BORROW, GEORGE HENRY (1803-1881). An English author; wrote *Romantic Ballads, The Zincali,* his most important work on the gypsies in Spain; *The Bible in Spain, Lavengro, Romany Rye,* and *Wild Wales.*

BOSCAN-ALMOGAVER, JUAN (about 1493-about 1542). A Spanish poet, tutor of the duke of Alva; experimented with sonnets, blank verse, and the octave stanza, in imitation of Italian measures, and thus founded a new school of Spanish poetry.

BOSWELL, JAMES (1740-1795). A Scotch biographer; the son of Lord Auchinleck; born in Edinburgh. In 1791 appeared his *Life of Johnson*. Macaulay styled Boswell "the first of biographers." His other works include *Account of Corsica* and *Journal of a Tour to the Hebrides*.

BOUCICAULT, DION (1822-1890). A dramatic writer; born in Dublin; author of popular Irish plays, as *The Colleen Bawn* and *The Shaughraun*. Among his later works are *The Streets of London, Flying Scud*, and *After Dark*. He collaborated with Charles Reade on *Foul Play*.

BOURGET, PAUL (1852-). A notable French essayist and novelist. His father was Russian and his mother, English. His many novels include: *Le disciple, Drames de famille, Nouveaux pastels*, and *L'Emigré*.

BOURINOT, SIR JOHN GEORGE (1837-1902). A Canadian historian; born in Sydney, Nova Scotia; wrote *Parliamentary Procedure and Practice, Manual of Constitutional History, Parliamentary Government of Canada, How Canada is Governed, Cape Breton and Its Memorials of the French Régime, Canada Under British Rule, Intellectual Development of the Canadian People*, and *Canada's Intellectual Strength and Weakness*.

BOWLES, CAROLINE ANNE (1787-1854). An English poetess, wife of Robert Southey; wrote *Chapters on Churchyards, The Young Gray Head*, and other poems. She was much praised by Christopher North, Coleridge, Professor Moir, and others.

BOWLES, SAMUEL (1826-1878). An American journalist; editor, for more than thirty years, of Springfield (Mass.) *Republican*, founded by his father. He wrote *Our New West* and *The Switzerland of America*.

BOWLES, WILLIAM LISLE (1762-1850). An English poet. His sonnets, by their "linking," as Professor Saintsbury has it, "of nature's aspect to human feeling," were much admired by Coleridge.

BOYD, ANDREW KENNEDY HUTCHINSON (1825-1899). A Scottish author and divine; gained great popularity as A. K. H. B., the writer of *Recreations of a Country Parson*, and other works.

BOYESEN, HJALMAR HJORTH (1848-1895). An Norwegian novelist; born at Frederiksvärn, Norway. His works include *Gunnar, Tales from Two Hemispheres, Falconberg, Ilka on the Hilltop*, and *A Daughter of the Philistines*. His critical essays include *Goethe and Schiller, Literary and Social Silhouettes, Essays on Scandinavian Literature*. His poems are *Idylls of Norway*.

BRADDON, MARY ELIZABETH (MRS. JOHN MAXWELL) (1837-1915). A popular novelist; born in London; authoress of *Lady Audley's Secret, Aurora Floyd*, and some 50 other novels.

BRADSTREET, ANNE (about 1612-1672). An American poet; born in England; a daughter of Governor Thomas Dudley; married the future Governor Bradstreet (1630), and became a voluminous writer.

BRADY, CYRUS TOWNSEND (1861-1920). An American author; born in Allegheny, Pa. His best work is *Recollections of a Missionary in the Great West*, and several works of fiction, including *For Love of Country* and *Woven with the Ships*.

BRANDES, GEORG MORRIS COHEN (1842-1927). A renowned Danish critic. His many works include *Danske Digtere, Mennesker og Værker i nyere Europæiske Literature*, and a valuable work on *Shakespeare*.

BRANTOME, PIERRE DE BOURDEILLES, SEIGNEUR DE (?1540-1614). French chronicler, whose *Memoirs* are valuable for their portrayal of the manners and personages of the period.

BREDEROO, GERBRAND ADRIAENSS (1585-1618). Dutch dramatist. His works include the farce *Kluchten*, the comedies *Moortje* and *Spaansche Brabander Jerolimo*, and a volume of poems, *Groot Liedboeck*.

BREMER, FREDRIKA (1801-1865). A Swedish novelist; born near Abo, Finland. She wrote *Sketches of Every Day Life, The H. Family, Homes in the New World, The Neighbors, The Four Sisters*, etc.

BRIDGES, ROBERT SEYMOUR (1844-). Poet laureate of England (1913-). His writings comprise lyrics, narrative poems, and plays. A complete edition of his works was published in 1913.

BROCKES, BARTHOLD HEINRICH (1680-1747). German poet; his chief work is *Irdisches Vernügen in Gott*.

BRODZINSKI, KAZIMIERZ (1791-1835). Polish poet. The idyll *Wieslaw* is his most important work.

BRONTE, ANNE (1820-1849). Sister of Charlotte; author of *Agnes Grey* and *Tenant of Wildfell Hall*.

BRONTE, CHARLOTTE (1816-1855). An English author; born at Thornton, Yorkshire; removed with her father, at the age of four, to Haworth, a moorland parish in the same county, where she lived most of her days; spent two years at Brussels as a student; on her return, in conjunction with her sisters, prepared and published a volume of poems under the pseudonyms respectively of "Currer Bell," "Ellis Bell," and "Acton Bell," which proved a failure. Nothing daunted, she set to novel writing and her success was instant; first *Jane Eyre*, then *Shirley*, and then *Villette*, appeared, and her fame was established. In 1854 she married her father's curate, Mr. Nicholls. [See Eng. Lit.].

BRONTE, EMILY (1818-1848). Sister of Charlotte; author of a novel, *Wuthering Heights*. Her poetry was highly praised by Matthew Arnold. [See Eng. Lit.].

BROOKE, STOPFORD AUGUSTUS (1832-1916). An English author; wrote *Life and Letters of Frederick W. Robertson, Theology in the English Poets, A Primer of English Literature, Sermons, Poems, Study of Tennyson, English Literature to the Norman Conquest*.

BROUGHAM, HENRY PETER, LORD BROUGHAM AND VAUX (1778-1868). A British statesman, orator, and author. In 1802 he helped to found the Edinburgh *Review*. The article on Byron's *Hours of Idleness* provoked the poet to write his *English Bards and Scotch Reviewers*. He left a memoir, *Life and Times*.

BROUGHTON, JOHN CAM HOBHOUSE, BARON (1786-1869). An English statesman and writer. He was a friend of Byron, and published in 1813 his *Journey Through Albania with Lord Byron*.

BROUGHTON, RHODA (1840-1920). A popular English novelist. Among her works are *Cometh Up as a Flower, Not Wisely but too Well, Red as a Rose is She, Nancy, Belinda, Doctor Cupid, Alas!*

BROWN, CHARLES BROCKDEN (1771-1810). An American novelist and editor; born in Philadelphia. His first novel, *Wieland, or the Transformation*, came out in 1798, followed by *Arthur Mervyn, Ormond, Edgar Huntley*, and *Clara Howard*. He was the first really professional American man of letters.

BROWN, JOHN (1810-1882). A Scotch physician and author; wrote the widely read *Rab and His Friends*.

BROWNE, CHARLES FARRAR, or "ARTEMUS WARD" (1834-1867). An American humorist; born at Waterford, Me. He delivered his first humorous lecture, *The Babes in the Wood*, in Brooklyn, and it was so successful that he abandoned journalism for the lecture platform. He published *Artemus Ward, His Book; Artemus Ward, His Travels*, and *Artemus Ward in London*.

BROWNE, FRANCIS FISHER (1843-1913). An American editor, poet, and critic; born at South Halifax, Vt. He wrote *Everyday Life of Abraham Lincoln*, and *Volunteer Grain*.

BROWNE, SIR THOMAS (1605-1682). An English philosopher and writer. He began life as a medical practitioner. His best works are the famous *Religio Medici* and the *Hydriotaphia or Urn-Burial*.

BROWNELL, WILLIAM CRARY (1851-1928). American writer; author of *French Traits, French Art, Victorian Prose Masters*.

BROWNING, ELIZABETH BARRETT (1806-1861). A distinguished English poetess, regarded by some as the greatest which England has ever produced; wrote *Sonnets from the Portuguese, Aurora Leigh, The Seraphim and Other Poems*. In 1846 she was married to Robert Browning.

BROWNING, ROBERT (1812-1889). One of the greatest of the Victorian poets; born in Camberwell, England. At the age of twenty he traveled on the continent and resided for some time in Italy. In 1846 he married Elizabeth Barrett, and settled with her in Florence, where they remained for nearly fifteen years. Recognition of his literary fame, which came slowly, was made in 1867, when he was elected an honorary fellow of Balliol, and an M.A. of Oxford. He died in Venice and was buried in Westminster Abbey between Cowley and Chaucer. [See Eng. Lit.]

BRUNETIERE, FERDINAND (1849-1906). The greatest systematic critic of contemporary French literature. His greatest work is his *Manuel de l'histoire de la littérature française*.

BRYANT, WILLIAM CULLEN (1794-1878). American poet and journalist; born in Massachusetts; entered Williams College, read law, admitted to the bar in 1815; published *Thanatopsis* in 1817; became editor of the New York *Evening Post* in 1828.

BRYCE, JAMES. (See Dictionary of Government). He wrote *The American Commonwealth*, which gives probably the best account ever written of the national institutions in relation to the history, the habits, and the character of the American people.

BUCHANAN, ROBERT WILLIAM (1841-1901). An English poet, dramatist, and novelist; wrote *Undertones, London Poems.* He wrote a number of novels, as *God and the Man* and *The Wandering Jew.*

BUCKLE, HENRY THOMAS (1821-1862). An English historian. The *History of Civilization*, the first volume of which appeared in 1857, made Buckle famous. He left his work unfinished.

BULFINCH, THOMAS (1796-1867). An American author; born at Boston, Mass. His *Age of Fable* is a perennial favorite and was revised (1881) by Edward Everett Hale. Bulfinch also published *Hebrew Lyrical History, The Age of Chivalry*, and *Oregon and the Eldorado.*

BULKELEY, PETER (1583-1659). American clergyman. His *Gospel Covenant* represents the "intellectual robustness of New England in the first age."

BULWER-LYTTON, EDWARD GEORGE EARLE, LORD LYTTON (1803-1873). An English novelist, playwright, and poet. Altogether his works exceed 60 in number, and fill 110 volumes. He wrote several plays which have long kept the stage: *The Lady of Lyons, Richelieu*, and *Money.* His first successful novel was *Pelham* (1828). It was followed by *Ernest Maltravers, Alice, Night and Morning, The Caxtons, My Novel, Kenelm Chillingly, Paul Clifford, Eugene Aram, Devereux, Last Days of Pompeii, Rienzi*, and *Leila.*

BUNNER, HENRY CUYLER (1855-1896). An American humorist and novelist; born in Oswego, N. Y. He wrote *Zadok Pine, Short Sixes, More Short Sixes, Love in Old Cloathes, Jersey Street and Jersey Lane*, and *The Midge.* His poems are collected in *Airs from Arcady.*

BUNYAN, JOHN (1628-1688). English author; the son of a tinker. He followed that vocation and led for many years a wandering life; served in the Parliamentary army; joined the Nonconformists in 1653, and in 1655 became a minister. He wrote *The Life and Death of Mr. Badman* and *Grace Abounding*, masterpieces of realistic literature; was imprisoned for more than twelve years, and during that time wrote his *Pilgrim's Progress*, his masterpiece.

BURGER, GOTTFRIED AUGUST (1747-1794). A German poet; born in Anhalt. His best ballad is *Lenore*, which was a potent influence in the revival of the ballad. Bürger also revived the sonnet in German.

BURKE, EDMUND (1729-1797). Irish orator, statesman, and writer. He wrote *Vindication of Natural Society, Essay on the Sublime and Beautiful, European Settlements in America, On the Cause of the Present Discontents, American Taxation, Conciliation with America*, and *Reflections on the Revolution in France.*

BURNETT, FRANCES ELIZA HODGSON (1849-1924). An Anglo-American novelist; born in Manchester, England; the wife of Stephen Townsend. Her chief work is *Little Lord Fauntleroy.* She wrote also *That Lass o' Lowrie's, Haworth's, A Fair Barbarian, Through One Administration*, and *The Making of a Marchioness.*

BURNS, ROBERT (1759-1796). Scotland's national poet; born in a clay-built cottage less than two miles south of the town of Ayr. *The Cottar's Saturday Night, To Mary in Heaven, Highland Mary, Scots Wha Hae Wi' Wallace Bled, The Jolly Beggars, Tam O' Shanter*, are among his best poems and typical of his style. [See Eng. Lit.].

BURROUGHS, JOHN (1837-1921). An American essayist and naturalist. His literary achievements are the outcome of his keen observation of nature and animal life. All his works bear the mark of his delightful originality.

BURTON, ROBERT (1577-1640). An English clergyman; author of the *Anatomy of Melancholy*, which he wrote to alleviate his own depression of mind, a book which is a perfect mosaic of quotations.

BUSTAMANTE, CARLOS MARIA DE (1774-1848). A Mexican historian; his works include *Cuadro historico de la revolición Mexicana*, published in eight volumes.

BUTLER, SAMUEL (1612-1680). An English satirist, author of *Hudibras*, the hero of which is Sir Samuel Luke, one of Butler's masters. It is a kind of metrical *Don Quixote* and ridicules the Puritans.

BUTLER, WILLIAM ALLEN (1825-1902). An American lawyer and satirical poet, son of Benjamin F. Butler. He is best known by his satire, *Nothing to Wear*, which was published anonymously in 1857.

BUTTERWORTH, HEZEKIAH (1839-1905). An American author, poet, and juvenile writer; born at Warren, R. I.; wrote *Zigzag Journeys* (1876-1890), *A Knight of Liberty, The Boyhood of Lincoln, The Wampum Belt*, and *In Old New England.*

BYLES, MATHER (1706-1788). An American poet, and distinguished pulpit orator. His published sermons were noteworthy, but his poems received an undue amount of praise from his contemporaries.

BYRON, GEORGE GORDON NOEL, LORD (1788-1824). English poet. In 1815 he married Anne Isabella Millbanke, but separated from her and left England in 1816. Espousing the cause of the Greeks in their struggle for liberty, he left for Greece in 1823, and died at Missolonghi from the effects of exposure while preparing for the siege of Lepanto. [See Eng. Lit.].

CABALLERO, FERNAN (1797-1877). A Spanish novelist whose real name was Cecilia Bohl von Faber. Her first success in a literary line was *La Gaviota.* She was the first to publish a collection of Spanish popular tales.

CABLE, GEORGE WASHINGTON (1844-1925). An American novelist; born in New Orleans, La. His sketches of creole life in *Scribner's Monthly* proved so successful that in 1879 he turned his entire attention to literature. He has written *Creole Days, Strange True Stories of Louisiana, The Cavalier, The Grandissimes, Madame Delphine, Dr. Sevier, Bonaventure*, and *John March, Southerner.* His work is original and unique, and much appreciated. Since 1886 he has lived in Northampton, Mass.

CAEDMON (*kad'mon*) (flourished 670). An English poet. The fragment of a hymn, or *Paraphrase*, written by him and preserved by Bede, is the oldest specimen of English poetry extant.

CAESAR, GAIUS JULIUS. (See Dictionary of Government). Most of Caesar's writings have been lost, though we have his invaluable *Commentaries.* This was first printed at Rome in 1449. He has never been surpassed as a historian; his style is simple and vigorous. The value of his works is enhanced by the truthfulness of the accounts of the events which he records, of many of which he was an eyewitness.

CAINE, THOMAS HENRY HALL (1853-). An English novelist and dramatist; born in Runcorn, Cheshire, England. His novels, which are striking in their pictures of human motives and passions, are read throughout the world; wrote *The Manxman, The Christian, The Shadow of a Crime, The Deemster, The Bondman, The Scapegoat*, and *The Eternal City.*

CALDERON DE LA BARCA (1600-1681). The great Spanish dramatist; born at Madrid; entered the army and served in Italy and Flanders, producing the while dramas which were received with great enthusiasm; took holy orders, and became a canon of Toledo. There survive 120 regular plays and 80 *autos* or religious plays. Of the former the best known are *El alcalde de Zalamea, El principe constante, La dama duende* (The Fairy Lady), and *El mayor monstruo los zelos* (No Monster Like Jealousy). [See Sp. Lit.].

CALDERON, SERAFIN ESTEBANEZ (1801-1867). Spanish writer, author of *Escenas andaluzas*, sketches of Andalusian life; *El solitario* (poems), and the novel, *Cristianos y Moriscos.*

CALLIMACHUS (about 310-240 B. C.). A Greek poet and grammarian of the Alexandrine school. He taught Eratosthenes, Aristophanes, and other leading Greek scholars. He left behind over 800 books. The most important are *The Tablets*, in 120 books; four books of *Causes; Berenice's Lock*, an elegy, and an idyllic poem, *Hecate.*

CALLISTHENES (about 360-328 B. C.). A Greek historian; born in Olynthus. He wrote several historical works, of which only fragments have survived.

CALLISTRATUS (flourished 375 B. C.). The greatest Athenian orator of his day; born at Aphidnae. His oration on the cause of Oropus made a great impression on Demosthenes, who heard it when a boy.

CALVERLEY, CHARLES STUART (1831-1884). An English writer of humorous verse, hymns, and *vers de société*; parodied and wrote examination papers on *Pickwick Papers*; wrote *Verses and Translations, Translations into English and Latin* (especially felicitous), *Theocritus in English Verse*, and *Fly Leaves.*

CAMDEN, WILLIAM (1551-1623). An English historian and antiquarian; born in London and known

as the "British Pausanias." His famous work is *Britannia*, an account of the British Isles from the earliest ages, written in elegant Latin and published in 1586. He wrote also *Annals of the Reign of Elizabeth*, *A Collection of Ancient English Historians, Monuments and Inscriptions of Westminster Abbey*, and *A Narrative of the Gunpowder Plot*.

CAMOENS, LUIZ DE (1524-1580). The greatest poet of Portugal; born at Lisbon; studied at Coimbra; fell in love with a lady of high rank in Lisbon, and she with him, but they were not allowed to marry; left Lisbon, joined the army, and fought against the Moors; volunteered service in India, arrived at Goa, and got into trouble with the Portuguese authorities; went to Macao, and consoled himself by writing his *Lusiad*; coming home he lost everything but his poem; died neglected and in poverty. It is the Portuguese national epic, called, not inaptly, the *Epos of Commerce*. [See Port. Lit.]

CAMPBELL, THOMAS (1777-1844). A Scotch poet; was interred at Poets' Corner, in Westminster Abbey, close to the tomb of Addison. Some of his poems have gained a permanent place in literature, as *The Battle of the Baltic*, *Hohenlinden*, *Ye Mariners of England*, *The Exile of Erin*, and *Lochiel's Warning*. His longer works are *The Pleasures of Hope* and *Gertrude of Wyoming*.

CAMPBELL, WILLIAM WILFRED (1861-1918). Canadian lyric and dramatic poet. Author of *Beyond the Hills of Dreams*, *Lake Lyrics*, and *Mordred and Hildebrand Tragedies*.

CAMPOAMOR Y CAMPOOSORIO, RAMON DE (1817-1901). Spanish politician, philosopher, and author; most popular and perhaps the greatest of modern Spanish poets. [See Span. Lit.]

CANTU, CESARE (1804-1895). An Italian historian and novelist. During imprisonment he wrote his popular romance, *Margherita Pusterla*. His greatest works are *Storia universale*, in 35 volumes; *History of the Italians*, *History of Italian Literature*, *Independence of Italy*, and *Milan, A History of the People for the People*.

CAPUANA, LUIGI (1839-1918). Italian novelist and critic. A "realist," his best known novel is *Giacinta*.

CARDUCCI, GIOSUE (1836-1907). An Italian poet. His chief works are *Juvenilia*, *Levia gravia*, *I Decennali*, *Odi barbare*, *Nuove odi barbare*, and *Terze odi barbare*. His prose works of remarkable critical value are *Studi letterarii* and *Bozetti critici*.

CARLETON, WILL (1845-1912). An American poet; born in Hudson, Mich. His *Poems* appeared in 1871 and were followed by *Farm Ballads*, *Farm Legends*, *Young Folks' Centennial Rhymes*, *City Ballads*, *City Festivals*, *Rhymes of Our Planet*.

CARLYLE, THOMAS (1795-1881). A Scottish author; born in Ecclefechan, Dumfriesshire, Scotland. He was the eldest son of James Carlyle, a mason, afterward a farmer, and was intended for the Church, with which object he was carefully educated. His first literary productions were short biographies and other articles for the *Edinburgh Encyclopaedia*. His career as an author may be said to have begun with the issue in monthly portions of his *Life of Schiller* in the *London Magazine* in 1823, this work being enlarged and published separately in 1825. The largest and most laborious work of his life was *The History of Frederick II. of Prussia, called Frederick the Great*, the last two volumes of which appeared in 1865, and after this time little came from his pen. *Sartor Resartus*, *French Revolution, Past and Present*, and *Heroes and Hero-worship* are among his best known works. [See Eng. Lit.]

CARMAN (WILLIAM) BLISS (1861-). A Canadian poet and author; born at Fredericton, N. B.; wrote *Low Tide on Grand Pré*, *Songs from Vagabondia*, *Behind the Arras*, *A Sea Mark*, *Ballads of Lost Haven*, *By the Aurelian Wall*, *More Songs from Vagabondia*, *Last Songs from Vagabondia*, and *The Kinship of Nature*. The *Vagabondia* series were written in collaboration with Richard Hovey. [See Can. Lit.]

CARPIO, MANUEL (1791-1860). Mexican physician, politician, and poet. His collected poems have gone through several editions.

CARY, ALICE (1820-1871). An American poet; born near Cincinnati, Ohio. Her works include *The Clovernook Papers*, *Married not Mated*, *Pictures of Country Life*, and *The Bishop's Son*.

CARY, HENRY FRANCIS (1772-1844). An English clergyman and writer; noted for his famous *Translation of Dante*, *Pindar's Odes*, *Birds of Aristophanes*.

CARY, PHOEBE (1824-1871). An American poet and prose writer, sister of Alice; born in Cincinnati, Ohio. These two poets worked together and published *Poems of Alice and Phoebe Cary* in 1850. Phoebe published *Poems and Parodies* and numerous hymns.

CASGRAIN, HENRI RAYMOND (1831-1904). Canadian historian. His works include *Légendes canadiennes*, *Biographies canadiennes*, *L'histoire de la Marie de l'Incarnation*.

CASTELAR, EMILIO (1832-1899). A Spanish republican leader, orator, and writer; born in Cadiz; wrote *La cuestion del oriente*, *Historia del descubrimiento de America*, and *La politique européenne*.

CASTIGLIONE, BALDASSARE, COUNT (1478-1529). Italian statesman and author, noted for his many talents and wide knowledge. His chief work is the famous *Libro del cortegiano*, written in 1528, which Dr. Johnson pronounced "the best book that was ever written upon good breeding." It is in four parts, forming a series of imaginary dialogues between distinguished men and noble ladies, upon varied subjects. It was one of the most popular books of the period in Italy. In his *Lettere* he gives many interesting contributions to the literature and history of the period.

CASTLE, EGERTON (1858-). An English novelist. His novels include *Consequences*, *The Light of Scarthey*, *The Pride of Jennico*, *The Bath Comedy*, and *Young April*. He wrote plays for Irving and Mansfield.

CATHERWOOD, MARY HARTWELL (1847-1902). An American novelist; born at Luray, Ohio. Among her works are *Craque o' Doom*, *The Romance of Dollard*, *The Story of Tonty*, *The Lady of Fort St. John*, *Old Kaskaskia*, *Lazarre*, *The Days of Jeanne D'Arc*, and *The White Islander*.

CATLIN, GEORGE (1796-1872). An American traveler, artist, and author; born at Wilkesbarre, Pa. He published *The Manners, Customs, and Conditions of the North American Indians*, *The North American Portfolio of Hunting Scenes*, *Eight Years' Travel and Residence in Europe*, *The Breath of Life*, and *Rambles Among the Rocky Mountains and the Andes*.

CATS, JAKOB (1577-1660). A Dutch poet. He wrote *Maiden Duty*, *Inward Strife*, *Manly Respectability*, *Marriage*, *Fidelity*, *Betrothal Ring*, *Age and Country Life*. [See Dutch Lit.]

CAVALCANTI, GUIDO (about 1250-1300). Florentine lyric poet. The canzone on the *Essence of Love* is his most famous poem.

CAVALLOTTI, FELICE (1824-1898). Italian writer and politician. Bitterly attacked Germany in *Germania e Italia*. Author of lyrics and dramas.

CAVENDISH, GEORGE (1500-about 1561). An English author, the biographer of Cardinal Wolsey. He entered Wolsey's service and remained his constant friend. The *Life of Wolsey* was written in 1557 and published 1641.

CAWEIN, MADISON JULIUS (1865-1914). An American poet; born in Louisville, Ky. His poems include *Blooms of the Berry*, *The Triumph of Music*, *Lyrics and Idyls*, *Days and Dreams*, *Moods and Memories*, *Undertones*, and *One Day and Another*.

CAXTON, WILLIAM (1422-1491). An English printer and scholar. His *Recuyell* (collection) *of the Historyes of Troye*, translated by him from the French, appears to have been printed in 1474, most probably at Bruges in Belgium. It was the first book printed in the English tongue. He set up a printing office in Westminster (1477). He is known to have printed 99 books, of which 38 survive. [See Eng. Lit.]

CERVANTES SAAVEDRA, MIGUEL DE (1547-1616). Author of *Don Quixote* and one of the greatest writers of modern times; born in Alcalá de Henares. Two of his plays survive—*Life in Algiers* and *Numantia*, the first worthless, the second the admiration of such authors as Goethe. He wrote also *Exemplary Tales* and *Voyage to Parnassus*. [See Sp. Lit.]

CHAMBERS, ROBERT WILLIAM (1865-). An American author; became first an illustrator; since 1903 devoted time to literature; *The King in Yellow*, *Ashes of Empire*, *The Conspirators*, *The Fighting Chance*, *The Firing Line*, etc., besides two plays.

CHAMFORT, SEBASTIEN ROCH NICOLAS (1741-1794). French epigrammatist. His aphorisms, *Maximes et pensées*, are keen and incisive.

CHAMISSO, ADELBERT VON (1781-1838). A German poet and scientist; born in France. His most noteworthy prose work is *Peter Schlemil*. Among his poems are the *Lion's Bride* and *Cousin Anselmo*.

CHAPMAN, GEORGE (about 1559-1634). An English poet and dramatist. Among his plays are *The Blind Beggar of Alexandria, All Fools, Eastward Ho! The Widow's Tears,* and *Caesar and Pompey.* He was the first translator of *Homer* into English verse.

CHARTIER, ALAIN (about 1390-about 1440). French poet and diplomatist. Author of patriotic and love poems, the political work *Le Quadriloge Invectif,* and *Bréviarie des Nobles.*

CHATEAUBRIAND (*shah-to-bre-on'*), **FRANCOIS RENE AUGUSTE, VICOMTE DE** (1768-1848). A French author; born in St. Malo, Brittany. His style did much to mold French literature; wrote *René, Atala, Les Natchez, Les aventures du dernier des Abencérages,* and translated Milton's *Paradise Lost.* His *René* and *Atala* mark the beginning of the Romantic School of French literature. [See Fr. Lit.].

CHATTERTON, THOMAS (1752-1770). An English poet. During his short career he indulged a mania for forging old manuscripts, which deceived for a time even Walpole himself. He wrote the "Rowley poems" in the name of one Thomas Rowley, a mythical monk of the fifteenth century. The "Rowley poems" were collected after Chatterton's death by T. Tyrwhitt in 1777 and published.

CHAUCER, GEOFFREY (1340-1400). "The father of English poetry"; born in London. His most celebrated work, *The Canterbury Tales,* was written at different periods between 1373 and 1400. It consists of a series of tales in verse, supposed to be told at the Tabard Inn by a company of pilgrims to the shrine of St. Thomas à Becket at Canterbury in 1386. In its pages we get such pictures of English life and English ways of thought in the fourteenth century as are found nowhere else. He wrote several minor poems, the *Complaint to Pity, Complaint to His Purse,* translation of *The Romance of the Rose.* He invented the seven line stanza and the heroic couplet extensively used by Dryden, Pope, and many others. He was buried in Westminster Abbey. [See Eng. Lit.].

CHENEY, JOHN VANCE (1848-1922). An American librarian and poet; born at Groveland, N. Y. His chief poetical works are *Thistle-Drift, Queen Helen and Other Poems, Out of the Silence,* and *For Thinking Hearts.*

CHENIER (*sha-nya'*), **ANDRE MARIE DE** (1762-1794). A French poet. His mother was a Greek and Chenier displayed remarkable aptitude for adapting Greek poems to French ideals. In 1791 he wrote the *Jeu de Paume,* a superb Pindaric ode on the meeting of the Third Estate. While waiting execution in Saint-Lazare prison he wrote his most famous poems, a denunciation of the Convention and the exquisite *Jeune Captive,* dedicated to his fellow prisoner, afterwards the countess of Fleury.

CHERBULIEZ, CHARLES VICTOR (1829-1899). A French novelist. His first successful novel was *Le comte Kostia.* The best of an immense number are *Prosper Randoce, Ladislas Bolski, Miss Rovel, Meta Holdenis,* and *Samuel Brohl et Cie.*

CHESTERFIELD, PHILIP DORMER STANHOPE, EARL OF (1694-1773). Statesman, orator, and man of letters; born in London; celebrated for his *Letters to his Son.*

CHILD, LYDIA MARIA FRANCIS (1802-1880). An American author; born at Medford, Mass. Her works include the novels *Hobomok, The Rebels, Philothea,* probably her best work.

CHITTY, JOSEPH (1776-1841). An English lawyer and legal writer. His celebrity rests mainly upon his legal works, which include *Treatise on Parties to Actions and to Pleadings, Treatise on Criminal Law, Synopsis of Practice, Treatise on Bills of Exchange and Promissory Notes,* and *Treatise on the Law of Nations.*

CHURCHILL, WINSTON (1871-). An American author; born in St. Louis, Mo. He wrote *Richard Carvel, The Crisis, The Crossing,* and *Coniston.*

CHURCHILL, WINSTON LEONARD SPENCER (1874-). An English author, son of Lord Randolph Churchill; wrote *The Story of the Malakand Field Force, The River War, Savrola, London to Ladysmith via Pretoria,* and *Ian Hamilton's March.*

CIBBER, COLLEY (1671-1757). English actor, dramatist, and poet laureate. His entertaining autobiography is entitled *Apology.*

CICERO, MARCUS TULLIUS (106-43 B. C.). A Roman orator; born in Arpinum. He was one of the greatest orators the world has known. He was executed at the instance of the Triumvirate—Octavianus, Antony, and Lepidus. His works include *De Oratore, De Republica, De Legibus, De Senectute, De Amicitia, De Officiis, De Natura Deorum,* and there remain to us 57 orations, of which the most famous are the four against Catiline, 14 Philippics against Antony, those on behalf of Archias, L. Murena, and Marcus Caelius.

CLARETIE, JULES (properly **ARSENE ARNAUD**) (1840-1913). A French author who became famous as a dramatist and dramatic critic. He is best known for his novels and historical works. Among the former are *L'Assassin Les Muscadins,* and *Le Prince Zilah,* both of which established his reputation; in the drama *Monsieur le Minister, Puyjoli, L'Accusateur,* and others. In 1888 he was elected to the French Academy.

CLARKE, CHARLES COWDEN (1787-1877). An English author; wrote *Tales from Chaucer, Shakespeare Characters, Molière Characters, Recollections of Writers.*

CLARKE, MacDONALD (1798-1842). An American poet; born in Bath, Me. From his eccentricities he was known as the "Mad Poet." Best known by his expression, "Now Twilight lets her curtain down, and pins it with a star." Among his works are *A Review of the Eve of Eternity, The Elixir of Moonshine by the Mad Poet,* and *A Cross and a Coronet.*

CLAUDIANUS, CLAUDIUS (flourished 400). A Latin poet; born in Alexandria; went to Rome (395). We have two of his epics, *The Rape of Proserpina* and *The Battle of the Giants,* besides some fragments.

CLAUDIUS, MATTHIAS (1740-1815). German poet and author. His collected works are published under the title *Asmus Omnia Sua Secum Portans.*

CLEMENCEAU, GEORGES BENJAMIN EUGENE (1841-). A French politician and writer. Losing his seat in the Chamber of Deputies (1892) through the Panama disclosures, for the next ten years he devoted himself to literature; wrote for and edited his radical journal, *La Justice;* published *Les massacres d'Arménie;* a series of articles in favor of Dreyfus; several works of fiction and essays.

CLEMENS, SAMUEL LANGHORNE, or **"MARK TWAIN"** (1835-1910). An American humorist; born in Florida, Mo.; his first book, *The Jumping Frog;* visit to Europe described in *Innocents Abroad; Roughing It;* wrote *Huckleberry Finn, Tom Sawyer, Tramp Abroad;* with Warner produced a drama entitled *The Gilded Age;* wrote *The Stolen White Elephant, The Prince and Pauper, A Connecticut Yankee at King Arthur's Court, The American Claimant, The* £1,000,000 *Bank Note, The Tragedy of Pudd'nhead Wilson, Tom Sawyer Abroad, Personal Recollections of Joan of Arc, More Tramps Abroad, Following the Equator, The Man that Corrupted Hadleyburg, A Double-Barreled Detective Story, Adam's Diary,* and *Christian Science;* compiled the *Memoirs of General Grant.*

CLOUGH (*kluf*), **ARTHUR HUGH** (1819-1861). A lyric poet; born at Liverpool; educated at Rugby under Dr. Arnold. He wrote *Dypsicus,* the *Bothie of Toberna-Vuolich,* and *Amours de Voyage,* besides shorter poems. Matthew Arnold wrote his famous elegy, *Thyrsis,* to commemorate Clough.

COBBETT, WILLIAM (1762-1835). An English political writer; spent some time in the United States; taught English to French emigrants, one of whom was Talleyrand. His best known works are *Grammar of the English Language, Rural Rides, Cottage Economy, Advice to Young Men and Women, History of the Protestant Reformation,* and *Life and Adventures of Peter Porcupine,* which is an autobiography.

COFFIN, CHARLES CARLETON (1823-1896). An American war correspondent, novelist, and juvenile writer. His works include *Days and Nights on the Battlefield, Following the Flag, Boys of '76, Story of Liberty, Old Times in the Colonies, Life of Garfield,* and *Daughters of the Revolution.*

COLERIDGE, HARTLEY (1796-1849). English poet, biographer, and essayist; son of S. T. Coleridge; best known by his verse, particularly his sonnets, which are among the finest examples in English. Such are "Whither," "To Shakespeare," "Prayer," "May, 1840," "Regrets," and "Ideality." His longest literary work was an edition of Massinger and Ford's dramas. He wrote their biographies and a series of lives of the *Worthies of Yorkshire and Lancashire.*

COLERIDGE, SAMUEL TAYLOR (1772-1834). English poet, philosopher, and critic; educated at Christ's Hospital; had Charles Lamb for schoolmate; at Cambridge devoted himself to classics; falling into debt, enlisted as a soldier, but after four months his friends procured his discharge; married and lived near

Wordsworth, in Somersetshire, where he produced the *Ancient Mariner, Remorse,* and the first part of *Christabel;* took to opium, about 1808; broke off the habit in 1816, and went to stay with the Gillmans at Highgate as their guest, under whose roof, after four years' confinement to a sick-room, he died. Among his other works were *The Friend,* his *Biographia Literaria, Aids to Reflection, Confessions of an Inquiring Spirit, Literary Remains, Table Talk,* and *Kubla Khan,* which Swinburne calls "for absolute melody and splendor the first poem in the language." [See Eng. Lit.].

COLLETT, JAKOBINE CAMILLA (1813-1895). Norwegian author. The "emancipation of woman" is the underlying principle of her work. Her best novel is *The Magistrate's Daughters.*

COLLINS, WILLIAM (1721-1759). An English poet. His most popular ode is *The Passions.* Among his other poems are *To Liberty, To Mercy, To Evening, How Sleep the Brave Who Sink to Rest,* and *Song from Cymbeline.*

COLLINS, WILLIAM WILKIE (1824-1889). English novelist. His many novels include *No Name, Armadale, Man and Wife, The New Magdalen, The Law and the Lady, The Legacy of Cain,* and his two masterpieces *The Woman in White* and *The Moonstone.*

COLONNA, VITTORIA (1490-1547). An Italian poet; born near Rome; noted for her friendship for Michelangelo, whom she addresses as "Magnificent master."

COMINES, PHILIPPE DE (1445-1509). French statesman and historian. His *Mémoires* deal with the political history of his time, and strongly portray the character of Louis XI.

CONDORCET (*kon-dor-say'*), **MARIE JEAN ANTOINE NICOLAS CARITAT, MARQUIS DE** (1743-1794). A French mathematician and philosopher. His best known work is his *Esquisse d'un tableau historique des progrès de l'esprit humain.*

CONGREVE, WILLIAM (1670-1729). English comic dramatist; born near Leeds. *The Old Bachelor* first brought him into repute. The production of *Love for Love* and the *Mourning Bride,* a stilted tragedy, added immensely to his popularity, but his comedy, *The Way of the World,* being coldly received, he gave up writing plays, and wrote only a few verses afterwards. The oft quoted "Music hath charms to soothe the savage breast" occurs in the *Mourning Bride.*

CONSTANT DE REBECQUE, HENRI BENJAMIN (1767-1830). A French politician and novelist. His novel *Adolphe* is based on his friendship with Madame de Staël. Among his other works are *Mémoires sur les Cent Jours* and *De la religion.*

COOK, ELIZA (1818-1889). An English poet; born in London. She wrote *Lays of a Wild Harp, Melaia and Other Poems, Jottings from My Journal, New Echoes and Other Poems, God Speed the Plough, The Old Armchair,* and *The Star of Glengarry.*

COOK, JOSEPH (1838-1901). An American lecturer and author; born in Ticonderoga, N. Y. He published *Monday Lectures, The Higher Levels of Arbitration,* and *New Defences of the Lord's Day.*

COOKE, ROSE TERRY (1827-1892). An American poet and short story writer of New England life; born at West Hartford, Conn. She wrote *Steadfast, Happy Dodd, Somebody's Neighbors, The Sphinx's Children, Huckleberries,* and *Poems.*

COOPER, JAMES FENIMORE (1789-1851). An American novelist; born in Burlington, N. J. His novels achieved wide popularity; showed him an expert in the narration of events, the description of scenes, as well as in the delineation of character. His well known "Leather Stocking Series" of Indian tales have been translated into every European language. He also wrote *Wing and Wing, Red Rover, The Spy, The Pilot, The Last of the Mohicans, History of the Navy of the United States, Pathfinder, Deerslayer, Satanstoe, The Chainbearer,* and many others.

COPPEE, FRANCOIS EDOUARD JOACHIM (1842-1908). A French poet, dramatist, and novelist. He achieved some reputation among the younger poets, known as "Parnassiens," as early as 1866 by the publication of three volumes of verses: *Le reliquaire, Les intimités,* and *Poèmes modernes. Les humbles* first gave him popularity. Then followed *Le cahier rouge, Olivier, Une idylle pendant le siège, L'exilée, Les mois, Le naufragé.* The best of his dramas are *Le luthier de Crémone* and *Pour la couronne.* The best of his prose tales are *Fille de tristesse, Henriette, Madame Nunu,* and *Le coucher du soleil.*

CORDOVA Y FIGUEROA, PEDRO DE (1692-about 1770). Chilean historian, whose authoritative history of Chile from the conquest until 1717 has been published in the *Colección de historiadores de Chile.*

COREL'LI, MARIE (1864-1924). An English author; born in Italy; was adopted by Dr. Charles Mackay, the author. Among her works are *The Romance of Two Worlds, The Sorrows of Satan, Ziska, Jane, Thelma, The Master Christian, The Mighty Atom, The Boy,* and *Temporal Power.*

CORNEILLE (*kor-na'y'*), **PIERRE** (1606-1684). One of the greatest of French tragic poets; born at Rouen; was bred for the bar, but gave it up for literature; threw himself at once into the drama; began by dramatizing an incident in his own life, and became the greatest dramatic author of France. His best tragedies are *The Cid,* which indeed is his masterpiece; *Horace, Cinna, Polyeucte, Rodogune,* and *Le Menteur.* [See Fr. Lit.].

COWLEY, ABRAHAM (1618-1667). An English poet and essayist. His poetical inspiration came, he says, from reading Spenser's *Faerie Queene.* His collected works were published by him in 1656 and included *Elegies* on Harvey and Cranshaw, *Pindaric Odes, The Mistress,* and the *Davideis.* Dr. Johnson calls him a "metaphysical poet."

COWPER, WILLIAM (1731-1800). An English poet. His greatest poem is *The Task,* the subject for which was suggested to him by Lady Austen, who also told him the history of *John Gilpin.* He translated Homer (1784-1791). His friendship for Mrs. Unwin—the Mary of his poetry—caused the suggestion of *The Progress of Error, Truth, Table Talk,* and *Expostulation.* [See Eng. Lit.].

CRABBE, GEORGE (1754-1832). An English poet; born in Aldborough, Suffolk. Under Burke's patronage he wrote his best-known poem, *The Village.* Other poems are *The Newspaper, The Parish Register, The Borough, Tales in Verse,* and *Tales of the Hall.*

CRAIK, DINAH MARIA MULOCK (1826-1887). An English author. In 1865 she married George Lillie Craik, a partner in the publishing house of Macmillan and Company; wrote *John Halifax, Gentleman; Olive, Alice Learmount, Agatha's Husband, Christian's Mistake,* and *Poems of Thirty Years.*

CRANE, STEPHEN (1870-1900). An American novelist; wrote *Maggie, A Girl of the Streets; The Black Riders and Other Lines, The Red Badge of Courage, George's Mother, The Little Regiment, The Open Boat, On Active Service, Whilomville Stories,* and *The Master. Wounds in the Rain* and *Great Battles of the World* were published after his death.

CRASHAW, RICHARD (about 1613-1649). English religious poet; author of *Epigrammatum Sacrorum Liber* and *Steps to the Temple.*

CRAWFORD, FRANCIS MARION (1854-1909). An American novelist; born in Italy; during 1879-1880 was engaged in press work at Allahabad, India; wrote the National Ode at the Centennial of the American Constitution (September 17, 1887). His works, which are numerous, are chiefly novels and include *Mr. Isaacs, Dr. Claudius, A Roman Singer, Zoroaster, A Tale of a Lonely Parish, Saracinesca, Paul Patoff, Greifenstein, Sant' Ilario, A Cigarette-Maker's Romance, The Witch of Prague, Don Orsino, Pietro Ghisleri, The Ralstons, Casa Braccio, Corleone, Via Crucis,* and *In the Palace of the King.*

CRAWFORD, ISABELLA VALANCY (1851-1887). Canadian poet. Most of her works are contained in *Old Spookses' Pass, Malcolm's Katie,* and *Other Poems.*

CREASY, SIR EDWARD SHEPHERD (1812-1878). Chief justice of Ceylon; author of *The Fifteen Decisive Battles of the World, Imperial and Colonial Constitutions of the British Empire, History of the Ottoman Turks,* and *Historical and Critical Account of the Several Invasions of England.*

CREBILLON, PROSPER JOLYOT DE (1674-1762). French tragic poet. Won public notice by *Idoménée,* but his best work is *Rhadamiste et Zénobie.*

CREIGHTON, MANDELL (1843-1901). English prelate and historian; Bishop of London (1897-1901). Besides his excellent *History of the Papacy,* his *Cardinal Wolsey* and *Age of Elizabeth* are worthy of special note.

CREVECOEUR, JEAN HECTOR ST. JOHN DE (1731-1813). French agriculturist, traveler and author, much of whose life was spent in America. His *Letters of an American Farmer* influenced immigration to this country.

CRITIAS (? -403 B. C.). An Athenian orator and poet; pupil of Socrates and of Gorgias; wrote tragic and elegiac poetry, historical prose, and orations.

CROCKETT, SAMUEL RUTHERFORD (1860-1914). A Scotch novelist. His works include *The Stickit Minister, The Raiders, The Lilac Sunbonnet, Lad's Love, The Standard Bearer, The Black Douglas, Kit Kennedy, Joan of the Sword Hand, The Dark o' the Moon,* and *The Banner of Blue.*

CROLY, JANE CUNNINGHAM, or **"JENNIE JUNE"** (1831-1901). An American author and journalist; born in England. Among her works are *For Better or Worse, Jennie Juniana, Thrown on Her Own Resources, Cookery Book for Young Housekeepers,* and *History of the Woman's Club Movement in America.*

CROZIER, JEAN BEATTIE (1849-1921). English writer on philosophy and history; born in Canada. Noted particularly for his *History of Intellectual Development.*

CUNNINGHAM, ALLAN (1784-1842). A Scottish poet and miscellaneous writer. Among his numerous works are *Songs of Scotland, Ancient and Modern; Traditional Tales of the English and Scottish Peasantry,* etc. He was the author of the old sea song, *A Wet Sheet and a Flowing Sea.*

CURTIN, JEREMIAH (1840-1907). An American linguist and translator. He translated the works of Sienkiewicz, Zagoskin, and Tolstoy, and wrote many books on folklore and mythology. He was more or less familiar with more than sixty languages.

CURTIS, GEORGE WILLIAM (1824-1892). An American author; born in Providence, R. I.; for many years the editor of *Harper's Weekly,* and the writer of the "Editor's Easy Chair" in *Harper's Monthly,* besides *Prue and I, Trumps, Potiphar Papers,* and *Eulogy on Wendell Phillips.* Charles Eliot Norton edited his *Orations and Addresses.*

CYNEWULF or **CYNWULF** (about 750-about 825). A writer of some of the best Old English or Anglo-Saxon verse: *Juliana,* on the martyrdom of St. Juliana; *Elene,* on the discovery of the true cross by Empress Helena; *Christ, Fates of the Apostles, Andreas or the Legend of St. Andrew.*

DA COSTA, ISAAC (1798-1860). A Dutch poet and Protestant theologian; after the death of Bilderdijk was chief poet of Holland; wrote *Prometheus, Poems, Festive Songs, Hagar, The Battle of Nieuwpoort;* translated Byron's *Cain* and two theological works: *Gospel Harmony* and *Israel and the Gentiles.*

DAHLGREN, FREDRIK AUGUST (1816-1895). A Swedish poet and dramatist; born in Nordmark. He has written many dialect songs and ballads. He has translated a great many dramas from foreign languages, and has written a history of the Swedish stage.

DALIN, OLOF VON (1708-1763). A Swedish poet and historian; "father of modern Swedish poetry"; born in Vinberga, in Holland. His time is known as the "age of Dalin"; published *Thoughts about Criticism;* a comedy, *The Jealous Man;* a tragedy, *Brunhild; The Story of the Horse* and *April Work of Our Glorious Time,* satires on Swedish history and politics, and a *History of Sweden.*

DANA, CHARLES ANDERSON (1819-1897). American journalist; born in Hinsdale, N. H. Among his works are *The Art of Newspaper Making, Lincoln and His Cabinet,* and *Recollections.*

DANA, RICHARD HENRY (1787-1879). An American poet, novelist, and critic, born in Cambridge, Mass.; editor of the *North American Review;* author of the *Dying Raven, The Buccaneer,* and other poems.

DANA, RICHARD HENRY (1815-1882). An American author; born at Cambridge, Mass.; son of Richard Henry Dana, the poet; wrote *Two Years Before the Mast, The Seaman's Friend, To Cuba and Back;* contributor to legal journals and to the *North American Review;* edited *Wheaton's International Law.*

D'ANNUNZIO, GABRIELE (1864-). An Italian poet, novelist, and dramatist. Among his best efforts is an exquisite epic, *La Canzone di Garibaldi* (1901), the drama *Francesca da Rimini* (1902), and the work *La Vergine delle Rocce* (1895).

DAN'TE (a contraction of Durante), **ALIGHIERI** (1265-1321). Greatest Italian poet and one of the greatest of all time; born in Florence. He is famous as the author of the *Divina Commedia,* containing awful word pictures of hell. The *Vita Nuova* contains in mingled poetry and prose the story of his love for Beatrice. In the struggle between the Guelphs and Ghibellines, Dante allied himself with the latter and was banished in 1302 and spent the remaining years in Ravenna. [See Ital. Lit.].

D'ARBLAY, FRANCES BURNEY (1752-1840). An English novelist; wrote *Evelina* (1778), the best novel since *Clarissa Harlowe.* There followed *Cecilia, Camilla,* and *The Wanderer,* which in no way compare with *Evelina.*

DASS, PETER (1647-1708). A Norwegian poet. His most famous poem is *The Northland's Trumpet. Valley Song* and *Spiritual Pastime* are noteworthy.

DAUDET (*do-day'*), **ALPHONSE** (1840-1897). A noted French novelist. He has been likened to Dickens in his choice of subjects and style of treatment. His greatest novels are *Numa Roumestan, Le nabab,* and the immortal *Tartarin de Tarascon,* with its sequels, *Tartarin sur les Alpes* and *Port Tarascon.* Among his other works are *Les prunes, Lettres de mon moulin, Contes du lundi, Le petit chose, La dernière classe, Le siège de Berlin, Le jeu au billard, Le bac, Fromont jeune et Risler aîne* or *Sidonie, Jack, Sapho,* and *Souvenirs d'un homme de lettres.*

DAVENANT, SIR WILLIAM (1606-1668). An English poet and playwright. On the death of Ben Jonson, Davenant was appointed poet laureate (1637). He staged his own plays, introduced opera, and initiated the presentation of female parts by women (1656). The best of his dramas is *The Siege of Rhodes,* and his epic, *Gondibert,* was much praised.

DAVID, AP GWILYM (about 1300-1370). The greatest of medieval Welsh poets. Two hundred and sixty-two of his poems were published (1789) and others were recently discovered in the British Museum. He was commonly called the "Cambrian Petrarch" on account of 147 poems addressed to a sweetheart.

DAVIS, REBECCA HARDING (1831-1910). A popular American short-story writer and novelist. Her best short story is *Life in the Iron Mills,* which established her fame as an author. Her principal novels are *Dallas Galbraith, A Law Unto Herself,* and *Doctor Warwick's Daughters.*

DAVIS, RICHARD HARDING (1864-1916). An American novelist; born in Philadelphia; has written *Captain Macklin, Ranson's Folly, Soldiers of Fortune, King's Jackal, Cuba in War Time, Princess Aline, Our English Cousins.* Among his earlier works are *Gallegher and Other Stories, Stories for Boys,* and the *Van Bibber* series.

DAVIS, VARINA ANNE JEFFERSON (1864-1898). Known as "The Daughter of the Confederacy." An American author; born in Richmond, Va.; the daughter of Jefferson Davis. She was a musician, painter, and writer. Among her works are *Sketch of the Life of Robert Emmet, The Veiled Doctor,* and *A Romance of Summer Seas.*

DAY, THOMAS (1748-1789). An English author; born in London; a strong sympathizer with the Americans in the War of Independence. He is best known as the author of the famous *History of Sandford and Merton* and the *History of Little Jack.*

DEFOE, DANIEL (1661-1731). An English writer; born in London. In 1719 appeared the most popular of all his works, *Robinson Crusoe;* wrote also *True-Born Englishman,* a vindication of William III.; *Memoirs of a Cavalier, Journal of the Plague Year, Colonel Jack, Captain Singleton, Moll Flanders,* and *The Apparition of One Mrs. Veal.*

DEFOREST, JOHN WILLIAM (1826-1906). An American author and soldier; born in Seymour, Conn.; wrote a *History of the Indians in Connecticut, Oriental Acquaintances, European Acquaintances, Seacliff,* followed by nine novels, of which the best are *The Wetherell Affair, Honest John Vane,* and *Justine's Lovers.*

DE KAY, CHARLES (1848-). An American author; published *Hesperus and Other Poems, Vision of Nimrod, Bird Gods, Essays on Ancient Ireland, Love Poems of Louis Barnaval* (his pen name).

DEKKER or **DECKER, THOMAS** (about 1570-about 1641). An English dramatist; born in London; wrote more than forty plays. Among these are *The Shoemaker's Holiday, Old Fortunatus, The Honest Whore, The Virgin Martyr,* and *The Witch of Edmonton.*

DELAND, MARGARET WADE (CAMPBELL) (1857-). An American novelist; born at Allegheny, Pa. In 1880 she married L. F. Deland of Boston. Among her novels are *John Ward, Preacher; Sidney, Mr. Tommy Dove and Other Stories, Philip and His Wife,* and *The Wisdom of Fools.*

DELAVIGNE, JEAN FRANCOIS CASIMIR (1793-1843). A French lyric poet and dramatist. His poems of patriotism won him great favor, and two *Élégies sur la vie et la mort de Jeanne d'Arc* touched the French heart. Among his best plays are *L'école des vieillards, Marino Falieri, Les vêpres siciliennes, Louis XI., Les enfants d'Edouard,* and *La fille du Cid.*

DEMETRIUS PHALEREUS (about 354-284 B. C.). Grecian orator and statesman. Of his historical and philosophical works fragments only are extant.

DE MILLE, JAMES (1837-1880). A Canadian author; born at St. John, N. B.; wrote *Andy O'Hara, The Soldier and the Spy, The Dodge Club, The American Baron, The Living Link, The Cryptogram,* and *A Castle in Spain.*

DEMOSTHENES (385?-322 B. C.). Athenian orator; conquered an impediment in his speech, and by perseverance and determination became the greatest orator of the ancient world; opposed Philip of Macedon, against whom he delivered his *Philippics.* His *De Corona* or *Oration on the Crown* in defense of Ctesiphon is regarded as one of the world's masterpieces in oratory. Over 60 of his orations have come down to us.

DENHAM, SIR JOHN (1615-1669). An English poet; born in Dublin. His first publication was a successful tragedy, *Sophy.* He then wrote *Cooper's Hill,* the earliest of English descriptive poems. His address to the Thames beginning "O could I flow like thee" appeared in 1665.

DE QUINCEY, THOMAS (1785-1859). An English author; born in Manchester. While at Oxford he contracted the habit of eating opium, to which he remained a slave for many years. The consequences were fearful, as he himself relates in his principal work, *The Confessions of an English Opium-Eater.* He was a very prolific writer, and his works are mostly essays and papers on historical, literary, and miscellaneous topics, such as *Letters to a Young Man* and the very valuable *Literary Reminiscences.* [See Eng. Lit.].

DESCHAMPS, EUSTACHE (about 1328-1415). French poet. His *Miroir de Mariage,* 13,000 lines long, is his best known poem.

DES PERIERS, BONAVENTURE (1500-1544). French satirist; a courtier of Margaret of Navarre, to whom is assigned the chief authorship of her *Heptameron.* His *Cymbalum Mundi* (1537) was a satire on the Christian religion.

DEUS-RAMOS, JOAO DE (1830-1897). A Portuguese lyric poet. In 1865 published his masterpiece, *Flores do campo.*

DIAS, GONCALVES ANTONIO (1823-1866). A Brazilian poet. His works comprise a report, *Brazil e Oceania,* and valuable papers on the migrations of South American Indian tribes, and several volumes of poems.

DIBDIN, CHARLES (1745-1814). Musician, dramatist, and song writer; born in Southampton. His celebrity is wholly due to his sea-songs *Tom Bowling, The Waterman, The Quaker,* and *Poor Jack.*

DICKENS, CHARLES (1812-1870). Celebrated English novelist; born at Landport, Portsmouth; son of a navy clerk, latterly in great straits; was brought up amid hardships; was sent to a solicitor's office as "an office boy," learned shorthand, and became a reporter, a post in which he learned much of what afterwards served him as an author; wrote sketches for the *Monthly Magazine* under the name of "Boz" in 1834, and the *Pickwick Papers* in 1836-1837, which established his popularity. These were succeeded by *Oliver Twist, Nicholas Nickleby, Old Curiosity Shop, A Tale of Two Cities,* and many others. They were all written with an aim. He was a little man, with clear blue eyes, a face of extreme mobility, and a quiet shrewdness of expression. [See Eng. Lit.].

DICKINSON, EMILY (1830-1886). An American poet; born in Amherst, Mass. Nothing of her writings was published during her lifetime. In 1890 T. W. Higginson and Mrs. Mabel Loomis Todd edited a volume, *Poems by Emily Dickinson.*

DICKINSON, JOHN (1732-1808). An American statesman and publicist, called the "Penman of the Revolution"; born in Talbot County, Md.; best known as a writer of state papers. He wrote or drafted the *Resolutions in Relation to the Stamp Act* adopted by the Pennsylvania Assembly (1765); the *Declaration of Rights* and *Petition to the King* adopted by the Stamp Act Congress.

DIDEROT, DENIS (1713-1784). A French writer, leader of the "Encyclopedists" or writers for the *Encyclopédie,* which Diderot had planned as an enlargement of *Chambers's Encyclopaedia.* Diderot gave to this work twenty years of the closest attention. The work consisted (1751-1772) of 28 volumes, with six volumes of supplement (1776-1777) and two volumes of tables (1780). Diderot wrote two plays: *Le fils naturel* and *Le père de famille,* which mark the beginning of the domestic drama; besides novels and essays of criticism.

DIODORUS SICULUS (flourished 21 B. C.). A Greek historian; born in Sicily. He traveled in Europe and Asia collecting material for his great work, the *Library,* a universal history in 40 books from the beginning to 60 B. C. He was 30 years in compiling it.

DIOGENES, LAERTIUS (flourished about 200). A Greek writer. Little is known about his life. He wrote *Lives of Philosophers* in 10 books, which is really a history of philosophy from its beginning.

DISRAELI, BENJAMIN, EARL OF BEACONSFIELD (1804-1881). (See Beaconsfield in Dictionary of Government). An English novelist and writer; wrote *Vivian Grey, Coningsby, Sybil, Tancred, Lord George Bentinck, an Autobiography; Henrietta Temple,* and *Endymion.*

D'ISRAELI, ISAAC (1766-1848.) An English author; descendant of a Hebrew family which settled in England in 1748; wrote *Curiosities of Literature, A Dissertation on Anecdotes, Amenities of Literature,* and some political and historical works. He was the father of Benjamin Disraeli, Earl of Beaconsfield.

DIX, DOROTHEA LYNDE (1805-1887). An American philanthropist and writer of juvenile books; wrote *The Garland of Flora, Prisons and Prison Discipline,* and *Alice and Ruth.*

DIXIE, LADY FLORENCE CAROLINE DOUGLAS (1857-1905). An English explorer, writer, and champion of woman's rights; daughter of the Marquis of Queensberry. She described her explorations in *Across Patagonia;* wrote *Defence of Zululand, In the Land of Misfortune, Gloriana,* and *The New Woman.*

DIXON, RICHARD WATSON (1833-1901). An English poet and historian. His poetic works include *Mano, Odes and Eclogues, Lyrical Poems, Songs and Odes, On Advancing Age,* and *The Spirit Wooed.* His important work is *History of the Church of England from the Abolition of the Roman Jurisdiction.*

DIXON, WILLIAM HEPWORTH (1821-1901). An English writer; wrote *John Howard and the Prison World of Europe, Life of William Penn,* written in 1859 to refute Macaulay's damaging charges; the *French in England, The Personal History of Lord Bacon,* etc.

DOBELL, SYDNEY THOMPSON (1824-1874). An English poet of the "spasmodic" school. His poems *The Roman* (1850), and *Balder* (1853), met with great success.

DOBSON, HENRY AUSTIN (1840-1921). An English poet; born in Plymouth; has written *Vignettes in Rhyme, Proverbs in Porcelain, Old World Idylls;* lives of *Steele, Goldsmith, Hogarth, Fielding,* etc.

DODD, WILLIAM (1729-1777). An English clergyman and writer. He wrote *Beauties of Shakespeare, Reflections on Death,* and *Thoughts in Prison.*

DODGE, MARY ABIGAIL (1830-1896). An American journalist and author; born in Hamilton, Mass.; she has written, under the pseudonym of "Gail Hamilton," a number of well known books, such as *Gala Days, Woman's Wrongs, Red Letter Days in Applethorpe, The Battle of the Books, Sermons to the Clergy,* and *The Irrepressible Book.*

DODGE, MARY ELIZABETH MAPES (1838-1905). An American writer; born in New York City. Her best known work is *Hans Brinker, or the Silver Skates,* and two volumes of poetry, *Along the Way* and *When Life is Young.*

DODGE, THEODORE AYRAULT (1842-1909). An American soldier and military writer; born in Pittsfield, Mass.; wrote *Bird's Eye View of Our Civil War, Campaign of Chancellorsville, Patroclus and Penelope, A Chat in the Saddle,* and *Great Captains.*

DODGSON, CHARLES LUTWIDGE, or "LEWIS CARROLL" (1832-1898). An English author. A writer of mathematical treatises, he is, however, best known by his invention of a literary genre in *Alice's Adventures in Wonderland, Through the Looking-Glass and What Alice Found There, The Hunting of the Snark, Sylvie and Bruno,* and *Sylvie and Bruno Concluded.*

DOLE, NATHAN HASKELL (1852-). An American author, editor, and translator; born at Chel-

sea, Mass.; edited *The Rubaiyat of Omar Khayyam*, based on Fitzgerald, and the *Collected Works* of Count Tolstoy. He wrote *The Hawthorn Tree and Other Poems*, life of *Francis William Bird*, and *Omar, the Tent-Maker*.

DONNELLY, IGNATIUS (1831-1901). An American journalist, politician, and essayist; born in Philadelphia; wrote *Atlantis* and *Ragnarok*. His *Great Cryptogram* was a cipher applied to the first folio of Shakespeare's works to prove that Bacon was the author and not Shakespeare.

DORAN, JOHN (1807-1878). A British miscellaneous writer; wrote *Lives of the Queens of the House of Hanover, Knights and Their Days, In and About Drury Lane*, etc.

DORR, JULIA CAROLINE RIPLEY (1825-1913). An American poet; born at Charleston, S. C. Among her works are *Isabel Leslie, Farmingdale, Lanmere, Expiation, Bermuda, The Flower of England's Face, Daybreak, Afternoon Songs, A Cathedral Romance, Afterglow*, and *Beyond the Sunset*.

DOSTOYEVSKI, FYODOR MIKHAYLOVITCH (1821-1881). A Russian novelist; wrote *Poor People, The Downtrodden and Oppressed, Memoirs from a Dead House, Crime and Punishment, Author's Diary*, and *The Brothers Karamazoff*.

DOUGALL, LILY (1858-1923). A Canadian writer; her popular novels include: *Beggars All* (1891), *What Necessity Knows* (1893), and *The Mormon Prophet* (1899).

DOWDEN, EDWARD (1843-1913). An English scholar and critic; wrote *Shakespeare, His Mind and Art; Shakespeare Primer, Introduction to Shakespeare, Studies in Literature, Southey, Shelley, Transcripts and Studies, Wordsworth, New Studies in Literature, The French Revolution and English Literature*, and a *History of French Literature*.

DOYLE, SIR ARTHUR CONAN (1859-). A British novelist. After practising medicine for some years, the success of several of his books induced him to enter literature. Among his works are *Adventures of Sherlock Holmes, The Hound of the Baskervilles, Micah Clarke, The White Company, The Refugees, Rodney Stone, The Exploits of Brigadier Gerard, Round the Red Lamp, The Stark Munro Letters*, and *The Green Flag*. He also wrote a volume of poems, *Songs of Action*, and a play called *Halves*. He was knighted in 1902.

DOZY, REINHART (1820-1883). A Dutch orientalist and historian; born in Leyden. He wrote *History of the Almohades, History of Africa and of Spain*, and several histories relating to the Arabs.

DRAKE, JOSEPH RODMAN (1795-1820). An American poet; born in New York City; wrote *The Culprit Fay, The American Flag*, the eulogy on Fitz-Greene Halleck, *Green be the turf above thee*, and, in conjunction with Halleck, *The Croakers*.

DRAKE, SAMUEL ADAMS (1833-1905). An American author; born in Boston, Mass.; brigadier general in the Civil War; wrote *Old Landmarks of Boston, New England Legends and Folk-lore, The Watch Fires of '76*, and *Myths and Fables of To-day*.

DRAYTON, MICHAEL (1563-1631). An English poet. Among his works are *The Shepherd's Garland, The Barons' Wars, Poems, Lyrical and Pastoral, Muses' Elysium*, and *Poly-Olbion*.

DRUMMOND, HENRY (1851-1897). An English author and evangelist. His aim was to reconcile science and religion. He wrote *Natural Law in the Spiritual World, The Ascent of Man, Tropical Africa, Travel Sketches*, and *The Greatest Thing in the World*.

DRUMMOND, WILLIAM HENRY (1854-1907). A Canadian poet; born in Quebec. He was a physician and in his intercourse with the French-Canadians learned their life stories, which he was able to depict in dialect poems published under the title of *The Habitant*. Frechette transfers to Drummond Longfellow's flattering tribute to Frechette: "He is the pathfinder of a new land of song." [See Can. Lit.]

DRYDEN, JOHN (1631-1700). [See Eng. Lit.]

DU BELLAY, JOACHIM (about 1524-1560). A French poet, known as "The French Ovid." Translated two books of the Aeneid (1552), and published his most noteworthy collection of poems *Les regrets* (1559).

DUMAS (*du-mah*), **ALEXANDRE, or DUMAS PERE** (1802-1870). The Elder; a French romancist. He was the grandson of a French marquis and a San Domingo negress. The works which bear his name amount to some 300 volumes, including several dramas; but the only claim he could lay to a great number of the productions issued under his name was that he either sketched the plot or revised them before going to press. *Monte Cristo, Three Musketeers, Forty-five, Twenty Years After*, are among his best novels.

DUMAS, ALEXANDRE, or DUMAS FILS (1824-1895). The Younger; a French dramatist and romancist, son of the preceding. In 1848 he found himself with a pen and 50,000 francs of debts. He wrote *La dame aux camélias* (1848; dramatized 1852) and soon became a wealthy man. His other plays fill seven volumes and they inaugurate in French drama the realistic study of social problems.

DU MAURIER (*du mo-re-ay'*), **GEORGE LOUIS PALMELLA BUSSON** (1834-1896). Artist, caricaturist, and novelist; born in Paris, France; joined the *Punch* staff, and became famous through his weekly drawings for that publication. In 1891 appeared his first novel, *Peter Ibbetsen*, and in 1894 he issued *Trilby*, a story which had great popularity both in book form and on the stage. His last work, *The Martian*, appeared after his death.

DUNBAR, PAUL LAURENCE (1872-1906). An American poet of the African race; born at Dayton, Ohio; wrote *Oak and Ivy, Majors and Minors, Lyrics of Lowly Life, Poems of Cabin and Field, The Uncalled*, and *The Sport of the Gods*.

DUNBAR, WILLIAM (about 1465-about 1525). The greatest of the old Scottish poets. Among his works are *Visitation of Saint Francis, The Thistle and the Rose*, and *The Dance of the Deadly Sins*.

DUNNE, FINLEY PETER, or "MR. DOOLEY" (1867-). An American humorist; born in Chicago, Ill. In his works he passes humorous comment on current topics with the assistance of Martin Dooley, a public-house keeper on the Archey Road. He has written *Mr. Dooley in Peace and War, Mr. Dooley in the Hearts of His Countrymen, Mr. Dooley's Philosophy*, and *Mr. Dooley's Opinions*.

DUYCKINCK (*di'kink*), **EVERT AUGUSTUS** (1816-1878). An American writer; wrote with his brother, George Long, the *Cyclopaedia of American Literature*, also *Wit and Wisdom of Sydney Smith, History of the War for the Union, National Portrait Gallery of Eminent Americans*, and *Poems Relating to the American Revolution*.

EARLE, ALICE MORSE (1853-1911). An American author; born in Worcester, Mass. Her works deal with Colonial history and include *The Sabbath in Puritan New England, Customs and Fashions in Old New England, Home Life in Colonial Days, Child Life in Colonial Days, Stage Coach and Tavern Days, In Old Narragansett*, and *Two Centuries of Costume in America*.

EASTMAN, CHARLES GAMAGE (1816-1861). An American editor and poet; born in Oxford County, Me. From his poetical delineations of rural life in Vermont he was called the "Burns of the Green Mountains."

EBERS (*ay'bers*), **GEORG MORITZ** (1837-1898). A German Egyptologist and novelist. His visit to Egypt resulted in the discovery of the celebrated hieratic medical *Papyrus Ebers*. Among his works are *Egyptian Kings* and the novels *Uarda, Serapis, The Sisters, Homo Sum, Der Kaiser*, and *Eine Frage*.

ECHEGARAY, JOSE (1833-1916). Spanish dramatist; born in Madrid. [See Span. Lit.]

ECHEVERRIA, ESTEBAN (1809-1851). A South American poet, born at Buenos Ayres; the poem *La cautiva* (1837), is national in spirit, whereas his earlier works showed the influence of his French education.

ECKERMANN, JOHANN PETER (1792-1854). A German author and editor of Goethe's works; born at Winsen; became Goethe's private secretary (1823); wrote *Gespräche mit Goethe*.

EDGAR, JAMES DAVID (1841-1899). A Canadian legislator and author; born in Quebec; wrote *The Insolvent Act of* 1864 and *This Canada of Ours and Other Poems*.

EDGEWORTH, MARIA (1767-1849). An English novelist; born in Black Bourton, Oxfordshire; wrote *Castle Rackrent, Leonora, Stories of Ireland, Belinda, Popular Tales, Tales of Fashionable Life, Ennui, The Absentee, Harry and Lucy*, and *Rosamond and Frank*.

EDGREN, ANNE CHARLOTTE LEFFLER (1849-1892). A Swedish novelist and dramatist. Her short stories include *By Chance, From Life, A Summer Story*, and *Woman and Love*. Among her best known dramas are *The Actress, The Curate, The Fairy, Ideal Women*, and *A Rescuing Angel*.

EDWARDS, HARRY STILLWELL (1855-). An American journalist, novelist, and poet; born at Macon, Ga. His best stories are studies of plantation life and include *Two Runaways and Other Stories, The Marbeau Cousins,* and *Sons and Fathers,* which won a $10,000 prize from the Chicago *Record.*

EGAN, MAURICE FRANCIS (1852-1924). An American scholar; born in Philadelphia; wrote *That Girl of Mine, Preludes, Songs and Sonnets, The Life Around Us,* and *Lectures in English Literature.*

EGGLESTON, EDWARD (1837-1902). An American author; born in Vevay, Ind. In fiction he achieved celebrity with stories of life in Southern Indiana in pioneer days. As a historian he made a specialty of American subjects; wrote *Hoosier Schoolmaster, The End of the World, The Circuit Rider, Roxey, The Graysons,* and *The Faith Doctor.* With the assistance of his daughter, Mrs. Lillie E. Seelye, he wrote many juvenile biographies of American Indians, including *Tecumseh, Pocahontas and Powhatan, Brant and Red Jacket,* and *Montezuma.*

EGGLESTON, GEORGE CARY (1839-1911). An American editor, author, and journalist; born at Vevay, Ind.; brother of Edward Eggleston; wrote *A Rebel's Recollections, Southern Soldier Stories, The Last of the Flatboats, A Carolina Cavalier,* and many books for the young.

EGILL SKALLAGRIMSSON (about 900-about 980). An Icelandic skald; fought under the English king Athelstan for several years after 925; returned to Norway and fought against Erik Bloodaxe (934), by whom he was taken prisoner; released for writing laudatory verses about his captor. This poem is called *Höfudhlausn* (the Redemption of the Head). Egill died in Borg, Iceland, where he settled after 950. Among his sagas are *Sonartorrek,* written on the death of his favorite son; *Arinbjanar drapa* in honor of his friend Arinbjörn, and *Skjaldar drapa.* "Egill's Saga," the famous Icelandic poem, is supposed to have been written by Snorri Sturluson, and contains many of Egill's songs.

EKKEHARD, AURA VON († -about 1125). A German historian; abbot of Aura, near Kissengen; wrote a valuable history of the first crusade, *Hierosolymita.*

"ELIOT, GEORGE" (1819-1880). The assumed literary name of **MARY ANN,** or, as she preferred to write the name in later years, **MARIAN EVANS,** an English novelist. Her first literary undertaking was the continuation of a translation of Strauss's *Life of Jesus,* completed in 1846. In 1849 she went abroad, returning to England next year, and in 1851 she took up her abode as a boarder in the house of John Chapman, editor of the *Westminster Review.* It was not, however, till 1857 that she came prominently into public notice, when the first of a series of tales entitled *Scenes from Clerical Life* appeared in *Blackwood's Magazine.* The credit of authorship of *Adam Bede,* her first novel, was openly ascribed to several persons of varying note. The secret soon began to leak out. Months before her second novel, *The Mill on the Floss,* was published, it was well known, among literary circles at least, that George Eliot was none other than Marian Evans, the Westminster reviewer. By this time was established that close association and literary fellowship with the talented philosophical writer, George H. Lewes, which terminated only with the death of the latter but a little more than two years before her own. In May, 1880, she married John Cross. Others of her novels are *Silas Marner, Romola, Daniel Deronda,* and *Middlemarch.* [See Eng. Lit.].

ELIOT, JOHN (1604-1690). The apostle of the Indians; born in Essex, England; entered the Church of England, but seceded and emigrated to New England; became celebrated for his successful evangelistic expeditions among the Indians during his lifelong occupancy of the pastorate at Roxbury. He wrote *Indian Grammar Begun* (1660), *Indian Primer* (of which only one complete copy exists and is in the library of the University of Edinburgh); one of the translations of the famous "Bay Psalm Book." His *Christian Commonwealth* was published in London in 1659.

ELIZABETH, PAULINE ELIZABETH OTTILIE LOUISE, or **"CARMEN SYLVA"** (1843-1916). Queen of Roumania, poet, and novelist; born at Neuwied, Germany; married Prince Charles of Roumania (1869), who became King Carol I. (1881). Her chief works are *Leidens Erdengang* or *Pilgrim Sorrow, Jehovah, Pensées d'une reine,* and *Handwerkerlieder.*

ELZEVIR, LOUIS (about 1540-1617). Dutch printer at Leyden. **BONAVENTURE** (1583-1652), son, and **ABRAHAM** (1592-1652), grandson, of Louis. Dutch printers and publishers at Leyden and Amsterdam of exquisite editions of the classics, which are highly prized for the elegance of type and high grade of paper. About 2,000 books were printed—968 in Latin, 44 in Greek, 126 in French, 32 in Flemish, 11 in German, 10 in Italian, and 22 in oriental languages.

EMERSON, RALPH WALDO (1803-1882). An American philosophic author; born in Boston. He graduated at Harvard College in 1821, and was minister of the Second Unitarian Church of Boston; but soon after formed peculiar views with regard to forms of worship, abandoned his profession and, retiring to the quiet village of Concord, devoted himself to the study of the nature of man and his relation to the universe. He was one of the most eminent American philosophers of the Transcendental school; wrote *Representative Men, The American Scholar, English Traits, Nature,* also volumes of *Essays* and *Poems.*

ENCINA (*en-the'na*), **JUAN DEL** (about 1468-1534). The father of the Spanish drama; born near Salamanca; took orders, and finally became prior of the Monastery of Leon. More than 170 of his lyrics have survived, many of them with musical settings by the author. His 14 plays, all being presentations of very primitive themes, sometimes sacred, sometimes not, are far more interesting, and mark the transition from the religious to the secular stage.

ENGLISH, THOMAS DUNN (1819-1902). An American physician and author; born in Philadelphia. His works include *Zephaniah Doolittle, Walter Wolfe, Poems, Ambrose Fecit, American Ballads, Boy's Book of Battle Lyrics.* He is best known as the author of the song *Ben Bolt.*

ENNIUS, QUINTUS (239-about 169 B. C.). A Roman poet; father of the Roman epos. Fragments of his tragedies, comedies, satires, and of his *Annales,* originally in 18 books, survive.

ENNODIUS, MAGNUS FELIX (about 473-521). A bishop of Ticinum, Italy. He wrote a life of Epiphanius, his predecessor; a partial autobiography entitled *Eucharisticum,* and some poems and hymns.

EPHORUS (about 400-about 330 B. C.). A Greek historian; born in Eolis. His chief work is a *History* in 30 books of the Greeks and barbarians covering a period of 750 years down to 340 B. C. Only fragments of it exist, though it was of great service to Diodorus Siculus and later historians.

EPICHARMUS (flourished fifth century B. C.). The greatest of the Sicilian comic poets. He lived 90 years and was much honored by the Syracusans. Fragments of his 36 comedies survive.

EPINAY (*ay-pe-nay'*), **LOUISE FLORENCE PETRONILLE TARDIEU D'ESCLAVELLES DE LA LIVE D'** (1726-1783). A French writer. Her *Mémoires et Correspondence* give a lively picture of her times. She wrote *Les conversations d'Emilie,* a complement to Rousseau's *Emile.*

ERCILLA Y ZUNIGA (*ar-the'lya e thoo'nye-ga*), **ALONSO DE** (1533-1594). A Spanish epic poet; born in Madrid. He went with the Spanish army to quell the insurrection of the Araucanians in Chile. The courage of the natives in the unequal struggle gave him a theme for an epic poem, *La Araucana,* in 37 cantos.

ERCKMANN-CHATRIAN. The name indicating the joint authorship of **EMILE ERCKMANN** (1822-1899) and **ALEXANDRE CHATRIAN** (1826-1890); both born in Lorraine. Their novels deal with historical events in the section of their homes and have been widely read. They include *Histoire d'un conscrit de* 1813, *Waterloo,* and two dramas, *Le juif polonais* and *L'ami Fritz.* The former was adapted under the title of *The Bells,* in which Sir Henry Irving achieved such success as "Mathias."

ESPRONCEDA, JOSE DE (1810-1842). Spanish poet, known as the Spanish Byron. He is unsurpassed among his countrymen as a lyrical poet. His *El Pelayo* won him much fame.

EUPOLIS (about 446-411 B. C.). A Greek poet, a contemporary of Aristophanes. Produced fourteen dramas, fragments of which are extant.

EURIPIDES (480-406 B. C.). The latest of the three great Greek tragic poets; born at Salamis, of poor parents; first trained as an athlete, and then devoted himself to painting and eventually to poetry. Of his plays the *Alcestis, Bacchae, Iphigenia at Aulis, Electra,* and *Medea* may be mentioned. He won the tragic prize five times. [See Gr. Lit.].

EUSTATHIUS (about 1125-about 1194). A celebrated Byzantine commentator on Homer, Pindar, and Dionysius the Periegite; born in Constantinople; archbishop of Thessalonica (1175-1194). His *Commentary*

on the Iliad and Odyssey is a treasure house of ancient learning. He left a great number of historical writings, speeches, and tracts.

EVA'GRIUS SCHOLASTICUS (about 536-?). An early church historian; born at Epiphania in Coele-Syria; legal adviser of the patriarch Gregory at Antioch; questor under Tiberius II. and prefect under Mauritius. He wrote an *Ecclesiastical History* covering the period from 431 to 594.

EVALD, HERMAN FREDERIK (1821-1908). A Danish novelist. Among his works are *Valdemar Krone's Youth, The Nordby Family, Johannes Falk, Charles Lyng,* and three historical novels, *The Swedes at Kronborg, Anna Hardenberg,* and *Clara Bille.*

EVALD, JOHANNES (1743-1781). A great lyric poet of Denmark; born at Copenhagen. His *Rolf Krange* is the first original Danish tragedy. *The Fishers,* a drama, is the noblest of his works and contains the Danish national song, *King Christian stood by the lofty mast.*

EVELYN, JOHN (1620-1706). An English author; born at Wotton, Surrey. His works cover a variety of topics—art, architecture, gardening, and commerce. His *Sylva, or a Discourse on Forest Trees,* was long a standard on the subject; but his celebrity rests upon his *Diary,* covering a period of 70 years.

EVERETT, ALEXANDER HILL (1792-1847). An American diplomatist and political writer; born in Boston, Mass.; brother of Edward Everett. Among his works are *A General Survey of the Political Situation in Europe;* a similar work on *America,* and *Lives of Joseph Warren* and *Patrick Henry.* His best orations are *The French Revolution, The Battle of New Orleans,* and *The Battle of Bunker Hill.*

EWING, JULIANA HORATIA (1841-1885). An English writer of stories for children; born in Yorkshire; the daughter of Alfred Gatty. Among her many delightful tales are *The Land of Lost Toys, Jackanapes, The Story of a Short Life,* and *Lob Lie by the Fire.*

FABYAN or **FABIAN, ROBERT** (? -1513). An English chronicler; wrote *New Chronicles of England and France,* aiming to give a true history of England from the landing of Brutus to the Battle of Bosworth (1485). It was extended by unknown writers to 1558.

FAGUET (*fa-gay'*), **EMILE** (1847-1916). A French critic and literary essayist. His work *La tragédie française au XVI. siècle* is the best treatise upon the subject. Among his other works are *Etudes littéraires, Politiques et moralistes du XIX. siècle, Le théâtre contemporain, Classiques populaires, La littérature française,* and *Problèmes poétiques du temps présent.*

FANNIUS STRABO, GAIUS (flourished 150 B. C.). A Roman historian and orator; one of the speakers in the *De Amicitia* and *De Republica* of Cicero; served in Africa under Scipio Africanus (149-146 B. C.).

FARGUS, FREDERICK JOHN, or **"HUGH CONWAY"** (1847-1885). An English novelist; born in Bristol; wrote *Called Back* (translated into six languages and dramatized), *Dark Days, Slings and Arrows, A Cardinal Sin,* and *Bound Together.*

FARINA, SALVATORE (1846-1918). An Italian novelist, known as the Italian Dickens. He wrote *Due amori, Fiamma vagabonda, Frutti proibiti, Il romanzo di un vedovo, Il tesoro di Donnina, Amore bendato, Capelli biondi, Dalla spuma del mare, Il signor Io, Piu dell' amore,* and *Il numero* 13.

FARJEON (*far'jon*), **BENJAMIN LEOPOLD** (1833-1903). An English author; born in London; spent some years in Australia and New Zealand, where he wrote *Shadows on the Snow;* returning to London he wrote *Grif, Blade-o'-Grass, Fair Jewess,* and *Last Tenant.*

FARQUHAR, GEORGE (1678-1707). An English dramatist; born in Londonderry, Ireland. He was one of the finest of English comic dramatists. His works include *Love and a Bottle, Constant Couple, Sir Harry Wildair, The Inconstant, Twin Rivals, The Stage Coach, The Recruiting Officer,* and *The Beaux' Stratagem.*

FAWCETT, EDGAR (1847-1904). An American author; born in New York City; wrote *Short Poems for Short People, Purple and Fine Linen, Song and Story, Romance and Reverie, Songs of Doubt and Dream, Ambitious Woman, House at High Bridge,* etc.

FAWCETT, HENRY (1833-1884). An English political economist; lost his sight by an accident (1858); wrote a *Manual of Political Economy* (1863); elected the same year professor of political economy at Cambridge; member of Parliament (1865, 1868, 1874); postmaster general (1880); wrote also *Pauperism: Its Causes and Remedies,* and *Free Trade and Protection.*

FAY (*fi*), **ANDRAS** (1786-1864). An Hungarian author; wrote *Mesék,* a book of fables; *The Two Bathorys,* a tragedy; *Ancient Coins,* a comedy; *The House of the Beltekys,* the first attempt at an Hungarian society novel.

FECHNER, GUSTAV THEODOR (1801-1887). A German physicist and philosopher; born near Muskau, Prussia. He was the founder of modern psychology and psychophysics; under the pseudonym of Dr. Mises wrote some satirical theses and poetry. In 1846 he wrote his ethical treatise *Ueber das höchste Gut.* His *Elemente der Psycophysik* (1860) was an epoch-making contribution. In 1876 he gave out his profound *Vorschule der Aesthetik.*

FEISI (*fi'se*), or **FEIYASI, ABUL FEIS IBN MUBARAK** (1547-1595). An Indo-Persian poet and scholar; born in Agra. His works include lyrics, epics, a commentary on the *Koran,* and translations of the *Mahabharata* and *Lilivati.*

FEITH, RHIJNVIS (1753-1824). Dutch poet and dramatist. His best known works are the tragedies *Lady Jane Grey* (1791), and *Inez de Castro.*

FENELON (*fayn'lon'*), **FRANCOIS DE SALIGNAC DE LA MOTHE** (1651-1715). A French prelate and author; born in the Château de Fénelon, province of Périgord, France; was educated at Plessis College, in Paris, and at the seminary of St. Sulpice, where he received holy orders in 1675. In 1695 he was created archbishop of Cambray. A theological dispute with Bossuet, his former instructor, terminated in his condemnation by Pope Innocent XII. He was the author of numerous works on philosophy, theology, and belles-lettres, among which are *Telemachus, Fables,* and *Epitome of the Lives of the Ancient Philosophers.*

FERLAND, JEAN BAPTISTE ANTOINE (1805-1864). Canadian writer. His *Cours d' histoire du Canada* established his reputation as an historian.

FERREIRA, ANTONIO (1528-1569). Portuguese poet; born at Lisbon. [See Port. Lit.].

FERRIER, SUSAN EDMONSTONE (1782-1854). A Scotch novelist; born in Edinburgh. Among her novels, *Marriage, The Inheritance,* and *Destiny* have retained their popularity even to the present day.

FESSLER, IGNAZ AURELIUS (1756-1839). A Hungarian author and historian; wrote an excellent *History of the Hungarians* and several historical novels.

FEUERBACH (*foy'er-bah*), **PAUL JOHANN ANSELM VON** (1775-1833). A German penalogist and one of the most distinguished jurists of Germany; wrote *Remarkable Cases in Criminal Law Trial by Jury and Judicial Procedure in France.*

FEUILLET (*feh-yay'*), **OCTAVE** (1821-1890). A French novelist. He wrote *The Romance of a Poor Young Man, Monsieur de Camors, Julia de Trécoeur,* and *History of a Parisienne.*

FIELD, EUGENE (1850-1895). An American journalist; born in St. Louis, Mo.; wrote *Book of Western Verse, Book of Profitable Tales, With Trumpet and Drum,* etc.

FIELDING, HENRY (1707-1754). First great English novelist or the father of the modern novel. After ill success as playwright and lawyer he embarked upon a literary career, in which he won fame. His three important works are *Tom Jones, Joseph Andrews,* and *Amelia.* [See Eng. Lit.].

FIELDS, JAMES THOMAS (1817-1881). An American publisher and author; born in Portsmouth, N. H.; wrote *Poems, A Few Verses for a Few Friends, Yesterdays with Authors, Hawthorne, In and Out of Doors with Charles Dickens,* and a volume of essays entitled *Underbrush.*

FIRDAUSI or **FIRDUSI** (935-1020). The greatest of Persian epic poets and one of the most famous in all literature. He wrote the *Shah Namah,* one of the greatest epics of literature. It traces the history of Persia. It contains 60,000 couplets and is more than seven times the length of Homer's *Iliad.*

FISCHART, JOHANN (about 1545-c. 1591). German satirist. His best known works include the *Rabelaisian Aller Praktik Grossmutter* (1572), and *Das Glückhafft Schiff von Zürich,* in verse.

FISHER, GEORGE PARK (1827-1909). An American author and educator; born in Wrentham, Mass.; was professor of divinity from 1854-1861, and subsequently of ecclesiastical history at Yale; author of many theological and historical works. Dr. Fisher was one of the leading church historians of the United States.

FISKE, JOHN (1842-1901). An American historian; born in Hartford, Conn. He was for a while

lecturer on philosophy at Harvard, and in 1872-1879 assistant librarian. He wrote *Outlines of Cosmic Philosophy, Destiny of Man, Idea of God as Affected by Modern Knowledge, Origin of Evil*, and other works popularizing the philosophy of evolution; in history, *Beginnings of New England, American Revolution, Discovery of America, Essays, Literary and Historical*, and *New France and New England*.

FITZGERALD, EDWARD (1809-1883). An English poet. His writings are for the most part remodeled translations of poems in other languages; among them *Six Dramas of Calderon* and *The Rubâiyat of Omar Khayyam*, a translation that won for Fitzgerald great celebrity.

FLACCUS, GAIUS VALERIUS (died about 88). A Roman poet; the author of an epic poem, *Argonautica*, on the Argonautic expedition. It exists in an incomplete form.

FLAUBERT (*flo-bayr'*), **GUSTAVE** (1821-1880). A French novelist; born and died in Rouen. Among his works are *Madame Bovary, Salammbô, L'éducation sentimentale, La tentation de Saint-Antoine, Trois contes, Hérodias, La légende de Julien l'hospitalier*, and *Bouvard et Pécuchet*. Zola says that in *Madame Bovary* Flaubert gave "the formula of the modern novel."

FLEMING, PAUL (1609-1640). A German poet; made Martin Opitz his master, but his works exceed in excellence those of his model.

FLETCHER, JOHN (1579-1625). English dramatist; the son of a bishop of London; collaborated with Beaumont in the production of their plays. *The Faithful Shepherdess, The Two Noble Kinsmen, Maid's Tragedy*, and *Philaster* are the best of the 54 dramas produced by the two poets. [See Eng. Lit.].

FLORIAN, JEAN PIERRE CLARIS DE (1755-1794). A French poet and romancer; a relative and protégée of Voltaire; wrote *Galatée, Numa Pompilius, Estelle, Gonsalve de Cordoue*, and *Fables*.

FLUGEL, JOHANN GOTTFRIED (1788-1855). A German lexicographer. He spent many years in the United States in business, diplomatic, and official occupations. He died in Leipzig. His fame rests upon his *English-German and German-English Dictionary*.

FOGAZZARO, ANTONIO (1842-1911). One of the greatest Italian novelists. Religion and patriotism are the two dominant notes in his work. His poem *Miranda* gave him immediate fame throughout Italy; *Vasolda* and *Profumo* are collections of verse. His novels, *Malombra, Daniele Cortis* (a very popular story), *Piccolo mondo antico* (*The Patriot*), *Piccolo mondo moderno* (*The Sinner*), *Il Santo* (*The Saint*—the most famous), and *Leila* are noted for their idealism.

FOGLIETTA, UBERTO (1518-1581). An Italian historian; born in Genoa. His *Della repubblica di Genoa* caused the forfeiture of his estate and banishment from Genoa. His *Historiae Genuensium* placed him among the foremost Latin writers of Italy.

FONTANES, LOUIS, MARQUIS DE (1757-1821). A French poet and orator. Among his works are *Le cri de mon coeur, La forêt de Navarre*, translation of Pope's *Essay on Man*, and an imitation of Gray's "Elegy," *Le jour des morts*.

FONTENELLE (*font-nel'*), **BERNARD LE BOVIER DE** (1657-1757). A French miscellaneous writer; a nephew of Corneille, whose life he wrote; author of *Dialogues of the Dead*, in imitation of Lucian, and *Conversations on the Plurality of Worlds*.

FORBES, ARCHIBALD (1838-1900). An English journalist and war correspondent. Among his numerous works are *Drawn from Life, My Experiences in the Franco-German War, Life of Chinese Gordon, William I. of Germany, The Afghan Wars, Tzar and Sultan*, and *Napoleon III*.

FORD, PAUL LEICESTER (1865-1902). An American author; born in Brooklyn, N. Y. He wrote *Washington* and *Franklin, Janice Meredith, The Honorable Peter Stirling*, and *Story of An Untold Love*.

FOSCOLO, UGO (1778-1827). An Italian writer; born in the Ionian Isles. His masterpiece is *I Sepolcri*, a magnificent lyric poem. His greatest fame rests upon his prose works, especially his novel *Ultime lettere di Jacopo Ortis*.

FOTHERGILL, JESSIE (1856-1891). An English novelist; born at Manchester. Her novels depict life in the factory towns and in the moorlands. They include *The First Violin, Kith and Kin, One of Three, Peril, Borderland, A March in the Ranks*, and *The Oriole's Daughter*.

FOUQUE, FRIEDRICH HEINRICH KARL, BARON DE LA MOTTE (1777-1843). A German novelist and poet; born in Brandenburg. He is best known as the author of *Undine*, a romantic classic.

FOWLER, ELLEN THORNEYCROFT (about 1873-). An English novelist; eldest daughter of Sir Henry Fowler, secretary of state for India (1894-1895). Miss Fowler wrote *Concerning Isabel Carnaby*, a clever society novel; *A Double Thread, The Farringdons, Sirius and Other Stories*, and some poems.

FOX, JOHN (1863-1919). An American novelist; born in Bourbon County, Ky. He wrote *A Mountain Europa, A Cumberland Vendetta, The Kentuckians, Crittenden, The Little Shepherd of Kingdom Come*, and *Blue Grass and Rhododendron*.

FOXE, JOHN (1516-1587). An English martyrologist. His most famous work is his *History of the Acts and Monuments of the Church*, which is known as his *Book of Martyrs*, first published in Latin on the continent, the noble English version appearing in 1563.

FRANCE, ANATOLE, or **JACQUES ANATOLE THIBAULT** (1844-1924). A noted French critic, novelist, and humorist. Among his best known works are *Le crime de Sylvestre Bonnard, L'orme du mail, Le mannequin d'osier, L'anneau amethyste, Monsieur Bergeret à Paris, Thaïs, Le lys rouge, La vie littéraire*, and *Le jardin d'Epicure*.

FRANCIS, PHILIP, SIR (1740-1818). An Irish-English statesman; born in Dublin; the best accredited of the candidates for authorship of the *Junius* letters.

FRASER, MARY CRAWFORD, or **MRS. HUGH.** An English author, sister of Marion Crawford; wrote *A Diplomat's Wife in Japan, The Customs of the Country or Tales of New Japan, A Chapter of Accidents*, and *The Splendid Porsenna*.

FRECHETTE, LOUIS HONORE (1839-1908). A French-Canadian poet; born at Point Lévi, Quebec. He was honored by the French Academy and the Imperial Institute of London; made a knight of the Legion of Honor; wrote a five-act drama, *Veronica;* an English sketch, *Christmas in French Canada;* translation of Howell's *Chance Acquaintance* and of Cable's *Creole Days, Mes loisirs, La voix d'un exilé, Pêle-mêle, Les fleurs boréales, Les oiseaux de neige, La légende d'un peuple*, and *Les feuilles volantes*.

FREDERIC, HAROLD (1856-1898). An American journalist and novelist; born in Utica, N. Y.; wrote *Damnation of Theron Ware, The Lawton Girl, In the Valley, The Copperhead, March Hares*, and *In the Marketplace*.

FREDRO, ALEXANDER COUNT (1793-1878). A Polish dramatist; wrote eighteen successful comedies, which were published in the collection of 1877.

FREEMAN, EDWARD AUGUSTUS (1823-1892). An English historian. His first publication was a *History of Architecture*, especially devoted to Gothic architecture. *History of the Norman Conquest* is his great work. He wrote also *Growth of the English Constitution, Comparative Politics, The Reign of William Rufus, History and Conquest of the Saracens*, and *Ottoman Power in Europe*. He was appointed professor at Oxford (1884). [See Eng. Lit.]

FREILIGRATH, FERDINAND (1810-1876). A German poet; wrote the famous lyrics *Löwenritt, Prinz Eugen*, and *Der Blumen Rache;* democratic poems *Trotz alledem* (translation of Burns's "A Man's a Man for a' That"), *Die Freiheit, Das Recht*, and *Hamlet*. Among his translations are Longfellow's *Hiawatha* and Shakespeare's *Winter's Tale* and *Cymbeline*.

FRENCH, ALICE, or **"OCTAVE THANET"** (1850-). An American novelist; born in Andover, Mass. Besides several successful short stories of an economic character she wrote *The Regulator, Knitters in the Sun, Otto the Knight, Stories of a Western Town, Expiation, We All*, and *Man of the Hour*.

FREYTAG (*frī'tahg*), **GUSTAV** (1816-1895). A German author and orientalist; born in Silesia. Among his works outside of the drama may be mentioned *Ancestors*, a cycle of six stories portraying the German civilization from the beginning of historic times.

FROISSART (*frwa-sar'*), **JEAN** (1338-1410?). A French chronicler; born in Valenciennes, in Hainault. His *Chronicles* form a work of permanent value, because of their accurate and impartial account of important events of the fourteenth century. They narrate events connected with France, England, Scotland, Spain, Brittany, etc.

FROUDE (*frood*), **JAMES ANTHONY** (1818-1894). An English historian; born in Devonshire, England;

wrote, under the pen name of "Zeta," *The Shadows of the Clouds* and the *Nemesis of Faith*, both of which were condemned by the Oxford College authorities; wrote *The History of England from the Fall of Wolsey to the Defeat of the Spanish Armada*. [See Eng. Lit.].

FULLER, SARAH MARGARET (OSSOLI) (1810-1850). An American essayist and critic; took an active part in the Italian struggle for independence and served in the hospitals; on fleeing to America was drowned with her husband and son off Fire Island Beach as they were approaching New York. Her works include *Woman in the Nineteenth Century*, *Papers on Literature and Art*, and her *Letters*.

FUNK, ISAAC K. (1839-1912), entered the ministry after his graduation from Wittenberg College. He organized the Funk and Wagnalls Company and started or edited these publications: *Metropolitan Pulpit*, 1876, *Literary Digest*, 1890, *Standard Dictionary* 1890-4, *Jewish Cyclopedia*, 1901.

FUST or **FAUST** (*foust*), **JOHANN** (? -1466). One of the three artists to whom the invention of printing has been ascribed, was the son of a goldsmith at Mentz, Germany. The other two were Gutenberg and Schöffer. Fust was a partner of Gutenberg. Their best-known publication is the Latin Bible of forty-two lines or Mazarin's Bible. A *Psalter* (1457) was the publication of Fust and Schöffer and is the first printed book to bear a complete date. Its beautiful initials in red and blue were printed from types made in two pieces.

GABORIAU (*ga-bo-re-o'*), **EMILE** (1835-1873). A French writer of criminal and detective stories. His early years were a succession of vicissitudes; the army, the law, and even the church, were in turn the objects of his inconstant attentions till at last he wrote his way to fame and fortune. He wrote *The Lerouge Affair*, *Monsieur Lecoq*, and *File No.* 113.

GARDINER, SAMUEL RAWSON (1829-1902). An English historian; declined the regius professorship of history at Oxford on the death of Froude; wrote *History of the Great Civil War*, *Calendars of State Papers*, *Cromwell's Place in History*, *Oliver Cromwell*, *A Student's History of England*, and many other historical works.

GARLAND, HAMLIN (1860-). An American story writer; born in La Crosse, Wis. His best novel is *Rose of Dutcher's Coolly*. Among his other works are *Prairie Folks*, *A Little Norsk*, *Main-Traveled Roads*, *Her Mountain Lover*, *Prairie Songs*, *Ulysses Grant: His Life and Character*, and *Captain of the Gray Horse Troop*.

GARNEAU, FRANCIS XAVIER (1803-1866). Canadian historian; author of *Histoire du Canada, depuis sa decouverte*, and *Voyage en Angleterre et en France*.

GARNETT, RICHARD (1835-1906). An English librarian and author; born at Litchfield; was connected with the British Museum from his sixteenth year; wrote several volumes of verse and edited many books; wrote *Relics of Shelley*, *Twilight of the Gods and Other Tales*, *Age of Dryden*, *William Blake, Painter and Poet*, and a *History of Italian Literature*.

GASKELL, ELIZABETH CLEGHORN (1810-1865). An English author. She wrote *Mary Barton*, *Ruth*, *Cranford*, *North and South*, *Lizzie Leigh*, *Sylvia's Lovers*, *Cousin Phillis*, *Wives and Daughters*, and *Life of Charlotte Brontë*.

GAUTIER (*go-te-ay'*), **THEOPHILE** (1811-1872). A French poet and prose writer. He applied himself at first, but without much success, to painting, and then turned to literature. He was a prince of short story writers. His poems are considered by critics his best claim to fame.

GAY, JOHN (1685-1732). An English poet. His verse tales, the *Fables*, are the best of their kind in English. Among his poems the best known is his ballad, *Black-ey'd Susan*. *The Beggar's Opera* ran for 63 days at Lincoln's Inn Fields when first presented.

GELLERT, CHRISTIAN FURCHTEGOTT (1715-1769). A German poet; born in Saxony. He wrote *Fables and Tales*. He was the most important of the writers preceding the golden age of German literature ushered in by Lessing.

GEOFFREY OF MONMOUTH (about 1100-about 1154). A Welsh chronicler; was born at Monmouth, Wales; bishop of St. Asaph (1152); author of the famous *Historia Regum Britanniae*, published in 1139. This is one of the main sources of the Arthurian legend.

GEORGE, HENRY (1839-1897). American author and economist, and advocate of the single tax; born in Philadelphia. His most important work, *Progress and Poverty*, was published in 1879. *The Science of Political Economy* was published after his death.

GERHARDT, PAULUS or **PAUL** (1607-1676). Next to Luther the greatest of German hymn writers; born in Saxony. Among his best-known hymns are *O sacred head once wounded*, *Commit thou all thy griefs*, and *Jesus, Thy boundless love to me*.

GIBBON, EDWARD (1737-1794). An English historian; born in Putney; studied at Westminster School, Magdalen College, Oxford, and Lausanne. In 1763 he went to Italy, and while sitting amid the ruins of the Capitol at Rome, he conceived the idea of writing the history of the decline and fall of that city. In 1772 he began his celebrated *Decline and Fall of the Roman Empire*, a history of the world for 13 centuries. [See Eng. Lit.]

GILBERT, SIR WILLIAM SCHWENCK (1836-1911). An English dramatist; noted as the author of *Bab Ballads* and librettos of a series of well known popular comic operas set to music by Sir Arthur Sullivan, including *H. M. S. Pinafore*, *The Pirates of Penzance*, *Patience*, *Iolanthe*, *The Mikado*, and *The Gondoliers*.

GILDER, JEANNETTE LEONARD (1849-1916). An American critic and journalist; born at Flushing, N. Y.; wrote *Representative Poems of Living Poets*, *Pen Portraits of Literary Women*, *Essays from the Critic*, *Authors at Home*, *Autobiography of a Tomboy*, and *Taken by Siege*.

GILDER, RICHARD WATSON (1844-1909). An American poet and editor; born in Bordentown, N. J.; wrote *The New Day*, *The Celestial Passion*, *Lyrics*, *Two Worlds*, *The Great Remembrance*, *Five Books of Song*, *For the Country*, *In Palestine and Other Poems*, and *Poems and Inscriptions*.

GISSING, GEORGE (1857-1903). An English novelist. His chief publications are *The Unclassed*, *Thyrza*, *Life's Morning*, *The Emancipated*, *The Odd Woman*, *Eve's Ransom*, *New Grub Street*, *Denzil Quarrier*, *The Whirlpool*, *Charles Dickens*, *Our Friend the Charlatan*, *Demos*, and *The Nether World*.

GIUSTI, GIUSEPPE (1809-1850). A celebrated popular Italian poet and satirist. *Lo stival*, or the history of a boot (Italy), *Gingillino*, *Il Re Travicello*, *Il Brindisi di Girella*, and *Dies Irae* are his most famous works.

GODWIN, MARY WOLLSTONECRAFT (1759-1797). An English writer. She married William Godwin (1797) and became the mother of Mary Godwyn, the future Mrs. Shelley. Among her works are *Vindication of the Rights of Women*, *Thoughts on the Education of Daughters*, *Vindication of the Rights of Men*, and *Posthumous Works*.

GODWIN, PARKE (1816-1904). An American journalist and author; born in Paterson, N. J.; wrote *Out of the Past*, *A Popular View of the Doctrine of Fourier*, *Democracy*, *Civic and Constructive*.

GOETHE, JOHANN WOLFGANG VON (1749-1832). German poet, author, dramatist, scientist, and art critic; one of the world's greatest writers; born at Frankfort-on-the-Main; son of an imperial councilor and of Elisabeth Textor. His life at Frankfort, and the ideal companionship of his mother, had a remarkable influence on his character. His friendship with Kätchen Schönkopf at Leipzig is pictured in his *Die Laune des Verliebten*. While spending a few years at Frankfort to regain his health, he continued his studies and learned much which proved useful in writing *Faust* and *Wilhelm Meister*. At Strassburg he met Herder and Friederike Brion, whose influence may be recognized in *Götz*, *Werther*, *Clavigo*, *Egmont* and *Faust*. He finally removed to Weimar where he lived at the Court of Karl August. At Weimar he became interested in scientific studies and mining, managed the Court Theatre and war department, superintended the roads and bridges, and carried on a very helpful correspondence with Charlotte von Stein. In 1786 he started for Italy, where he studied for several years, some of his best works—*Iphigenie*, *Tasso*, *Faust* and *Egmont*—showing the influence of Italian life. After a close relationship with a woman of Weimar, they were married in 1806. For a time after his return to Weimar he turned his attention to scientific research. In 1794 Goethe met Schiller, and a warm and stimulating friendship developed. During this period he produced several successful novels and ballads. After the death of his wife in 1816, he traveled little and wrote intermittently, completing some of his earlier attempts and producing his *Gespräche*. [See Ger. Lit.].

GOGOL, NIKOLAI VASSILYEVITCH (1809-1852). One of the greatest of Russian writers; born in Poltava; wrote *Evenings at a Farmhouse Near Dikan 'Ka, Mirgorod, Taras Bulba, Old World Proprietors, How the Two Ivans Quarreled, Arabesques, Revizor* (a comedy), and *Dead Souls.*

GOLDONI, CARLO (1707-1793). Italian comedy writer; left about 150 plays, including *La donna di garbo, La bottega del caffè,* and *La locandiera.* [See It. Lit.].

GOLDSMITH, OLIVER (1728-1774). English man of letters; born at Pallas or Pallasmore, Ireland, and celebrated in English literature as the author of the *Vicar of Wakefield;* produced poems, *The Traveller* and *The Deserted Village,* besides comedies, such as *She Stoops to Conquer* and *The Good Natured Man;* lived extravagantly, and died in debt; wrote histories of Greece and Rome, and *Animated Nature.* [See Eng. Lit.].

GOODRICH, SAMUEL GRISWOLD, or **"PETER PARLEY"** (1793-1860). An American author; born in Ridgefield. Conn. His *Peter Parley* books won great popularity. He wrote *Poems, Sow Well and Reap Well, Men and Things I Have Seen.*

GORDON, CHARLES WILLIAM (1860-). Canadian novelist and clergyman; wrote *Black Rock, The Sky Pilot, The Prospector, The Man from Glengarry,* and *Beyond the Marshes.*

GORKY, MAXIM, or **ALEXEI MAXIMOVITCH PYESHKOFF** (1868-). A Russian author. He wrote *Makar Chudra, Foma Gordyéeff, Chelkash, Tales,* and *Orloff and His Wife.* Gorky visited the United States in 1907 in the interests of Russian freedom. His works have been admirably translated by Isabel Hapgood and by R. Nisbet Bain.

GOSSE, EDMUND WILLIAM (1849-1928). An English poet, essayist, and critic; born in London; author of *History of Eighteenth Century Literature,* a collection of lyrics, and a series of monographs, in particular *Life of Gray, Short History of English Literature, Life and Letters of Dr. Donne,* and *An Illustrated History of English Literature.*

GOWER, JOHN (about 1325-1408). An English poet. He wrote three great poems, one each in French, Latin, and English, to which he gave Latin names—*Speculum Meditantis,* long supposed to be lost, but found by G. C. Macaulay in the Cambridge University Library in 1895; *Vox Clamantis,* describes the insurrection of Wat Tyler, and *Confessio Amantis.*

GRAND, SARAH, or **FRANCES ELIZABETH CLARKE** (1862-). An English novelist; born in Ireland, of English parents; married Lieutenant-Colonel McFall when she was only 16. She accompanied her husband to the East, visiting India, China, and Japan. She wrote *Ideala, The Heavenly Twins, Our Manifold Nature, The Beth Book,* and *Babs the Impossible.*

GRANT, GEORGE MONRO (1835-1902). A Canadian author, educator, and orator; born at Albion Mines, N. S.; wrote *Ocean to Ocean, Advantage of Imperial Federation, Our National Objects and Aims,* and *Religions of the World in Relation to Christianity.*

GRANT, ROBERT (1852-). An American author; born in Boston, Mass.; wrote *Unleavened Bread, The Confessions of a Frivolous Girl, The Carletons, An Average Man, Opinions of a Philosopher, Reflections of a Married Man, The Art of Living.*

GRAY, MAXWELL, or properly **M. G. TUTTIETT.** An English novelist; born on the Isle of Wight; wrote *The Silence of Dean Maitland, In the Heart of the Storm, The Lost Sentence, A Costly Freak, House of Hidden Treasure, The World's Mercy, Four-leaved Clover,* and *The Forest Chapel and Other Poems.*

GRAY, THOMAS (1716-1771). An English poet; born in Cornhill, London; produced in 1747 *Ode on a Distant Prospect of Eton College,* and in 1750 his well known *Elegy Written in a Country Churchyard.* These were followed by the Pindaric odes, the *Progress of Poesy* and *The Bard,* finished in 1757. [See Eng. Lit.]

GREELEY, HORACE (1811-1872). An American journalist; born in New Hampshire; wrote *Hints Towards Reforms, Glances at Europe, Overland Journey to San Francisco, The American Conflict, Recollections of a Busy Life,* and *Essays on Political Economy.*

GREEN, JOHN RICHARD (1837-1883). An English historian; born at Oxford. In 1874 he published his *Short History of the English People,* which was speedily adopted in schools, and was widely accepted as one of the ablest summaries of the history of the country. The welcome with which this small work was received induced the author to essay a larger, which he accordingly published in four volumes. This was followed by *The Making of England* and *The Conquest of England.*

GREENE, ROBERT (about 1560-1592). English dramatist and poet; wrote *The Famous History of Friar Bacon, Pandosto, Menaphon,* and *Groat's Worth of Wit.*

GREGORY VII., HILDEBRAND (1020?-1085). Son of a carpenter; born in Soano, Tuscany. Succeeded to the papacy in 1073; his writings are contained in Migne's *Patrologia.*

GRILLPARZER, FRANZ (1791-1872). A popular Austrian dramatist; born at Vienna. His first notable drama was the tragedy *Die Ahnfrau,* the *motif* of which is an extreme fatalism. *Sappho, Das Goldne Vlies,* and many others followed, all of which are marked by dramatic power and lyric grace.

GRIMM, Brothers. **JAKOB LUDWIG** (1785-1863), and **WILHELM KARL** (1786-1859). German authors. The former gained renown as a philologist, producing his *Deutsche Grammatik.* Wilhelm's best-known book is *Die deutsche Heldensage.* Together they wrote *Deutsches Wörterbuch* and *Kinder- und Hausmärchen,* a collection of fairy stories which has made them famous.

GROTE, GEORGE (1794-1871). An English historian. In 1846 appeared the first two volumes of his magnificent *History of Greece.* The remaining ten volumes followed rapidly; the last, published in 1856, terminated with the death of Alexander the Great.

GRUNDTVIG, NIKOLAI FREDERIK SEVERIN (1783-1872). A noted Danish poet and historian. Always a champion of civic and religious freedom, he attempted to secure reforms by establishing a school. He wrote many popular ballads, translations, and essays. [See Scand. Lit.] His son, **SVEND HERSLEB** (1824-1883), was a famous philologist and balladist. *Danmarks gamle Folkeviser,* a work in four volumes, was his best.

GUICCIARDINI, FRANCESCO (1483-1540). Italian historian; wrote *Ricordi Politici e Civili,* and *Reggimento di Firenze.* [See It. Lit.].

GUINEY, LOUISE IMOGEN (1861-1920). An American poet and essayist; born in Boston, Mass.; the daughter of General Patrick R. Guiney; wrote *Songs at the Start, The White Sail and Other Poems, The Martyr's Idyl, Goose-Quill Papers, Monsieur Henri, A Roadside Harp, A Little English Gallery,* and *Patrins.*

GUIZOT (*gee-zo'*), **FRANCOIS PIERRE GUILLAUME** (1787-1874). A French historian. He was minister of the interior, ambassador to Great Britain, and minister of foreign affairs. After the fall of Louis Philippe, Guizot escaped and fled to England. Henceforth he practically retired from public life. Among his numerous works may be mentioned *History of Civilization in France, General History of Civilization in Europe, History of the English Revolution, History of the Origin of Representative Government,* and *Life, Correspondence, and Writings of Washington.*

GUTHRIE, THOMAS ANSTEY, or **F. ANSTEY** (1856-). An English author; born at Kensington. His works include *Vice Versa, The Giant's Robe, The Black Poodle, The Tinted Venus, The Fallen Idol, The Pariah, Voces Populi, The Travelling Companions, Under the Rose, Lyre and Lancet, The Statement of Stella Maberly, Paleface and Redskin,* and *The Brass Bottle.*

HAFIZ or **SHAMS-UD-DIN MOHAMMED** (? - about 1389). One of the world's greatest names in lyrical poetry; lived at Shiraz, Persia. The *Divan* or collection of the writings of Hafiz was made by his friend, Mohammed Gulandam. His *Ghazals* or *Odes,* corresponding in some respects to our sonnet, are the most famous among the Persians.

HAGGARD, HENRY RIDER (1856-1925). An English novelist; born at Norfolk. Among his works are *King Solomon's Mines, She, Elissa, Swallow, Nada, the Lily; The People of the Mist, Jess, Cleopatra,* and *Rural England.*

HAKLUYT (*hak'loot*), **RICHARD** (about 1552-1616). An English geographer and historian; wrote *Divers Voyages Touching the Discovery of America* (1582); *A Particular Discourse Concerning Western Discoveries* (1584), *Principall Navigations, Voiages, and Discoveries of the English Nation.*

HALEVY, LUDOVIC (1834-1908). A French dramatist. From 1852 to 1865 he wrote the librettos for Offenbach's most popular operettas; from 1864 to 1881 wrote comic operas in collaboration with Henri Meilhac; they produced *La belle Hélène,* their first great success,

in 1865; the work on the Cardinal family is the best illustration of his satires. Halévy was elected to the Academy (1886).

HALIBURTON, THOMAS CHANDLER, or "SAM SLICK" (1796-1865). A Canadian humorist; born at Windsor, Nova Scotia; became judge of the Supreme Court (1842); retired (1856) and thereafter resided in England. His *Sam Slick* is the drollery, wit, knowledge of human nature, and successful use of "soft sawder" by a Yankee clock-maker and peddler.

HALLAM, HENRY (1777-1859). An English historian and critic; practised law until 1812; gave ten years of preparation to his first great work, *A View of the State of Europe during the Middle Ages* (1818). Others of his works which have remained standard authorities are *The Constitutional History of England from the Accession of Henry VII. to the Death of George II.*, published in 1827, and the *Introduction of the Literature of Europe in the Fifteenth, Sixteenth and Seventeenth Centuries* (1837-39).

HALLECK, FITZ-GREENE (1790-1867). An American poet; born at Guilford, Connecticut. With Joseph Rodman Drake, he contributed the humorous series of *The Croaker Pavers*, to the New York *Evening Post*.

HANNAY, JAMES (1842-1910). A Canadian journalist and historian; born at Richibucto, N. B.; wrote *History of Acadia, Story of the Queen's Rangers in the American Revolution, History of the Loyalists*, and *Life and Times of Sir Leonard Tilley*.

HARDY, THOMAS (1840-1928). An English novelist; born in Dorset, England. He was brought up as an architect. Among his works are *Tess of the D'Urbervilles, The Woodlanders, Two on a Tower, Far from the Madding Crowd, The Three Strangers, Poems of the Past and Present, A Pair of Blue Eyes*, and *Jude the Obscure*.

HARLAND, HENRY (1861-1905). An American novelist; born in St. Petersburg, Russia; wrote *As It Was Written, Mrs. Peixada, The Yoke of the Thorah, My Uncle Florimond, A Latin Quarter Courtship, Mea Culpa, The Cardinal's Snuffbox*, and *The Lady Paramount*.

HARNACK, ADOLF (1851-). The leading living church historian; born at Dorpat, Russia; wrote *Monasticism: Its Ideals and Its History, The Confessions of Saint Augustine, History of Dogma, The Apostles' Creed*, and *What is Christianity?*

HARRADEN, BEATRICE (1864-). An English novelist; wrote *Ships That Pass in the Night, Things Will Take a Turn, In Varying Moods, Hilda Strafford*, and *The Fowler*.

HARRIS, JOEL CHANDLER (1848-1908). An American author; born at Eatonton, Georgia; studied law; became editor of the Atlanta *Constitution* (1876); his *Uncle Remus* sketches in negro dialect first appeared in this paper in 1880; these were followed by studies of Afro-American folk lore; published a memoir of Henry W. Grady (1890), and a volume on *Georgia from the Invasion of De Soto to Recent Times* (1899).

HARRISON, CONSTANCE CARY, or MRS. BURTON (1846-1920). An American novelist; born at Vaucluse, Va.; married in 1867 to Burton Harrison, a lawyer and private secretary to Jefferson Davis; wrote *Golden Rod, The Anglomaniacs, Sweet Bells Out of Tune, A Daughter of the South, A Son of the Old Dominion, Good Americans, Flower de Hundred*, etc.

HARRISON, FREDERIC (1831-1923). An English essayist; born in London. Among his works are *Meaning of History, Order and Progress, The Choice of Books, Oliver Cromwell, Victorian Literature, Tennyson, Ruskin, Mill, and Other Literary Estimates; John Ruskin*, and *Washington*.

HARRISON, MARY SAINT LEGER, or "LUCAS MALET" (1852-). An English novelist; daughter of Charles Kingsley. Her novels are written with an ethical purpose and include *Mrs. Lorimer, The Wages of Sin, The Carissima, The Gateless Barrier, Sir Richard Calmady*, and *The Far Horizon*.

HARRISON, SUSAN FRANCES (1860-). Canadian author. Wrote *Crowded Out* (stories), *Pine, Rose, and Fleur-de-Lis* (verse), *Canadian Birth-Day Book*.

HART, ALBERT BUSHNELL (1854-). An American historian; born at Clarksville, Pa. His writings include *Introduction to the Study of Federal Government, Formation of the Union, Practical Essays on American Government, Studies in American Education, Source Book of American History*, and *Life of Salmon P. Chase*.

HARTE, FRANCIS BRET (1839-1902). An American humorous poet and novelist; born at Albany, New York; removed to California (1854); entered newspaper work (1857) as compositor in the office of the *Golden Era;* became editor-in-chief of the *Weekly Californian;* was secretary of the United States mint in San Francisco (1864-1867); had been writing sketches which had attracted much attention and in 1868-1870 published *The Luck of Roaring Camp*, and *The Outcasts of Poker Flat;* these with the poem *The Heathen Chinee* (1870), won him a national reputation; was United States consul at Crefeld, Germany (1878-1880), and at Glasgow (1880-1885); his last years were spent in England.

HAUPTMANN, GERHART (1862-). Noted German dramatist; his works are democratic, his later poems of a social altruism.

HAVERGAL, FRANCES RIDLEY (1836-1879). An English religious writer; born at Astley. Her works include *The Ministry of Song, Loyal Responses, Coming to the King*, and *Red Letter Days*. She is best known for her hymn, *Take my life and let it be*.

HAWEIS (*haws*), **HUGH REGINALD** (1838-1901). An English clergyman and author; born in Surrey; served under Garibaldi at the siege of Capua; wrote *Music and Morals, American Humorists, Christ and Christianity, The Broad Church, Travel Talk*, and *Old Violins*.

HAWKINS, ANTHONY HOPE (1863-). An English novelist writing under the name "Anthony Hope"; born in London. Among his best known works are *A Man of Mark, The Prisoner of Zenda, Phroso, The Dolly Dialogues, Quisanté, The Intrusions of Peggy, Rupert of Hentzau*, and *The King's Mirror*.

HAWTHORNE, JULIAN (1846-). An American novelist and journalist, son of Nathaniel. Among his works are *Garth, Noble Blood, The Professor's Sister, A Fool of Nature*. He also wrote *Saxon Studies, Nathaniel Hawthorne and His Wife, American Literature*, and *A History of the United States*.

HAWTHORNE, NATHANIEL (1804-1864). American novelist; born at Salem, Massachusetts. *Twice-told Tales* was the first production by which he won distinction. After the publication of *Twice-told Tales* he spent some months at Brook Farm, leaving which he married and took up house at Concord. From 1848 to 1850 he held a state appointment, and in his leisure hours wrote his *Scarlet Letter*, which appeared in the latter year and established his fame as a master of literature. This was followed by *The House of Seven Gables, The Snow Image, The Blithedale Romance*, and later by *The Marble Faun* and *Our Old Home*.

HAYNE, PAUL HAMILTON (1831-1886). An American poet; born in Charleston, S. C. At first a lawyer, he turned to journalism, and in 1855 his maiden volume of verse appeared. His works include *Legends and Lyrics, The Mountain of the Lovers*, and *Complete Poetical Works* (1882).

HAZELTINE, MAYO WILLIAMSON (1841-1909). An American journalist and reviewer; born in Boston, Mass.; wrote *Chats about Books, Poets, and Novelists;* but he is most widely known for his masterly reviews in the New York *Sun*.

HAZLITT, WILLIAM (1778-1830). An English critic. He wrote *On the Principles of Human Action, Lectures on the Dramatic Literature of the Reign of Queen Elizabeth, Round Table*, and *Characters of Shakespeare's Plays*. Robert Louis Stevenson said of him: "Though we are mighty fine fellows nowadays, we cannot write like Hazlitt."

HEADLEY, JOEL TYLER (1813-1897). An American prose writer; born in Walton, N. Y. His writings, such as *Washington* and *Chaplains of the Revolution*, contain much valuable information about early American history.

HEARN, LAFCADIO (1850-1904). An American author; born in the Ionian Isles; wrote *Chita, Two Years in the French West Indies, Youma or The Story of a West Indian Slave, Out of the East, Hints and Echoes of Japanese Inner Life, Gleanings in Buddha Fields, Shadowings*, and *Kotto*.

HEAVYSEGE, CHARLES (1816-1876). A Canadian poet; born in Liverpool, England; a cabinetmaker in Canada (1853); afterwards a journalist on the staff of the Montreal *Witness;* wrote *The Revolt of Tartarus*, a volume of sonnets, a three part tragedy entitled *Saul, Count Filippo or The Unequal Marriage, The Dark Huntsman, The Owl, Jephthah's Daughter*, and a novel entitled *The Advocate*.

HECATAEUS (flourished 500 B. C.). A Greek writer; the most important of the logographers; wrote *Genealogies* and *Tour of the World*, which contains a map probably based on that of Anaximander.

HECTOR, ANNIE (FRENCH), or MRS. ALEXANDER (1825-1902). An Irish novelist; born in Dublin; wrote *The Wooing O't, Her Dearest Foe, By Woman's Wit, Mona's Choice, A Life Interest, A Winning Hazard,* and *Barbara: Lady's Maid and Peeress.*

HEINE, HEINRICH (1797-1856). The greatest lyric poet of Germany; born of Jewish parents in Düsseldorf. In 1831 he settled in Paris, supported himself by his literary labors, and dwelt there till his death. From 1837 to the overthrow of Louis Philippe in 1848 he enjoyed a pension of $800 from the French government. As a poet Heine is remarkable for the simplicity and pathos of many of his lyric pieces. He collected them in *The Book of Songs;* wrote *Romanzero, Pictures of Travel, The Romantic School,* and *Atta Troll.* His works are published in 21 volumes. [See Ger. Lit.].

HELPS, SIR ARTHUR (1813-1875). An English essayist; born in Surrey; edited the speeches of the prince consort for Queen Victoria (1862); prepared for the press her *Highland Journals* (1868-1869); wrote *Las Casas, Columbus, Pizarro, Cortez,* and *The Spanish Conquest in America.* His *Essays,* particularly *Friends in Council,* have gained his greatest fame.

HEMANS, FELICIA DOROTHEA (BROWNE) (1793-1835). An English poet; born in Liverpool. She was the author of a number of works, the best of her productions being lyrics. Among them are *The Forest Sanctuary,* which included the well known "Casabianca"; *Records of Women, Hymns for Childhood, National Lyrics and Songs for Music,* and *Scenes and Hymns of Life.*

HENLEY, WILLIAM ERNEST (1849-1903). An English author; a collaborator with Robert Louis Stevenson for 13 years (1874-1887). Together they wrote the plays *Deacon Brodie, Beau Austin, Admiral Guinea,* and *Robert Macaire;* alone he wrote *Views and Reviews, Literature; Views and Reviews, Painting and Sculpture; London Voluntaries, London Types, For England's Sake, Hawthorn and Lavender,* and *Poems.*

HENTY, GEORGE ALFRED (1832-1902). An English author; born in Cambridgeshire; served in the army in the early part of the Crimean War; war correspondent of the London *Standard* in various campaigns; wrote numerous popular historical novels for boys, including *All but Lost, The Tiger of Mysore, To Herat and Cabul, With Roberts to Pretoria, The Treasure of the Incas, With the British Legion,* and *With Clive in India.*

HERBERAY DES ESSARTS (? -1552). French translator, called "the founder of the heroic romance in France."

HERBERT, GEORGE (1593-1633). An English poet; was the author of poems entitled *The Temple* and a prose work entitled *The Country Parson.* A charming life of Herbert was written in 1670 by Izaak Walton.

HERDER, JOHANN GOTTFRIED VON (1744-1803). A German author. His greatest work is his *Ideas on the Philosophy of the History of Man.*

HEREDIA Y CAMPUZANO, JOSE MARIA DE (1803-1839). Cuban lyric poet, the first of the patriotic group. Wrote also the valuable *Lecciones de historia universal.*

HEROD'OTUS (484-424 B. C.). The "Father of History"; born at Helicarnassus, in Caria; traveled in Asia Minor, Egypt, and Syria, and in his old age recorded with fidelity the fruits of his observations and inquiries. His chief work was on Xerxes' invasion of Greece, in nine books. [See Gr. Lit.].

HERRERA, FERNANDO DE (1534-1597). Spanish poet, chief of the "Seville" school of lyric poetry. His masterpiece is *Por la vitoria de Lapanto.*

HERRICK, ROBERT (1591-1674). An English poet; a collection of his poems entitled *Hesperides* and *Noble Numbers* appeared in 1648; the songs *Gather Ye Rosebuds While Ye May* and *Cherry Ripe* are examples of lyrical art in English; after his death his fame declined and his works were neglected. His fame revived in the nineteenth century.

HERTZ, HENRIK (1798-1870). A Danish dramatist and poet; born in Copenhagen, of Jewish extraction. His *King René's Daughter* (1845) won him universal recognition, and has been translated into English by Sir Theodore Martin (1850).

HESIOD (flourished about 750 B. C.). One of the earliest Greek poets; born in Ascra, Boeotia. [See Gr. Lit.]

HEWLETT, MAURICE HENRY (1861-1923). An English novelist. His reputation as a writer is assured by his novel, *The Forest Lovers;* his short stories, *Madonna of the Peach Tree* and *The Duchess of Nona* in *Little Novels of Italy,* and *New Canterbury Tales.*

HEYSE, PAUL (1830-1914). Noted German writer of short stories, poems, and dramas.

HEYWOOD, THOMAS (?1575-?1650). English poet and author, the most prolific playwright of the period. His best production is *A Woman Killed with Kindness.*

HICH'ENS, ROBERT SMYTHE (1864-). An English novelist. His *Green Carnation* (1894) was published anonymously and created a literary sensation. Other of his novels are *An Imaginative Man, Flames, The Slave, Tongues of Conscience,* and *Felix.*

HIGGINSON, THOMAS WENTWORTH (1823-1911). Author and essayist; born in Cambridge, Mass. His works include *History of the United States, Memoir of Longfellow, Life of Margaret Fuller, Short Stories of American Authors, English History for Americans.* also many essays, in which he was at his best.

HILDRETH, RICHARD (1807-1865). An American historian; born at Deerfield, Mass. Besides *The Slave* (1837) he published other books on the social aspects of slavery; his most noteworthy effort was the *History of the United States,* in six volumes (1849-1856).

HOBBES, JOHN OLIVER, or PEARL RICHARDS CRAIGIE (1867-1906). An English novelist; born in Boston, Mass. Taken to England in childhood. She wrote *The Sinner's Comedy, A Study in Temptations; The Gods, Some Mortals, and Lord Wickenham; A Bundle of Life, Robert Orange, The Serious Wooing,* and *Love and the Soul Hunters.*

HOFFMAN, AUGUST HEINRICH (1798-1874). German philologist and poet. Wrote *Alemannische Lieder, Jägerlieder, Reineke Vos, Deutsche Philologie.*

HOFFMANN, ERNST TEODOR AMADEUS (1776-1822). German romantic novelist. His most noted works are *Die Elixire des Teufels* and *Lebensansichten des Katers Murr.*

HOGG, JAMES (1770-1835). A Scotch poet, known as the "Ettrick Shepherd." After receiving a very scanty education he began to earn his bread by daily labor as a shepherd. The appearance of *The Queen's Wake* in 1813, with its charming ballad of Kilmeny, established Hogg's reputation as a poet. Among his poems and songs are *When the Kye Come Hame* and *Flora Macdonald's Farewell.*

HOLBERG, LUDWIG (1684-1754). A Danish poet, novelist, and historian. His works are of four classes —poems, stage pieces, philosophical treatises, and historical works. His poems are chiefly satirical. His best works are *Henrik and Pernille* and *Subterranean Journey of Niels Klim.* He is known as "the father of Danish comedy." [See Scand. Lit.].

HOLLAND, JOSIAH GILBERT (1819-1881). An American author; born in Belchertown, Mass. He became assistant editor of the Springfield *Republican,* of which he was part proprietor from 1851 to 1866; wrote the novels *Bay Path, Seven-oaks, Nicholas Minturn,* and *Arthur Bonnicastle;* the poems *Bitter Sweet, Kathrina,* and *Garnered Sheaves.*

HOLMES, OLIVER WENDELL (1809-1894). A celebrated American author, son of a Unitarian minister; became professor of anatomy and physiology at Dartmouth College, but resigned and settled in Boston as a general practitioner. In 1847 he was elected to the chair of anatomy in Harvard, a position he held till 1882. A successful professor, it is as an essayist, novelist, and poet that he is remembered. The appearance of *The Autocrat of the Breakfast-Table,* with its quaint humor, fresh thought, and charming egotism took literary America by storm. The *Professor* and the *Poet at the Breakfast-Table* followed in after years and remain his most widely popular works. *Elsie Venner, The Guardian Angel, Songs of Many Seasons, Memoirs of Motley and of Emerson* are some of his many works, all of which bear the impress of his personality.

HOMER (flourished about 1000 B. C.). The great epic poet of Greece and the greatest of all time; author of the *Iliad* and the *Odyssey;* is said, when old and blind, to have wandered from city to city rehearsing his verses. It is only modern criticism that has called in

question his existence, and has ventured to argue that the poems ascribed to him are a mere congeries of compositions of the fabulous age of Greece, but the unity of the plan and the simplicity of the style of the poems go to condemn this theory. [See Gr. Lit.].

HOOD, THOMAS (1799-1845). An English poet and humorist. From 1829 to 1837 he conducted his *Comic Annual*. He contributed to *Punch* during his last illness *The Song of the Shirt, The Bridge of Sighs,* and *The Lay of a Laborer*. Hood is unrivaled as a punster, and he possesses a singular power of combining the humorous with the pathetic. His best comic poem is *Miss Kilmansegg*.

HOOKER, RICHARD (about 1553-1600). An English clergyman; the author of the most famous treatise on the constitution of the Church of England, the celebrated *Laws of Ecclesiastical Polity*.

HORACE or **QUINTUS HORATIUS FLACCUS** (65-8 B. C.). A Latin lyric poet. The talent which he had displayed procured him the friendship of two eminent poets, Vergil and Varius, and to them he was indebted for his first acquaintance with Maecenas, a refined man of the world. Nine months after, Maecenas received Horace into the circle of his intimate friends and after some years presented him with the Sabine estate which Horace so often mentions in his poems. It was sufficient to maintain him in ease and comfort during the remainder of his life. Horace wrote the *Odes, Epodes, Satires,* and *Epistles*.

HORNE, RICHARD HENGIST (1803-1884). An English poet and miscellaneous author. He wrote *Orion: a Tragic Poem*, his best work, and two tragedies, *Cosmo de Medici* and *The Death of Marlowe*.

HOVEY, RICHARD (1864-1900). An American poet; born at Normal, Ill; wrote *Launcelot and Guenevere, Quest of Merlin, The Marriage of Guenevere, The Birth of Galahad, Taliesin, Songs from Vagabondia* in collaboration with Bliss Carman, and *Along the Trail*.

HOWARD, HENRY, EARL OF SURREY (about 1517-1547). English soldier and poet: introduced into the language blank verse and the sonnet of three quatrains and a couplet.

HOWE, JULIA WARD (1819-1910). An American poet; married Dr. Samuel G. Howe, noted for his labors in the education of the blind; wrote *Passion Flowers, Words for the Hour, Later Lyrics,* including *Battle Hymn of the Republic;* two dramas, *The World's Own* and *Hippolytus; Life of Margaret Fuller,* and *Reminiscences*.

HOWELLS, WILLIAM DEAN (1837-1920). An American author; born in Martins Ferry, Ohio. From 1861 to 1865 he resided in Venice as United States consul. Soon after his return appeared a series of papers under the title *Venetian Life,* followed by a similar volume, *Italian Journeys*. He was assistant editor of the *Atlantic Monthly* during 1866-1871, and editor in chief from 1871 till his resignation in 1881. He is seen at his best in the *Rise of Silas Lapham* and *A Hazard of New Fortunes*. His has been the most influential work in American literature during the last 30 years.

HUBBARD, ELBERT (1859-1915), American author and lecturer, who went down on the *Lusitania*, is best known as the editor of the *Philistine* and *Little Journeys*. Estab. Roycroft shops at East Aurora, N. Y.

HUGHES, THOMAS (1823-1896). An English judge, author, and philanthropist. As an author, Thomas Hughes is doubtless best known by his first work, *Tom Brown's School Days,* published in 1856, which has gone through many editions and been translated into several languages. He wrote also *Alfred the Great* and *Tom Brown at Oxford*.

HUGO, VICOMTE VICTOR MARIE (1802-1885). A distinguished French poet and man of letters; born in Besançon, France. His father was a general in the French army. In 1822 he brought out the first volume of his *Odes and Ballads*. Hugo, who published a number of dramatic pieces of various merit, was, after much opposition, admitted into the Academy in 1841. On the *coup d'état* of December 2, 1851, Hugo, then a member of the legislative assembly, was among those deputies who vainly attempted to assert the rights of the assembly and to propose the constitution. His conduct led to his proscription. He took refuge in the island of Jersey, and subsequently in that of Guernsey, having steadfastly refused to avail himself of the general amnesties issued in 1859 and in 1869. His trenchant satire, *Napoleon the Little,* appeared at Brussels in 1852, and was rigorously suppressed in France, into which country it had been smuggled. On the fall of the empire in 1870 he returned to France, was elected to the National Assembly, but soon resigned and repaired to Brussels, whence he was expelled by the government on account of the violence of his political writings and his sympathy with the Communists. Returning to Paris he was elected a senator for life in 1876. *Notre Dame de Paris, Les Misérables, Ninety-three* are his great novels. His best lyric verses are found in *The Terrible Year,* treating patriotically the French disaster of 1870-1871. [See Fr. Lit.].

HUME, DAVID (1711-1776), Scottish historian and philosopher. In 1751 appeared at Edinburgh his *Inquiry Concerning the Principles of Morals*. In 1754 he published the first volume of his *History of England,* his best work, which he did not complete till 1762. [See Eng. Lit. and Ethics.]

HUNT, JAMES HENRY LEIGH (1784-1859). An English poet and essayist. He was the personal friend of Byron, Shelley, Keats, Lamb, and Coleridge. The *Story of Rimini* is his longest and perhaps his best known poem. He wrote also *Palfrey* and *Abou ben Adhem*. His *Imagination or Fancy* contains the familiar essay *What is Poetry?* and his *Men, Women, and Books* is a charming collection of miscellany.

IBSEN, HENRIK (1828-1906). A Norwegian novelist and dramatist; born in Skien, Norway. His youth was passed in extreme poverty. His attention was turned to dramatic writing and he produced *The Banquet at Solhaug, The Vikings at Helgeland, Love's Comedy, Ghosts, A Doll's House, When We Dead Awaken, The Pillars of Society, The Wild Duck,* etc. In 1857 he became artistic director of the Norwegian Theater at Christiania. [See Scand. Lit.].

INGELOW, JEAN (1820-1897). An English poet and story writer. Her first published work appeared anonymously in 1850, but not till the publication of *Poems* in 1863 did Miss Ingelow become famous. This volume won the enthusiastic praise of critics. She wrote a great many poems and novels, among which are *Poems of Old Days and New, Off the Skelligs, Mopsa,* and *Stories Told to a Child*.

INGERSOLL, ROBERT GREEN (1833-1899). An American lawyer; born in Dresden, N. Y.; wrote *The Gods and Other Lectures, Great Speeches, Lectures Complete,* and *Prose Poems and Selections*.

IRELAND, WILLIAM HENRY (1777-1835). A Shakespearean forger; born in London; wrote a remarkable series of forgeries which deceived many scholars. They included legal documents, verses, and letters purporting to be Shakespeare's, and two plays, *Vortigern* and *Henry II*. He confessed in 1805.

IRVING, WASHINGTON (1783-1859). An American author; born in New York, where his father had emigrated from Scotland before the Revolution. He was originally educated for the legal profession, but his tastes were all in the direction of literature, in which field he made his first appearance by the publication, in 1802, of the *Letters of Jonathan Oldstyle,* in the New York *Morning Chronicle*. In December, 1809, appeared his celebrated *History of New York, by Diedrich Knickerbocker*. In May, 1815, he embarked for England, where he commenced in 1818 the series of papers entitled *The Sketch-Book,* which was published in New York and London. Up to 1832 Mr. Irving continued to reside in Europe. During this period were composed some of his most famous literary works. He wrote also *Alhambra, Christopher Columbus, Bracebridge Hall, Washington, Conquest of Granada, The Rocky Mountains, Wolfert's Roost, Goldsmith,* and *Mahomet*.

JACKSON, HELEN FISKE HUNT (1831-1885). An American author; wrote under the pen name of "H. H."; born in Amherst, Mass. She wrote *Ramona, A Century of Dishonor* (a plea for better treatment of the Indians), *Mercy Philbrick's Choice, Hetty's Strange History,* and several poems, among them *Sonnets and Lyrics*. *Habeas Corpus* is one of the finest American lyrics.

JAMES, GEORGE PAYNE RAINSFORD (1801-1860). An English novelist; wrote about 60 novels. The best examples of his style are perhaps *Richelieu Philip Augustus, Henry Masterton, Mary of Burgundy, Darnley, Corse de Léon, The Smuggler*.

JAMES, HENRY (1843-1916). An American novelist and essayist; born in New York. From 1869 until 1907 he made his home in England. Among his works are *The Bostonians, The Sacred Fount, What Maisie Knew, The Wings of a Dove, The Better Sort, The Soft Side, The Awkward Age, In the Cage, Washington Square, Daisy Miller, Roderick Hudson*. His published works number over 40 volumes. His writings are

marked by an elusiveness of thought and complexity of style only thoroughly appreciable by a reader of marked intuition.

JAMI, NUR-ED-DIN ABDUR RAHMAN (1414-1498). A romantic, lyric, and mystic Persian writer, the last of the great Sufi poets; most famous work is *Haft Aurang*, a collection of seven poems; composed three *Diwans*, collections of lyrics and odes; *Baharistan* in his well-known prose work.

JEROME, JEROME KLAPKA (1859-1927). An English humorous writer; wrote *On the Stage—and Off, Stage Land, Barbara, Sunset, Idle Thoughts of an Idle Fellow, Three Men in a Boat, Diary of a Pilgrimage, John Ingerfield, Sketches in Lavender, Observations of Henry*, and *Paul Kelver*.

JERROLD, DOUGLAS WILLIAM (1803-1857). An English humorist; one of the most brilliant wits of his day. He wrote about 40 plays, *Black-Eyed Susan* being his chief success; joined the staff of *Punch*, in which first appeared the *Caudle Lectures*.

JEVONS, WILLIAM STANLEY (1835-1882). An English economist; born at Liverpool; wrote *Treatise on Logic, Theory of Political Economy, Money and the Mechanism of Exchange*, and *Coal Question*.

JEWETT, SARAH ORNE (1849-1909). An American writer; born in South Berwick, Me. Her best work portrays New England character. Among her works are *Deephaven, Play Days, Old Friends and New, The Mate of the Daylight, A Country Doctor, A Marsh Island, A White Heron, The King of Folly Island, The Life of Nancy*, and *The Country of the Pointed Firs*.

JODELLE, ETIENNE (1532-1573). French dramatist. Wrote *Cléopâtre, Dido, Eugène*.

JOHN OF SALISBURY (about 1120-1180). An English scholar and churchman; for 30 years the central figure of English learning; wrote *Policraticus sive de nugis Curialium et Vestigiis Philosophorum, Metalogicus, Vita et Passio Sancti Thomæ, Entheticus, Vita Sancti Anselmi*, and *Historia Pontificalis*.

JOHNSON, E. PAULINE (1862-1913). A Canadian poet; born at Chiefswood, Ontario; daughter of George Henry M. Johnson, chief of the Mohawk Indians, and Emily S. Howells of Bristol, England; wrote a volume under the title of *The White Wampum*.

JOHNSON, ROSSITER (1840-). An American author and editor; born at Rochester, N. Y.; wrote *Phaeton Rogers, Idler and Poet, A History of the French War*, and *A History of the War of Secession*.

JOHNSON, SAMUEL (1709-1784). One of the most distinguished English writers; born in Lichfield, England, where his father, Michael Johnson, was a bookseller. Among many great works the most useful to mankind was his *Dictionary*. In 1759 he wrote his celebrated romance of *Rasselas, Prince of Abyssinia*, which fine production he composed in the evenings of one week in order to defray the funeral expenses of his aged mother. At length, in 1762, the Bute administration granted nim a pension of $1,500 per annum, which he accepted after a short struggle against the reception of a favor from the house of Hanover. The concluding portion of Johnson's life was saddened by the loss of many old friends and by declining health. His remains were interred in Westminster Abbey with great solemnity. His statue has been placed in St. Paul's. Among his works are *Lives of the Poets, The Rambler*, and *The Vanity of Human Wishes*. [See Eng. Lit.]

JOHNSTON, MARY (1870-). An American novelist; born at Buchanan, Va.; wrote *Prisoners of Hope, To Have and to Hold*, and *Audrey*.

JOINVILLE, JEAN, SIRE DE (1224-1317). French historian, remembered particularly for his *Histoire de Saint Louis*.

JO'KAI (*yo'ko-i*), **MAURUS** (1825-1904). A Hungarian novelist; born in Komorn. He wrote almost 300 volumes, comprising novels, dramas, poems, including *The New Landlord, There is No Devil, Love's Fools*, the drama *Milton*, and *History of Hungary*.

JONES, SIR WILLIAM (1746-1794). An English orientalist, jurist, and man of letters; wrote a *Life of Nadir Shah, Persian Grammar, Poeseos Asiaticae Commentariorum Libri Sex, Essay on the Law of Bailments*, translations of *Sakuntala*, and *Ordinances of Manu*.

JONSON, BEN (1573-1637). An English dramatist; born at Westminster; was in his youth first a bricklayer, afterwards a soldier in the Netherlands, whence he returned about 1592; married a shrew and became connected with the stage. He was one of the most learned men of his age, and for 40 years the foremost, except Shakespeare, in the dramatic and literary world. Killing his challenger in a duel nearly cost him his life in 1598. He was branded on the left thumb, imprisoned, and his goods confiscated. In prison he turned Catholic, but 12 years later reverted to Protestantism. For 10 years after Shakespeare's death he produced no dramas. He died in poverty, but was buried in Westminster Abbey. He wrote at least 16 plays, among them *Every Man in His Humour*, in which Shakespeare acted; *The Poetaster*, the tragedy of *Sejanus, The Silent Woman*, a comedy; and his best work, *The Alchemist*. [See Eng. Lit.]

JORDANES (flourished 550). A Latin historian; wrote *De Rebus Geticis* or *Getica*, a work of the highest importance on the early history of the Goths.

JOSEPHUS, FLAVIUS (about 37-about 102). A famous Jewish historian; wrote *History of the Jewish War, Jewish Antiquities*, and *Apology* for the Jews against Apion.

JOUBERT, JOSEPH (1754-1824). French philosopher, author of *Pensées*.

KALIDA'SA (flourished about 500?). A great Indian dramatist and poet; was the author of *The Lost Ring*, translated by Sir William Jones, and much praised by Goethe and Max Muller, and *The Hero and the Nymph*.

KARAMZIN', NIKOLAI MIKHAILOVITCH (1766-1826). A Russian historian and author. His first work was *Letters of a Russian Traveler*, which gained him a high reputation. It was followed by his *History of Russia*. [See Rus. Lit.]

KEATS, JOHN (1795-1821). An English poet; born in London, England. The first poems Keats published in 1817 were dedicated to Leigh Hunt. In the next year he published *Endymion*, a poetical romance, and in 1820 *Lamia*, and other poems. He died in Rome. Shelley lamented his poet friend in the beautiful and well known *Adonais*. [See Eng. Lit.]

KEBLE, JOHN (1792-1866). An English poet; born in Fairford, Gloucestershire, England. Of his great work, *The Christian Year*, hundreds of thousands of copies have been sold, and from its profits the author built one of the most beautiful parish churches in England. He translated parts of the *Library of the Fathers*, and wrote seven *Tracts for the Times*.

KEM'PIS, THOMAS A' (1380-1471). A German mystic; born in Kempen (whence his name, "Thomas from Kempen"), near Cologne. His true name was Hamerken. He was author of the *Imitation of Christ*.

KERNIGHAN, ROBERT KIRKLAND (1857-). A Canadian poet; known as "The Khan," author of songs and patriotic and humorous verse, including "Men of the Northern Zone," and "Canada First."

KEY, FRANCIS SCOTT (1780-1843). An American poet; born in Frederick County, Md. He was a lawyer by profession. Being detained on one of the British ships during the bombardment of Fort McHenry, September 14, 1814, he composed the words of *The Star-Spangled Banner*. The words were sung to the tune of *Anacreon in Heaven*.

KHERASKOFF, MIKHAIL MATVEYEVITCH (1733-1807). A Russian poet; "the dean of Russian literature"; born in Poltava. His chief work is the *Rossyada*, an epic which describes, on the plan of the *Aeneid*, the invasion of Kazan by Ivan the Terrible.

KIELLAND, ALEXANDER LANGE (1849-1906). Norwegian author, satirical and epigrammatic. Won notice by his *Garman og Worse*.

KINGLAKE, ALEXANDER WILLIAM (1809-1891). An English historian; wrote *Eothen*, descriptive of a tour in the Orient, and *The Invasion of the Crimea*, in eight volumes (1863-1887).

KINGSFORD, WILLIAM (1819-1898). Canadian historian, author of *Canadian Archaeology* and a valuable *History of Canada*.

KINGSLEY, CHARLES (1819-1875). An English author; born at Holne vicarage, near Dartmoor; was the author in 1848 of a drama entitled *The Saint's Tragedy*, with St. Elizabeth of Hungary for heroine, which was followed successively by *Alton Locke, Yeast, Hypatia*, and *Westward Ho!* and besides other works, including *Two Years Ago, Water Babies*, and *Hereward the Wake;* he was the author of the popular ballads of *The Three Fishers, The Starlings*, and *The Sands o' Dee*. Written up under social reformers.

KINGSTON, WILLIAM HENRY GILES (1814-1880). An English novelist and writer of books for boys; wrote *The Circassian Chief, Peter the Whaler, The Fireships, Ben Burton, The Three Midshipmen,*

The Three Lieutenants, The Three Commanders, The Three Admirals, and many historical works.

KIPLING, (JOSEPH) RUDYARD (1865-). An English author; born in Bombay. He was educated in England, and in 1882 went to India and joined the staff of the *Civil and Military Gazette*, Lahore, for which paper his early tales were written. He depicts Anglo-Indian and military life. Among his works are the novels *The Light That Failed, Soldiers Three, Stalky and Co.*, and *Kim*, whose wonderful revelation of India marks it as his best romance; *The Recessional, Barrack Room Ballads, White Man's Burden*, and *Departmental Ditties*, which include his best poetry, and two *Jungle Books*, give a highly imaginative picture of the older India.

KIRBY, WILLIAM (1817-1906). Canadian author, whose *Le Chien d' Or* is one of the best Canadian romances. Wrote also poems and dramas.

KLEIST, HEINRICH VON (1777-1811). German dramatist and poet. His *Broken Pitcher* is considered by some the best one act comedy of Germany.

KLOPSTOCK, FRIEDRICH GOTTLIEB (1724-1803). German poet; born at Quedlinburg; distinguished as the author of an epic poem entitled the *Messiah*, the publication of which did much to enrich the poetic vocabulary of Germany. [See Ger. Lit.]

KORNER, KARL THEODOR (1791-1813). German poet and dramatist, famous for his songs, collected as *Leier und Schwert*.

KOTZEBUE, AUGUST FRIEDRICH FERDINAND VON (1761-1819). A German dramatist. Of about 200 tragedies, comedies, dramas, and farces, the best known now is *Misanthropy and Repentance*, reproduced in Paris as late as 1862, and famous in the United States and England in Sheridan's adaptation entitled *The Stranger*.

KRASINSKI, ZYGMUNT, COUNT (1812-1859). One of the greatest of Poland's poets; born in Paris; published *Undivine Comedy, Irydion, Dawn*, and *Psalms of the Future*.

KRASZEWSKI, JOSEPH IGNACY (1812-1887). Polish historian, novelist, and poet; published over 350 titles, chiefly fiction. *Anafielas* is his best poetical work.

KYD, THOMAS (about 1557-about 1595). English dramatist. Wrote *Jeronimo* and *The Spanish Tragedy*.

LABERIUS, DECIMUS (105-43 B. C.). A famous Roman writer of farces. Only fragments of his works remain.

LA BRUYERE, JEAN DE (1645-1696). A French essayist; born in Paris; tutor to the grandson of the great Condé, and court attendant; wrote *Caractères*, some translations, his *Discours*, and a few *Letters*.

LA FONTAINE, JEAN DE (1621-1695). A French poet and fabulist. *Contes et Nouvelles en vers* written 1665 to 1683, and *Fables*, 1668 to 1671, made him one of the most popular writers in France.

LAMARTINE, ALPHONSE DE (1790-1869). An eminent French historian, poet, orator, and statesman; wrote *Méditations poétiques, Nouvelles meditations, Jocelyn, La chute d'un ange, Recueillements, Harmonies poétiques et religieuses, Histoire des Girondins*, and others, which fill 40 volumes.

LAMB, CHARLES (1775-1834). A brilliant English essayist. In 1796 and 1797 some short poems by him appeared along with others by Coleridge, and in 1798 he published a volume of poems in conjunction with his friend, Charles Lloyd. It met with little success. Nor was his tale of *Rosamund Gray* much more favorably received. Under the name of *Elia* a series of his essays has been frequently republished in a collected form since 1823; latterly along with *Last Essays of Elia*, first published in 1833. Here, in a style ever happy and original, and with humor of the rarest and most pungent description, he has carried the short essay to a point of excellence perhaps never before attained.

LAMENNAIS, HUGUES FELICITE' ROBERT DE (1782-1854). French religious and political writer. His *Essai sur l' indifférence en Matière de religion*, was a masterpiece of philosophy and served to make him known over Europe. The greater part of his works were aimed against monarchy and the Papacy.

LAMPMAN, ARCHIBALD (1861-1899). A Canadian poet; born in Morpeth, Ontario; wrote *Among the Millet and Other Poems* and *Lyrics of Earth*.

LANDON, LETITIA ELIZABETH (1802-1838). An English author. She wrote several volumes of verse, under the initials "L. E. L.," which include her first poem, *Rome*, and the *Improvisatrice*. The best of her three novels is *Ethel Churchill*.

LANDOR, WALTER SAVAGE (1775-1864). An English poet. In 1824 he took up his abode in Florence, where he resided for several years, and where many of his works were written. His principal poetical works are *Hellenics, Poems and Inscriptions, Dry Sticks*, and *Last Fruit off an Old Tree*. His most important prose work is the *Imaginary Conversations of Literary Men and Statesmen*.

LANG, ANDREW (1844-1912). Scotch critic, poet, humorist, and anthropologist; most versatile writer of his day. His writings include prose renderings of the *Odyssey, Iliad, The Making of Religion, History of Scotland, Letters on Literature, Letters to Dead Authors, Essays in Little, Cock-Lane and Common Sense, Adventures Among My Books*, the *Red, Blue, Green, Yellow*, and *Pink Fairy Books*; verse, both grave and gay, *Ballades in Blue China, Grass of Parnassus*, and *Helen of Troy*; biographies of J. G. Lockhart and Tennyson.

LANGLAND, WILLIAM (about 1332-about 1400). An English poet. His great poem is *Piers Plowman*, an allegory of life written in the alliterative or head-rhyme measure. Langland was, next to Chaucer, the greatest English poet of the fourteenth century.

LANIER, SIDNEY (1842-1881). An American poet; born at Macon, Ga. The poems *Corn*, one of his earliest pieces, and *The Marshes of Glynn* show insight into nature. He wrote also several works in prose, mostly pertaining to literary criticism. Among the former are *The Science of English Verse* and *The English Novel and the Principles of its Development*. His fame is steadily growing, and he is coming to be regarded as the greatest American poet of the last quarter of the nineteenth century.

LARCOM, LUCY (1826-1893). An American poet; born in Beverly, Mass. In her youth, a factory girl in Lowell, Mass. Her later life was mainly devoted to literary work. She wrote stories and four or five volumes of poetry, among which were *Ships in the Mist* and *The Sunbeam*.

LA ROCHEFOUCAULD, FRANCOIS (1613-1680). French moralist and satirist. In 1665 was published his *Maximes*, or *Reflexions ou sentences et Maximes morales*, which are unsurpassed in literary excellence. His *Memoires* were published in a complete form in 1817 and his *Lettres in* 1818.

LAROUSSE (*lah-roos'*), **PIERRE** (1817-1875). A celebrated French grammarian and lexicographer; best known by his *Grand dictionnaire universel du XIXe siècle*. This work is kept up to date by a weekly *Revue Encyclopédique*, and there is published in connection with it a small and popular *Dictionnaire complet illustré*.

LA SALLE, ANTOINE DE (1398-1461?). French satirist and prose narrator. His works include *La salade* and the compilation, *Cent nouvelles nouvelles*.

LATHROP, GEORGE PARSONS (1851-1898). An American journalist and poet; born in the Sandwich Islands; wrote *Rose and Roof Tree, Study of Hawthorne, Afterglow, A Masque of Poets, An Echo of Passion, In the Distance, Spanish Vistas, Newport, Gold of Pleasure*, and *Dreams and Days*.

LAVATER (*lah-vah-tair'*), **JOHANN CASPAR** (1741-1801). Swiss physiognomist and mystic; born in Zurich; wrote *Schweizerlieder, Aussichten in die Ewigkeit*, and *Physiognomische Fragmente*.

LAYAMON (about 1200). An early English writer of the *Brut*, a metrical or rhymed chronicle of events in England. He was a priest at Ernley on the Severn. He derived much of his information from Wace's *Roman de Brut*, which in turn was founded upon Geoffrey of Monmouth's *History of the British Kings*. The *Brut* contains 32,243 short lines in which both alliterative or head-rhyme and assonance or end-rhyme are employed.

LECKY, WILLIAM EDWARD HARTPOLE (1838-1903). An English historian; born near Dublin, Ireland. Already in 1861 he had published anonymously *The Leaders of Public Opinion in Ireland*, four brilliant essays on Swift, Flood, Grattan, and O'Connell. Later works were his learned, luminous, and dispassionate *History of the Rise and Influence of the Spirit of Rationalism in Europe, History of European Morals from Augustus to Charlemagne*, and *History of England in the Eighteenth Century*.

LE CONTE DE LISLE, CHARLES MARIE (1818-1894). The leading French poet of the Parnassian school; wrote *Poèmes antiques, Poèmes et poésies, Poèmes barbares, Poèmes tragiques, Derniers poèmes;* translated the *Iliad, Odyssey, Horace, Sophocles*, and *Euripides*. Elected to the French Academy (1887).

LE GALLIENNE, RICHARD (1866-). An English journalist and man of letters; born in Liverpool; wrote the *Religion of a Literary Man, Rudyard Kipling, Retrospective Reviews.* In 1898 he took up his residence in New York and wrote *The Quest of the Golden Girl;* an adaptation of the *Rubaiyat* of Omar Khayyam; *Travels in England, George Meredith, Some Characteristics,* and an adaptation of the poems of Hafiz.

LELAND, CHARLES GODFREY, or **"HANS BREITMANN"** (1824-1903). An American poet, humorist, and writer; born in Philadelphia; wrote *Hans Breitmann's Ballads, The Poetry and Mystery of Dreams, Meister Karl's Sketch Book, Pictures of Travel, Sunshine in Thought, Heine's Book of Songs, Legends of Birds,* and many others.

LELAND or **LEYLAND, JOHN** (about 1506-1552). An English antiquary whose MSS. in the Bodleian Library at Oxford are invaluable to historians; wrote *A New Yeare's Gift to King Henry VII. in the 37th Yeare of His Raygne, Commentarii de Scriptoribus Britannicis, Itinerary of England,* and *De Rebus Britannicis Collectanea.*

LEMOINE, SIR JAMES MACPHERSON (1825-1911). A Canadian naturalist and author; born in Quebec. His work on Canadian history and ornithology is marked by more than ordinary thoroughness and reliability; wrote *L'ornithologie du Canada, Legendary Lore of the Lower St. Lawrence, Les pêcheries du Canada, Maple Leaves, The Tourists' Note Book, Quebec, Past and Present; The Scot in New France, Chronicles of the St. Lawrence, Picturesque Quebec, Monographies et esquisses, Canadian Heroines, Birds of Quebec,* and *Conférences et mémoires, Histoire, archéologie.*

LEMON, MARK (1809-1870). An English journalist; the founder and editor of *Punch.* With Henry Mayhew he founded *Punch,* and the first number appeared July 17, 1841. Among his works are *Faulkner Lyle, Leyton Hall,* and his well known *Jest Book.*

LERMONTOFF, MIKHAIL YURYEVITCH (1814-1841). The greatest Russian poet after Pouchkine; wrote *On the Death of a Poet* to commemorate Pouchkine (1837), *Hero of Our Time, The Demon, Song of the Merchant, Kalashnikoff,* and *The Circassian Boy.* [See Russ. Lit.].

LE SAGE, ALAIN RENE (1668-1747). A French novelist and dramatist; famous for his *Gil Blas,* his greatest novel; *Turcaret,* his greatest comedy; *Le diable boiteux,* and *Crispin, rival de son maître.*

LESCARBOT, MARC (about 1570-1630). A French writer who went to Canada in 1605 to report on the settlement at Port Royal. In 1607 he embodied his observations in a book, *Histoire de la Nouvelle France.*

LESSING, GOTTHOLD EPHRAIM (1729-1781). A German author and founder of modern German literature; born at Kamenz, Saxony; son of the pastor there; sent to study theology at Leipzig, studied hard; conceived a passion for the stage; wrote plays and criticisms; wrote an essay on Pope; took English authors as his models, revolting against those of France; made it his aim to inaugurate or rather revive a purely German literature, and produced examples regarded as classics to this day. His principal dramas are *Miss Sara Sampson, Minna von Barnhelm, Emilia Galotti,* and *Nathan der Weise,* and his principal prose work is his *Laocoon,* a critical work on art still in high repute. [See Ger. Lit.]

LEVER, CHARLES JAMES (1806-1872). An Irish novelist; born at Dublin; was by profession a physician; author of numerous Irish stories written in a rollicking humor, *Harry Lorrequer, Charles O'Malley, Jack Hinton, Tom Burke of Ours, The Martins of Cro' Martin, Roland Cashel,* and *The Dodd Family Abroad.*

LEWES, GEORGE HENRY (1817-1878). An English critic and man of letters; wrote *Biographical History of Philosophy from Thales to Comte, Comte's Philosophy of the Sciences, Life and Works of Goethe, Sea-Side Studies at Ilfracombe, Physiology of Common Life;* founded the *Fortnightly Review* (1865).

LEWIS, MATTHEW GREGORY (1775-1818). An English writer, sometimes nicknamed "Monk" Lewis, from his book *Ambrosio, or the Monk* (1795), which gained a wide success.

LIE, JONAS LAURITZ EDEMIL (1833-1908). A Norwegian novelist. His novels give admirable realistic pictures of life in Norway, especially of the fisher-folk of the west coast. *The Pilot and His Wife* is the best known of his 20 novels.

LIGHTHALL, WILLIAM DOUW (1857-). A Canadian writer. Has published *Thoughts, Moods and Ideals* (1887), *Montreal after 250 years* (1892), and other works in verse and prose.

LINDSAY or **LYNDESAY, SIR DAVID** (1490-1555). The most popular of the early Scotch poets. His first poem was *The Dreme,* an allegory; satires on the court, nobles, and king followed. In 1540 appeared his famous morality play, *Ane Satyre of the Thrie Estaitis,* in which he denounced the clergy.

LIVY (59 B.C.-17 A.D.). A great national historian of Rome of whom we have little information. His history consisted of 142 books, 35 of which are extant. He invented a new style of prose which gave him the title of "first writer of Silver Latinity."

LOCKHART, JOHN GIBSON (1794-1854). The biographer of Sir Walter Scott; a Scottish lawyer and writer; wrote *Peter's Letters to His Kinsfolk;* married Sophia, daughter of Sir Walter Scott (1820); wrote the novels *Valerius, Adam Blair, Reginald Dalton,* and *Matthew Wald;* editor of *Quarterly Review* (1825); wrote *Life of Burns* and *History of Napoleon.* His *Life of Scott* is, next to Boswell's *Johnson,* the most admirable biography in English.

LONGFELLOW, HENRY WADSWORTH (1807-1882). An eminent American poet; born in Portland, Me. He was graduated from Bowdoin College (1825); soon after appointed professor of modern languages at his alma mater, with four years' leave of absence for travel and study; sailed for Europe, May, 1826, returned in the summer of 1829, and began his duties in the following September; resigned in 1835 and went to Europe for a year's study to fit for the Smith professorship at Harvard University. He wrote *Hyperion,* a romance in prose, and a succession of poems and lyrics, among the former *Evangeline, The Golden Legend, Hiawatha,* and *Miles Standish.*

LONGINUS, DIONYSIUS CASSIUS (about 213-273). A philosopher and rhetorician; born in Athens; studied Greek literature at Alexandria; settled as a teacher in Athens. *On the Sublime* and a few fragments of his works have survived.

LOSSING, BENSON JOHN (1813-1891). An American historian; born in Beekman, N. Y. He was a voluminous writer, but his most useful and enduring works were his great *Pictorial Field-Books* of the Revolution, the War of 1812, and the Civil War. He wrote *Life and Times of Philip Schuyler, Our Country,* and *Cyclopaedia of United States History.*

LOTHROP, HARRIET MULFORD (STONE) (1844-1924). An American writer; born in New Haven, Conn.; married Daniel Lothrop, the Boston publisher (1881); wrote, under the name of Margaret Sidney, *Five Little Peppers, and How They Grew; The Pettibone Name, What the Seven Did, The Minute-Man,* and *Dilly and the Captain.*

LOTI, PIERRE (1850-1907). A French poet and novelist; real name Louis Marie Julien Viaud. In 1891 he was elected a member of the French Academy. His works include *Le Desert, Galilee, Le livre de la pitié et de la mort,* and *Figures et choses qui passent.*

LOUNSBURY, THOMAS RAYNESFORD (1838-1915). An American critic and historian of literature; born in Ovid, N. Y.; wrote *Studies in Chaucer,* his most important work; *History of the English Language,* a *Life of James Fenimore Cooper,* which is regarded as one of the best short biographies, and *Shakespearean Views.*

LOVELACE, RICHARD (1618-1658). An English poet; imprisoned for the active part which he took in the Revolution; wrote *The Scholar,* a comedy; *The Soldier,* a tragedy; and while in prison a volume of poems, *Lucasta.* This latter contains his well known lyrics *Going to the Wars* and *To Althea from Prison.*

LOVER, SAMUEL (1797-1868). An Irish author; born in Dublin; wrote the ballad, *Rory O'More, Legends and Stories from Ireland, Handy Andy, Treasure Trove,* and *Songs and Ballads.*

LOWELL, JAMES RUSSELL (1819-1891). An American essayist, poet, and diplomatist; born in Cambridge, Mass. Succeeding Longfellow in the chair of modern languages and literature in Harvard (1855), he visited Europe to study; returned as United States minister to Spain (1877), was transferred to England (1880-1885). Of his prose work *My Study Windows* and *Among My Books* are essays on literary subjects; *Fireside Travels* contain reminiscences. He wrote *Biglow Papers, Vision of Sir Launfal, Old English Dramatists,* and a *Life of Hawthorne.*

LUCILIUS, GAIUS (149-103 B. C.). A Roman poet; the creator of that form of poetic satire which was wielded so brilliantly by his successors, Horace,

Persius, and Juvenal. Over 800 fragments, the longest of 13 verses, remain of his 30 satires, a comedy, epodes, and hymns.

LYALL, EDNA, or ADA ELLEN BAYLY (? - 1903). An English author; wrote *Won by Waiting, Donovan, We Two, In the Golden Days, Knight Errant, The Autobiography of a Slander, Derrick Vaughn, A Hardy Norseman, To Right the Wrong, Doreen, The Autobiography of a Truth, Wayfaring Men, Hope the Hermit, In Spite of All,* and *The Hinderers.*

LYLY, JOHN (about 1554-1606). An English romancer and dramatist; born in Kent; wrote *Euphues,* which added the word "euphuism" to our language. The style is marked by excessive use of alliteration, similes from mythology, and fabulous natural history. He also wrote eight plays for presentation before the court by children.

LYTTON, EDWARD ROBERT, EARL OF, or **"OWEN MEREDITH"** (1831-1891). An English statesman and novelist; became viceroy of India in 1876, and subsequently ambassador at Paris. He wrote *Orval, Lucile, The Wanderer* (verse), *Fables in Song,* and *Glenaveril.*

MAARTENS, MAARTEN, or **J. M. W. VAN DER POORTEN-SCHWARTZ** (1858-1915). A Dutch-English novelist; wrote *The Sin of Joost Avelingh, An Old Maid's Love, A Question of Taste, God's Fool, The Greater Glory,* and *My Lady Nobody.* A distinct moral note pervades all of his work.

MABIE, HAMILTON WRIGHT (1846-1916). An American author, critic, essayist, and editor; born at Cold Spring, N. Y. He has done much toward spreading a love of good reading among Americans; wrote *Norse Stories Retold from the Eddas, Nature in New England, My Study Fire, In the Forest of Arden, Essays in Literary Interpretation, Essays on Nature and Culture, The Life of the Spirit, Parables of Life,* etc.

McCARTHY, JUSTIN (1830-1912). An English journalist, author, and politician; born in Cork, Ireland; spent three years in the United States (1868-1871); elected to the House of Commons (1879), and became vice-president of the Irish National League (1886). On the deposition of Parnell, McCarthy became the Parliamentary chief of the Home-Rule Party (1896); wrote *Modern Leaders, Epoch of Reform, History of the Four Georges and William IV., The French Revolution, A History of Our Own Times* (completed in 1905), *Modern England, The Story of Gladstone's Life, Reminiscences,* and *The Story of an Irishman.*

McCARTHY, JUSTIN HUNTLY (1861-). An English novelist, historian, and dramatist; wrote *A History of England Under Gladstone,* translation of the *Rubaiyat* of Omar Khayyam, *The French Revolution,* and the plays, *The White Carnation, The Highwayman, The Wife of Socrates,* and *If I Were King.*

MACAULAY, THOMAS BABINGTON (1800-1859). An English historian; born at Rothley Temple, Leicestershire, England. He composed a compendium of universal history before he was eight years old; went to school at Shelford and entered Cambridge in 1818. In 1826 he was called to the bar, but not succeeding in law practice he soon abandoned it. In 1825 he won distinction by his *Essay on Milton.* After the failure of the firm of which his father was a member he was offered a seat in the Commons by Lord Lansdowne. In 1834 he accepted a seat on the Supreme Council of India. Here he drafted a penal code which became the basis of the criminal code of India. In 1838 he returned to England, and in 1839 became war secretary in Lord Melbourne's cabinet. In 1846 he was appointed paymaster general in Lord John Russell's cabinet, where he had time to devote himself to his *History of England,* which he had now begun. He soon retired to private life in order to prosecute this work, refusing a seat in the cabinet in 1849. In 1848 the first two volumes of the *History* appeared. No other historical work ever met with so favorable reception or circulated so rapidly. In 1857 he was raised to the peerage as Baron Macaulay of Rothley. He wrote also *Lays of Ancient Rome* and several volumes of essays.

MacDONALD, GEORGE (1824-1905). A Scotch novelist and poet. He lectured in the United States. He wrote *David Elginbrod, The Portent, Malcolm, The Seaboard Parish, Annals of a Quiet Neighborhood, Thomas Wingfold, Curate; What's Mine's Mine, Lilith, Dealings with Fairies, At the Back of the North Wind, The Princess and the Goblin, Unspoken Sermons,* and *The Miracles of Our Lord.*

MACKAY, CHARLES (1814-1889). A Scotch journalist; wrote the songs *Cheer, boys, cheer* and *There's a land, a dear land;* 14 volumes of verse, two novels, *Longbeard* and *Luck, and What Came of It,* and miscellaneous works, including *Forty Years' Recollections, Through the Long Day,* and several philological works of the Gaelic.

MACLEOD, NORMAN (1812-1872). A Scottish clergyman and author; wrote *The Earnest Student, Life of John Mackintosh, Reminiscences of a Highland Parish, Eastward, The Old Lieutenant and His Son, The Starling, Peeps at the Far East, The Gold Thread, Wee Davie, Home Education,* and *Sermons.*

McMASTER, JOHN BACH (1852-). An American historian; born in Brooklyn, N. Y. He wrote *Benjamin Franklin as a Man of Letters, History of the People of the United States, Bridge and Tunnel Centers, Daniel Webster, Origin, Meaning, and Application of the Monroe Doctrine.*

MAETERLINCK, MAURICE (1862-). A Belgian poet; born in Ghent; wrote *Serres chaudes, Douze chansons, La princesse Maleine, Les aveugles, L'intruse, Les sept princesses, Pelléas et Mélisande, Alladine et Palamides, Intérieur, Mort de Tintagiles, Aglavaine et Sélysette, Monna Vanna,* and the essays *Le trésor des humbles, La sagesse et la destinée,* and *La vie des abeilles.* His dramas were translated by Richard Hovey (1896). Received Nobel prize for literature (1911).

MAHONY, FRANCIS SYLVESTER, or **"FATHER PROUT"** (1804-1866). An Irish poet and humorist; born in Cork; contributed to *Fraser's Magazine* and *Bentley's Miscellany* under the name of Father Prout; wrote *The Reliques of Father Prout,* in which *The Bells of Shandon* appears, and *The Final Reliques of Father Prout.*

MAISTRE, XAVIER DE (1763-1852). A French novelist and essayist. His *Les prisonniers du Caucase* (1825), and *Voyage autour de ma Chambre* (1794), won for him a place among the most noted of French writers.

MAJOR, CHARLES (1856-1913). An American author; born at Indianapolis, Ind.; wrote *When Knighthood Was in Flower, The Bears of Blue River,* and *Dorothy Vernon of Haddon Hall.*

MALLOCK, WILLIAM HURRELL (1849-1923). An English writer on theology and sociology. His works include *The New Republic, Belgravia, The New Paul and Virginia, Poems, A Romance of the Nineteenth Century, Social Equality, The Old Order Changes, A Human Document,* and *Tristram Lacy, the Individualist.*

MAN'ETHO (flourished 273 B. C.). The greatest classical writer on the history of Egypt; born in the Delta of Egypt; a high priest and scribe in the temples of Egypt. His chief work is *Egyptian History,* written under Ptolemy II., Philadelphus.

MANNING, HENRY EDWARD (1807-1892). An English clergyman and writer; cardinal (1875); founded the Roman Catholic University in Kensington (1874); wrote *Petri Privilegium, The True Story of the Vatican Council, The Temporal Mission of the Holy Ghost, The Internal Mission of the Holy Ghost.*

MANUEL, DON JUAN (1282-1349). A Spanish author, soldier and prince. His best known work contained in the *Biblioteca de autores* is the *Conde Lucanor.*

MANZONI, ALESSANDRO (1785-1873). An Italian poet and novelist. Produced many poems of political and religious sentiment. His *Cinque maggio* (1821), and *I promessi sposi* made him famous.

MARLOWE, CHRISTOPHER (1564-1593). An English dramatist and poet, precursor of Shakespeare; son of a shoemaker at Canterbury. Besides a love poem entitled *Hero and Leander,* he was the author of seven plays, *Tamburlaine,* in two parts; *Dr. Faustus, The Jew of Malta, Edward the Second, The Massacre at Paris,* and *Dido.* He may be called the creator of the English tragedy. [See Eng. Lit.]

MARRYAT, FLORENCE (1837-1899). An English novelist; daughter of Frederick Marryat and wife of Mr. Francis Lean; editor of *London Society* (1872); wrote many novels, among which are *Love's Conflict, Her Lord and Master, A Little Stephen, Facing the Footlights,* and *Tom Tiddler's Ground.* She has also written a *Life of Frederick Marryat.*

MARRYAT, FREDERICK (1792-1848). An English novelist; born in London; father of Florence Marryat. He entered the navy at the age of 14; won many honors and was rapidly promoted during his service, and retired in 1830; a member of various distinguished orders. His first novel was *Frank Mildmay.* This was followed by *Newton Forster, Mr. Midshipman Easy, Japhet in Search of a Father, Peter Simple, Snarley-yow, The Phantom Ship, The Children of the New Forest, The Little Savage,* and many other works

of fiction. He also published *A Diary in America, with Remarks on its Institutions.*

MARSTON, PHILIP BOURKE (1850-1887). An English poet and essayist; the son of Westland Marston, dramatist and poet. He was totally blind from early childhood; published his first volume of poems, *Song-Tide* (1870), followed by *All in All* and *Wind Voices.*

MARTEL DE JANVILLE, GABRIELLE, COUNTESS DE. Known as "Gyp" (about 1850-). A French author. Her novels in dialogue include *Petit Bob* (1882), *Elles et lui* (1885), and *Eux et Elle* (1896).

MARTIAL (MARCUS VALERIUS MARTIALIS) (40-104). A Latin epigrammist; born in Bilbilis, Spain. His *Epigrams* are of great literary value, being the first examples of what we now know as epigrams.

MARTINEAU, HARRIET (1802-1876). An English reformer and author; sister of James Martineau; born in Norwich, England. She visited the United States in 1834, aiding the abolitionists. She labored under the disability of being all her life without the senses of taste and smell, and at 20 became very deaf. She produced works in almost every department of literature, notably *Society in America, Retrospect of Western Travel, The Hour and the Man, Eastern Life, Past and Present,* and *British Rule in India.*

MARTINEAU, JAMES (1805-1900). An English clergyman and author; born in Norwich; brother of Harriet Martineau. Among his works are *The Rationale of Religious Inquiry, Endeavors after the Christian Life, Studies of Christianity, Modern Materialism,* and *The Relation between Ethics and Religion.*

MATTHEWS (JAMES) BRANDER (1852-1929). An American author; born in New Orleans, La. In fiction he steadily gained in reputation; his short stories of New York City life in the realistic vein being among the very best of their kind. Among his works are *His Father's Son, Aspects of Fiction, Studies of the Stage,* and *Philosophy of the Short-Story.*

MAUPASSANT, GUY DE (1850-1893). A French romancer; gave himself to letters, producing novels, stories, lyrics, and plays, among them *A Life, Pierre and Jean, Yvette, Fort comme la mort, Bel-ami, Mont-Oriol, Notre coeur,* and about 200 short stories, of which he is one of the greatest of modern writers.

MENDES, CATULLE (1841-1909). A French poet and novelist. Founded the *Revue Fantaisiste* (1849). His many works include *Le capitaine Fracasse* (1870), a drama, and *La femme-enfant* (1891), a novel.

MEREDITH, GEORGE (1828-1909). An English poet and novelist; born in Hampshire, England; educated in Germany; studied law, but essayed a literary career with a volume of poems in 1851. He has written *The Ordeal of Richard Feverel, Essay on Comedy, The Egoist, Adventures of Harry Richmond,* and *Diana of the Crossways.* His life and a full bibliography are to be found in *George Meredith: Some Characteristics,* by Richard Le Gallienne. [See Eng. Lit.].

MERIMEE, PROSPER (1803-1870). A French author; studied law, but he attached himself to literature under the *nom de plume* of Joseph L'Estrange; an academician (1844); and a senator of the Empire (1853). Among his works are *Theater of Clara Gazul, Chronicles of the Reign of Charles IX., Colomba,* a popular novel; *Carmen,* and *Don Pedro of Castile.*

MICHELET (*mee-shlay'*), **JULES** (1798-1874). The greatest French historian of the Romantic School; assistant to Guizot at the Sorbonne; an academician and professor in the College de France (1838); involved in a bitter controversy with the Jesuits; refused allegiance to Napoleon in 1851 and lived thereafter in Brittany and on the Riviera; wrote *Histoire de France* down to Waterloo in 21 volumes, *Précis d'histoire moderne, Introduction à l'histoire universelle, Origines du droit français, Mémoires de Luther, Les Jésuits, Du peuple,* and many poetical romantic impressions of nature.

MICKIEWICZ (*mits-ki-a'vich*), **ADAM** (1798-1855). The greatest of Polish poets; born of a noble family; in 1834 published his great poem, *Sir Thaddeus,* and in 1840 was appointed to a professorship of Slavic literatures in Paris. He wrote also *Crimean Sonnets, Wallenrod, Ancestors or Festival in Honor of the Dead,* and edited at Paris the *Tribune des peuples,* which was suppressed by the government. [See Pol. Lit.].

MILLER, CINCINNATUS HEINE or **JOAQUIN** (1841-1913). An American poet; born in Wabash district, Indiana. His checkered life included the extremes of being a California gold miner, editor of an Oregon newspaper, an Oregon lawyer and judge, a social lion in London, etc.; wrote *Songs of the Sierras, Songs of the Sunland, Songs of Italy, Songs of the Mexican Seas, The Danites in the Sierras,* and *'49 or The Gold Seekers of the Sierras.*

MILTON, JOHN (1608-1674). An English poet; born in London. His father, a notary, was a man of cultivated mind, and gave him a careful education, which was continued at St. Paul's School and the University of Cambridge. He entered the latter in 1624, and quitted it in 1631 with the degree of M. A. His first polemical work was a treatise *Of Reformation.* On the establishment of the Protectorate, Milton became Latin secretary to the Council of State and held office till the abdication of Richard Cromwell (1659). In 1652 he had become totally blind, deliberately and heroically preferring, as he says, the loss of his sight to the desertion of his duty. The last short intervals of sight allotted him were devoted to the composition of the *Defense.* In 1665, being in his 57th year, he completed *Paradise Lost.* He wrote also *Hymn on the Nativity, Comus, Lycidas, L'Allegro, Il Penseroso, Samson Agonistes;* sonnets *On His Blindness, To Fairfax, To Cromwell, Areopagitica,* a plea for freedom of the press; *On Shakespeare,* and his second epic, *Paradise Regained.* [See Eng. Lit.].

MITCHELL, DONALD GRANT, or **"IK MARVEL"** (1822-1908). An American author; born in Norwich, Conn. In 1851 he published *The Reveries of a Bachelor* and his *Dream Life;* has since written many popular books, such as *My Farm at Edgewood, Dr. Johns, Seven Stories with Basement and Attic,* and *English Lands, Letters, and Kings.*

MITCHELL, (SILAS) WEIR (1829-1914). American physician, poet, and novelist; born in Virginia; practised in Philadelphia and became prominent as a physiologist, especially as a neurologist and toxicologist. Among his works are *Dr. North and His Friends, Hugh Wynne* (his best), *In War Time, The Adventures of François,* and *Circumstances.*

MITFORD, MARY RUSSELL (1787-1855). An English author; born at Alresford, Hampshire; lived with her father, an extravagant physician, at Lyme Regis and London. She published poems in 1810-11-12, but, forced to earn a living, took to dramatic work. *Julian, The Foscari,* and *Rienzi* were successful, if ephemeral, tragedies. Her best work was *Our Village,* sketches of homely English life, written with much care.

MITFORD, WILLIAM (1744-1827). An English historian; born in London. Under the advice of Gibbon, he wrote his celebrated *History of Greece* between 1784 and 1810. His minor works include *An Essay on the Harmony of Language* and other essays.

MOLIERE, or **JEAN BAPTISTE POQUELIN** (1622-1673). The greatest French dramatist; born in Paris. A friend of Boileau, Racine, and La Fontaine; his chief patron was Louis XIV. His more important works are *Les précieuses ridicules, Sganarelle, L'ecole des femmes, Tartufe, Le misanthrope, George Dandin, l' Avare, le Bourgeois gentilhomme, les Fourberies de Scapin, le Médecin malgré lui, les Femmes savantes, le Malade imaginaire.* Called by Voltaire the Father of French Comedy.

MOMMSEN, THEODOR (1817-1903). A German historian. His great work is *Roman History.* He wrote besides *Roman Chronology down to Caesar* and *History of Roman Courage.* His historical work incorporates the results of vast learning in widely separate fields.

MONTAGU, LADY MARY WORTLEY (1689-1762). An English author; the eldest daughter of Evelyn, duke of Kingston; born in Thoresby, Nottinghamshire. In 1712 she married Edward Wortley Montagu, whom she accompanied in 1716 on his embassy to Constantinople, from which place she wrote *Letters* to Pope, Addison, and other eminent literati of the time, which are very interesting and contain many curious facts respecting the manners of the Turks. She first introduced the practice of inoculation into her native country. Her *Letters* certainly place her at the head of female epistolary writers in Great Britain.

MONTAIGNE, MICHEL EYQUEM DE (1533-1592). A French essayist and moralist. His fame rests on his *Essays,* in which he records his observations of mankind. Among his other works are *Apologie de Raimond Sebond,* whose *Theologia Naturalis* he translated. [See Fr. Lit.].

MONTALEMBERT (*mon-tal-aim-bair'*), **CHARLES FORBES DE TRYON, COMTE DE** (1810-1870). A French politician; born in London; son of a noble French emigrant; spent his life in advocating the cause of a free unfettered system of national education; wrote the *Monks of the West,* his chief work; *Catholic Interests in the Nineteenth Century, The Political Future of England, Pius IX. and France in* 1849 *and* 1859, and *Pius IX. and Lord Palmerston.*

MONTESQUIEU, CHARLES DE SECONDAT, BARON DE LA BREDE ET DE (1689-1755). A famous French writer. His greatest work is the *Spirit of Laws*, which occupied him 20 years. It was published in 1748, and secured to him a very high place among writers on political science. [See Fr. Lit.].

MONTGOMERY, ROBERT (1807-1855). An English preacher; born at Bath; author of *The Omnipresence of Deity* and *Satan;* minister of Percy Street Chapel, London. All his many works are forgotten save the above, which live in Macaulay's famous review.

MOORE, THOMAS (1779-1852). An Irish poet; born in Dublin; author of *Lalla Rookh*. His fame now rests chiefly on *National Airs* and *Irish Melodies*. He was distinctively the poet of Ireland.

MORE, HANNAH (1745-1833). An English author; born near Bristol; wrote dramas, a novel entitled *Coelebs in Search of a Wife*, and the tracts *Village Politics* and *Cheap Repository Tracts*.

MORLEY, JOHN (1838-1923). An English politician and man of letters; an advanced Liberal in both capacities; besides essays and journalistic work, has written biographies, particularly on men associated with politics and social movements, such as Voltaire, Rousseau, and Diderot, as well as Burke, whose biography he contributed to "English Men of Letters Series"; *Life of Cobden, Diderot and the Encyclopaedists, Walpole, Cromwell,* and *Life of Gladstone*.

MORRIS, WILLIAM (1834-1896). An English poet, art-worker, and socialist; son and heir of a wealthy merchant; studied at Oxford, where he became the bosom friend of Burne-Jones. He devoted his working hours to decorative art, in particular designing wall papers; produced in 1858 *The Defence of Guenevere and Other Poems*, in 1867 *The Life and Death of Jason*, and from 1868 to 1870 his masterpiece, *The Earthly Paradise*. Among other works he translated the *Aeneid* and the *Odyssey*, and gave a splendid rendering of some of the Norse legends.

MORRISON, ARTHUR (1863-). An English novelist; born in London. His work is a remorselessly true picture of London life and includes *Tales of Mean Streets, Martin Hewitt, Investigator; Chronicles of Martin Hewitt, Adventures of Martin Hewitt, A Child of the Jago, The Dorrington Deed-Box, To London Town, Cunning Murrell,* and *The Hole in the Wall*.

MOTLEY, JOHN LOTHROP (1814-1877). An eminent American historian; born in Dorchester, Mass. He published, after 10 years' labor and a journey to Europe, his great *History of the Rise of the Dutch Republic*, in 1856, a work which was further developed in the *History of the United Netherlands, The Life and Death of John of Barneveldt*. He was minister from the United States to Austria and to Great Britain.

MOULTON, ELLEN LOUISE CHANDLER (1835-1908). An American poet; born in Pomfret, Conn.; married William U. Moulton, a Boston publisher; published children's stories, novels, essays, and poems. Among these are *Juno Clifford, My Third Book, Bedtime Stories, More Bedtime Stories, New Bedtime Stories, Poems, Random Rambles,* and *At the Wind's Will*.

MULLER, FRIEDRICH MAX (1823-1900). A German philologist; son of Wilhelm Müller, the German poet. He was the author of *A History of Ancient Sanskrit Literature, On the Origin and Growth of Religion as Illustrated by the Religions of India, Chips from a German Workshop, Comparative Mythology, Last Essays,* and *My Autobiography*.

MUNCHAU'SEN, BARON VON (1720-1797). A cavalry officer in the service of Hanover, famed for the extravagant stories he used to relate of his adventures and exploits, which, with exaggerations, were collected by Rudolph Erich Raspe, and published in 1785 under Münchausen's name.

MURFREE, MARY NOAILLES, or **"CHARLES EGBERT CRADDOCK"** (1850-1922). An American novelist; born in Murfreesboro, Tenn. Her subjects deal largely with Tennessee. She wrote *A Spectre of Power, The Mystery of Witch-Face Mountain, In the Tennessee Mountains, The Phantoms of the Foot-Bridge, The Bushwhackers,* and *The Young Mountaineers*.

MURGER (*moor-zhay'*), **HENRI** (1822-1861). French novelist and poet; born at Paris; is chiefly distinguished as the author of *Scènes de la vie de Bohême* from his own experiences.

MURRAY, DAVID CHRISTIE (1847-1907). An English novelist. Though known chiefly as a writer, he was also a landscape painter of ability. Many of his writings were done in collaboration with Henry Herman. His first work was *A Life's Atonement* in 1880. He continued to write until 1901, when *Despair's Last Journey* was published. Some of his other works were *Joseph's Coat, The Way of the World, Bit of Human Nature, A Model Father, Rainbow Gold, Cynic Fortune, First Person Singular, Mount Despair, This Little World,* and *A Rogue's Conscience*.

MURRAY, LINDLEY (1745-1826). An English grammarian; born in Lancaster County, Pa.; removed to New York, where he studied and practised law; made a fortune in trade in the Revolutionary War; wrote *Power of Religion on the Mind, Grammar of the English Language,* readers, and spelling book.

MURRAY, WILLIAM HENRY HARRISON (1840-1904). An American author; born in Guilford, Conn.; from 1869 until 1873 delivered Sunday evening talks in the Boston Music Hall, which were popular. He resigned his charge in 1874 to engage in business and to preach to independent congregations. His works include *Adventures in the Adirondacks, Adirondack Tales* (6 vols., 1877), *The Story of Mamelons, Daylight Land, How John Norton the Trapper Kept His Christmas, Mamelons and Ungava,* a legend.

MUSSET (*moo-say'*), **ALFRED DE** (1810-1857). Celebrated French poet; achieved his first signal success with the dramas *Andre del Sarto* and *The Caprices of Marianne;* in the same year began his famous *liaison* with George Sand, involving him in the ill-fated expedition to Venice, whence he returned in 1835 shattered in health and disillusioned. His writings are chiefly remarkable for the intense sincerity of feeling which animates them, and which finds its highest expression in his four great lyrical pieces, *The Nights*. Of his prose works *The Son of Titian, Mademoiselle Mimi Pinson,* and the *Confessions* are his best.

NAIRNE, LADY CAROLINA OLIPHANT (1766-1845). A Scottish poet. From her great beauty she was called in youth "The Flower of Strathearn." Regretting the coarseness of many popular songs, she undertook to furnish new words for the beautiful tunes, and attained eminent success. Her authorship was not disclosed till near her death. Among her best known songs are *Land o' the Leal, Caller Herrin', The Laird o' Cockpen,* and *The Auld Hoose*.

NAPIER, SIR WILLIAM FRANCIS PATRICK (1785-1860). An English general and historian; brother of the conqueror of Scinde; served all through the Peninsular War, and wrote besides the *Conquest of Scinde,* the *History of the Peninsular War,* a celebrated work, written with matchless graphic power.

NICCOLINI, GIOVANNI BATTISTA (1782-1861). An Italian poet. His first tragedy, *Polissena,* was given the prize of the Della Cruscan Academy in 1810. His other dramas include *Ino e Temisto, Medea, Edipo, Matilda, Nabucco, Antonio Foscarini, Ludovico Sforza, Rosmunda,* and *Filippo Strozzi*.

NICOLAY, JOHN GEORGE (1832-1901). An American author; born in Bavaria; brought to America (1838); wrote *The Outbreak of the Rebellion,* and, with John Hay, *Abraham Lincoln: A History,* which appeared serially in the *Century Magazine* (1886-1890).

NIETZSCHE, FRIEDRICH WILHELM (1844-1900). An important German writer. His theories are fully set forth in his philosophical works. He was also popular as a poet, producing *Gedichte und Sprüche* and *Also sprach Zarathustra*. [See Ger. Lit.].

NOLDEKE, THEODOR (1836-). An eminent German orientalist; born at Hamburg; professor at Kiel (1868); of Semitic philology at Strassburg (1872). He is the leading authority on Semitic philology.

NORDAU, MAX SIMON (1849-1923). A German author; born in Budapest, Hungary. He wrote a number of books, of which the best known, perhaps, in the United States is *Degeneration*.

NORRIS, FRANK (1870-1902). An American novelist; born in Chicago, Ill.; wrote *Yberville, McTeague, Moran of the Lady Letty, The Octopus, The Pit,* and *The Wolf*.

NORRIS, WILLIAM EDWARD (1847-1925). An English novelist; born in London. His first book, *Heaps of Money,* appeared in 1876. It has been followed by *Mademoiselle de Mersac, Thirlby Hall, Matrimony, A Man of His Word, That Terrible Man, Chris, Major or Minor, Miss Shafto, The Rogue, My Friend Jim, Misadventure, The Countess Radna, Billy Bellew, The Dancer in Yellow, Clarissa Furiosa, The Widower. An Octave,* and *Lord Leonard the Luckless*.

NORTON, CHARLES ELIOT (1827-1908). An American scholar; son of Andrews Norton; born at Boston. In 1867 he published a translation of the *Vita*

Nuova of Dante, accompanied with *Essays and Notes*, a part of which had already appeared in the *Atlantic Monthly*. He lived in Europe about 10 years. *Notes of Travel and Study in Italy* was the result. Other works are *Memoir of Arthur Hugh Clough*, prefixed to an edition of his *Poems; Sketch of the Life and Works of William Blake*, accompanying his *Illustrations of the Book of Job; List of the Principal Works Relating to Michael Angelo, Historical Studies of Church Building in the Middle Ages*. He edited *James Russell Lowell's Letters*.

"NOVALIS," the pseudonym of **FRIEDRICH VON HARDENBERG** (1772-1801). A German author. His writings, with the exception of a few short pieces, notably, *Hymns to the Night*, were written in a kind of rhythmical prose, and are altogether fragmentary. They were published, edited by his friends Tieck and Friedrich von Schlegel, in 1802.

NYE, EDGAR WILSON, or **"BILL NYE"** (1850-1896). An American humorist; born at Shirley, Me; regularly contributed humorous letters to various American journals; gave lectures throughout the country and published *Bill Nye and the Boomerang, The Forty Liars, Baled Hay, Bill Nye's Blossom Rock, Remarks,* and *Bill Nye's History of the United States*.

OAKES, URIAN (about 1631-1681). An American clergyman, president of Harvard. In his *Elegie upon the Death of the Reverend Mr. Thomas Shepard*, lies his claim to fame.

OEHLENSCHLAEGER (*ö'len-shlay-ger*), **ADAM GOTTLOB** (1779-1850). One of the greatest dramatic poets of the Scandinavian North; born in Vesterbro, near Copénhagen, Denmark. He commenced his career on the stage, but abandoned the profession for literature, and finally became professor of aesthetics in his native city. Among his greatest works are *The Death of Balder, Haakon Jarl, Palnatoke,* and *Aladdin*.

OLIPHANT, LAURENCE (1829-1888). An English author and traveler; born at Cape Town; spent his boyhood in Ceylon; married Alice l'Estrange. With her he went to Palestine, and wrote two mystical books under her inspiration. Oliphant was special correspondent for the *Times* and was a brilliant journalist. He wrote *A Journey to Khatmandu, The Russian Shores of the Black Sea, Episodes in a Life of Adventure, Sympneumata, Scientific Religion, Massollam,* and *Piccadilly*.

OLIPHANT, MRS. MARGARET (*née* **WILSON**) (1828-1897). An English author; began her literary career as a novelist. Her reputation as such was assured by *Chronicles of Carlingford*. She wrote on history, biography, and criticism; the *Makers of Florence, Makers of Venice, Makers of Modern Rome,* lives of *Dante, Cervantes,* and *Edward Irving*.

OLMEDO, JOSE JOAQUIN (1782-1847). A Spanish-American poet, popular in his own country. His ode addressed to General Bolivar as the deliverer of Peru brought him into public notice.

OMAR KHAYYAM (*o'mar khi-yahm'*) (? -1123). A Persian poet, astronomer, and mathematician; born in Nishapur, in Khorassan. His scientific works, which were of high value in their day, have been eclipsed by his *Rubaiyat*, or quatrains, a collection of about 500 epigrams in praise of wine, love, and pleasure, translated by Fitzgerald.

OPITZ, MARTIN (1597-1639). German poet. Produced the critical *Aristarchus seu de Contemptu Linguae Teutonicae* and in 1627 wrote the libretto for the oldest German opera, *Dafne*.

OTFRIED (about 800-about 870). An Alsatian poet and theologian. Wrote *Liber Evangeliorum*, in which rhyme instead of alliteration is used. Fragments only of his other works are extant.

OTWAY, THOMAS (1652-1685). An English dramatist; born in Sussex; left Oxford without a degree and went to London (1671); made a failure as an actor and devoted himself to play writing; wrote *Alcibiades, Don Carlos, Friendship in Fashion, Caius Marius, The Orphan, The Soldier of Fortune,* and the finest of all of his plays, *Venice Preserved,* which was produced in 1682.

OVID (PUBLIUS OVIDIUS NASO) (43 B. C.-18 A. D.). A Roman poet of the Augustan age; born at Sulmo; was the author, among other works, of the *Amores, Fasti,* and the *Metamorphoses;* the friend of Horace and Vergil, and the favorite of Augustus.

OXENFORD, JOHN (1812-1877). An English author. He translated poems and wrote songs, which have been set to music. Among his works for the stage are *My Fellow Clerk, A Day Well Spent, Porter's Knot,* and £456, 11*s*. 3*d*. He published translations of the *Autobiography of Goethe,* the *Conversations of Eckermann with Goethe,* the *Hellas* of Jacob, and a collection of songs from the French entitled *The Illustrated Book of French Songs*.

PAGE, THOMAS NELSON (1853-1923). An American novelist; born in Oakland, Va. His books are widely read and include *In Ole Virginia, Red Rock, Gordon Keith, The Old South,* and *Pastime Stories*.

PAGET, VIOLET, or **"VERNON LEE"** (1856-). An English author. Since 1871 she has lived in Italy, where she has studied art and literature. Her *Studies of the Eighteenth Century in Italy* was well received. Her other books are *Belcaro, Essays on Aesthetical Questions, The Prince of a Hundred Soups, Ottilie: an Eighteenth Century Idyl; Euphorion,* essays; *The Countess of Albany, Miss Brown, Baldwin, Juvenilia, Hauntings, Limbo,* and *Genius Loci*.

PAINE, ROBERT TREAT, JR. (1773-1811). An American poet; born in Taunton, Mass. He is best remembered as the author of two songs, *Rise, Columbia,* and *Adams and Liberty*.

PAINE, THOMAS (1737-1809). An American political and philosophical writer; born in England. At the outbreak of the Revolutionary War (1774) he emigrated to the United States; gave an impulse to the Revolution by his famous pamphlet called *Common Sense* and *The Crisis,* in which he advocated the policy of separation and independence. He went to Paris in 1787. In September, 1792, he was elected a member of the French National Convention, acted with the Girondists, narrowly escaped death in the Reign of Terror, and brought out in 1795 his celebrated work entitled *The Age of Reason*. He returned to the United States in 1802.

PALFREY, JOHN GORHAM (1796-1881). An American publicist and historian; born at Boston. Besides sermons, magazine and newspaper essays, he published *Evidences of Christianity,* originally delivered as a course of Lowell lectures; *Lectures on the Jewish Scriptures and Antiquities, The Relation between Judaism and Christianity,* and a *History of New England*. It brings the history down to the appointment of Washington as commander in chief of the Colonial army in 1775.

PALGRAVE, SIR FRANCIS (1788-1861). An English author. His family name was Cohen, which at his marriage he exchanged for that of his wife's mother. He published a *History of England, The Rise and Progress of the English Commonwealth,* and *Observations on Principles of New Municipal Corporations*. In 1832 he was knighted. In 1837 he published *Merchant and Friar*. During the last 23 years of his life he held the office of deputy keeper of her Majesty's records. His greatest work is a *History of Normandy and of England*.

PALGRAVE, FRANCIS TURNER (1824-1897). An English poet; the eldest son of Sir Francis Palgrave; born at London. He was educated at Balliol College, Oxford; professor of poetry at Oxford (1886). His principal poetical works are *Idylls and Songs, Hymns,* and *Lyrical Poems*. He also compiled *The Golden Treasury of English Songs* and wrote *Essays on Art, Life of Sir Walter Scott, The Visions of England,* and *The Treasury of Sacred Songs*.

PANINI (fourth century B. C.). The greatest grammarian of India; born in the north of the Punjab. His work is the oldest Sanskrit grammar in existence. The effect of his work was to fix permanently the literary form of the Sanskrit language.

PARDO-BAZAN, EMILIA (1851-1921). Principal Spanish female writer of the nineteenth and twentieth centuries; a novelist and critic; of the naturalistic school and a disciple of Zola. *De mi tierra, La madre naturaleza,* and *Los pazos de Ulloa* are the best.

PARINI, GIUSEPPE (1729-1799). Italian poet; introduced depth and morality into Italian poetry. His best productions are the *Odi* and the *Giorno,* the latter being one of the finest works of the eighteenth century.

PARKER, SIR (HORATIO) GILBERT (1862-). A Canadian novelist; born in Camden East, Ontario; studied pedagogy and taught in Frankford and Seaforth; studied for the ministry; taught in the Belleville Deaf and Dumb Institute; wrote *Pierre and His People, Mrs. Falchion, The Translation of a Savage, When Valmond Came to Pontiac, The Seats of the Mighty, The Battle of the Strong, The Lane That Had No Turning, The Right of Way, Donovan Pasha, The Weavers, History of Old Quebec, A Ladder of Swords,* and *Northern Lights*.

PARKMAN, FRANCIS (1823-1893). An American historian; born in Boston, Mass.; worked his way to

recognition as a historical writer on the period of rise and fall of the French dominion in America. He wrote *Conspiracy of Pontiac, Montcalm and Wolfe, A Half Century of Conflict, La Salle, The Jesuits in North America,* and *The Old Régime in Canada.*

PARTON, JAMES (1822-1891). An American author; born in England. Up to 1875 he resided at New York, and subsequently at Newburyport, Mass. His principal works are *Life of Horace Greeley, Life and Times of Aaron Burr, Life of Andrew Jackson, General Butler at New Orleans, Life and Times of Benjamin Franklin, Famous Americans of Recent Times, Life of Thomas Jefferson,* and *Captains of Industry.*

PATER, WALTER HORATIO (1839-1894). An English author. He was educated at Oxford, and in 1864 was made a fellow of Brasenose College in that university. His books include *The Renaissance, Marius, the Epicurean,* a story of ancient Rome; *Imaginary Portraits,* a later edition of *The Renaissance, Appreciations, Plato and Platonism, The Child in the House, Greek Studies,* and a volume of *Essays.* His work is the interpretation of the spirit of the Renaissance in literature and art.

PATMORE, COVENTRY KEARSEY DIGHTON (1823-1896). An English poet; born at Woodford, Essex. From 1846 to 1868 he was an assistant librarian in the British Museum. In 1844 he published a small volume of poems, under the title of *Tamerton Church Tower, and Other Poems.* His principal work, *The Angel in the House,* appeared in four parts: *The Betrothal, The Espousal, Faithful Forever,* and *The Victories of Love.* He wrote *The Unknown Eros, Amelia,* and a memoir of "Barry Cornwall."

PAYN, JAMES (1830-1898). An English author; born in Cheltenham; was educated at Eton, Woolwich, and Trinity College, Cambridge; succeeded Leslie Stephen as editor of the *Cornhill Magazine* (1882). Among his works are *Stories from Boccaccio,* poems; *The Foster Brothers, Halves, Carlyon's Year, One of the Family, What He Cost Her, Mirk Abbey, Murphy's Master, Under One Roof, The Luck of the Darrells, Some Literary Recollections, Thicker than Water, Glow-worm Tales, The Burnt Million, The Word and the Will, Not Wooed but Won, Gleams of Memory, autobiographical; In Market Overt, Another Burden,* and *The Backwater of Life.*

PAYNE, JOHN (1842-1928). English poet and translator; belongs with the Neo-Romantic poets, Rossetti, Morris, and Swinburne. His verse includes *A Masque of Shadows, Intaglios,* and *Lautrec;* translations, *Arabian Nights, Tales from the Arabic,* and *Decameron.*

PAYNE, WILLIAM MORTON (1858-1919). An American critic and educator; born in Newburyport, Mass. He is a strong critic of modern literature of Europe and America; wrote *Our New Education, Little Leaders,* and *Various Views.*

PEABODY, ANDREW PRESTON (1811-1893). An American preacher, professor, and author; born in Beverly, Mass. From 1852, for 11 years he edited the *North American Review.* Among the books written by him are *Reminiscences of European Travel, Manual of Moral Philosophy, Christianity and Science, Harvard Reminiscences, Harvard Graduates Whom I Have Known,* and *King's Chapel Sermons.*

PECK, GEORGE WASHINGTON (1840-1916). An American humorist; born at Henderson, N. Y. For several years he was proprietor of *Peck's Sun,* Milwaukee. His books are *Peck's Compendium of Fun, Peck's Sunshine, Peck's Bad Boy, How George W. Peck Put Down the Rebellion,* and *Peck's Boss Book.*

PECK, HARRY THURSTON (1856-1914). An American editor and critic; born in Stamford, Conn.; editor of the *Bookman* (1895); wrote *The Personal Equation, The Adventures of Mabel, Graytone and Porphyry,* and *What Is Good English?*

PECK, SAMUEL MINTURN (1854-). An American poet; born in Tuscaloosa, Ala.; wrote *Cap and Bells, Rings and Love-Knots, Rhymes and Roses,* and *Fair Women of To-day.*

PEELE, GEORGE (about 1558-about 1597). English dramatist; author of *Arraignment of Paris, Edward I., The Battle of Alcazar, The Old Wives' Tale, David and Bethsabe,* and a few miscellaneous pieces which include "An Eclogue Gratulatory," and "The Beginnings, Accidents, and End of the Fall of Troy."

PELLICO, SILVIO (1789-1854). An Italian poet; born at Saluzzo. While quite young he achieved a high reputation, especially by his dramatic poems, *Laodamia* and *Francesca da Rimini.* In 1831 he put forth *My Prisons,* containing an account of his 10 years' incarceration. Pellico subsequently published several works in verse and prose, one of the latest being a treatise on *The Duties of Man.*

PEMBERTON, MAX (1863-). An English novelist; born in Birmingham, England. He has published a number of stories of adventures, including *The Iron Pirate, The Sea Wolves, The Impregnable City, A Gentleman's Gentleman, Queen of the Jesters, The Garden of Swords, Fêo,* and *The House Under the Sea.*

PERRY, BLISS (1860-). An American editor and author; born at Williamstown, Mass.; wrote *The Broughton House, Salem Kittredge, The Plated City, The Powers at Play,* and *A Study of Prose Fiction.*

PERSIUS (AULUS PERSIUS FLACCUS) (34-62). A Roman satirist; born in Etruria; wrote six short satires of much native vigor, though not equal to those of Horace and Juvenal.

PETRARCH, FRANCESCO (1304-1374). A famous Italian lyric poet; born at Arezzo, in Tuscany; spent his youth in Avignon; intended for the profession of law, devoted his time to the study of Cicero and Vergil; met Laura, a lady of surpassing beauty, in the church of St. Clare there in 1327, conceived a passion for her which she could not return, and wrote sonnets in praise of her which have immortalized him. The historic reality of Laura has been doubted. Petrarch wrote more in Latin than in Italian, but his fame rests upon the *Canzoniere,* comprising sonnets and madrigals, and mainly love poetry. [See Ital. Lit.].

PHAEDRUS. A Latin fabulist of the age of Augustus; originally a slave; was manumitted by Augustus. His fables, 100 in number, were written in verse and are mostly versifications from Aesop.

PHELPS, ELIZABETH STUART (Mrs. Ward) (1844-1911). American writer; her books include *The Gates Ajar, The Story of Avis, Beyond the Gates, A Singular Life,* and *Within the Gates.*

PHILEMON (about 361-263 B. C.). A Greek poet, and one of the founders of Attic new comedy. He produced nearly 100 comedies, of which about 57 have been preserved to us in fragments in other works.

PIERPONT, JOHN (1785-1866). American poet; a volume of his works was published in 1840 as *Airs of Palestine, and Other Poems;* his *Anti-Slavery Poems* appeared in 1843.

PIKE, ALBERT (1809-1891). An American journalist, lawyer, and poet; born in Boston. He rose to a high grade in the order of Freemasons. Besides several Masonic works he has published *Hymns to the Gods,* reprinted in *Blackwood's Magazine* in 1839; *Prose Sketches* and *Poems; Nugae,* a collection of poems, and two similar collections.

PINKNEY, EDWARD COATE (1802-1828). American poet; known principally for a small volume of *Poems.*

PISAN, CHRISTINE DE (1363-1431). French author; her *Le chemin de longue estude* and *Poème de la pucelle* give accurate ideas of the society of her time.

PLATEN, AUGUST (1796-1835). German poet; author of *Ghaselen, Sonette aus Venedig, Die Verhängnisvolle Gabel, The Abbassiden, Polenlieder,* and *Gedichte.*

PLAUTUS, TITUS MACCIUS (254-184 B. C.). A Latin comic poet; born in Umbria. He wrote about 130 comedies, but only 20 have survived, the plots mostly borrowed from Greek models.

POE, EDGAR ALLAN (1809-1849). An American poet and story writer; born in Boston. Left an orphan early, he was adopted by John Allan of Richmond, Va. At the age of 18 he left this home and published his first volume of verse at Boston. He was a cadet at the United States Military Academy (1830-1831), and subsequently embarked on a literary career. He is one of the most remarkable characters in literature, gifted with great power of invention, vividness of imagination, and artistic skill. His work consists of criticism, prose tales, and poetry. His tales are remarkable for their imaginative vigor and finished art, notably *Ligeia, The Fall of the House of Usher, Eleonora, The Mask of the Red Death,* and *The Murders of the Rue Morgue.* His best poems are *Valley of Unrest, Lenore, Helen, City in the Sea, Israfel, The Raven,* and *The Bells.*

POLYBIUS (205-120 B. C.). A Greek historian. His great work is a general history of the extension of Rome from 220 to 146 B. C. Five only of its 40 books are now extant, with some fragments of the rest.

PONCE DE LEON, LUIS (1529-1591). Spanish poet. While in prison he produced *Los Nombres de Cristo*, a famous mystic prose work. Some of his best known odes are *La Profecia del Tajo*, *La Noche Serena*, and *La Vida Retirada*. [See Sp. Lit.].

POOLE, WILLIAM FREDERICK (1821-1894). An American bibliographer; born at Salem, Mass. While at Yale he prepared and published his *Index to Subjects in Reviews and Periodicals*, which afterward became the larger work, *Index to Periodical Literature*. He was the author of *Cotton Mather and Salem Witchcraft*, *The Popham Colony*, *The Ordinance of* 1787, *Anti-Slavery Opinions Before* 1800, *The Battle of the Dictionaries*, and *Websterian Orthography*.

POPE, ALEXANDER (1688-1744). An English poet; born in London. In 1711 he published his poem the *Essay on Criticism*, which was followed by *The Rape of the Lock*, a polished and witty narrative poem, founded on an incident of fashionable life. From 1715 to 1726 he was engaged on a poetical translation of Homer's works, the *Iliad* being wholly from his pen, the *Odyssey* less than half. He wrote *Imitations of Horace* and *The Dunciad*. [See Eng. Lit.].

PORTER, JANE (1776-1850). A British novelist; born in Durham. Her father, an officer in the army, died when his children were all young. Jane, the eldest child, wrote several novels, two of which, *Thaddeus of Warsaw* and the *Scottish Chiefs*, had a high reputation in their day, and are still read.

PORTER, NOAH (1811-1892). An American scholar; born in Farmington, Conn. In 1871 he succeeded Theodore D. Woolsey as president of Yale College. His principal works are *The Educational Systems of the Puritans and the Jesuits*, *The Human Intellect*, *Books and Reading*, *American Colleges and the American Public*, *Science and Sentiment*, *Elements of the Moral Sciences*, *Kant's Ethics*, and *Fifteen Years in the Chapel of Yale College*; editor in chief of *Webster's Dictionary* and *International Dictionary*.

POUCHKINE, ALEXANDER SERGEYEVITCH (1799-1837). The greatest poet of Russia; born at Moscow; wrote *Recollections of Tsarskoye Selo*, where he was educated; *Ruslan and Lyudmila*, *The Prisoner of the Caucasus*, *The Gypsies*, *The Brother Murderers*, *Peltava*, *History of the Pugatcheff Insurrection*, *The Captain's Daughter*, and *Dubrovski*. [See Rus. Lit.].

PRAED, WINTHROP MACKWORTH (1802-1839). An English poet; born at London. A complete edition of his works was issued in 1864, edited by his sister, Lady Young, with a memoir by Derwent Coleridge. Praed wrote many charades, which are among the cleverest in our language.

PRATI, GIOVANNI (1815-1884). Italian poet; author of *Edmenegarda*, and the *Psiche* and the *Iside*, containing his best lyrics. [See It. Lit.]

PRESCOTT, WILLIAM HICKLING (1796-1859). An eminent American historian; born at Boston, Mass. Growing blind, the result of an accident at college, he fortunately inherited means, employed assistants, and with great courage in 1826 began to study Spanish history. *Ferdinand and Isabella* (1838) established his reputation in both worlds. *The Conquest of Mexico*, his best work, was published in 1843, and *The Conquest of Peru* in 1847. He died of apoplexy at Boston before completing the *History of Philip II*.

PRIME, WILLIAM COWPER (1825-1905). An American lawyer and author; brother of Samuel I. Prime; born at Cambridge, N. Y. In 1857 he published *Boat Life in Egypt and Nubia* and *Tent Life in the Holy Land*. He devoted much attention to archaeology, numismatics, and ceramics, and published *Coins, Medals, and Seals; Pottery and Porcelain of All Times and Nations*, and an annotated edition of the hymn, *O Mother, Dear Jerusalem*.

PRINCE, THOMAS (1687-1758). American historian; author of *The Chronological History of New England* to 1633, valuable on account of its accuracy; *Account of the English Ministers at Martha's Vineyard*, and *Earthquakes of New England*.

PRIOR, MATTHEW (1664-1721). An English politician and poet; born in Dorsetshire. In 1686 he was graduated at Cambridge, where he formed an intimacy with Charles Montague, afterwards earl of Halifax. He held various civil and diplomatic positions; was returned to Parliament in 1701. In 1713 he was made ambassador at Paris; but when the Whigs came into power, in 1714, he was recalled, and imprisoned on a charge of treason. After his release he published by subscription a folio volume of his *Poems*, from which he realized 4,000 guineas. Lord Harley added an equal sum for the purchase of an estate. He was buried in Westminster Abbey, where a monument was erected to his memory, for which he left £500 in his will.

PROCTER, ADELAIDE ANNE (1825-1864). An English poet; daughter of "Barry Cornwall." Early in 1853 *Household Words* received a poem bearing the signature "Mary Berwick" which Charles Dickens, the editor, thought "very different from the shoal of verses perpetually setting through the office of such a periodical, and possessing much more merit." It was not until nearly two years after that Dickens learned that "Mary Berwick" was Adelaide Procter, whom he had known from childhood, and who was the daughter of one of his oldest literary friends. With the exception of a little volume entitled *A Chapter of Verses*, published in 1862, all of her poems originally appeared in periodicals edited by Dickens, who prefixed a biographical introduction to a complete edition issued shortly after her death.

PROCTER, BRYAN WALLER, or **"BARRY CORNWALL"** (1787-1874). An English lyrist; born in London; is chiefly memorable as a friend of all the eminent literary men of two generations, such as Wordsworth, Lamb, and Scott on the one hand, and Carlyle, Thackeray, and Tennyson on the other. His *Charles Lamb* is a delightful memoir. He wrote nearly 300 songs, among which are *The Sea*, *A Petition to Time, Life*, and *Song to His Wife*.

PULCI, LUIGI (1432-1484). Italian poet; wrote *Il Morgante Maggiore*, *Confessions*, *Beca di Dicomano*.

QUARLES, FRANCIS (1592-1644). English religious poet and author of royalist pamphlets. His *Emblems* have frequently been reprinted.

QUENTAL, ANTHERO DE (1842-1891). Portuguese poet and essayist; author of *Primaveras romanticas*, *Os sonetos completos*, *Bomsensoe e bomgosto*.

QUEVEDO Y VILLEGAS, FRANCISCO DE (1580-1645). Spanish author. His most important works are *El Buscón* (*El gran Tacaño*), and *Las Visiones* (*Sueños*).

QUILLER-COUCH (*kootch*), **ARTHUR THOMAS** (1863-). An English author; born at Cornwall; wrote *Dead Man's Rock*, *Troy Town*, *The Splendid Spur*, *The Delectable Duchy*, *Wandering Heath*, *Ia*, *The Ship of Stars*, *Old Fires and Profitable Ghosts*, *Adventures of Harry Revel*, and *Adventures in Criticism*. He was selected to finish Stevenson's unfinished novel, *St. Ives*; wrote much under the pseudonym of "Q."

QUINAULT, PHILIPPE (1635-1688). A French librettist and dramatist; *Les rivales* and *L'amant indiscret*, his first comedies, are among his best. *Psyché*, his first lyric drama, was followed by librettos almost entirely, of which his masterpieces are *Amadis*, *Roland*, and *Armide*.

QUINET, EDGAR (1803-1875). French man of letters; attracted by his early translations, the French Institute sent him to Greece, where he wrote *La Gréce moderne*; the poems *Ahasvérus*, *Napoleon*, and *La genie des religions* gained a lectureship at Lyons and later at the College de France, from which he was dismissed for his attacks on the Jesuits; later famous works are *La création*, *La révolution*, and *La république*, all relating to the conditions in France.

QUINTANA, MANUEL JOSE. Spanish statesman and writer; author of patriotic *Odes* and *Vidas de Españoles célebres*.

RABELAIS (*rah-be-lay'*), **FRANCOIS** (1483-1553). A great French humorist; born at Chinon; studied medicine and for a time practised it, particularly at Lyons. Here he commenced the series of writings that have immortalized his name, his *Gargantua* and *Pantagruel* forming a succession of satires in a vein of riotous mirth mingled with keen political insight and pedantic wisdom.

RACINE, JEAN (1639-1699). A French poet and dramatist; born at La Ferte-Milon; educated at Beauvais and Port Royal. While at Paris he was associated with La Fontaine, Moliere, and Boileau. In 1664 he was granted a pension from the Court for his *Odes* to the king. He wrote only one comedy, *Les Plaideurs* (1668), which did not prove a success. His other productions include *La Thebaïde* (1664), his earliest play, *Alexander the Great* (1665), *Mithridate* (1673), *Britannicus* (1669), *Berenice* (1670), *Bajazet* (1672), *L' Andromaque* (1667), *Iphigenie* (1675), *Phèdre* (1677), the last three being most popular. In 1689 he wrote *Esther* for the girls at St. Cyr Col-

lege, and in 1681 *Athalie* appeared. For many years he was royal historiographer, holding the office jointly with Boileau. In his later years he produced four *Cantiques spirituels* and an *Histoire abregée de Port Royal.* [See Fr. Lit.]

RADCLIFFE, ANNE (1764-1823) English novelist; author of *A Sicilian Romance, The Italian, Mysteries of Udolpho, Journey through Holland and Germany.*

RALEIGH, SIR WALTER (about 1605-1666). [See under Government, also Eng. Lit.]

RALPH, JULIAN (1853-1903). An American author and journalist; South African correspondent for the London *Daily Mail* (1899); wrote *Dutchman or German, On Canada's Frontier, Chicago and the World's Fair, Our Great West, People We Pass, Dixie, Alone in China, A Prince in Georgia, Toward Pretoria, An American with Lord Roberts, War's Brighter Side,* and *The Millionairess.*

RAMEE, LOUISE DE LA, or **"OUIDA"** (1840-1908). An English novelist; born at Bury St. Edmunds. Her pseudonym is her own childish attempt to pronounce her name—Louisa; wrote *Held in Bondage, Strathmore, Chandos, Idalia, Under Two Flags, Tricotrin, Puck, A Dog of Flanders, Pascarel, Two Little Wooden Shoes, Ariadne, Friendship, Moths, The Village Commune, In Maremma. Bimbi, Wanda, Othmar, Guilderoy, Syrlin, Ruffino, The Silver Christ, Two Offenders, Le Selve, Two Massarenes, Toxin, La Strega, Street Dust, Views and Opinions,* and *Critical Studies.* Recently she made her home in Florence, where, through her prodigal extravagance, she suffered from poverty; granted a pension by the British government (1907).

RAMSAY, ALLAN (1686-1758). A Scotch poet; born at Leadhills, Lanarkshire. A collection of his poems appeared in 1721; *Fables and Tales* (1722), *The Teatable Miscellany* (1724), *The Evergreen* (1724), and *The Gentle Shepherd* (1725), which established his fame. He also wrote many songs, *The Yellow-hair'd Laddie* being most popular. A complete edition of his works appeared in 1731.

RANDALL, JAMES RYDER (1839-1908). An American song writer and journalist; born at Baltimore, Maryland. He is the author of a number of songs in behalf of the Confederate cause, including *Maryland, My Maryland* (his most popular work); *The Sole Sentry, There's Life in the Old Land Yet,* and *The Battle Cry of the South.*

RANKE, FRANZ LEOPOLD VON (1795-1886). A German historian; born at Wiehe, near Nuremberg; from 1825, professor of history at Berlin. He was sent by the government to examine the archives at Vienna, Rome, Venice, and Florence. His thorough researches made him the father of a school of historiography. *A History of the Roman and Teutonic Nations* was his first work, covering the period 1494-1535. This was followed by a *History of Southern Europe in the Sixteenth and Seventeenth Centuries, The Servian Revolution,* and the *Conspiracy Against Venice in* 1688. Then came his best known work, the *History of the Popes.*

RAWLINSON, GEORGE (1812-1902). An English orientalist and historian; brother of Sir Henry Rawlinson. His principal works are *Historic Evidences for the Truth of Christian Records, The Contrasts of Christianity with Heathenism and Judaism,* and *Manual of Ancient History.* His great work is *Seven Great Monarchies of the Eastern World.* These are: I. Chaldaea; II. Assyria; III. Media; IV. Babylonia; V. Persia; VI. Parthia; VII. The Sassanian or New Persian Empire. His *History of Phoenicia* appeared in 1890.

RAYMOND, HENRY JARVIS (1820-1869). An American journalist; born in Lima, N. Y.; founded the New York *Times* (September 18, 1851); lieutenant governor of New York (1854); drafted the famous *Address to the People* (1856); in 1864 was chosen as representative from New York to the thirty-ninth Congress; wrote *A Life of Daniel Webster, Political Lessons of the Revolution,* and *The Life and Public Services of Abraham Lincoln.*

READ, OPIE PERCIVAL (1852-). An American journalist; born in Nashville, Tenn. His studies of Arkansas life have been widely read; wrote *A Kentucky Colonel, Emmett Bonlore, A Tennessee Judge, My Young Master, Bolanyo, The Wives of the Prophet,* and *In the Alamo.*

READ, THOMAS BUCHANAN (1822-1872). An American poet and artist; born in Chester county, Pa. His *Poems* appeared in 1847. *Lays and Ballads* (1848), *The New Pastoral* (1854), *The House by the Sea* (1856), *Female Poets of America* (1848). The most popular of his productions are *Sheridan's Ride* and *Drifting.*

READE, CHARLES (1814-1884). An English novelist. The books by which he first became known were his *Peg Woffington* and *Christie Johnstone. The Cloister and the Hearth* is his masterpiece. Among his others are *Hard Cash, It Is Never Too Late to Mend, Griffith Gaunt, Put Yourself in His Place, A Terrible Temptation, A Woman Hater,* and *Good Stories of Man and Other Animals.*

READE, JOHN (1837-1919). Canadian writer; born in Ireland. Autnor of *Aboriginal American Poetry, The Prophecy and Other Poems, Making of Canada.*

REGNIER, MATHURIN (1573-1613). French satirical poet. One of the best editions is by Viollet-le-Duc.

RENAN (*reh-non'*), **JOSEPH ERNEST** (1823-1892). A French writer; born in Tréguier. In 1862 he was appointed professor of Hebrew, Chaldee, and Syriac in the Collège de France, but the skeptical views manifested in his *Life of Jesus* raised an outcry against him, and he was removed from his chair to be restored again, however, in 1871. This work was the first part of a comprehensive *History of the Origins of Christianity,* written from the standpoint of one who disbelieves in the supernatural claims of Christianity. Renan's latest important work was the *History of the People of Israel Till the Time of King David;* became a member of the French Academy (1878).

REPPLIER, AGNES (1858-). An American essayist; born in Philadelphia; published *Books and Men, Points of View, Essays in Miniature, Book of Famous Verse, Essays in Idleness, In the Dozy Hours, Varia, Philadelphia,* and *The Fireside Sphinx.*

REUTER, FRITZ (1810-1874). One of the most realistic of German writers. His best known productions, *Ut mine Festungstid, Ut mine Stromtid,* and *Ut de Franzosentid* are included in *Olle Kamellen.*

RHODES, JAMES FORD (1848-1927). American historian, whose *History of the United States from the Compromise of* 1850 is considered the best work on the period covered.

RHYS, ERNEST (1859-). English author, editor of the Camelot series, Dekker's *Plays;* author of *The Great Cockney Tragedy, A London Rose and Other Rhymes.* **SIR JOHN RHYS** (1840-1915) was a profound Celtic scholar and author. *Celtic Britain, Celtic Folklore,* and *The Welsh People* are among his writings.

RICE, JAMES (1843-1882). An English novelist; born at Northampton; collaborated with Walter Besant on *Ready-Money Mortiboy, The Golden Butterfly, The Monks of Thelema,* and *The Seamy Side.* Rice wrote *History of the British Turf.*

RICHARDSON, SAMUEL (1689-1761). An English novelist; born in Derbyshire; the son of a joiner; was apprenticed to a printer in London; set up in the business for himself, and from his success in it became master of the Stationers' Company in 1754 and king's printer in 1760; was 50 before he came out as a novelist; published his *Pamela* in 1740, his masterpiece; *Clarissa Harlowe,* written in the form of letters, in 1748, and *Sir Charles Grandison* in 1753.

RICHTER, JEAN PAUL FRIEDRICH (1763-1825). Usually called Jean Paul simply; the best known of German humorists; born at Wunsiedel, in Upper Franconia; the son of a poor German pastor; had a scanty education, but his fine faculties and unwearied diligence supplied every defect. His works are numerous, and the chief are the novels *Hesperus, Quintus Fixlein,* and *Schoolmaster Wuz;* idyls, and *Levana,* a work on pedagogy. His works are published in 34 volumes.

RIDPATH, JOHN CLARK (1840-1900). An American educator and historian; born in Putnam County, Ind. In 1874-1875 he published a *History of the United States,* which he supplemented with another in 1877. In 1876 he issued a *School History.* His *History of the United States* in eight volumes was completed shortly before his death.

RILEY, JAMES WHITCOMB (1853-1916). An American poet; born in Greenfield, Ind. His poems are characterized by both humor and pathos and by their sympathy with the simplest phases of life. Those of the Hoosier type are especially popular. Among his works are *The Boss Girl and Other Sketches, Green Fields and Running Brooks, The Rubaiyat of Doc. Lifers, Home Folks, Afterwhiles, Old-Fashioned Roses.*

Pipes o' Pan, Rhymes of Childhood, The Flying Islands of the Night, Neighborly Poems, Here at Home, Armazindy, and *A Child World.*

RIPLEY, GEORGE (1802-1880). An American scholar; born at Greenfield, Mass.; published *Discourses on the Philosophy of Religion* (1839), and *Letters on the Latest Forms of Infidelity.* In 1849 he became literary editor of the New York *Tribune* and literary adviser for the publishing house of Harper & Brothers, filling these positions until his death. In 1853 he published *Hand Book of Literature and Fine Arts.* In 1853 he and Charles A. Dana undertook the editing of Appleton's *American Cyclopedia* (1853, *et seq.*; second edition 1874, *et seq.*).

ROBERTS, CHARLES GEORGE DOUGLAS (1860-). A Canadian poet; born at Douglas, near Fredericton, New Brunswick; professor of English and French literature at King's College, Windsor, Nova Scotia (1885-1887), and of economics and international law (1887-1895); associate editor of the *Illustrated American* at New York (1897); wrote *Orion and Other Poems, In Divers Tones, Ave: An Ode for the Shelley Centennial, Songs of the Common Day, The Book of the Native,* and *New York Nocturnes.* His prose includes *The Canadians of Old, Appleton's Canadian Guide, The Raid from Beauséjour, Reube Dare's Shad Boat, Around the Camp Fire, Earth's Enigmas, A History of Canada, The Forge in the Forest, A Sister to Evangeline, By the Marshes of Minas, The Heart of the Ancient Wood, The Kindred of the Wild, Barbara Ladd, Mam'selle, The Watchers of the Trail,* and *The Haunters of the Silences.*

ROE, EDWARD PAYSON (1838-1888). An American clergyman and novelist; born at Moodna, N. Y. His chief works are *Nature's Serial Story, An Original Belle, Driven Back to Eden, The Earth Trembled, The Home Acre,* and *Taken Alive.*

ROGERS, SAMUEL (1763-1855). An English poet; bred to banking, and all his life a banker; took to literature and produced a succession of poems, *The Pleasures of Memory, Human Life,* and *Italy.*

ROOSEVELT, THEODORE. (See p. 296). The author of *The Naval War of* 1812, *Life of Thomas Hart Benton, Life of Gouverneur Morris, Ranch Life and Hunting Trail, History of New York City, The Winning of the West, Essays on Practical Politics, The Wilderness Hunter, American Political Ideals, The Rough Riders, Life of Oliver Cromwell, The Strenuous Life,* and *The Deer.*

ROSCOE, WILLIAM (1753-1831). An English historian; born near Liverpool; studied law and began to practice (1774); wrote *Life of Lorenzo de' Medici, Called the Magnificent, Life and Pontificate of Leo X.,* and devoted much attention to the study of botany.

ROSSETTI, CHRISTINA GEORGINA (1830-1894). An English poet; born at London; a sister of Dante Gabriel Rossetti. Their father, **GABRIELE ROSSETTI** (1783-1854) was from 1814 to 1821 director of the Museum at Naples, but was exiled on account of his political opinions. In 1824 he settled in England, and in 1831 was made professor of Italian literature in King's College, London. Having become blind he resigned the professorship in 1845. He wrote several poems in Italian, but is specially notable as a commentator upon Dante. The daughter wrote several volumes in verse and prose. Among her poems are *Goblin Market, The Prince's Progress, Sing-Song, Annus Domini,* a prayer and a text for each day of the year; *A Pageant, Letter and Spirit, Time Flies,* and *The Face of the Deep.*

ROSSETTI, DANTE GABRIEL (1828-1882). An English poet and painter; the head of the Pre-Raphaelite Brotherhood; born in London. He wrote *The Blessed Damozel,* a poem of great simplicity and spiritual beauty; *My Sister's Sleep, The House of Life,* of 101 sonnets; a prose work, *Hand and Soul,* and two remarkable ballads, *Sister Helen* and *The King's Tragedy.* Robert Buchanan, under the pseudonym of Thomas Maitland, attacked the morality of Rossetti's poems in the famous article "The Fleshly School of Poetry," which Rossetti answered in his "The Stealthy School of Criticism."

ROSTAND, EDMOND (1868-1918). A French poet. His first play, *The Romanticists,* was an instantaneous success and was followed by *Princess Lointaine, The Samaritan, Cyrano de Bergerac,* and *L'Aiglon.* Rostand's versification is of remarkable beauty. In 1901 he was elected one of the 40 "immortals" of the French Academy. In 1910 his satire drama, *Chantecler,* was produced.

ROYCE, JOSIAH (1855-1916). Born in Grass Valley, Cal.; one of the foremost exponents of neo-Hegelianism in America; published *A Primer of Logical Analysis, The Religious Aspect of Philosophy, The Conception of Immortality.*

ROWSON, SUSANNA HASWELL (1762-1824). Anglo-American novelist, dramatist and actress. Of her plays, the two farces *Americans in England* and *The Volunteers* were the most popular; of her novels, *Charlotte Temple.*

RUCKERT, FRIEDRICH (1788-1866). A German poet; born in Bavaria. His most popular books are the collection of lyrics entitled *Springtime of Love* and the reflective poems *The Wisdom of the Brahman.*

RUNEBERG, JOHAN LUDWIG (1804-1877). Famous Swedish poet of Finland, born at Jacobstadt. [See Scan. Lit.]

RUSKIN, JOHN (1819-1900). An English author; born in London. He was Slade professor of fine arts at Oxford. In *Modern Painters* he advocated a complete revolution in the received conventions of art and art criticism. Ruskin was the first art critic to place criticism upon a scientific basis. In 1851 he appeared as a defender of pre-Raphaelitism. About 1860 he began to write as a political economist and social reformer; his chief works in this sphere being *Unto This Last, Munera Pulveris,* and *Fors Clavigera,* a periodical series of letters to the working men and laborers of Great Britain. In this connection he founded, in 1876, the Guild of St. George; founded a linen industry at Keswick, and revived, in Langdale, hand loom weaving. Among his other works are *Crown of Wild Olive, Sesame and Lilies, Ethics of the Dust, Queen of the Air, and Stones of Venice.*

RUSSELL, WILLIAM CLARK (1844-1911). An English author; born in New York City. His father, **HENRY RUSSELL** (1813-1900), was the composer of the songs *Cheer, Boys, Cheer; To the West, There's a Good Time Coming, Boys; A Life on the Ocean Wave,* and *O Woodman, Spare That Tree.* W. C. Russell was educated at Winchester, England, and in France. He then entered the British merchant service, made voyages to Australia and to China, and after eight years of sailor life abandoned it and devoted himself to literature. His ambition was to raise the nautical novel to a high standard, and his books were written out of his own experience. His books include *The Wreck of the Grosvenor, A Sailor's Sweetheart, An Ocean Free Lance, Jack's Courtship, The Dutch Ship, A Frozen Pirate, Marooned, On the Fok'sle Head, An Ocean Tragedy, My Shipmate Louise, Life of Nelson, Helma,* and *The Good Ship Mohock.*

RYAN, ABRAM JOSEPH, or **"FATHER RYAN"** (1839-1886). An American poet; born at Norfolk, Va. For several years he was pastor of St. Mary's Church, Mobile, Ala., and in 1880 he went north to lecture and to publish his *Poems, Patriotic, Religious, Miscellaneous.* The longest of these is a narrative poem entitled *Their Story Runneth Thus.*

RYDBERG, VIKTOR (1829-1895). Swedish poet and historical novelist. His works include *Frybytaren pa Oestersjön, Den siste athenaren.*

SACHS, HANS (1494-1576). A German meistersinger; born at Nuremberg. He was active in literature for 51 years (1514-1567), during which time he produced in all over 6,300 pieces, consisting of mastersongs, dramas, stories, fables, histories, and hymns. His works have been published in 23 volumes.

SA DE MIRANDA, FRANCISCO DE (about 1495-1558). Portuguese poet, who wrote also in Spanish. "First of the 'Petrarchists' in Spain and Portugal."

SAINTE-BEUVE, CHARLES AUGUSTIN (1804-1869). A French writer and one of the greatest of modern critics; born in Boulogne, France. In 1845 admitted a member of the French Academy. He wrote three volumes of poetry. His 53 volumes, marked by precision, subtlety, delicacy, tact, and knowledge, cause him to stand alone in the field of criticism.

SAINT-PIERRE, JACQUES HENRI BERNARDIN DE (1737-1814). A French novelist; an engineer by profession; was a disciple of Rousseau both sentimentally and speculatively; his chief work, *Paul and Virginia.*

SALTUS, EDGAR EVERTSON (1858-1921). An American novelist and journalist; born in New York City. His works include *Balzac, The Philosophy of Disenchantment, The Anatomy of Negation, Eden, A Transaction in Hearts, The Pace That Kills, Imperial Purple, Madame Sapphira, Enthralled,* and *When Dreams Come True.*

SAND, GEORGE, or MADAME ARMANTINE LUCILE AURORE DUPIN DUDEVANT (1804-1876). One of the greatest of French novelists; born in Paris. In 1822 she married Baron Dudevant, but in 1831 separated from him. In conjunction with Jules Sandeau, a young lawyer, she wrote *Rose and White*, which was published in 1831, with the pseudonym Jules Sand. The reception it met with afforded her an opportunity of publishing a novel solely by herself—*Indiana*, under the name of George Sand, which she ever after retained. In 1854 she published *Story of My Life*, a psychological autobiography. Her published works consist of upward of 80 separate novels, a large number of plays, and numerous articles in literary journals.

SARDOU', VICTORIEN (1831-1908). A French dramatist; born in Paris. He began play writing in early life, though intended originally for the medical profession. Among his plays are *Cleopatra*, *Thermidor*, *Gismonda*, *Madame Sans-Gêne*, and *Fedora*. He entered the Academy in 1878.

SAXE, JOHN GODFREY (1816-1887). An American humorous poet; born in Highgate, Vt. His most popular verses include *Rhyme of the Rail*, *The Proud Miss McBride*, *Progress*, *The Money King*, *Fables and Legends of Many Countries*, and *Leisure-Day Rhymes*.

SAYCE, ARCHIBALD HENRY (1846-). An English orientalist. His works are widely known. He wrote *An Assyrian Grammar for Comparative Purposes*, *The Principles of Comparative Philology*, etc.

SCHEFFEL, JOSEPH VIKTOR VON (1826-1886). A German poet. His first and best work is *Der Trompeter von Säckingen*, a charming tale in verse of the Thirty Years' War.

SCHILLER, JOHANN CHRISTOPH FRIEDRICH VON (1759-1805). A German poet; born in Marbach, Würtemberg; in his twenty-second year wrote the tragedy of *The Robbers*, which at once raised him to the foremost rank among the dramatists of his country. In 1789 he was appointed to the chair of history in the University of Jena, and besides lecturing to crowded audiences he published his *History of the Thirty Years' War* and engaged in various literary enterprises which had great influence on the literature of Germany; settled at Weimar, in order to be near a theater and with Goethe. At intervals he published *Wallenstein*, *Mary Stuart*, *Maid of Orleans*, and *William Tell*. [See Ger. Lit.].

SCHREINER, OLIVE (1862-1920). An English novelist; daughter of a Lutheran clergyman at Cape Town; achieved a great success by *The Story of an African Farm* in 1883, which was followed in 1891 by *Dreams;* also, later, *Dream Life and Real Life*, and *Trooper Peter Halket*.

SCHUYLER, EUGENE (1840-1890). An American author and diplomat; born at Ithaca, N. Y. His books include *Turkistan, Notes of a Journey in Russian Turkistan, Khokand, Bokhara, and Kuldja; Peter the Great as Ruler and Reformer*, and *American Diplomacy and the Furtherance of Commerce*.

SCOLLARD, CLINTON (1860-). An American poet; born at Clinton, N. Y. He has published several volumes of poems, *Pictures in Song, With Reed and Lyre, Old and New World Lyrics, Giovio and Giulia, Songs of Sunrise Lands, The Hills of Song, Skenandoa*, and *A Boy's Book of Rhyme*, besides the prose works *Under Summer Skies* and *On Sunny Shores*.

SCOTT, DUNCAN CAMPBELL (1862-). A Canadian poet; born at Ottawa; entered the civil service and rose to chief clerk and accountant (1893); wrote *The Magic House, Labor and the Angel*, and *The Village of Viger*, a collection of 10 short stories of Canadian country life.

SCOTT, HUGH STOWELL, or "HENRY SETON MERRIMAN" (1862-1903). An English author; born at Newcastle-upon-Tyne; wrote *Phantom Future, Suspense, Prisoners and Captives, Slave of the Lamp, With Edged Tools, Grey Lady, The Sowers, In Kedar's Tents, Flotsam, Roden's Corner, Isle of Unrest, Velvet Glove*, and *The Vultures*.

SCOTT, SIR WALTER (1771-1832). A British author; born in Edinburgh, Scotland. From the commencement of his literary career in 1796, when he published his translations of Burger's *Lenore* and *Wild Huntsman*, to the year of his decease, he was constantly writing. His romances are universally known. His patrimonial estate was considerable; and in 1799 he obtained the preferment of sheriff of Selkirkshire, with about £300 ($1,500). In 1811 he built a mansion on the Tweed, to which he gave the name of Abbotsford. In 1826 the great publishing house of Constable & Co. failed and with it the Ballantyne firm in which Scott was a partner. He regarded the Ballantyne debt as personal and, resolving to "owe no man a penny," he began at the age of 55 the task of paying the creditors $600,000. In two years his work had gained for them nearly $200,000; but the severity of his labors permanently broke down his health, and he died before his aim was realized. But in 1847, by sale of copyrights, his debts were all liquidated. Scott was the originator of the historical novel and has added greatly to our appreciation of history by such novels as *Ivanhoe, Legend of Montrose, Kenilworth;* and *The Talisman, Guy Mannering, Waverley, Rob Roy*, and *Heart of Midlothian* are also among his best novels. The *Lady of the Lake, Marmion*, and the *Lay of the Last Minstrel* constitute his best poetry.

SCUDDER, HORACE ELISHA (1838-1902). An American author; born at Boston, Mass. He contributed to Justin Winsor's *Memorial History of Boston* and was joint author with Mrs. Bayard Taylor of the *Life and Letters of Bayard Taylor; The Life and Letters of David Coit Scudder, Boston Town, Noah Webster*, in the "American Men of Letters Series"; besides a number of books for children.

SEELEY, SIR JOHN ROBERT (1834-1895). English essayist and historian. Author of *Ecce Homo, Expansion of England, Growth of British Policy*.

SHAFTESBURY, ANTHONY ASHLEY COOPER, THIRD EARL OF (1671-1713). An English freethinker, philanthropist, and author. A complete collection of his works was published in 1716 under the title *Characteristics of Men, Manners, Opinions, and Times*.

SHAKESPEARE, WILLIAM (1564-1616). An English dramatist and poet; born in Stratford-on-Avon, Warwickshire, England. His birthplace, as pointed out by traditions, is the house in Henley street, Stratford, which belonged to his father. In his nineteenth year he married Anne Hathaway, daughter of a yeoman at the neighboring hamlet of Shottery, and eight years older than himself. He went to London about 1586, and lived there many years, leaving his wife and children at Stratford. He gained an honorable position as actor, play writer, and shareholder in the theater of Blackfriars, and afterward in that of the Globe; enjoyed the favor and patronage of Queen Elizabeth, James I., and the earl of Southampton, the warm friendship of Ben Jonson, and the highest respect and admiration of his associates, not only for his preeminence as a poet, but for his honesty, geniality, and worth as a man. Of his end we have no other account than the short statement in the diary of the Rev. John Ward, vicar of Stratford, that "Shakespeare, Drayton, and Ben Jonson had a merry meeting, and it seems drank too hard, for Shakespeare died of a fever then contracted." The first collected edition of Shakespeare's plays was the folio of 1623. His poems of *Venus and Adonis* and the *Rape of Lucrece* were published in 1593 and 1594, and were the only works which appeared with his name in his lifetime. Of the 36 plays (exclusive of *Pericles*), the dates of publication of only a few are known. *The Two Gentlemen of Verona* and *Love's Labor's Lost* were among the earliest; and *The Tempest, Troilus and Cressida, Henry VIII., Coriolanus, Julius Caesar*, and *Antony and Cleopatra* among the latest. The *Midsummer Night's Dream, Merchant of Venice, Romeo and Juliet, Richard II., Richard III., Henry IV.*, and *King John* were all produced before 1598. A copy of *Hamlet* is extant, bearing the date 1603. *Twelfth Night* was produced in 1601; *King Lear* was printed in 1607; *The Tempest* was written in 1611. The second folio edition of the collected plays appeared in 1632, and two others subsequently. [See Eng. Lit.].

SHAW, ALBERT (1857-). An American economist and editor; born at Shandon, Ohio; wrote *Icaria: A Chapter in the History of Communism;* editor of the American *Review of Reviews;* wrote also *Municipal Government in Great Britain*, and *Municipal Government in Continental Europe*.

SHAW, GEORGE BERNARD (1856-). A British critic, essayist, and dramatist; born in Dublin; began his literary career in London as a fine art critic; wrote four novels, *The Irrational Knot, Love Among the Artists, Cashel Byron's Profession*, and *An Unsocial Socialist*. His plays have aroused much discussion. They are included in *Plays Pleasant and Unpleasant, Three Plays for the Puritans*, and *The Admirable Bashville*. Other works are *Fabian Essays, The Quintessence of Ibsenism*, and *The Perfect Wagnerite*.

SHAW, HENRY WHEELER, or "JOSH BILLINGS" (1818-1885). An American humorist; born at Lanesborough, Mass. His sketches, written in his original method of spelling, were very popular. His published works include *Josh Billings, His Sayings; Josh Billings on Ice, Every Body's Friend,* and *Josh Billings' Spice Box.* In 1870 he began the publication of *Josh Billings' Farmers' Allminax,* which appeared annually.

SHELLEY, PERCY BYSSHE (1792-1822). An English poet; son of Sir Timothy Shelley; born near Horsham, England. At Oxford he published anonymously a scholastic thesis entitled *Necessity of Atheism;* refusing either to acknowledge or deny it, was at once expelled. His first great poem, *Queen Mab,* was followed by the *Revolt of Islam,* a poem in the Spenserian stanza. In 1811 he eloped to Edinburgh with Harriet Westbrook, the daughter of a retired innkeeper. She was 16 years of age, his own age being 19. The marriage turned out unhappily. In November, 1816, she committed suicide by drowning. Shelley was deeply affected by this event, but soon after married Mary Godwin. Shelley left England in March, 1818, and the whole short remainder of his life was passed in Italy. On July 8, 1822, he was sailing with a Mr. Williams in the Bay of Spezia, when both were drowned. He wrote also *Alastor, Adonais, Sensitive Plant, The Skylark,* and *The Defense of Poetry.* [See Eng. Lit.]

SHERIDAN, RICHARD BRINSLEY (1751-1816). An English dramatist and politician; born in Dublin; scored his first success with *The Rivals. The School for Scandal* and *The Critic* set flowing the tide of prosperity. Turning his attention next to politics, he entered Parliament, and two years later became undersecretary for foreign affairs. His great speech impeaching Hastings placed him in the front rank of orators. He died in poverty, but was accorded a burial in Westminster Abbey.

SHERMAN, FRANK DEMPSTER, or "FELIX CARMEN" (1860-1916). An American poet; born at Peekskill, N. Y. He achieved fame as a writer of graceful, piquant verses; published *Madrigals and Catches, Lyrics for a Lute, New Waggings of Old Tales,* in collaboration with John Kendrick Bangs, and *Little-Folk Lyrics.*

SHILLABER, BENJAMIN PENHALLOW, or "MRS. PARTINGTON" (1814-1890). An American humorist; born at Portsmouth, N. H. His *Life and Sayings of Mrs. Partington* gave him fame. His other works are *Rhymes with Reason and Without, Knitting Work, Partingtonian Patchwork, Lines in Pleasant Places, The Ike Partington Juvenile Series, Ike and His Friends, Cruises with Captain Bob, The Double-runner Club, Wide-Swath,* a collection of verses; and *Mrs. Partington's New Gripsack Filled with Fresh Things.*

SHORTHOUSE, JOSEPH HENRY (1834-1903). English novelist, noted for his *John Inglesant.*

SIDNEY, SIR PHILIP (1554-1586). An English poet and one of the most attractive figures at Elizabeth's court; born at Penshurst, Kent; the son of Sir Henry Sidney, lord deputy of Ireland; sent as ambassador in 1577 to the court of Vienna. In 1583 he received a knighthood. He received his death wound at the battle of Zutphen. His fame as an author rests securely on his prose romance *Arcadia,* his critical treatise *The Defense of Poesy,* and above all on his exquisite sonnet series *Astrophel and Stella.* [See Eng. Lit.]

SIDONIUS, APOLLINARIS (431-about 482). Roman poet, received political advance as reward for his panegyrics. Author of *Poems* and *Letters.*

SIENKIEWICZ (*se-en'ke-vix*), **HENRYK** (1846-1916). A Polish author; born in Siedlce. He is the author of the historical novel *Quo Vadis, With Fire and Sword, Knights of the Cross,* etc.

SIG'OURNEY, LYDIA (HUNTLEY) (1791-1865). An American author; born in Norwich, Conn. In her *Letters of Life* she enumerates 46 distinct works wholly or partially from her pen, besides over 2,000 articles in prose and verse contributed to nearly 300 periodicals.

SILL, EDWARD ROWLAND (1841-1887). An American poet and essayist; born at Windsor, Conn.; wrote *Hermione and Other Poems, The Hermitage and Other Poems, The Venus of Milo and Other Poems, Essays in Literature and Education and Friendly Letters,* and a posthumous collection embracing most of his better verse.

SIMMS, WILLIAM GILMORE (1806-1870). A prolific American writer; born at Charleston, South Carolina; turned from law to literature. *Southern Passages and Pictures* contains characteristic examples of his poetry, and of his novels *Woodcraft, The Partisan,* and *Beauchampe* may be mentioned.

SISMON'DI, JEAN CHARLES LEONARD SIMONDE DE (1773-1842). A celebrated Swiss historian; born at Geneva. The works which have established his reputation are his great histories of *The Italian Republics in the Middle Ages, European Literature,* and *A History of the French.*

SLOANE, WILLIAM MILLIGAN (1850-). American historian. His works include *French War and the Revolution, Napoleon Bonaparte, French Revolution and Religious Reform, Life of James McCosh.*

SLOWACKI, JULIUSZ (1809-1849). Polish poet, called "Satan of Literature" from the misanthropic tenor of his writings.

SMILES, SAMUEL (1812-1904). A British author. The greater portion of his works are biographical. Among these works are *The Life of George Stephenson, Self-Help, Lives of the Engineers, Industrial Biography, The Huguenots in England and Scotland, Character, The Huguenots in France, Duty, Life and Labor, A Publisher and His Friends, Jasmin the Barber Poet,* and *Josiah Wedgwood.*

SMITH, ADAM (1723-1790). A British political economist. In 1776 he produced his *Inquiry in the Nature and Causes of the Wealth of Nations,* a work to which he devoted ten years of his life and which has rendered his name world-famous.

SMITH, FRANCIS HOPKINSON (1838-1915). An American author, engineer, and artist; born in Baltimore, Md. (For his work as an artist, see Dictionary of Fine Arts); wrote *Well-Worn Roads, Colonel Carter of Cartersville, A Day at Laguerre's, Tom Grogan, Gondola Days, Caleb West Master Diver, The Other Fellow, The Fortunes of Oliver Horn,* etc.

SMITH, GOLDWIN (1823-1910). An English man of letters; born in Berks; regius professor of modern history at Oxford (1858-1866); a stanch friend of the North during the Civil War; came to America as professor of English history in Cornell University; in 1871 settled in Canada; was regent of the University of Toronto; editor of the *Canadian Monthly,* the *Nation,* and the Toronto *Week.* He believed that Canada will be annexed to the United States; wrote a number of books and pamphlets to that effect, including *Relations between England and America* and *The Political Destiny of Canada.* A few of his other voluminous writings are *Lectures on Modern History, Irish History and Irish Character, The Empire, Lectures and Essays, Essays on the Questions of the Day,* and *History of the United States.* He was an ultra-Liberal.

SMITH, SAMUEL FRANCIS (1808-1895). An American clergyman and author; born in Boston; wrote *My country, 't is of thee,* and he says, "It was written at Andover in 1831 or 1832; was first used at a children's Fourth of July celebration at the Park Street Church (1832), and made a national hymn, without my planning or seeking for such a distinction, because the people, unasked, took it up, and *would* sing it."

SMITH, SYDNEY (1771-1845). An English clergyman; born in Woodford, Essex. In 1803 he removed to London. He became renowned as one of the wittiest and most genial of men. He wrote *Letters on Catholics* or *The Plymley Letters, Three Letters to Singleton,* and *Letters on American Debts.*

SMOLLETT, TOBIAS GEORGE (1721-1771). A British novelist; born at Dalquhurn, Dumbartonshire, Scotland; bred to medicine, but drifted to literature; achieved his first success in *Roderick Random,* which was followed by *Peregrine Pickle, Count Fathom,* and *Humphrey Clinker;* wrote a *History of England* and a political lampoon, *The Adventures of an Atom.*

SOPH'OCLES (495-406 B. C.). A Greek tragic poet; born in the Attic demus or village of Colonus, a suburb of Athens. He was 15 when the battle of Salamis was fought, and for his remarkable beauty and skill in music he was chosen to lead the chorus which sang the paean of victory. The number of plays attributed to him without question was 113. Seven only are extant, viz., *Antigone, Electra, Trachinian Women, King Oedipus, Ajax, Philoctetes,* and *Oedipus at Colonus.* These exhibit his art in its maturity, and sustain the verdict of ancient and modern critics that Sophocles carried the Greek drama to its highest perfection.

SOUTHEY, ROBERT (1774-1843). An English poet. In 1803 he took up his residence at Keswick, in Cumberland, being thenceforth classed as one of the Lake poets. The latter years of his life were clouded by a mental imbecility. His chief poems are *Joan of Arc, A Vision of Judgment, Roderick, Thalaba, Madoc,*

and *The Curse of Kehama*. His prose is of most value, especially *Letters from England by Don Manuel Espriella, The Doctor*, containing *The Three Bears;* and the lives of *Wesley* and of *Nelson*.

SPARKS, JARED (1789-1866). An American historian; born in Willington, Conn.; author of a large number of sermons, biographical, historical, and theological works, notably *The Library of American Biography* and *Correspondence of the American Revolution*.

SPENSER, EDMUND (1552-1599). One of England's greatest poets. Details of his life are scanty. He wrote *Shepherd's Calendar*, more rhythmical than any preceding poem in English; *Epithalamion*, the finest English marriage hymn; *Faerie Queene*, his great poem, in which he invented Spenserian stanza; *Four Hymns* in honor of love and beauty; and the *Prothalamion*. [See Eng. Lit.]

SPIELHAGEN, FRIEDRICH (1829-1911). A German novelist of the old school, one of the best. His descriptions of the period of 1848 are notable. Author of *Problematische Naturen, Durch Nacht zum Licht, Der neue Pharao, Beiträge zur Theorie und Technik des Romans*.

SPOFFORD, HARRIET PRESCOTT (1835-1921). American author; born in Calais, Me.; wrote *New England Legends, Thief in the Night, Marquis of Carabas, Hester Stanley at St. Mark's, Ballads About Authors, Scarlet Poppy, A Master Spirit*, and *In Titian's Garden*.

STAEL (*deh stah-l'*), **ANNE LOUISE GERMAINE, BARONNE DE** or **MADAME DE** (1766-1817). Born in Paris; daughter of Necker and only child; a woman of eminent ability and an admirer of Rousseau; wrote *Letters* on his character and works; married the Baron de Staël-Holstein, the Swedish ambassador in Paris. Her salon became the center of the literary and political activity of the time. The ambition of Napoleon excited her distrust, and forced her into opposition so expressed that in 1803 she was ordered to leave Paris. In 1802 she was left a widow, and soon after she went to Weimar, where she met Goethe and Schiller. By and by she returned to France and published *Corinne*, her best novel. After this appeared her great epoch-making work on Germany, *De l'Allemagne*, which was seized by the French censors and she was banished from France and settled in Switzerland.

STANNARD, HENRIETTA ELIZA VAUGHAN, or **"JOHN STRANGE WINTER"** or **"VIOLET WHYTE"** (1856-1911). An English novelist; born at York; married Arthur Stannard, a civil engineer (1884); wrote *Sketches of Cavalry Life, Bootles' Baby, Houplá, On March, Garrison Gossip, A Siege Baby, Beautiful Jim, A Blameless Woman, Heart and Sword, The Married Miss Binks, A Blaze of Glory*, and *Marty*.

STEDMAN, EDMUND CLARENCE (1833-1908). An American poet and banker; born in Hartford, Conn. The best known of his critical works are *Victorian Poets, Edgar Allan Poe, Poets of America, The Nature and Elements of Poetry, A Victorian Anthology, An American Anthology*, and editor with Miss Ellen M. Hutchison of *A Library of American Literature* and with George E. Woodberry of the *Works of Edgar Allan Poe*.

STEELE, RICHARD (1672-1729). A British author; born at Dublin; was educated at Charterhouse School, London, Addison being one of his schoolfellows; afterwards entered the University of Oxford, but left without taking a degree, and enlisted in the Horse Guards, where he rose to the rank of captain. In 1701 he put forth *The Christian Hero*, a religious treatise, and within a few years produced several fairly successful comedies, the earliest being *The Funeral, or Grief à la Mode*, the last and best being *The Conscious Lovers*. Steele was an industrious pamphleteer, but his fame rests upon his essays in *The Tatler* and *The Spectator*, rather than upon his dramas or his political writings. [See Eng. Lit.].

STEPHEN, SIR LESLIE (1832-1904). An English man of letters, biographer, and critic; became editor of the *Cornhill* and of the *Dictionary of National Biography;* author of *Hours in a Library, History of English Thought in the Eighteenth Century, The Science of Ethics, Life of Henry Fawcett, An Agnostic's Apology, Life of Sir James Fitzjames Stephen, Studies of a Biographer, The English Utilitarians*, and lives of *Swift, Pope, Johnson, Hobbes*, and *George Eliot*.

STERNE, LAURENCE (1713-1768). An English humorist; born at Clonmel, Ireland. In 1759 appeared the first two volumes of *Tristram Shandy*, and in 1767 the last one; in 1768 his *Sentimental Journey;* and in the interim his *Sermons*.

STESICHORUS (about 640-555 B. C.). Greek lyric poet. His arrangement of strophe, antistrophe, and epode became the model for lyric poetry.

STEVENSON, ROBERT LOUIS BALFOUR (1850-1894). A British author; born in Edinburgh, Scotland; wrote for periodicals till 1878, when his first book appeared; visited California in 1879. In 1888 he cruised in the Southern Pacific for his health; bought a tract of land ("Vailima" or "Five Streams") in Samoa, where he made his home. His chief works are *Treasure Island, Dr. Jekyll and Mr. Hyde, St. Ives, Weir of Hermiston* (his best), *Underwoods*, and *Prince Otto*.

STOCKTON, FRANCIS RICHARD (1834-1902). An American author; born at Philadelphia; became an engraver, but soon abandoned art for literature. He wrote several novels and numerous short stories, which have been collected into separate volumes, among which are *Rudder Grange, The Lady or the Tiger? The Late Mrs. Null, Christmas Wreck, The Bee-Man of Orn, The Casting Away of Mrs. Lecks and Mrs. Aleshine, The Dusantes, Amos Kilbright, Personally Conducted, Ardis Claverden, The Stories of the Three Burglars, The House of Martha, The Rudder Grangers Abroad, The Squirrel Inn, The Watchmaker's Wife, Pomona's Travels, Adventures of Captain Horn, Afield and Afloat*, and *The Captain's Toll-Gate*.

STOWE, HARRIET ELIZABETH BEECHER (1811-1896). An American novelist; daughter of Lyman Beecher and sister of Henry Ward Beecher; born in Litchfield, Conn.; was married to Professor Calvin Ellis Stowe. In 1864 she settled in Hartford, Conn. She published *The Mayflower, or Sketches of the Scenes and Characters Among the Descendants of the Pilgrims; Uncle Tom's Cabin, or Life Among the Lowly;* and a large number of other works. Her best known work, *Uncle Tom's Cabin* (suggested by the life of Josiah Henson), has been translated into 19 languages, its sale exceeding that of any previous work of English fiction.

STRICKLAND, AGNES (1796-1874). An English author; born in London. She wrote several books of verse and fiction before entering upon her career as a writer of historical biography. Her principal works in this department are *Lives of the Queens of England*, in which she was assisted by her sister, Elizabeth Strickland; *Lives of the Queens of Scotland*, and *Lives of the Seven Bishops*.

STUBBS, WILLIAM (1825-1901). English prelate and historian; wrote *Constitutional History of England, Historical Introductions to the Rolls Series, Seventeen Lectures on the Study of Mediæval and Modern History*.

SUDERMANN, HERMANN (1857-1928). German novelist and dramatist. Among his numerous productions are the dramas *Die Ehre, Heimat* (*Magda*), *Es lebe das Leben* (*The Joy of Living*), and the novels *Frau Sorge* (*Dame Care*), *Der Katzensteg* (*Regina*), *Es war*.

SUE, MARIE JOSEPH or **EUGENE** (1804-1857). A French novelist; born in Paris. His most famous works are *The Mysteries of Paris* and *The Wandering Jew*. In 1850 he was elected to the Constituent Assembly and sat as an advanced radical. After the *coup d'état* by Napoleon III. in 1851 he left France and retired to Savoy.

SULLY-PRUDHOMME, RENE FRANCOIS ARMAND (1839-1907). French poet; born in Paris; in 1907 received the Noble prize in literature. His works include *Stances et poèmes, La justice, Le bonheur*.

SULTE, BENJAMIN (1841-1923). Canadian poet and historian. His songs are included in *Les Laurentiennes* and *Les chants nouveaux*. Author of *Histoire des Canadiens-Français, Histoire de Saint François-du-Lac*.

SWIFT, JONATHAN (1667-1745). The greatest of English satirists; born in Dublin, Ireland. He was the posthumous son of Jonathan Swift, an Englishman, and was educated at Kilkenny and at Trinity College, Dublin. In 1701 he took his doctor's degree and in 1704 he published anonymously his famous *Tale of a Tub*, to which was appended the *Battle of the Books*. In 1710 Swift began his *Journal to Stella*, which constitutes a splendid commentary on his own history. His famous *Gulliver's Travels* appeared in 1726. He died in Dublin, bequeathing the greatest part of his fortune to a hospital for lunatics and idiots. [See Eng. Lit.].

SWINBURNE, ALGERNON CHARLES (1837-1909). An English poet and essayist; son of Admiral Charles Henry Swinburne; born in London. His first productions were *Queen Mother* and *Rosamund*. They were followed by two tragedies, *Atalanta in Calydon* and *Chastelard*, and by *Poems and Ballads*, reprinted as

Laus Veneris. He also wrote *A Study of Shakespeare, Astrophel, and Other Poems; Essays and Studies, The Tale of Balen,* and *Rosamund, Queen of the Lombards.* His reply to Robert Buchanan's attack on himself and Rossetti is entitled *Under the Microscope.*

SWINTON, WILLIAM (1833-1892). An American author; born in Scotland. His principal works in the department of military history are *Campaigns of the Army of the Potomac, The Twelve Decisive Battles of the War,* and *History of the New York Seventh Regiment During the War of the Rebellion.*

SYMONDS, JOHN ADDINGTON (1840-1893). An English author; born at Bristol. He was educated at Harrow and Oxford. Most of his works—the earliest of which appeared in 1872—are upon Italian subjects. In verse he has translated *Sonnets of Michelangelo and Campanella* and a volume of *Sonnets on the Thought of Death, Many Moods, New and Old.* His prose works are *Introduction to the Study of Dante, Studies of the Greek Poets, Renaissance in Italy, Sketches in Italy and Greece, Italian By-Ways,* and the lives of *Shelley* and *Sir Philip Sidney* in the "English Men of Letters." The seventh and last volume of his work on the Italian Renaissance was published in 1886. *In the Key of Blue* and *Walt Whitman* were published after his death in 1893. He is the Opalstein in Stevenson's *Memories and Portraits.*

TACITUS, PUBLIUS CORNELIUS (about 55-about 117). A Roman historian; born presumably at Rome. Of writings extant, the chief are his *Life of Agricola, Germania, Histories,* and *Annals.* His *Agricola* is admired as a model biography, while his *Histories* and *Annals* are distinguished for their conciseness, their vigor, and their poetical coloring.

TAINE, HIPPOLYTE ADOLPHE (1828-1893). Born at Vouziers; French historian, critic, and man of letters; educated at Ecole Normale. Among his most important writings are his *History of English Literature,* and the *Beginnings of Contemporaneous France,* the former considered one of the finest on that subject, while the latter is the most noted of his works. In 1878 he was elected to the French Academy.

TALFOURD, SIR THOMAS NOON (1795-1854). An English lawyer and dramatist; was for some years a member of Parliament; introduced the copyright bill (1837), for which Dickens dedicated *Pickwick* to him; author of four tragedies, of which *Ion* is the best known.

TARBELL, IDA MINERVA (1857-). An American author; wrote *Short Life of Napoleon Bonaparte, Life of Madame Roland, Early Life of Abraham Lincoln, Life of Abraham Lincoln,* and *History of the Standard Oil Company.*

TARKINGTON, NEWTON BOOTH (1869-). An American author; born in Indianapolis, Indiana; graduated from Princeton University (1893). His first novel, *The Gentleman from Indiana,* won for him much success, and was followed by his *Monsieur Beaucaire* (1900), *The Two Vanrevels* (1902), and *The Conquest of Canaan,* etc. (1905).

TASSO, TORQUATO (1544-1595). A famous Italian poet; born at Sorrento, March 11, 1544. Tasso's lyrics, plays, and letters contained many fine passages, but the poet owes his fame to two works alone—the narrative, *Jerusalem Delivered,* and the pastoral play *Aminta.* [See Ital. Lit.].

TAYLOR, HENRY, SIR (1800-1886). An English poet. His best-known tragedies are *Philip Van Artevelde* (1834), *Isaac Comnenus* (1827), *Edwin the Fair* (1842), and *Saint Clement's Eve* (1862). In 1847 his *Eve of Conquest* appeared.

TAYLOR, JAMES BAYARD (1825-1878). An American writer and traveler; born in Kennett Square, Chester County, Pa. He wrote *Ximena: or the Battle of the Sierra Morena,* translation of Goethe's *Faust, Ode* in honor of the opening of the Centennial Exhibition at Philadelphia, and many books of travel and novels.

TCHEKHOV, ANTON PAVLOVITCH (1860-1904). A Russian novelist. Wrote *In Twilight* (1887), and *Morose Folks* (1890), *Memoirs of a Stranger,* and *Steppe,* all of which are humorous and witty.

TEGNER, ESAIAS (1782-1846). A popular Swedish poet; the son of a country parson. His poems, of which *Frithjof's Saga* is reckoned the finest in Swedish, have the finish of classic models, but are charged with the fire and vigor of modern romanticism.

TENNYSON, ALFRED, LORD (1809-1892). An English poet; born in Somersby, England. His literary career may be said to date from 1830, when he published a volume entitled *Poems, Chiefly Lyrical.* It was not received with any great favor by the public, but its success was sufficient to encourage the poet to prepare a second collection, which appeared in 1833 and contained such poems as *A Dream of Fair Women, Oenone,* and others. It was not till 1842 that he again appealed to the public with a selection of his poems in two volumes. *The Idylls of the King* is his highest achievement. He received the laureateship upon the death of Wordsworth (1850). Thereafter hardly a year passed without his adding some gem to our language. Among his later compositions are the dramas *Queen Mary, Harold,* and *The Cup.* Tennyson was raised to the peerage in 1884 as Baron Tennyson of Aldworth, Sussex, and Freshwater, Isle of Wight. He died in Aldworth, England, and was buried in Westminster Abbey. [See Eng. Lit.].

TERHUNE, MARY VIRGINIA, or "MARIAN HARLAND" (1831-1922). An American author; born in Richmond, Va.; author of *Common Sense in the Household, At Last, Sunnybank, Sketches of European Travel, Our Daughters and What Shall We Do With Them? Judith,* and *A Gallant Fight.*

THACKERAY, WILLIAM MAKEPEACE (1811-1863). An English novelist; born in Calcutta, India. Being well provided for, he chose the profession of an artist. He spent several years in France, Germany, and Italy, staying at Paris, Weimar, and Rome, but gradually became convinced that art was not his vocation, and, having lost his fortune, he resolved to turn his attention to literature. His first appearance in this sphere was as a journalist. In 1846-1848 his novel of *Vanity Fair* was published in monthly parts, with illustrations by himself; and long before its completion its author was unanimously placed in the first rank of British novelists. His next great novel was *Pendennis,* completed in 1850. In 1851 he delivered a course of lectures in London on the *English Humorists of the Eighteenth Century,* which was repeated in Scotland and America. In 1855-1856 he delivered a series of lectures in the United States—*The Four Georges*—and afterward in England and Scotland. Besides those mentioned, Thackeray's other great novels are *The Newcomes* and *Henry Esmond.*

THAXTER, CELIA (LAIGHTON) (1836-1894). An American author; born at Portsmouth, N. H.; daughter of a lighthouse keeper. Her poems are full of the shimmer and dash of the sea—many of them exquisite marine paintings as well as glowing utterances of the heart. Her collected poems were published in 1871 and 1876; *Drift-weed, Poems for Children, The Cruise of the Mystery and Other Poems,* and *Idyls and Pastorals. Among the Isles of Shoals* is a series of charming prose sketches.

THIERRY, JACQUES NICOLAS AUGUSTIN (1795-1856). A French historian. In 1825 published his *History of the Conquest of England by the Normans,* which placed him in the first rank of modern historians, as distinguished from mere chroniclers on the one hand and from historical theorists on the other. While engaged upon this work his eyesight was impaired, and in 1827 he became totally blind, although, as in the similar case of Milton, there was no outward indication of the loss of vision. A few years later he became paralyzed in all his limbs, being unable to walk or even hold a pen. He nevertheless continued his minute historical researches by the help of the eyes and hands of others, notably those of his young wife, Julie de Qurangel, whom he married in 1831 and who was herself the author of several esteemed works. Thierry's other works are *Letters on the History of France, Ten Years of Historical Studies, Narrative of the Times of the Merovingians,* and *Essay on the Formation and Progress of the Third Estate.*

THIERS, LOUIS ADOLPHE (1797-1877). French historian. Although his *Histoire de la Révolution française* has not stood the test of historical criticism it won him fame when first published in 1823.

THOMPSON, JAMES MAURICE (1844-1901). An American author; born in Fairfield, Ind.; was state geologist of Indiana (1885-1889); wrote nature studies. He published in book form *Hoosier Mosaics, The Witchery of Archery, A Tallahassee Girl, Alice of Old Vincennes* (his best novel), and *My Winter Garden.*

THOMSON, JAMES (1700-1748). A Scottish poet; the author of *The Seasons;* the son of the parish minister at Ednam, Roxburghshire. His poem *Winter* had immediate success and raised up a host of friends and patrons. The *Masque of Alfred,* with its popular song *Rule Britannia,* and his greatest work, *The Castle of Indolence,* were the outcome of his later years of leisure.

THOREAU, HENRY DAVID (1817-1862). An American author; born in Concord, Mass. In 1845 he built for himself a hut in a wood near Walden Pond, Concord, Mass., and there for two years lived the life of a hermit. Besides contributing to the *Dial* and other periodicals, he published *A Week on the Concord and Merrimac Rivers* and *Walden, or Life in the Woods.* After his death appeared *Excursions in Field and Forest, The Maine Woods, Cape Cod,* and *A Yankee in Canada.* Thoreau was a friend of Emerson and imbibed much of his spirit and method of thought. His best essays are *Miscellanies and Excursions,* of remarkable style and substance.

THUCYDIDES (about 460-about 400 B. C.). The Greek historian of the Peloponnesian War; born in Athens, of a wealthy family; naval commander in 424 B. C. in the Peloponnesian War, but from neglect of duty was banished; returned from exile 20 years after. His great achievement is his history, all derived from personal observation and oral communication, the materials of which were collected during the war, and the whole executed in a style to entitle it to rank among the noblest literary monuments of antiquity. He was the greatest historian of ancient times.

TICKNOR, GEORGE (1791-1871). An American scholar; born at Boston. In 1840 he set himself strenuously at work upon the composition of his *History of Spanish Literature,* which was published in 1849. The work was at once recognized as the best upon the subject in any language, and was almost immediately translated into Spanish and German. In the numerous translations from Spanish poets, Ticknor evinced poetical ability of a high order. Besides this great work he contributed some valuable papers to the *North American Review.* He also published a *Memoir of Nathaniel Appleton Hazen, Life of William H. Prescott,* and *Remarks on the Character of Edward Everett. Life, Letters, and Journals of George Ticknor* appeared in 1876.

TIMROD, HENRY (1829-1867). An American poet; born in Charleston, S. C.; the best of southern lyrists after Poe and Lanier. Among his best poems are *Katie, The Cotton Boll, Charleston,* and an *Ode* on the Confederate dead in Magnolia Cemetery, Charleston.

TOCQUEVILLE, ALEXIS CHARLES HENRI CLEREL DE (1805-1859). A French economist and political philosopher; bred to the bar, and especially distinguished as the author of two works in high repute, *La démocratie en Amérique* and *L'ancien régime et la révolution;* died at Cannes, leaving much of his work unfinished. He was elected to the Academy in 1841.

TOLSTOY, COUNT LYOF NIKOLAYEVITCH (1828-1910). A Russian novelist; born on the family estate of Yasnaya Polyana in the province of Tula, Russia. He served in the Crimean War, and afterward traveled extensively. In 1861 he took up permanent residence on his country estate. Among his earliest works are *Detsvo* (Childhood), *Otrchestvo* (Boyhood), and *Iunost* (Youth); also *Cossacks, Sevastopol,* and a number of military sketches. *War and Peace* was published in 1865-1868; *Anna Karenina* in 1875-1876. His peculiar doctrines are promulgated in *My Confession, In What My Faith Consists,* etc.; many of them are forbidden in Russia. His later works are *The Kreutzer Sonata, Death of Ivan Ilyitch, Master and Man, The Resurrection,* and *Hadji Murat,* unfinished.

TOTTEL, RICHARD (about 1525-1594). An English publisher. Noted for his compilation of the famous *Tottel's Miscellany,* published 1557, containing 271 heretofore unpublished poems by English authors.

TREITSCHKE, HEINRICH VON (1834-1896). German historian. His chief work is *Deutsche Geschichte im neunzehnten Jahrhundert* brought down to the year 1848.

TRENCH, RICHARD CHENEVIX (1807-1886). Archbishop of Dublin, poet, and scholar; born in Dublin; was educated at Harrow and Cambridge; wrote *Notes on the Parables, Notes on the Miracles, Commentary on the Epistles to the Seven Churches, Studies on the Gospels, The Study of Words, English Past and Present,* and *Lectures on Mediaeval Church History.*

TROLLOPE, ANTHONY (1815-1882). An English novelist; born in London. He was educated at Harrow and Winchester; in 1834 became a clerk in the post office, and in 1841 was appointed clerk to a post office surveyor in Ireland. His Irish experiences gave him material for his first novels. His first success was *The Warden,* followed by *Barchester Towers, Doctor Thorne, The Three Clerks, The Bertrams, Castle Richmond, Framley Parsonage, Orley Farm, The Small House at Allington, Can You Forgive Her? Phineas Finn, The Eustace Diamonds, Phineas Redux, The Way We Live Now,* and *Is He Popenjoy?*

TRUMBULL, JOHN (1750-1831). An American poet. The satiric poem *The Progress of Dullness* was published in 1772. His most famous work was *McFingal,* an epic poem after the style of Hudibras.

TUPPER, MARTIN FARQUHAR (1810-1889). An English poet; author of *Proverbial Philosophy;* born in Marylebone; bred to the bar; wrote some 40 works. The *Philosophy* had a phenomenal success.

TURGUENIEV, IVAN SERGEYEVITCH (1818-1883). A Russian novelist; born at Orel. By him the term "nihilist" was first used in its political sense. In 1843-1844 he issued several books of poetry. Among his other volumes are *Memoirs of a Sportsman, Fathers and Sons, Smoke, Liza, On the Eve, Dimitri Rudin, Journal of a Useless Man, A Lear of the Steppe, Spring Floods, The Unfortunate One, Virgin Soil, First Love,* and *Assya.* [See Rus. Lit.].

TYLER, ROYALL (1757-1826). An American writer. Produced *The Contrast,* a drama which had much success. His masterpiece was *The Algerine Captive* (1797).

TYNDALE, WILLIAM (about 1490-1536). English translator of the Bible. [See Eng. Lit.].

UDALL, NICHOLAS (1505-1556). An English dramatist; born at Hampshire. From 1534 to 1543 he was master at Eton. In 1555 he became master of Westminster School; he wrote several plays for his pupils, one of which, *Ralph Roister Doister,* in five acts, is the earliest specimen of English comedy. It was written before 1541, and it marks the transition from the mysteries and interludes of the Middle Ages to the comedies of modern times.

UHLAND, JOHANN LUDWIG (1787-1862). A distinguished German poet; born at Tübingen. He wrote poetry which appeared in periodicals as early as 1806. His works include *Gedichte,* the dramas *Ernst von Schwaben* and *Ludwig der Bayer, Alte hoch- und niederdeutsche Volkslieder,* and *Schriften zur Geschichte der Dichtung und Sage.* His poems have been translated by Longfellow and by Alexander Platt, and his *Songs and Ballads* by W. W. Skeat.

URQUHART, DAVID (1805-1877). A Scotch writer and politician; secretary of the legation at Constantinople (1835-1836); wrote *Turkey and Its Resources, The Spirit of the East, The Mystery of the Danube,* and *Letters and Essays on Russian Aggressions.*

VANBRUGH, SIR JOHN (1664-1726). English dramatist. His plays include *The Relapse* (1697), *The Provok'd Wife* (1697), and *The Mistake* (1705).

VAN DYKE, HENRY (1852-). An American educator; born in Germantown, Pa. His publications include *The Reality of Religion, The Poetry of Tennyson, The Ruling Passion,* and *The Blue Flower.*

VEGA CARPIO, LOPE FELIX DE (1562-1635). Known as Lope; a Spanish dramatist; born in Madrid; served in the Armada; was secretary to the duke of Alva; took orders and became a priest; wrote a heroic pastoral entitled *Arcadia* at the instance of the duke, and *La Dragontea* over the death of Drake as the destroyer of the supremacy of Spain on the sea; was a man of fertile inventiveness, and is said to have written 1,500 plays and many verses, and was called by Cervantes a "prodigy of nature." He wrote also *San Isidro.* [See Sp. Lit.].

VERGIL (70-19 B. C.). A great Latin poet; born near Mantua; author in succession of the *Eclogues,* the *Georgics,* and the *Aeneid;* studied at Cremona and Milan, and at 17 was sent to Rome to study rhetoric and philosophy; lost property he had in Cremona after the battle of Philippi; went to settle in Rome. Here, in 37 B. C., he published his *Eclogues,* a collection of 10 pastorals, and gained the patronage of Maecenas, under whose favor he was able to retire to a villa at Naples, where in seven years he, in 29 B. C., produced the *Georgics,* in four books, on the art of husbandry, after which he devoted himself to his great work, the *Aeneid,* or the story of Aeneas of Troy, an epic in 12 books, connecting the hero with the foundation of Rome, and especially with the Julian family, and which was finished in 19 B. C. On his deathbed he expressed a wish that it should be burned, and left instructions to that effect in his will.

VERLAINE, PAUL (1844-1896). A French poet. Little is known of his early life. He was the greatest "Symbolist" poet of France. He wrote *Poemes saturniens, Les fêtes galantes, La bonne chanson, Sagesse,*

Mes prisons, Mes Hôpitaux, Jadis et naguère, Romances sans paroles, Amour, Bonheur, Parallèlement, Chansons pour elle, Les poètes maudits, Confessions, and *Les hommes d'aujourd'hui.*

VERNE, JULES (1828-1905). A French novelist; born in Nantes. He studied law for some time, but afterward began writing short pieces for the stage. His more popular works are *Twenty Thousand Leagues Under the Sea, From the Earth to the Moon, Across Africa in a Balloon, Michel Strogoff, To the Center of the Earth, Round the World in Eighty Days, The Mysterious Island,* etc.

VIGNY (*veen-yee'*), **ALFRED, COMTE DE** (1799-1863). A French poet of the Romanticist school. He wrote *Poems* and *Poems Ancient and Modern* between 1821 and 1826. His strongest drama was *Chatterton,* published in 1835; wrote also *Cinq-Mars,* a long historic novel, and translated into French *Othello.*

VILLANI, GIOVANNI (about 1275-1348). An Italian historian. Wrote a chronicle of Florence to 1348 in twelve books, which was continued by his brother Matteo.

VILLARI, PASQUALE (1827-1917). An Italian historian. His works include *Lives of Savonarola* and of *Machiavelli;* and *The First Two Centuries of Florentine History* (1895).

VILLEHARDOUIN, GEOFFREY OF (about 1155-1213). A French chronicler; born near Troyes. His history of the conquest of Constantinople during the Fourth Crusade, in which he was prominent, is the earliest known history in French.

VILLON (*vee-lyon'*), **FRANCOIS** (1431-1484). The first and one of the greatest lyric French poets of the modern school. His writings are frank and form a highly colored but reliable picture of the time in which he lived, and include *Le petit testament, Le grand testament,* a *Codicille, Le jargon,* and a monologue, *Le franc archier de Bagnolet.*

VIZETELLY, FRANK HORACE (1864-). An Anglo-American author and lexicographer; born in London, England, and educated in England and France; managing editor of Funk and Wagnall's *Standard English Dictionary.*

VOLNEY, CONSTANTIN FRANCOIS CHASSEBOEUF COUNT DE (1757-1820). French writer of philosophy. His chief work is *Les ruines, ou méditations sur les révolutions des empires* (1791).

VOLTAIRE, FRANCOIS MARIE AROUET DE (1694-1778). A great French philosopher and man of letters; born in Paris; son of a lawyer; began his career as a satirist in the production of lampoons which cost him imprisonment in the Bastille. After a second imprisonment he left France in 1726 and went to England, where he stayed two years and got acquainted with the literary free-thinking society there. On his return to Paris he engaged in some profitable commercial speculations and published his *Charles XII.,* which he had written in England; retired to the Chateau of Cirey, where he lived 15 years with Madame du Châtelet, engaged in study and diligent with his pen; after her death made his famous visit to Frederick the Great, with whom he quarreled about three years later, and from whom he was glad to escape, making his headquarters eventually within the borders of France at Ferney; now and again visited Paris, where on his last visit he was received with such raptures of adulation that he was quite overcome, and had to be conveyed home, and died two months after. He was a man of superlative adroitness of faculty, of great clearness and wit as a writer, and more than any other the incarnation of the spirit of his time. [See Fr. Lit.].

WALLACE, LEWIS (1827-1905). An American military commander and author; born at Brookville, Ind. Practiced law in Indiana; governor of New Mexico (1878-1881); United States Minister to Turkey (1881-1885). His leisure moments were spent in writing, some of his works being *The Fair God* (1873), *Ben Hur* (1880), *The Prince of India* (1893), and *The Life of General Harrison* (1888).

WALLER, EDMUND (1606-1687). An English poet; born in Coleshill, Buckinghamshire; was educated at Eton and Cambridge; entered Parliament; detected in a royalist plot, was fined heavily and banished. Pardoned after seven years, he supported the commonwealth. Re-elected to Parliament (1661), he retained his seat until his death. In his poetry he reduced the "heroic" or rhymed pentameter verse to an art; is best known by his song *Go, lovely rose,* lines *On a Girdle,* and a few other perfect poems.

WALPOLE, HORACE, FOURTH EARL OF ORFORD (1717-1797). An English author; son of Sir Robert Walpole; born in London. After receiving an education at Eton and Cambridge he traveled in France and Italy. In 1741 he entered the House of Commons. In 1791 he succeeded his nephew in the peerage. He never took his seat in the House of Lords, and appears to have avoided using his title. The works of Horace Walpole are numerous; but his fame as a writer rests on his *Letters* and *Memoirs.* The former are held to be unsurpassed in the English language. His romance *The Castle of Otranto* is also well known.

WALTON, IZAAK (1593-1683). English author; known as the "Father of angling"; born in Stafford, England. Walton's fame is mainly based on his *Compleat Angler; or the Contemplative Man's Recreation,* first published in 1653. Few more popular books exist.

WARD, MRS. HUMPHRY, or **MARY AUGUSTA ARNOLD** (1851-1920). An English novelist; born in Hobart, Tasmania; is a niece of Matthew Arnold; translated Amiel's *Journal,* but is best known by her romance *Robert Elsmere.* She has written several later books, notably *Eleanor, Lady Rose's Daughter, The History of David Grieve, Marcella, The Story of Bessie Costrell, Sir George Tressady, Helbeck of Bannisdale, Fenwick's Career,* and *Daphne.*

WARMAN, CY (1855-1914). An American journalist and author; born near Greenup, Ill.; wrote *Tales of an Engineer, The Express Messenger, Frontier Stories, The Story of the Railroad, The White Mail, Snow on the Headlight,* and *Short Rails.* Besides some popular verse, he wrote several songs, including the once popular *Sweet Marie.*

WARNER, CHARLES DUDLEY (1829-1900). An American editor and author; born in Plainfield, Mass.; was graduated from Hamilton College in 1851. He was the author of such well-known works as *Saunterings, Backlog Studies, Washington Irving, On Horseback,* and *Captain John Smith,* and editor of *A Library of the World's Best Literature.*

WARREN, SAMUEL (1807-1877). An English lawyer and author; member of Parliament; wrote *Ten Thousand a Year,* a novel which appeared in *Blackwood's Magazine* (1839) and has since gone through several editions. His collected works fill five volumes.

WATSON, JOHN, or **"IAN MACLAREN"** (1850-1907). Till 1893 Dr. Watson was known as a popular preacher and able minister, and in that year he acquired additional distinction and wider fame by writing a series of Scotch idyls for the *British Weekly,* under the title of *Beside the Bonnie Brier Bush.* They became widely popular in the United States and Great Britain. *The Days of Auld Lang Syne,* a second series of idyls, published in 1895, also reached a large circulation. A novel from Dr. Watson's pen, *Kate Carnegie and Those Ministers,* was published in 1896. *The Upper Room* and *The Life of the Master* are perhaps his best known religious works.

WATSON, WILLIAM (1858-). An English poet; born in Yorkshire. The first poem which procured him recognition was *Wordsworth's Grave.* Among his later productions the most important is a volume entitled *Odes and Other Poems;* has also written an admirable volume of essays, *Excursions in Criticism.*

WEBSTER, NOAH (1758-1843). An American lexicographer; born at Hartford, Conn.; bred to law; tried journalism; devoted 20 years to his *Dictionary of the English Language.*

WEYMAN (*way'man*), **STANLEY JOHN** (1855-1928). An English novelist. He was educated at Shrewsbury and Christ Church, Oxford. His first writings appeared in the *Cornhill Magazine* in 1883. Among his principal works are *The House of the Wolf, Francis Cludde, The New Rector, A Gentleman of France, Under the Red Robe, My Lady Rotha, The Red Cockade, From the Memoirs of a Minister of France, The Man in Black, Shrewsbury, The Castle Inn, Sophia,* and *In King's Byways.*

WHARTON, EDITH (JONES) (1862-). An American novelist; born in New York; wrote *The Greater Inclination, The Touchstone, Crucial Instances, The Valley of Decision, Sanctuary,* and *The House of Mirth.*

WHATELY, RICHARD (1787-1863). Archbishop of Dublin, and author; born in London. He did much to forward the cause of general education and to promote liberal views in the English church. Among his numerous works are *Historic Doubts Relative to Napoleon Bonaparte,* a burlesque aimed at the "destructive school" of criticism; *Essays on the Peculiarities of the*

Christian Religion, Elements of Logic, Elements of Rhetoric, Political Economy, Introduction to the Study of St. Paul's Epistles, English Synonyms, Rise, Progress, and Corruption of Christianity; Miscellaneous Lectures and Reviews, and *Remains.*

WHITEING, RICHARD (1840-). An English novelist; born in London. As a journalist he wrote *Mr. Sprouts—His Opinions* for the London *Evening Star.* He was, later, a leader writer on several English dailies, including the London *Daily News;* wrote *The Democracy, The Island, No. 5 John Street, The Life of Paris,* and *The Yellow Van.*

WHITMAN, WALT (1819-1892). An American poet; born in West Hills, Long Island, N. Y.; became editor of the Brooklyn *Eagle. Leaves of Grass* and *Specimen Days and Collect* may be held to embrace the life work of Whitman as a writer. About the close of the war he received a subordinate clerkship under the government, and was summarily dismissed as the author of "an indecent book," though he fortunately obtained a similar post almost immediately. In 1874 he left Washington for Camden, N. J., where he resided till his death.

WHITNEY, WILLIAM DWIGHT (1827-1894). An American philologist and author; born at Northampton, Mass. He was graduated at Williams College in 1845 and studied three years in Germany. From 1854 he was professor of Sanskrit and from 1869 also of comparative philology in Yale College. As a Sanskrit scholar he has a European reputation.

WHITTIER, JOHN GREENLEAF (1807-1892). An American poet; born near Haverhill, Mass. The son of a poor farmer, who was also shoemaker, young Whittier obtained his education with that struggle which seems to foster genius, while the bodily frame, that so well served him till his decease, was developed and hardened by his healthy, outdoor life; was apprenticed to journalism. His poetry attracted the admiration of William Lloyd Garrison, who rode over from Newburyport to see Whittier when quite a lad, and became his lifelong friend. If Garrison may be called the preacher or prophet, Whittier must be wreathed the poet laureate, of abolition. Apart from this strenuous and heroic struggle there is nothing epoch making in Whittier's life, literary or personal. His chief poems are *Voices of Freedom, Snow Bound* (his best), *In War Times, The Tent on the Beach,* and *Poems of Nature.*

WIELAND, CHRISTOPH MARTIN (1733-1813). A German poet and novelist. His best work is a heroic poem entitled *Oberon.* He translated 22 of Shakespeare's plays and wrote *The Republic of Fools.* He is one of the most important of the writers in the classic period of German literature.

WILCOX, ELLA (WHEELER) (1855-1919). An American poet; born at Johnstown Center, Wis. She was educated at the University of Wisconsin. At an early age she began to write for newspapers and periodicals. She has published *Drops of Water, Maurine, Shells, Poems of Passion, Mal Moulée,* a novel; *Poems of Pleasure, A Double Life,* a novel; *How Salvator Won,* reciting poem; *Sweet Danger,* a novel; *Men, Women, and Emotion,* 45 chapters of advice to married folks; *Song of the Sandwich,* a comic poem, and *Was It Suicide?* a collection of stories.

WILDE, OSCAR FINGALL O'FLAHERTIE WILLS (1856-1900). A British poet; born at Dublin. He was the son of Sir William and Lady Wilde ("Speranza"). He was educated at Magdalen College, Oxford, where he took the Newdigate prize for English verse. He became known about 1881 as "the poet and apostle of æstheticism." In 1882 he came on a lecturing tour to the United States. He was for a time the manager of the *Woman's World* of London. He is the author of *Poems, The Happy Prince, and Other Tales; Dorian Gray,* a novel; and several plays, including *Lady Windermere's Fan* and *Salome.* He was imprisoned for two years (1895), during which he wrote *The Ballad of Reading Gaol.* After his release he wrote *De Profundis.*

WILKINS-FREEMAN, MARY ELEANOR (1862-). An American author; born in Randolph, Mass. Her works, studies of New England country life, are *The Adventures of Ann, A Humble Romance, A New England Nun, Young Lucretia, Jane Field, Giles Corey, Pembroke, Madelon, Jerome, A Poor Man; Silence and Other Stories, The Love of Parson Lord, Understudies, Portion of Labor, Wind in the Rose Bush.* She was married to Dr. Charles M. Freeman, January 1, 1902.

WILSON, AUGUSTA EVANS (1835-1909). An American author; born at Columbus, Ga. Her earlier novels were published under her maiden name of Evans. In 1868 she was married to L. M. Wilson of Mobile, Ala. Her novels include *Inez, Beulah, Macaria, St. Elmo, Vashti, Infelice, At the Mercy of Tiberius,* and *A Speckled Bird.*

WILSON, JOHN, or **"CHRISTOPHER NORTH"** (1785-1854). A Scottish writer; born in Paisley; son of a manufacturer, who left him a fortune of £50,000; lost his fortune and settled in Edinburgh, and wrote for *Blackwood's Magazine.* He wrote *Noctes Ambrosianae,* full of humor and pathos, and his best work; *Lights and Shadows of Scottish Life, The Foresters,* and *The Trials of Margaret Lindsay.*

WISTER, OWEN (1860-). An American writer; born in Philadelphia, Pa.; wrote *The Modern Swiss Family Robinson, The Dragon of Wantley: His Tail; Red Man and White, Lin McLean, The Jimmyjohn Boss, U. S. Grant, a Biography; The Virginian, Oliver Wendell Holmes, Benjamin Franklin,* and, with G. B. Grinnell and Caspar Whitney, *The Bison, Musk-Ox, Sheep, and Goat Family.*

WOOD, ELLEN (PRICE) or **MRS. HENRY** (1820-1887). An English novelist; born in Worcestershire; her best novels, *The Channings* and *Mrs. Halliburton's Troubles,* though her most popular is *East Lynne.* She wrote some 30, all popular.

WOOLSEY, SARAH CHAUNCEY, or **"SUSAN COOLIDGE"** (1835-1905). An American writer of books for young people; born in Cleveland, Ohio; wrote *The New Year's Bargain, What Katy Did, Verses, A Guernsey Lily, Mischief's Thanksgiving, A Little Country Girl,* and *Ballads of Romance and History.*

WOOLSON, CONSTANCE FENIMORE (1848-1894). An American author; born in Claremont, N. H. She was the daughter of Charles Jarvis Woolson. From 1873 till 1878 she resided in Florida, Georgia, and the Carolinas, and in 1879 she went to Europe, where she afterwards resided. Her literary field includes sketches, poems, stories, and novels, which have appeared in *Harper's* and other magazines. Her books are *Castle Nowhere: Lake Country Sketches; Rodman the Keeper: Southern Sketches; Anne, For the Major, East Angels, Jupiter Lights, Two Women, The Old Stone House,* and *Horace Chase.*

WORCESTER, JOSEPH EMERSON (1784-1865). An eminent American lexicographer; author of the popular *Dictionary* bearing his name; born at Bedford, N. H. His was the first illustrated dictionary in English (1860).

WORDSWORTH, WILLIAM (1770-1850). An English poet; born in Cockermouth, Cumberland. He was the son of an attorney and in 1787 was sent to St. John's College, Cambridge. His best poems are *The Excursion,* odes on *Immortality* and to *Duty, The Prelude, Thanksgiving Ode,* and *White Doe of Rylstone.* [See Eng. Lit.]

YONGE, CHARLOTTE MARY (1823-1901). An English novelist; born in Otterbourne, Hampshire. Her works number more than 125 volumes, including *The Heir of Redclyffe, The Daisy Chain, The Dove in the Eagle's Nest, Forget-Me-Not, Catherine of Aragon and the Sources of the English Reformation, Life of Hannah More,* and *Life of the Prince Consort.*

YOUNG, EDWARD (1683-1765). An English poet; born at Upham, Hampshire; chaplain to the king (1728); wrote the famous *Night Thoughts on Life, Death, and Immortality.*

ZANGWILL, ISRAEL (1864-1926). An English-Jewish novelist; born in London. He began life as a London teacher; has written novels, essays, and poems; among his works are the *Bachelors' Club, Old Maids' Club, Children of the Ghetto, Dreamers of the Ghetto, The Master, Without Prejudice, The Grey Wig,* and *Merely Mary Ann.*

ZOLA, EMILE (1840-1902). A French novelist; born in Paris; the son of an Italian engineer. After working for Paris publishers and writing for the press he attempted fiction with success. During 1897 and 1898 he took up with splendid courage the cause of Captain Dreyfus, whom he declared to have been illegally condemned, and was in consequence of his action prosecuted by order of the French government and condemned to imprisonment. He escaped punishment by voluntary exile in England. Returning to Paris after the subsidence of the excitement caused by the Dreyfus case, he resumed his literary work; but was accidentally killed by gas escaping from a coal fire.

ZSCHOKKE (*tshok'ke*), **JOHANN HEINRICH** (1771-1848). A German writer; born in Magdeburg; lived chiefly at Aarau, in Aargau, Switzerland, where he spent 40 years of his life and where he died; wrote histories and a series of tales, but is best known by his *Stunden der Andacht* or *Hours of Devotion.* His *Select Works* fill 40 volumes.

DICTIONARY OF NOTED EDUCATORS.

ABBOTT, EDWIN (1838-1926). A celebrated English Shakespearean scholar and theologian; assistant master in King Edward's School in Birmingham; head master of the City of London School, which he made one of the best day schools in London (1865-1880); his works include the well-known *Shakespearean Grammar*.

ABELARD, PIERRE (1079-1142). The boldest thinker of the twelfth century; was born in France. He wandered about, seeking masters and opponents, and by this method of controversy did more than any one else to increase the love of study and intellectual pursuit in Paris. Everything he did then caused adverse criticism, but his example as an independent teacher led to the founding of schools and universities.

ADAMS, HENRY CARTER (1852-1921). Born in Iowa; graduated at Iowa College; has been lecturer at Cornell, University of Michigan, and Johns Hopkins, and since 1887, professor of political economy and finance at the University of Michigan; is statistician of the Interstate Commerce Commission, and president of the Economic Association.

ADLER, FELIX (1851-). German-American educator and reformer; professor of Hebrew at Cornell University (1874), and in 1876 founded Society of Ethical Culture. His principal literary works are *Creed and Deed* and *The Education of Children*.

AGRICOLA, RUDOLPH (1443-1485). A distinguished Dutch humanist; educated at the Universities of Louvain and Paris, and studied in Italy. After 1482 he was very influential in promoting the popularity of Greek and Roman literature. He was a forerunner of Erasmus. His most important work is *De Inventione Dialectica*.

ALBERTUS, MAGNUS, COUNT OF BOLLSTADT (1193-1280). A Dominican friar; was a celebrated teacher of science, theology, and philosophy. He received a bishopric, but retired to a convent in Cologne to devote himself to literary pursuits. He wrote a number of works, principally on *Aristotle*, the best *Summa Theologiae* and *Summa de Creaturis*.

ALCOTT, AMOS BRONSON (1799-1888). An American lecturer. In 1828 he became an educational reformer, establishing a school in Boston which attracted much attention by the novelty of the methods used. His teaching was largely by the conversational method, but he met with so much opposition that he gave up the school and removed to Concord, where he promulgated his views on education, society, civics, and theology, through lectures in Boston and vicinity. He tried to found a community in Harvard, Mass. He published *Concord Days, Table Talk, Sonnets and Canzonets* and an *Essay on R. W. Emerson*.

ALCUIN or **FLACCUS ALBINUS** (735-804). The most distinguished scholar of the eighth century, was an Englishman. Charlemagne made his acquaintance, invited him to his court, himself became his pupil, and established the Palatine School at his court, committing its supervision to Alcuin. Alcuin retired to the abbey of St. Martin in Tours, in 796, teaching clerics and the laity alike, for the love of it. He left many copies of the new books of that time, besides numerous theological writings, works of his own. He was the educational light of the age of Charlemagne.

ALDERMAN, EDWIN ANDERSON (1861-). President of the University of Virginia; born in Wilmington, N. C.; superintendent of Goldsboro, N. C., schools; professor of English in the State Normal College; professor of pedagogy in, and later president of, the University of North Carolina; president of Tulane University; author of several historical books.

ALLEN, WILLIAM (1784-1868). An American author; born at Pittsfield, Mass. He prepared the *American Biographical and Historical Dictionary*, the first work of general biography written in the United States. The first edition contained but 700 names; the third, published in 1857, contained over 7,000. He was president of Dartmouth College (1817-1820), and of Bowdoin (1820-1850).

ANDREWS, ELISHA BENJAMIN (1844-1919). A native of Hinsdale, N. H. He was successively pastor of a Baptist Church; president of Denison University; professor of homiletics in Newton, of history and political economy at Brown University and later at Cornell; was president of Brown University (1889-1898); was superintendent of the Chicago schools for two years. Since then he was chancellor of Nebraska University until he resigned in 1908. He has published several books, among them *Institutes of Constitutional History, An Honest Dollar, Wealth and Moral Law*, and *History of the United States in Our Own Time*.

ANGELL, JAMES BURRILL (1829-1916). Born in Scituate, R. I.; professor of modern languages at Brown; editor of the Providence *Journal* for several years; president of the University of Vermont (1866-1871); president of Michigan University (1871-1910); twice had leave of absence to accept important diplomatic missions, first to China to procure a revision of treaties between that country and the United States, second to Turkey on a similar mission. He was appointed to help arrange a treaty with Great Britain upon the fisheries questions. Regent of Smithsonian Institution (1887-1912). He has written *Progress in International Law* and *The Higher Education*.

ANTHON, CHARLES, LL.D. (1797-1867). Classical scholar and teacher; born in New York City. Served as tutor and professor of Greek and Latin for nearly fifty years in Columbia College. He is chiefly remembered by his annotated editions of numerous classical authors, long used here and in England as school and college text-books. He published also a new edition of Lemprière's *Classical Dictionary* and a dictionary of Greek and Roman antiquities.

APGAR, AUSTIN CRAIG (1838-1908). Born at Peapack, N. J., and was graduated at the New Jersey State Normal School, where he now teaches. He is the author of *Geographical Handbook, Geographical Drawing Book, Trees of the Northern United States*, and *Birds of the United States*.

AQUAVIVA, CLAUDIUS (1543-1615). An Italian, became the head of the order of Jesuits at the age of 38, and was chiefly responsible for its organization. In 1584 he appointed a commission of six Jesuits to frame rules for regulating the studies of the order. The result, after revision and approval by Aquaviva, was *Ratio Atque Institutio Studiorum Societatis Jesu*, a famous pedagogical book.

AQUINAS, THOMAS (1225-1274). Born of a noble Italian family, encountered the strongest opposition when he entered the order of the Dominicans. He became a public teacher at Paris until Pope Urban called him to teach philosophy in Italy. He declined an archbishopric to devote himself to study and lecturing. He was called the "Father of Moral Philosophy," and his *Summa Theologiae* is one of the first attempts at a complete theological system.

ARNOLD, SARAH LOUISE (1859-). Born in Abington, Mass. She taught in several states, and then became successively principal of the training school in Saratoga, N. Y.; supervisor of schools in Minneapolis and Boston; dean of Simmons College since 1902; author of *Waymarks for Teachers, Stepping Stones to Literature, Reading—How to Teach It*, and *The Mother Tongue*.

ARNOLD, THOMAS (1795-1842). The celebrated head master of Rugby; born on the Isle of Wight. His success was due to his endeavor to apply the principles of Christianity to school life. His literary fame rests upon his *History of Rome*.

ASCHAM, ROGER (1515-1568). Born in Yorkshire, Eng. Having pursued the study of the classics, especially Greek, with great ardor, he was appointed by the University to read Greek lectures. In 1548 became the tutor of the Princess Elizabeth in languages; was Queen Mary's Latin secretary, and Elizabeth retained him as tutor and secretary until his death. His treatise on classical education, *The Schoolmaster*, was published in 1570.

AVERY, ELROY McKENDREE (1844-) Author; born in Michigan; principal of high and normal schools, but his chief educational work has been as the author of a series of text-books on physics and chemistry which are used in the public schools throughout the country. He is writing a *History of the United States and its People*, to be completed in 15 volumes.

BACON, FRANCIS (BARON VERULAM) (1561-1626). A celebrated English philosopher. He was the first of his time to make the method of induction the object of investigation, and began the reform of existing sciences and the harmonizing of all knowledge. By his *Essays, Advancement of Learning*, and *Novum Organum*, he directed the attention of learned men to the reform of school methods. He exerted a wonderful influence on the scientific thought and teaching of the

European scholars who succeeded him. (See ENGLISH LITERATURE.)

BACON, ROGER (1214-1294). An English monk and philosopher; born at Ilchester, Eng. In his *Opus Majus*, an encyclopedia of all sciences, grammar, logic, mathematics, physics, and moral philosophy, he shows the need of different methods of study in language and nature. He made remarkable chemical discoveries, invented the magnifying glass, and rectified the calendar.

BAILEY, HENRY TURNER (1865-). An American art teacher, lecturer, and author; born at Scituate, Mass. After being supervisor of drawing in Lowell, was agent of the Massachusetts State Board of Education, in the interest of Industrial Drawing; official representative for the United States to the International Congress of Public Art at Brussels in 1898. He is the author of *First Year in Drawing*, *The Blackboard in Sunday School*, *The Great Painters' Gospel*, and editor of *School Arts Book*.

BAIN, ALEXANDER (1818-1903). English psychologist; born at Aberdeen, Scotland; taught in Aberdeen University; made professor of physics in the Andersonian University, Glasgow; in 1860 became professor of logic in the University of Aberdeen, and in 1881 was elected its rector. He is the exponent of physical psychology, and his chief work, *The Senses and the Intellect*, together with *The Emotions and the Will*, is the most learned and exhaustive treatise on the human mind in the English, or perhaps in any, language. Among his many writings are *English Grammar*, *Mental and Moral Science*, *Logic—Deductive and Inductive*, and *Education as a Science*.

BALLIET, THOMAS M. (1852-). Educated at Franklin and Marshall College, and at Yale; taught for several years, and then for a year devoted his time to lecturing on educational subjects in the West; was superintendent of schools in Reading, Pa., for two years, and in Springfield, Mass., for seventeen years. He has written and lectured much with inspiration and wide influence. The manual training movement found him one of its earliest and most ardent supporters. He is now dean of the School of Pedagogy in New York University, and is associate editor of the *Pedagogical Seminary*.

BARIZZA, GASPARINO (1370-1431). An Italian scholar; professor of Latin at Padua, coming from Milan. With Petrarch, he led in the movement for the revival of classical Latin, the recovery of the Latin text, and for the founding of libraries; he developed boarding schools for boys; wrote a manual of rhetoric for use in schools.

BARKER, GEORGE FREDERICK (1835-1910). Born at Charlestown, Mass.; professor of physiological chemistry and toxicology at Yale; professor of physics at the University of Pennsylvania from 1872 to 1900; now professor emeritus; expert in poisons in criminal cases, and in patent suits; has written a text-book on chemistry.

BASCOM, JOHN (1827-1911). Born at Genoa, N. Y.; professor of rhetoric in Williams, and for thirteen years president of Wisconsin University; returned to Williams to accept the chair of political science, remaining till 1901; he was prominent as a lecturer on sociology and economics, but is most widely known as an efficient teacher and scholarly writer on economics, philosophy, and sociology; author of a *Political Economy*, *Ethics*, *Evolution and Religion*, etc.

BASEDOW, JOHANN BERNARD (1723-1790). Born at Hamburg, came under the influence of Rousseau's *Emile*, and proposed a general reform in education in Germany. His *Elementarwerk* appeared in 1774, combining the principles of Rousseau with the methods of Comenius. The *Philanthropinum* was established as a result, and exerted a wide influence.

BEDE, THE VENERABLE (673-735). The most distinguished scholar of his age; born in England. He obtained all the learning possible in those days, being acquainted with both Latin and Greek. He spent his life teaching and writing at Jarrow. He composed an encyclopedic work for his pupils, and wrote homilies, hymns, epigrams, history, and a work on grammar. His last work was a translation of the Gospel of St. John into Anglo-Saxon

BELL, ALEXANDER MELVILLE (1819-1905). Scotch-American educator, born in Edinburgh; lecturer and instructor at Edinburgh University, the University of London, and Queen's College, Kingston, Canada, successively; famous as the inventor of "visible speech" a system of phonetic notation, very successfully used in the instruction of deaf mutes. He has written *Visible Speech*, *Principles of Phonetics*, and *World-English*.

BELL, ANDREW (1753-1832). A Scotch educational reformer; born at St. Andrew's. He went to India as a chaplain, but became the principal of an orphan school at Madras founded by the East India Company. The scarcity of properly qualified assistants forced him to use pupils to instruct one another under his direction, thus beginning the "Monitorial System," sometimes called the "Madras System." In 1797 Bell published *An Experiment in Education Made at the Male Asylum of Madras*, which attracted little attention until 1803, when Joseph Lancaster in an educational treatise recommended Bell's Monitorial System, the forerunner of the public graded schools.

BLOW, SUSAN E. (1843-1916). The foremost pioneer of the kindergarten training movement in the United States. With Superintendent William T. Harris, in 1873, she made her first experiment, gladly proffering her own services gratuitously to the St. Louis Board of Public Schools. Sixty children were assigned her, quickly dispelling the Froebelian notion that only 12 or 15 could be successfully taught. Miss Blow's success marked a new epoch in the history of elementary education. Her well-known book, *Symbolic Education*, has already become a classic, and her later book, *Letters to a Mother*, is a further welcome addition to kindergarten literature.

BOYNTON, FRANK DAVID (1843-). Superintendent of schools in Ithaca, N. Y.; born in Potsdam; became principal of the Ithaca High School, and director of the Ithaca Conservatory of Music; was chairman of the commission to revise the regents' academic syllabus in 1900 and 1905, and of the commission appointed by the University of the State of New York to arrange courses of study for the secondary schools of the state, and is a member of the state examining board. He is the author of *School Civics*, *Manual of Civics*, and *Plane and Solid Geometry*.

BROWN, ELMER ELLSWORTH (1861-). Born at Kiantone, N. Y.; taught in high schools and universities; United States Commissioner of Education (1906-1911); chancellor of New York University; member International Congress of Arts and Sciences at St. Louis in 1904 and president National Council of Education; has written *The Making of our Middle Schools*, *The Origin of American State Universities*, and a monograph entitled *Secondary Universities*.

BRYAN, WILLIAM LOWE (1860-). Born near Bloomington, Indiana; instructor in Greek, professor of philosophy, and vice-president at the University of Indiana from 1885 to 1902, since which time he has been its president.

BURGESS, JOHN WILLIAM (1844-). Born at Conersville, Tennessee; was professor of political science and history at Amherst, but, since 1876, has been connected with Columbia University as professor of political science and constitutional law; appointed the first Roosevelt professor of American history and institutions at the University of Berlin; published important works on political science and history.

BUSS, FRANCES MARY (1827-1894). A pioneer in the movement for the higher education of women in England, but chiefly in promoting secondary education for girls. A small private school, with the aid of the Brewers' and Clothiers' Companies, developed into the North London Collegiate and Camden Schools, the first school for girls in England offering educational facilities corresponding to the English grammar schools for boys, serving as a model for the many secondary schools founded by the Girls' Public Day School Company, the Church Schools Company, and many others.

BUTLER, NATHANIEL (1853-1927). Born at Eastport, Me., is a graduate of Colby University and has been teacher and professor in high schools and colleges; was president of Colby from 1895 to 1901, and has been dean of the College of Education, University of Chicago, since 1905; largely identified with the University Extension movement.

BUTLER, NICHOLAS MURRAY (1862-). Born in Elizabeth, N. J. Since 1885, he has been connected with Columbia College, as tutor, dean, and professor of philosophy and education, and finally president; he is president of Barnard College, Teachers College, and of the College of Pharmacy; trustee of the Carnegie Foundation for the Advancement of Teaching, and president of the University Settlement Society. In 1893 he founded the *Educational Review*, of which he is still the editor, as he is of the *Great Educators* series; president of the N. E. A. in 1895;

has served on various boards of education, and has also been active in civil and political reform; founded the New York College for the Training of Teachers (now Teachers College), and was its first president. Author of *The Meaning of Education*, and of a number of monographs on *Education in the United States*.

CALKINS, NORMAN A. (1822-1895). Born at Gainesville, N. Y.; successively, teacher, principal, and superintendent of schools; conducted teachers' institutes for many years in New York and adjoining states; assistant-superintendent of schools in New York City and instructor in methods and principles of education in the Saturday Normal School; active in the National Education Association; author of *Primary Lessons* and other books for teachers.

CAPEN, SAMUEL PAUL (1878-). Professor of modern languages at Clark College since 1902; president of Public Education Association since 1908.

CARDAN, JEROME (CARDANO, GIROLAMO) (1501-1575). Born in Italy, studied medicine at Padua, and became a celebrated physician at Milan, and professor of mathematics there, at Bologna, and at Rome; a man of great learning and an original thinker, being the first to demonstrate the formula for the resolution of equations of the third degree. His published works, in ten volumes, include treatises upon almost every department of learning.

CASSIODORUS, MAGNUS AURELIUS (about 468 to 568). Roman historian and statesman. The most profound and enlightened scholar of an age of barbarism. He may be regarded the father of the monastic *scriptorium* to which we owe the preservation of most of the classic literature; writer of text-books on rhetoric and grammar which had great vogue in the Middle Ages.

CAVANAUGH, JOHN WILLIAM (1870-). Roman Catholic clergyman; born at Leetonia, Ohio; was superior of Holy Cross Seminary, Indiana, from 1898 to 1905. He has been professor of English literature, and since 1905 president at the University of Notre Dame. Member of the Rhodes scholarship committee for Indiana; author of *Priests of the Holy Cross*.

CHAMBERLAIN, ALEXANDER FRANCIS (1865-1914). A Canadian educationist, born in England; educated in Canada; graduated at Toronto University (B.A., 1886; M.A., 1889); at Clark University (Ph.D., 1892), where he has since been assistant professor of anthropology; member of several learned societies; made special investigations of the Kootenay (B.C.) Indians; editor of *Journal of American Folk-Lore* since 1900; department editor *American Anthropologist;* author of essays, sonnets, short poems, and hymns.

CHANCELLOR, WILLIAM ESTABROOK (1867-). Born in Dayton, Ohio; lecturer on sociology, history, and economics, at Brooklyn Institute; superintendent of schools in Bloomfield, and Paterson, N. J., and since 1906 in the District of Columbia; lecturer on school administration at Chicago University, and on education and history at the George Washington University; member of several important scientific associations. His principal important scientific works are *Mathematical Series* in 10 volumes, *American History, Graded City Spellers*, and *A Theory of Education*.

CHEEVER, EZEKIEL (1615-1708). Born in London, but came to New England in 1637. He taught in New Haven, Ipswich, and Charlestown, for thirty-two years. In 1670 he went to Boston, and for thirty-eight years served as head master of the Boston Latin School; the most famous of colonial schoolmasters. He wrote the *Accidence*, which was used as a text-book in Latin for over a century, and *Scripture Prophecies Explained*.

CHILD, FRANCIS JAMES (1825-1896). A distinguished American scholar and teacher; born in Boston, Mass.; professor of English at Harvard (1876-1896); wrote *Observations on the Language of Chaucer* and *Of Gower's Confessio Amantis*. His greatest work is the edition of *English and Scottish Ballads* in eight large volumes.

CHRYSOLORAS, MANUEL (? -1415). A Byzantine Greek scholar, the first important teacher of Greek of the Renaissance; taught in Constantinople, and, at the invitation of the Florentine Republic, in Florence; later, in other cities of Italy; his most important work was a *Greek Grammar*, published in Venice in 1484.

CLARKE, SIR CASPAR PURDON, KT. (1846-1911). Director of the Metropolitan Museum of Art, New York (1905-1910); born in London, England; educated in England and France; for a time he was principal of the School of Arts, Calcutta, India, and was a recognized authority on Indian Art; afterwards, he became director of the Art Museum, South Kensington, London, which contains the finest collection in the British Empire.

COCHRAN, DAVID HENRY (1828-1909). Born in Springville, N. Y.; president of the New York State Normal College, and of the Brooklyn Collegiate and Polytechnic Institute; when president of the Brooklyn Y. M. C. A., he organized evening schools and a course of scientific lectures.

COLBURN, DANA POND (1823-1859). Horace Mann's attention being attracted to him by his teaching of arithmetic, he was appointed an institute instructor. In 1852, opened a private normal school in Providence, which became a state institution and of which he was the first principal. He published *Arithmetic and its Applications* and *Common School Arithmetic*.

COLBURN, WARREN (1793-1833). A distinguished American mathematician and educator; born in Massachusetts; his *First Lessons in Intellectual Arithmetic* was immensely popular in America and England and was widely translated. He wrote a *Sequel* to his arithmetic and an *Algebra*.

COMENIUS (or **KOMENSKY**), **JOHANN AMOS** (1592-1670). Bishop of the Moravian Church; born in *Moravia*; in 1631, published his *Janua Linguarum Reserata* in which he attempts to systematize the entire field of knowledge, so as to bring it in outline within the grasp of each child; organized the schools in Moravia, Sweden, and Holland. He recommended a system of schools like the American system of kindergarten, elementary and secondary schools, and university. His *Orbis Pictus* was a description, in short and easy sentences, of objects illustrated by rude engravings, and was the most popular text-book in Europe. He was the forerunner of Rousseau, Pestalozzi, and Froebel.

COMPAYRE, JULES GABRIEL (1843-1913). Born in France; professor of philosophy and the history of education in normal schools, and rector of the Academy at Poitiers and at Lyons; member of the higher council of public instruction, and of the commissions appointed to reorganize primary instruction; was inspector-general of public education in 1905; is considered one of the foremost French writers of this century on pedagogic questions. His principal writings are: *Histoire critique des doctrines de l'education en France*, a brilliant and valuable work, *Etudes sur l'enseignement et l'education, Histoire de la pedagogie*, and *Abelard and the Origin of Universities*.

COOLEY, EDWIN GILBERT (1857-1923). Born at Strawberry Point, Iowa; was superintendent of schools, principal of a high school, and elected principal of Chicago Normal School, but before taking the position was elected to the superintendency of the Chicago Schools; was president of the National Education Association for 1907-1908.

DABNEY, CHARLES WILLIAM (1855-). President of the University at Cincinnati; professor of chemistry in the University of North Carolina and state chemist; discovered the phosphate deposits and tin ore in North Carolina, and was largely instrumental in establishing an industrial school at Raleigh; was president of the University of Tennessee and assistant secretary of agriculture at Washington during Cleveland's administration; author of *Old College and New, Washington's Interest in Education*, and *Agriculture and Education*.

DANA, EDWARD SALISBURY (1849-). Born in New Haven, Conn.; curator of the mineral collection at Yale, and professor of physics; trustee of Peabody Museum and editor of the *American Journal of Science*. His text-books on mineralogy have been deservedly popular and are in use in many schools.

DAVIS, WILLIAM MORRIS (1850-). Geographer and geologist; born in Philadelphia; for three years assistant at the Argentine National Observatory; has been connected with Harvard since 1878 as professor of physical geography and geology; a member of the Carnegie Institution Expedition to Turkestan in 1903, and traveled in South Africa two years later; author of *Physical Geography* and *Elementary Meteorology*, and is associate editor of *Science, American Naturalist*, and *The American Journal of Science*.

DAY, JAMES ROSCOE (1845-1923). Born in Maine; was clergyman in Portland, Boston, and New York Methodist churches; chancellor of Syracuse University since 1894; was elected Bishop of the Methodist Episcopal Church in 1904, but resigned.

DEGARMO, CHARLES (1849-). Born in Wisconsin; professor of modern languages, professor of psychology in the University of Illinois, and president of Swarthmore College. Since 1898 he has been professor of the science and art of education at Cornell; author of *Essentials of Method, Herbart and Herbartians, Language Lessons,* and *Principles of Secondary Education.*

DEWEY, MELVIL (1851-). Born in New York State; while at Amherst College he was acting librarian; planned and directed three national educational societies—the American Library Association, the Metric Bureau, and the Spelling Reform Association; also the Library Bureau for advancing library interests. From 1883 to 1888, he was chief librarian and professor of library economy at Columbia; founder and director of the Albany Library School; has written *Library School Rules* and *Decimal Classification and Relative Index.*

DOLBEAR, AMOS EMERSON (1837-1910). For 33 years professor of physics at Tufts College, and afterwards professor emeritus; invented the writing telegraph, the magneto-telephone, the static telephone, and the air space telegraph cable; discovered the convertibility of sound into electricity, telegraphing without wires, and photographing with electric waves; wrote several books, *Matter, Ether, and Motion* and *Modes of Motion* being his principal works.

DRAPER, ANDREW SLOAN (1848-1913). Born in New York State; American lawyer and educator; served on the City Board of Education in Albany; member of the Court of Commissioners on Alabama claims in 1885; state superintendent of public instruction in New York, and he accomplished among other reforms, the adoption of a system of uniform examinations; superintendent of the Cleveland, Ohio, schools for two years, and president of the University of Illinois for ten years; elected first commissioner of education for the state of New York (1904-1913); declined the election to the first superintendency of the schools of Greater New York; member of the Board of United States Indian Commissioners (1902-1913); published *The Rescue of Cuba* and many addresses; received medals for work as educational writer and speaker; editor-in-chief of *Self Culture for Young People.*

DUNSTER, HENRY (about 1612-1659). Born in Lancashire, England, and educated at Cambridge. He emigrated to America (1640) and at once became president of Harvard College, resigning in 1657.

DUTTON, SAMUEL TRAIN (1849-1919). A teacher, principal and superintendent of schools (1874-1900); professor of school administration and superintendent of Horace Mann Schools, Teachers College, N. Y., since 1900; lecturer in pedagogy at Harvard; author of several valuable text-books.

DWIGHT, TIMOTHY (1828-1916). Born at Norwich, Conn.; for twenty-eight years professor of sacred literature and New Testament Greek at Yale Theological Seminary; president of Yale University, as was his father before him; member of the American committee for the revision of the Bible; translated and edited several foreign works on the Epistles of the New Testament, and has published a volume of his sermons entitled *Thoughts of and for the Inner Life,* and *Memories of Yale Life and Men.*

ELIOT, CHARLES WILLIAM (1834-1926). Called the "First Living Citizen of America"; born in Boston, Mass.; was tutor in mathematics and chemistry at Harvard several years, later professor of analytical chemistry in the Massachusetts Institute of Technology, whence he was elected president of Harvard University (1869). In this position he has led most of the colleges in the country to substitute electives for the former uniform courses of study. He resigned the presidency of Harvard and was elected president emeritus (1909). By his lectures and writings, and by his work on the "Committee of Ten" in the National Education Association, he has also been active in reforming the courses in secondary and common schools. Some of his published works are *The Working of the American Democracy, Educational Reform,* and *Essays and Addresses.*

ELY, RICHARD THEODORE (1854-). Born at Ripley, N. Y.; was professor of political economy at Johns Hopkins, and since has held a similar position at the University of Wisconsin; founded the American Economic Association and the American Bureau of Industrial Research; has been president of the American Association for Labor Legislation since 1900. He is the author of a number of works on political economy, among them *Taxation in American States and Cities, The Social Law of Service, Monopolies and Trusts,* and *Studies in the Evolution of Industrial Society.*

ERASMUS, DESIDERIUS (1467-1536). Born at Rotterdam; one of the greatest scholars of the Renaissance and Reformation period; was famous as chief interpreter to the peoples of northern Europe of the great intellectual movement of the fifteenth century. Having hopes of preferment from Henry VIII., he went to England and became professor of Greek at Oxford. He was a man of profound learning and brilliant wit. Besides editing several classic authors, he prepared the earliest edition of the Greek testament. His *Colloquia* has exerted the greatest influence of all his writings.

ERIGENA, JOHANNES SCOTUS, "JOHN THE SCOT" (about 810 to about 875). A distinguished British philosopher, whose early and late years are shrouded in obscurity; he was invited to France by Charles the Bald and placed in charge of the court school. Erigena translated the writings of Pseudo-Dionysius, the Areopagite. His great work is *De Divisione Naturae,* first printed in Oxford, 1681. His teachings mark the transition from the older Platonism to Neo-Platonism.

FALCONER, REV. ROBERT A. (1867-). Leading educator; born in Nova Scotia. Matriculation honors at Toronto University, gaining B.A. (1888), M.A. (1889); B.D. (1892) at Edinburgh University. Ordained to the ministry; appointed lecturer on New Testament Exegetics in Presbyterian College, Halifax (1892), professor (1895).

FAUNCE, WILLIAM HERBERT PERRY (1859-). Born at Worcester, Mass.; was graduated at Brown; instructor of mathematics at Brown; pastor of Baptist churches at Springfield, Mass., and New York City until his election to the presidency of Brown University in 1899; has been lecturer at University of Chicago and at Yale.

FELLOWS, GEORGE EMORY (1858-). Born at Beaver Dam, Wis.; taught for ten years in high schools; professor of European history at Indiana University and assistant professor of history at Chicago University. Since 1902 he has been president of Maine University; author of *Outlines of the Sixteenth Century* and *Recent European History.*

FENOLLOSA, ERNEST FRANCISCO (1853-1908). Born at Salem, Mass.; went to Japan as professor of political economy and philosophy in Tokyo University; was imperial fine arts commissioner to the Japanese government in 1886; professor of aesthetics and manager of the Tokyo Arts Academy; became curator of the oriental art department of the Museum of Fine Arts in Boston; professor of English literature in the Imperial Normal School in Tokyo; lectured on the Orient, and was the author of several books, including two volumes of poems and monographs on oriental art.

FINLEY, JOHN HUSTON (1863-). Secretary of the State Charities Aid Association in New York; founder and editor of the *State Charities Record* and *Charities Review* of New York; professor of politics, Princeton; president of New York College (1903-1913); Commissioner of Education, New York state (1913).

FITCH, JOSHUA G., SIR (1824-1903). An English educator; vice-principal of the British Normal College, then principal; finally inspector of schools, including the training college for teachers. His books, *Lectures on Teaching, Art of Questioning,* and *Art of Securing Attention,* are well known.

FRANCKE, AUGUST HERMANN (1663-1727). A distinguished German educator. In 1695 he became pastor of a small town near Halle, where he started a private school in his house, which at his death had grown to be a large educational and charitable institution with 2,165 students, comprising three departments, the Pedagogium, for the children of the wealthy, the Latin School, and the common schools. The teachers were students at the University of Halle. This institution was the first to combine Christian and practical training with normal school work. Francke's ideas were opposed both to extreme rationalism and the classical school. He advocated the use of the vernacular.

FROEBEL, FRIEDRICH WILHELM AUGUST (1782-1852). Famous German educationist and originator of the *Kindergarten,* an institution for simultaneously furthering the physical, moral, and intellectual growth of children between the ages of three and seven; a "garden of children" in which young human

plants are nurtured. He held that the essence of education was to be found in wisely directed but spontaneous action, and that play was a child's most natural employment. The master-stroke of Froebel's genius was his organization of children's play. In 1826, he published his great work, *The Education of Man*, and seventeen years later, the *Mutter-und-Kose-lieder* (Songs, Games, and Stories for use of Mothers). Froebel holds that education creates nothing in the children, but merely directs the growth of inborn qualities. To him education meant unity of development in perfect accordance with the laws of being.

FRYE, ALEXIS EVERETT (1859-). Educator and author, teacher of methods and practice, Chicago Normal School; superintendent in California and Cuba; organizer of Cuban school system; educational lecturer; author of many school text-books relating to nature study and geography.

GALLAUDET, EDWARD MINER (1837-1917). Born in Hartford, Conn.; taught in his father's institution for deaf-mutes at Hartford before organizing, in 1857, the institution for Deaf, Dumb, and Blind at Washington; founded in 1864, Gallaudet College for the Deaf, which is the only college of its kind in the world. He is professor of moral and political science there, and president of the convention of American Institutions for the Deaf. He has written *Popular Manual of International Law*, and the *Life of Thomas Hopkins Gallaudet*.

GALLAUDET, THOMAS HOPKINS (1787-1851). American educator of deaf and dumb; born in Philadelphia, Pa., of French Huguenot ancestry. Familiarizing himself with the system of the Abbé Sicard in Paris, and with that of Braidwood and Watson in London, he founded an institution in Hartford, Conn., for the deaf and dumb.

GENUNG, JOHN FRANKLIN (1850-1919). An American educator; born in Willseyville, N. Y.; is professor of rhetoric in Amherst College; has written a number of excellent text-books.

GILDERSLEEVE, BASIL LANNEAU (1831-1924). Distinguished classical scholar; born at Charleston, S. C.; professor of Greek in the University of Virginia; appointed to the professorship of Greek at Johns Hopkins University, which position he still holds; edited the *American Journal of Philology* since its establishment in 1880. Among his numerous works are: *A Latin Grammar*; *Persius*; *Justin Martyr*; *Pindar*; *Essays and Studies*; *Greek Syntax*.

GILMAN, ARTHUR (1837-1909). Born in Alton, Ill.; planned the Harvard Annex School (1876), which became Radcliffe College (1894), of which Gilman became regent; founded the Cambridge school for girls, since known as the "Gilman School" (1886); wrote *Boston Past and Present*, *Shakespeare's Morals*, *History of the American People*, *The Making of the American Nation*, etc.

GILMAN, DANIEL COIT (1831-1908). Born at Norwich, Conn.; successively librarian, secretary of the Sheffield Scientific School, and professor of physical and political geography; president of the University of California, first president of Johns Hopkins University, continuing from 1875 to 1901, and then president emeritus; president of the Carnegie Institution at Washington; member of the United States Commission on the boundary line between Venezuela and British Guiana; trustee of the Russell Sage Foundation and of Carnegie Institution. He published *Life of James Monroe*, *University Problems*, and *The Launching of a University*. He was editor-in-chief of the New International Encyclopedia.

GOODWIN, WILLIAM WATSON (1831-1913). Well-known American classical scholar; born at Concord, Mass.; Eliot professor emeritus of Greek at Harvard University; first director of the American School of classical studies at Athens; author of various text-books.

GRIGGS, EDWARD HOWARD (1868-). Widely-known lecturer; born in Minnesota. Instructor in English literature and professor of literature at Indiana University; professor of ethics, and of ethics and education at Leland Stanford Junior University. Since 1899 he has been giving courses of lectures on ethics and literature to cultured audiences in the larger cities. His writings include *The New Humanism*, *A Book of Seventy Meditations*, and *Moral Education*.

GROSVENOR, EDWIN AUGUSTUS (1845-). American historian; born in Newburyport, Mass.; professor of European history at Amherst from 1892-1899; author of various historical works including: *Constantinople*, *Contemporary History of the World*, also a translation from the French of Duruy's *History of Modern Times*, *etc.*

GULICK, LUTHER HALSEY (1865-1918). Born in the Hawaiian Islands; secretary of the physical training department of the International Committee of the Y. M. C. A.; one of the faculty of the International Y. M. C. A. Training School at Springfield, Mass.; principal of Pratt Institute High School; director of physical training in the public schools of Greater New York until 1908, when he began to serve on the Russell Sage Foundation for playgrounds. His writings are *Physical Measurements*, and *Physical Education by Muscular Exercise*, and *Mind and Work*.

HADLEY, ARTHUR TWINING (1856-). Born in New Haven, Conn.; professor of political science and political economy until 1899, when he became president of Yale; has been lecturer on railroad administration, and commissioner of labor statistics. He has published *Railroad Transportation—Its History and its Laws*, *The Education of the American Citizen*, *Freedom and Responsibility*, and *Standards of Public Morality*. His writings give him first rank among American economists.

HAILMANN, WILLIAM NICHOLAS (1836-). Born in Switzerland; after teaching several years, was elected superintendent of the public schools of La Porte, Indiana; became national superintendent of Indian schools and later superintendent of schools at Dayton, Ohio. Since 1904 has been head of the department of psychology at the Chicago Normal School. His writings include a large number of educational works, among which are *History of Pedagogy*, *Early Education*, *Kindergarten Culture*, *The English Language*, and *The Laurel Primer*.

HALL, GRANVILLE STANLEY (1846-1924). Born in Ashfield, Mass.; professor of psychology at Antioch College; lecturer on psychology at Harvard and at Williams, and professor of psychology at Johns Hopkins, becoming then (1888) president and professor of psychology at Clark University. He has made child-study a specialty, and is a well-known lecturer and writer in various publications on that subject. His books include *Aspects of German Culture*, *Adolescence*, and *Youth—Its Education, Regimen and Hygiene*. He is the founder and editor of *The American Journal of Psychology* and the *Pedagogical Seminary*.

HARPER, WILLIAM RAINEY (1856-1906). An American educator; born at New Concord, Ohio; professor of Hebrew at the Baptist Seminary, Chicago (1879), where he perfected a method of teaching Hebrew by correspondence; professor of Semitic languages and biblical literature at Yale (1886-1889); president of the University of Chicago (1891-1906); wrote *Elements of Hebrew*, *Hebrew Vocabularies*, *Hebrew Method and Manual*, *Elements of Hebrew Syntax*, and *Prospects of the Small College*.

HARRIS, ABRAM WINEGARDNER (1858-). Born in Philadelphia; taught mathematics at Wesleyan and elsewhere; director of the Office of Experiment Stations, United States Department of Agriculture; from 1893 to 1901 president of the University of Maine; since 1906 president of Northwestern University.

HARRIS, GEORGE (1844-1922). President of Amherst College (1899-1912); born in Maine; professor of Christian theology in Andover Theological Seminary; one of the editors of the *Andover Review*; author of *Moral Evolution*, and *Inequality and Progress*.

HARRIS, WILLIAM TORREY (1835-1909). One of the most eminent American educators; was United States Commissioner of Education from 1889 to 1906; superintendent of St. Louis public schools (1867-1888); lecturer at the Concord School of Philosophy; represented the U. S. Bureau of Education at the Brussels Educational Congress and the Paris Exposition in 1889; established the *Journal of Speculative Philosophy*, and was regarded as the best exponent in this country of the philosophy of Hegel. He helped edit Appleton's School Readers, edited Appleton's educational series, department of philosophy in Johnson's Cyclopædia, and was editor-in-chief of Webster's International Dictionary. He was the author of *Introduction to the Study of Philosophy*, *Hegel's Logic*, and *Psychologic Foundations of Education*, besides many other works

HAZARD, CAROLINE (1856-). Born in Rhode Island; member of the Massachusetts State

Board of Education; president of Wellesley (1899-1910). Author of *Some Ideals in the Education of Women.*

HECKER, JOHANN JULIUS (1707-1768). A German educator. Pupil of Francke. By command of Frederick II. of Prussia he formulated a system for the government of common schools, which is now partly in force, and established the first permanent real-schule.

HEGIUS, ALEXANDER (1420-1495). A German humanist. He was a pupil of Thomas à Kempis, and in his turn instructed Erasmus, Pope Adrian VI., and Conrad Goclenius. He used no mediæval text-books, but made Latin his standard. His works include treatises on pedagogy, psychology, and morals.

HERBART, JOHANN FRIEDRICH (1776-1841). A German philosopher and eminent educationist. Following at first in his teaching the methods of Pestalozzi and Fichte, after more reflection he formed one of his own, now familiarly called the *Herbartian System.* The theory of "Apperception" was fully set forth by him as well as the problem of how to realize the ideas of freedom, perfection, right, equity, and benevolence within the sphere of education. Many training schools have been established on his methods. His writings fully explain his position and theories, among them *Herbart's A B C of Sense-Perception, Application of Psychology to the Science of Education,* and *Outlines of Educational Doctrine.*

HIRSCH, EMIL G. (1851-1922). He became a rabbi in 1877, and in 1892 was appointed professor of rabbinical literature and philosophy at Chicago University; for several years editor of the *Zeitgeist,* and now edits the *Reform Advocate,* Chicago.

HOPKINS, MARK (1802-1887). Professor of moral philosophy and rhetoric at Williams in 1830; elected to the presidency of Williams in 1836, which office he held for thirty-six years, retaining the professorship of mental and moral philosophy after resigning the office of president. As a teacher he made a wonderful impression upon his classes, and his administration of the college was remarkably successful. Among his published works are *The Law of Love, Love as a Law,* and *Teachings and Counsels.*

HOWARD, OLIVER OTIS (1830-1909). From 1865 to 1874, he was commissioner of the Freedmen's Bureau, establishing within three years 1,400 schools and 700 Sabbath schools; he was largely instrumental in establishing Howard University, Washington, and was its president from 1869 to 1873; superintendent at West Point for a year; founded Lincoln Memorial University in 1895. He wrote *Donald's School Days, Nez Perces Joseph,* and *Our Wild Indians.*

HOWE, SAMUEL GRIDLEY (1801-1876). An American educational reformer and philanthropist. His name will long be remembered for his work among the blind. In 1832 he established the famous Perkins Institution for the Blind, and later was the means of a number of similar institutions being founded throughout the country. He introduced many improvements in the printing and preparation of books for the blind.

HUNTINGTON, EMILY (1841-1909). A writer as well as educator. In 1872 she became the head of the Wilson Industrial School for Girls, in New York, the first school of its kind in America, laboring for twenty years; started the first boys' club and the first kitchen garden; author of many books on gardening.

HUTCHINS, HARRY BURNS (1847-). President of the University of Michigan (1910-1920). Instructor and assistant professor of history and rhetoric, 1872-1876, of law, 1884-1887, in the same university; professor of law in Cornell, 1887-1894; professor and dean in law department, 1895-1910; acting president in 1897-1898, and again from October, 1909, to June, 1910, of the University of Michigan.

HYDE, WILLIAM DEWITT (1858-1917). Pastor of a church in Paterson, N. J.; called to be the seventh president of Bowdoin College in 1885. He has frequently written and spoken on educational topics. Some of his published works are *Practical Ethics, Social Theology, The Evolution of a College Student, The Art of Optimism,* and *From Epicurus to Christ.*

ISIDORE, ARCHBISHOP OF SEVILLE (?570-636). Most famous ecclesiastic of the seventh century, and most learned man of his time. We are indebted to him for many fragments of Greek and Latin authors. His *Etymologies,* in twenty books (edited by Otto Leipsig, 1833), formed the great mediaeval encyclopedia.

ISOCRATES (436-228 B. C.). The most celebrated teacher of his age, was educated at Athens, being taught by Socrates. In 392 B. C. he opened a school at Athens, where he taught the art of rhetoric. Cicero gained much from him, and said that in his school the eloquence of Greece was developed and perfected. His writings include orations and letters.

JAMES, EDMUND JANES (1855-1925). Political economist; born in Jacksonville Ill.; professor of public finance and administration, Wharton School of Finance and Economy, University of Pennsylvania (1883-1895); professor of political and social science in the same university (1884-1895); professor of public administration, University of Chicago (1896-1901); president of the Northwestern University from 1902 to 1904; now president of the University of Illinois; editor and author of a number of works on political economy and social science and public law.

JAMES, WILLIAM (1842-1910). American psychologist and philosopher; born in New York; filled the following offices at Harvard: assistant professor of comparative anatomy and physiology; assistant professor of philosophy; professor of psychology and philosophy; besides being Gifford lecturer on natural religion at Edinburgh. He contributed much to analytical psychology and to metaphysical analysis in philosophy. Some of his works are: *Principles of Psychology, The Will to Believe, Talks to Teachers on Psychology, Human Immortality, Pragmatism.*

JEROME, SAINT (about 340-420). The most learned of the early fathers of the Latin Church, and a contemporary of Ambrose and Augustine. He presided over a monastery founded by Paula in Bethlehem and finished the book to which he owes his fame, viz., *The Latin Translation of the Bible.*

JESSE, RICHARD HENRY (1853-). Born in Virginia; instructor in the universities of Louisiana and Tulane until called to the presidency of the University of Missouri in 1891; prominent in the National Education Association, being one of the Committee of Ten on the course of study for secondary schools (1892-1893). President of Southern Association of Colleges and Secondary Schools; author of many pamphlets and addresses.

JOHNSON, EMORY RICHARD (1864-). American educator; professor of commerce and transportation, University of Pennsylvania, since 1896; expert on transportation and railway property for U. S. government (1899-1905); author of works on transportation.

JOWETT, BENJAMIN (1817-1893). A distinguished English scholar and educationist. A brilliant university career was followed by a fellowship and tutorship at Balliol, of which college he was master from 1870 until the time of his death. Jowett exercised a marked personal influence over his pupils, and did more perhaps than any of his contemporaries toward shaping the life and thought of his generation. He was the foremost Greek scholar of his day.

JUDSON, HARRY PRATT (1849-1927). Born at Jamestown, N. Y. Teacher and principal of the high school at Troy, N. Y.; professor of history in the University of Minnesota; head professor of political science, and dean of the faculties of art, literature, and science, at the University of Chicago. Since 1907 he has been president of the University of Chicago; author of a number of books on historical and educational subjects.

KING, HENRY CHURCHILL (1858-). Born at Hillsdale, Mich.; was associate professor, professor and dean of Oberlin College from 1884 to 1902, when he was elected its president; was a member of the Committee of Ten in the National Education Association to report on secondary school studies; author of *The Appeal of the Child, Personal and Ideal Elements in Education,* and *Letters to Sunday School Teachers.*

LADD, GEORGE TRUMBULL (1842-1921). American psychologist and philosopher; born at Painesville, Ohio; professor of philosophy at Yale since 1881. He has written numerous works on psychology and philosophy, including *Philosophy of Religion, Outlines of Physiological Psychology, Philosophy of Mind, Philosophy of Conduct.*

LANCASTER, JOSEPH (1778-1838). English educator; born in London. He made use of, and improved, Bell's Monitorial System; established the Royal Lancastrian Society from which grew the British and Foreign School Society.

LA SALLE, JEAN BAPTISTE DE (1651-1719). A French priest; born at Rheims; founder of the order commonly called the "Christian Brothers," having for its object the providing of schools for the poor. After establishing schools in various parts of France, he went

to England and James II. intrusted to him the educating of fifty Irish boys of good family. In 1699 he established the first technical school. At his death the order comprised 274 Brothers and 10,000 pupils. Some of his books have been translated into English: *The Rules of Christian Politeness* and *Management of Christian Schools*. La Salle was canonized by Pope Leo XIII.

LILY, or LILLY, WILLIAM (about 1468-1522). A celebrated English grammarian. He was graduated from Oxford, traveled to the Orient, lived at Rhodes and Rome to perfect his knowledge of Greek and Latin. He opened the first private or aristocratic school in London for training gentlemen's sons for Oxford and Cambridge in the dead languages. He was the first headmaster in Colet's School, in St. Paul's Churchyard, the first public school in England. He was probably the first teacher of Greek in England and was one of the chief exponents of the "new learning" in that country. He edited and published a work known as *Lilly's Grammar*.

LOW, SETH (1850-1916). An American administrator; born in Brooklyn, N. Y.; graduated at Columbia University (1870); president Columbia University (1890-1901); united its several departments, expanded its scope, promoted removal to its present commanding site, and gave to it the great library building completed at a cost of over $1,000,000 to his private fortune; mayor New York City (1902-1903).

LOWELL, ABBOTT LAWRENCE (1856-). Was graduated from Harvard (1877); and from Harvard Law School (1880); legal practitioner (1880-1897); lecturer on government at Harvard (1897-1899); professor of the science of government (1900-1909); president of Harvard University (1909); trustee of the Lowell Institute of Boston; author of *Essays on Government, Governments and Parties in Continental Europe*, a widely used treatise; and *The Government of England*.

LOYOLA, IGNATIUS DE (1491-1556). Founder of the Jesuits; born in Spain. At the age of thirty-three he began to teach the rudiments of grammar in a public school to little boys; continued his studies in Paris, where Francis Xavier was one of his chosen companions; became a priest and founded the Order of the Jesuits in 1534, establishing a number of orphan asylums for boys and girls. At his death no fewer than 130 colleges had been established by the Jesuits. Loyola was canonized in 1622.

LYON, MARY (1797-1849). Pioneer in the movement for the higher education of women; taught at Derry, N. H., and from 1828 to 1834 was principal of Ipswich Seminary; founded in 1837 Mt. Holyoke Seminary, where women could fit themselves for teaching. For the sake of economy and to give the young women exercise and practice in household tasks, she arranged the course so that each student should perform some household labor each day.

McCARTHY, CHARLES HALLAN (1860-). American educator; professor American history, Catholic University of America, since 1904; author of *Lincoln's Plan of Reconstruction*.

MacCRACKEN, HENRY MITCHELL (1840-1916). Born at Oxford, Ohio. He was teacher of classics, school superintendent, chancellor of Western University, then went to New York University as vice-chancellor and professor of philosophy; chancellor of New York University (1891-1911); author of *Kant and Lotze*, and *A Metropolitan University*.

McIVER, CHARLES DUNCAN (1860-1906). Born in North Carolina; taught for several years and was elected president of the State Normal and Industrial College for women; organized many associations for the betterment of educational conditions in his own state and through the South.

MACKAY, ALEXANDER HOWARD. Born at Mount Dalhousie, Pictou, N. S. He was successively principal of Annapolis, Pictou, and Halifax academies; superintendent of education for Nova Scotia. He is very active in the educational field, advocating reforms in the systems of weights and measures, and spelling. He has been connected editorially with various educational and scientific periodicals.

MACY, JESSE (1842-1919). American educator and political economist; professor constitutional history and political science, Grinnell, since 1885; author of the *British Constitution*, texts on civics, and other works on political science.

MAIN, JOHN HANSON THOMAS (1859-). Born at Toledo, Ohio; professor of ancient languages at Moore's Hill College; professor, acting president, dean, and now president of Grinnell College.

MANN, HORACE (1796-1859). President of Antioch College (1852-1859). As secretary of the board of education appointed by the state legislature of Massachusetts (1837) to revise the school laws and to reorganize the school system, Mann wrote 12 volumes of annual *Reports* (1837-1848) which are educational classics; wrote *Lectures on Education, On the Study of Physiology in Schools, Slavery Letters and Speeches*.

MARTIN, GEORGE H. (1841-1917). Born at Lynn, Mass. He was a teacher at Bridgewater Normal School for 18 years; agent of the Massachusetts State Board of Education for two years; supervisor of the Boston schools from 1892-1904, since which time he has been secretary of the State Board of Education. His works include *Civil Government*, a text-book for schools, and *Hints on Teaching Civics*.

MATHER, INCREASE (1639-1723). A colonial divine; born at Dorchester, Mass.; in 1681 he was made president of Harvard, but his régime was characterized by various intrigues. He was a voluminous writer, his books including: *A Brief History of the War with the Indians in New England, Cometographia, Cases of Conscience, Concerning Witchcraft*.

MAXWELL, WILLIAM HENRY (1852-1920). Born in Ireland. He came to the United States, became superintendent of schools in Brooklyn, and finally since 1898 superintendent of the greater New York City schools. He is author of two school grammars.

MUIR, ALEXANDER (1834-1906). Scotch birth; B.A. at Queen's University, Kingston (1851); taught at Scarboro, Newmarket, Beaverton, Toronto (1880); principal Gladstone avenue public school, Toronto (1897). Well known national poet; author of "The Maple Leaf Forever," the national song of Canada (1866); also "Canada," "The Old Union Jack," and "Canada Forever." Member Orange Order; president Army and Navy Veterans' Association, Toronto (1892); bard to Militia Veterans '66 (1894).

MONROE, PAUL (1869-). Professor of history of education since 1902, in Teachers College, Columbia University; author of several books, including *Text-book in the History of Education*, and a brief course in the same subject.

MOULTON, RICHARD GREEN (1849-1924). An English literary critic; born at Preston, England; a well-known University Extension lecturer; now professor of English at the University of Chicago. Among his many writings may be mentioned: *Shakespeare as a Dramatic Artist, Ancient Classical Drama, Four Years of Novel Reading, The Literary Study of the Bible, Introduction to the Literature of the Bible, Modern Readers' Bible*.

MULCASTER, RICHARD (1548-1611). An English schoolmaster of wide repute; first head master of the Merchant Taylors' School (1561-1586); subsequently high master of St Paul's School, London, (1596-1608). His best known books are: *Positions, wherein those primitive circumstances be examined, which are necessarie for the training up of children, either for skill in their book or health in their bodie* (1581); and the *Elementarie, which entreateth Chefelie of the right writing of our English tung* (1582). He strenuously advocated physical training as well as music for boys.

MULLANY, PATRICK FRANCIS (BROTHER AZARIAS) (1847-1893). Born in Ireland. President of Rock Hill College for seven years; teacher of literature at De La Salle Institute, New York; author of *Philosophy of Literature* and *Phases of Thought and Criticism*.

MUNRO, DANA CARLETON (1866-). American educator; instructor and professor of history at University of Pennsylvania (1893-1902); since 1902 professor of European history, University of Wisconsin; author of *Mediaeval History, Source Book of Roman History*, and *Mediaeval Civilization*.

MUNSTERBERG, HUGO (1863-1916). A German-American psychologist. He became instructor in psychology at the University of Freiburg, Germany, assistant professor in 1891; and in 1892 professor of psychology at Harvard University. He has devoted himself chiefly to the psychological side of psychology, and it was under his direction that the psychological laboratory at Harvard was organized. Some of his important publications are *Psychology and Life, Grundzüge der Psychologie, American Traits, Principles of*

Art Education, Science and Idealism. He is editor of *Harvard Psychological Studies.*

MURPHY, THOMAS EDWARD (1856-). Born in New York; professor of Latin and Greek at Georgetown University, as well as vice-president; president of the College of St. Francis Xavier, and (1906-1910) of Holy Cross College, Worcester

NEEDHAM, CHARLES WILLIS (1848-). Born in Castile, N. Y.; elected dean of the Schools of Law of Columbian University, Washington, D. C., and later appointed professor of law. He organized the School of Comparative Jurisprudence and Diplomacy at Washington, and was elected its dean (1898); professor of transportation and interstate commerce. President of George Washington University since 1902.

NICHOLS, ERNEST FOX (1869-1924). Born in Leavenworth, Kan.; professor of physics at Cornell, Colgate, and Dartmouth successively; professor of experimental physics, Columbia (1903-1909); president of Dartmouth College (1909); writer on radiation.

NOLLEN, JOHN SCHOLTE (1869-). American educator; professor modern languages, Grinnell (1893-1903); professor of German, Indiana University (1903-1907); president Lake Forest University since 1907; author *Outline History Modern German Literature*; editor, Schiller's *Maria Stuart*, and other poems.

NORTHROP, CYRUS (1834-1922). Born in Connecticut; professor of rhetoric and English literature at Yale from 1863 to 1884, when he was elected president of the University of Minnesota.

O'CONNELL, DENNIS J. Born at Charleston, S. C.; secretary to Cardinal Gibbons; head of the American College in Rome for several years; rector of the Catholic University of America, and president of the Catholic Educational Association.

ORIGEN (about 185-about 254). The most famous Christian writer and teacher of the third century; born in Alexandria. Educated at the famous Alexandrian School, under Clement, whom he succeeded as head of the Catechetical School. During the persecutions of the Christians by Maximinus he fled to Caesarea, where he ultimately succeeded in raising a school rivaling the fame of Alexandria. He was imprisoned and tortured for heresy, and died from the effects of his injuries. Few of his voluminous writings have come down to us.

OSLER, WILLIAM (1849-1919). American educator and physician; born in Ontario. In 1874 he was appointed professor of physiology and pathology in McGill University, and ten years later was elected professor of chemical medicine in the University of Pennsylvania; subsequently, professor in the Johns Hopkins University; at present in the University of Oxford. His writings include: *Histology Notes, Cerebral Palsies of Children, The Principles and Practice of Medicine.*

PAGE, DAVID PERKINS (1810-1848). Born at Epping, N. H. Principal of the State Normal School at Albany. His *Theory and Practice of Teaching*, the most popular of American pedagogical books, has given him a high place among nineteenth century educators.

PAINTER, FRANKLIN VERZELIUS NEWTON (1852-). An American educator and author. From 1878 to 1882 he was instructor in, and from 1882 till 1906, professor of modern languages at Roanoke College, Va., his alma mater; since then has been professor of pedagogy there. His educational writings, many and of unusual merit, include *A History of Education, Luther on Education, Introduction to American Literature, A History of English Literature, Lyrical Vignettes, Poets of the South, Great Pedagogical Essays from Plato to Spencer, An Ancient History*, and *Poets of Virginia.*

PALMER, ALICE FREEMAN (1855-1902). Born in Colesville, N. Y.; elected to the chair of history at Wellesley in 1879; acting-president the next year, and in 1882 appointed president; appointed non-resident dean of the women's department of the University of Chicago.

PALMER, GEORGE HERBERT (1842-). An American educator. Born in Boston; educated at Harvard and in Germany; became Oxford professor of natural religion, moral philosophy, and civil polity at Harvard in 1889; is a writer on classical and pedagogical subjects, his chief works being: *New Education, Self Cultivation in English, The Glory of the Imperfect.*

PARKER, FRANCIS WAYLAND (1837-1902). An American educator; born in Bedford, N. H.; principal of schools in Manchester, N. H., and Dayton, Ohio; superintendent at Quincy, Mass., and supervisor in Boston, Mass. In 1883 he was made principal of the Cook County Normal School, and in 1896 of the Chicago Normal School. He was appointed president of the Chicago Institute in 1899. His publications include: *Talks on Teaching, Course in Arithmetic*, and *How to Study Geography.*

PARKIN, GEORGE ROBERT (1846-1922). Principal of the Upper Canada College, Toronto (1895-1902). Author and lecturer on Imperial Federation, organizing representative of the Rhodes Scholarship Trust since 1902. Publications include *Reorganization of the British Empire, Imperial Federation, Geographical Unity of the Empire, The Great Dominion*, and *The Life of Dr. Edward Thring.*

PARSONS, FRANK (1854-1908). American educator. Born in New Jersey; professor of political science and economics, dean of College of Liberal Arts, Ruskin University, Mo.; director of history, Bureau of Economic Research, Washington; authority on railroads; noted lecturer on economics and sociology; has written *Our Country's Need, The Drift of Our Time, The New Political Economy, Direct Legislation*, and other works.

PAYNE, WILLIAM HAROLD (1836-1907). Born in New York State. Superintendent of schools for several years; professor of the art and science of teaching in the University of Michigan; chancellor of the University of Nashville and president of the Peabody Normal College; returned to the University of Michigan. His works include *School Supervision, Contributions to the Science of Education, The Education of Teachers*, and translations of several of Compayre's pedagogical books.

PEABODY, ELIZABETH PALMER (1804-1894). Born in Billerica, Mass. She became an ardent disciple of Froebel, and was one of the most active in introducing the kindergarten system into the United States. She published *Kindergarten Culture* and *Letters to Kindergartners.*

PESTALOZZI, JOHANN HEINRICH (1746-1827). A Swiss educational reformer, and the chief founder of modern pedagogy. He was, with the exception of Froebel, the greatest educational reformer since the time of the Revival of Learning. Realizing that social reform must come through education, he early allied himself with the reformers of the day. His principles were elaborated and carried out, and formed the basis of the Educational Movement of the nineteenth century. The modern enthusiasm for technical education is, for example, largely due to his teachings. In 1801 he gave a summary of his ideas on education in the book *Wie Gertrud Ihre Kinder Lehrt* (''How Gertrude teaches her children''). His great idea was to "psychologize education'' (his own expression). Pestalozzi's method is to proceed from the easier to the more difficult; to begin with observation and then pass to consciousness, and from consciousness to speech. Instead of the ''three R's'' he would substitute language, number, and form, as the elements of education. In his masterpiece, *Leonard and Gertrude*, he centers the education in the home itself, and seeks to reform the child's first teacher—the mother. What he strove for was not the mere enlightenment of the mind, but the regeneration of the race through sounder methods of education.

PLATTER, THOMAS (1499-1582). Swiss educator. For thirty-seven years professor of Hebrew at Basle. His autobiography is one of the best pictures extant of the school life of that time.

PRITCHETT, HENRY SMITH (1857-). Was assistant astronomer at U. S. N. Observatory, and later at Morrison Observatory; professor of astronomy at Washington University, St. Louis; superintendent of the United States Coast and Geodetic Survey; elected president of the Mass. Institute of Technology in 1900 and resigned in 1906 to accept the presidency of the Carnegie Foundation for the Advancement of Teaching.

QUICK, ROBERT HERBERT (1831-1891). An English educator; the first to lecture at Cambridge University on the history of education; wrote *Essays on Educational Reformers*, and other educational articles. The former is still a leading text-book in the study of education.

QUINTILIAN (MARCUS FABIUS QUINTILIANUS) (about 35-about 97 A. D.). A Roman rhetorician, born in Spain. Educated in Rome, he revisited Spain to teach oratory, but returned with Galba to Rome in 68. As a teacher of elocution he won great fame. Among his pupils were Pliny the Younger and the two grandnephews of Domitian. His modern reputation is based

on his great work *De Institutione Oratoria*, a complete system of rhetoric in twelve books.

RAND, THEODORE HARDING (1835-1900). Canadian educationist; born in Nova Scotia. Became superintendent of education for Nova Scotia, and later was appointed to a similar post in New Brunswick; professor of history and didactics in Acadia College; professor of education and English history in the University of New Brunswick.

RAYLEIGH, BARON (J. W. Strutt) (1842-1919). Eminent English physicist, professor at Cambridge and Royal Institute. He evaluated electric units, made many discoveries about gases at low pressures, and discovered with Ramsey the element argon. Wrote 250 learned papers. Awarded the Nobel and other prizes.

REMSEN, IRA (1846-1927). Born in New York; professor of chemistry at Williams College and at Johns Hopkins; president of John Hopkins University (1901-1912); editor of the *American Chemical Journal;* author of various works on chemistry, among which are *The Elements of Chemistry* and *Chemical Experiments*.

RICHARDS, CHARLES RUSSELL (1865-). American educator; director of science and technology at Pratt Institute (1888-1898); director of manual training at Teachers College, Columbia University (1898-1908); since 1908 director of Cooper Union, New York.

RICHARDSON, CHARLES FRANCIS (1851-1913). An American author and educator; born at Hallowell, Maine. Professor of Anglo-Saxon and English language and literature in Dartmouth College (1882-1911). Author of *A Primer of American Literature, The Choice of Books, American Literature* (2 vols.), *The End of the Beginning*, and *Daniel Webster for Young Americans*.

ROGERS, HENRY WADE (1853-1926). American educator and jurist; professor of law, University of Michigan (1883-1890); president of Northwestern University (1890-1901); professor of law, Yale (1901-1903); dean of law department, Yale, since 1903; joint author of *Two Centuries of American Law;* published *Illinois Citations and Expert Testimony*.

ROGERS, WILLIAM BANKS (1857-). Born in Cincinnati, Ohio; taught English and the classics at St. Ignatius and St. Xavier's; president of Marquette College for two years, and since 1900 president of St. Louis University.

ROSS, HON. GEORGE WILLIAM (1841-1914). Canadian statesman and educator. Born in Ontario, of Scotch parentage; appointed inspector of public schools for the county of Lambton, and towns of Petrolea and Strathroy; leader in promotion of normal schools, serving as inspector of them; author of *The History of the School System of Ontario*.

ROUSSEAU, JEAN JACQUES (1712-1778). A distinguished French writer of the eighteenth century; born at Geneva. In 1762 he published *Emile*, which had a marvelous effect throughout Europe, continuing in influence upon the whole educational world to the present time. In the opening sentence of his book he sounds the keynote of all his teachings: "All is good as it comes from the hand of the Creator; all degenerates in the hands of man." The burden of his message was nature, the nature of an idealist, perhaps, but still worthy of our efforts. Rousseau presented a negative idea of moral education. "The first education consists not in teaching the principles of virtue or truth, but in guarding the heart against vice and the mind against error." With him, all education was to come by development from within, an expansion of natural powers and not an acquisition of knowledge.

SCHURMAN, JACOB GOULD (1854-). Born on Prince Edward Island; professor at Acadia, at Dalhousie, and at Cornell, where he has been president since 1892; appointed by the president chairman of the U. S. Philippine Commission, he spent most of 1899 in the Philippines. Has written *The Ethical Import of Darwinism* and *Agnosticism and Religion*.

SEAVER, EDWIN PLINY (1838-1917). American educator, born in Northborough, Mass. He taught in the Boston schools and was superintendent of the same for fourteen years; is a member of the American Academy of Arts and Sciences, and the Massachusetts Historical Society. He is the author of the *Franklin Arithmetic, Algebra,* and *Trigonometry,* and the *Mathematical Handbook*.

SEELYE, JULIUS HAWLEY (1824-1895). President of Amherst College (1879-1890) and inaugurated the "Amherst system" of self-government: wrote a translation of Schwegler's *History of Philosophy; The Way, the Truth, the Life,* etc.

SEELYE, LAURENUS CLARK (1837-1924). Born in Connecticut. Pastor of North Congregational Church at Springfield, Mass.; later professor of rhetoric and English literature at Amherst College; first president of Smith College (1873-1909).

SEERLEY, HOMER HORATIO (1848-). President of Iowa State Normal School since 1886; received degrees from Iowa State University and Penn College. Superintendent of schools (1875-1886), Oskaloosa, Ia.; president Iowa State Teachers' Association (1884), and the department of Normal Schools in N. E. A. (1898); member of many educational societies.

SLOCUM, WILLIAM F. (1851-). Born at Grafton, Mass.; president of Colorado College; extensive writer on sociology

SMITH, NORA ARCHIBALD. American author of kindergarten and children's books, born at Philadelphia. She taught in Mexico and Arizona and in 1880 entered kindergarten work in San Francisco, part of the time as superintendent; author of *Children of the Future, Kindergarten in a Nutshell, The Message of Froebel, Kindergarten Principles and Practice, Golden Numbers, The Posy Ring, The Fairy Ring,* and many others.

SPENER, PHILIPP JAKOB (1635-1705). Founder of the German Pietists; born in Alsace; in 1670 held meetings at his house to cultivate greater evangelical piety; reformed the methods of catechising and religious instruction for children; his ideas were practised later by Francke.

STRONG, FRANK (1859-). Born in Venice, N. Y. Principal of the High School, St. Joseph, Mo.; superintendent of schools at Lincoln, Neb.; lecturer on history at Yale; president of the University of Oregon (1899-1902); chancellor of the University of Kansas; author of *Life of Benjamin Franklin, A Forgotten Danger to the New England Colonies, Causes of Cromwell's West Indian Expedition,* and *Government of the American People*.

STURM, JOHANN (1507-1589). The most renowned teacher of his age, and has left his mark on the secondary school system of all northern Europe; born in Germany; reorganized the educational system of Strassburg. His plan aimed at an extended, systematic, and well-balanced course of study. His method of teaching Greek and Latin was by double translation. The important pedagogic ideas in his method were: subjects to be kept within range of pupils' ability; all teaching to be clear and definite; little at a time; all instruction should have an ethical and a spiritual side. The instruction in our classical preparatory schools of the United States still shows Sturm's influence in a marked degree, possibly tracing its origin through English public schools like Eton, Rugby, and Harrow.

SWEET, HENRY (1845-1912). English philologist; foremost British authority on phonetics as well as a distinguished Anglo-Saxon scholar. He has contributed largely to both subjects; in particular, his works on phonetics have done much to foster more scientific methods in the study and teaching of modern languages.

TERTULLIAN (QUINTUS SEPTIMIUS FLORENS TERTULLIANUS) (about 160-about 230). An early Father of the Church; born in Carthage, son of a Roman centurion; converted to Christianity; he was a man of great originality and genius, and his writings display great wit, keen imagination, and profound learning. His chief work is the *Apologeticus*, a weighty defense of Christianity.

THOMAS, M. CAREY (1857-). Born at Baltimore, Md.; the first woman to receive the Doctorate of Arts at a European university; in 1885 appointed professor of English, and in 1894 president of Bryn Mawr College.

THRING, EDWARD (1821-1887). A famous schoolmaster, head of Uppingham School, England, from 1853 until his death; pioneer of many important reforms in secondary education and public school life; first head master in England to evince sympathy with the liberal education of girls. To English composition, pursued *pari passu* with composition in foreign languages, he assigned a foremost place, while he held the opinion that English grammar, taught inductively and analytically, provided the very best basis for language training. His writings include *Education and School,* which sets forth his matured opinions on educational methods. Other books are: *The Theory and Practice of Teaching, Exercises in Grammatical Analysis,* also *School Sermons and Songs*.

THWING, CHARLES FRANKLIN (1853-). Born in Maine; president of Adelbert College and

Western Reserve University. His publications include: *American Colleges, The Reading of Books, Within College Walls, The American College in American Life.*

TUCKER, WILLIAM JEWETT (1839-1926). Born at Griswold, Conn.; professor at Andover, and founder of Andover House, a social settlement, in Boston; president of Dartmouth College from 1893 to 1909; author of *From Liberty to Unity* and *The Making and the Unmaking of the Preacher.*

UPSON, ANSON JUDD (1823-1902). Born in Philadelphia, Pa.; professor of logic and rhetoric from 1853 to 1870; in 1890 became chancellor of the University of the State of New York.

VAN HISE, CHARLES RICHARD (1857-1918). Educator and geologist; born at Fulton, Wis. Held the following appointments in the University of Wisconsin: instructor of chemistry and metallurgy, assistant professor of metallurgy, of mineralogy, and of archean and applied geology; professor of geology; elected president of the University (1903). He is the author of a number of books and papers on geological subjects: *Archean and Algonkian, Principles of North American Pre-Cambrian Geology, Some Principles Controlling the Deposition of Ores.*

VIETOR, WILHELM (1850-). German professor of philosophy in Marburg; one of the pioneers of modern language teaching by the "New Method" (*die neuere Richtung*); the author of many recognized works in modern language teaching, one of the best-known being *Elements of Phonetics* in German, English, and French.

VIVES, GIOVANNI LUDOVICO (1492-1540). Born in Spain; considered the most learned man of his time. After being tutor to the children of Ferdinand and Isabella he lectured at Paris and at Oxford, and taught Latin to Mary, future queen of England. He wrote several pedagogical books, *The Instruction of a Christian Woman* being the most popular book of the age.

WASHBURN, GEORGE (1833-1915). American clergyman and educator; missionary in Turkey under the American Board of Commissioners for Foreign Missions (1858-1868); professor of philosophy and acting president of Robert College, Constantinople (1870-1877); president of Robert College from 1877 until his return to the United States in 1903.

WASHINGTON, BOOKER TALIAFERRO (1859-1915). American negro educator; born a slave in Virginia. In 1879 was appointed instructor in Hampton Institute, and introduced the night school, of which he took charge. In 1881 was appointed by the state to establish a colored industrial and normal school at Tuskegee, Ala., of which he became the successful principal. He is known as an interesting and effective speaker, and for his work in uplifting his race. He has written *Up from Slavery* and *Character Building.*

WAYLAND, FRANCIS (1796-1865). An American educator and author; was graduated at Union College in 1813; assumed the presidency of Brown University in 1827, retiring after 28 years of service. He published several books regarding education, political economy, and religion.

WELLS, BENJAMIN WILLIS (1856-1923). American educator and editor; professor of modern languages at the University of the South (1891-1898). Besides numerous French and German text-books, he published *Modern German Literature, Modern French Literature,* and *A Century of French Fiction* (1898).

WELLS, WEBSTER (1851-1916). Mathematician and educator; born in Boston, Mass.; was graduated at the Massachusetts Institute of Technology in 1873, became associated with the department of mathematics in that institution, and was made full professor of that subject in 1893. His publications include *Logarithms* (1878), *University Algebra* (1878), *Plane and Spherical Trigonometry* (1884), *College Algebra* (1890), *Essentials of Algebra* (1890), *Complete Trigonometry* (1900), and numerous other educational books.

WHEELER, BENJAMIN IDE (1854-1927). Born at Randolph, Mass.; instructor at Brown and Harvard; professor of comparative philology and of Greek at Cornell and at Athens, Greece; president of University of California since 1899; wrote *The Greek Noun-Accent* and *Organization of Higher Education in the United States.*

WHEELOCK, ELEAZER (1711-1779). American educator; graduate of Yale College (1733); pastor (1735); 1754, opened a school to Christianize the Indians, with two Indian boys; 1764, increased to 30 pupils, mostly white youths; 1770, located the school at Dartmouth, N. H.; a charter from George III. gave it the title of college; in recognition of Lord Dartmouth's aid, called Dartmouth College.

WIGGIN, KATE DOUGLAS (*née* **SMITH**), or **MRS. GEORGE C. RIGGS** (1857-1923). Born in Philadelphia, Pa. She went to California, where she studied the kindergarten system and later organized the California Kindergarten Training School. She has written many kindergarten stories and books, also *Rebecca of Sunnybrook Farm, Penelope's Progress, Diary of a Goose Girl, Timothy's Quest, The Birds' Christmas Carol, Penelope's Experiences in Ireland.*

WILSON, WOODROW (1856-1924), both by temperament and by training a deep student of national and international affairs, came to the presidency of the United States with fixed views of national and foreign affairs. His father, the Reverend James Wilson, and his mother, Jessie Woodrow, were of good old Scotch-Irish and English stocks. After their marriage in Ohio, and a sojourn of two years in Western Pennsylvania, they moved to Virginia, where Woodrow was born, then went to Augusta, Georgia, where he was educated at home and by private tutors. After an academic course at Davidson College and Princeton, ending in 1879, Wilson studied law in the University of Virginia and practiced for about a year in Atlanta, Georgia. Turning to political science as his life work, he took a doctorate at Johns Hopkins, where he acted as instructor, after which time he served as an associate professor of history and politics at Bryn Mawr and professor at Wesleyan University. He was called to Princeton in 1890, remaining till he assumed the governorship of New Jersey in 1911,—first, as professor of jurisprudence and political science, and then as president from 1902 to the fall of 1910.

Though serving as a Democrat in a Republican stronghold, he was enabled to initiate a number of important changes in the acts relating to primaries, public service commissions, trusts, and administration of public institutions in New Jersey. Thus the natural candidate of his party for the presidency he defeated Taft and Roosevelt in a three-cornered contest. In spite of more or less opposition, his ideals and high sense of duty won Wilson many friends. He based his claim for a second term on his policy of "watchful waiting" as regards Mexico, his views of international obligations, and his holding aloof from the World War, despite a vigorous insistence that America throw off the mask of neutrality. The return of Germany to submarine warfare on a large scale, and other acts, led President Wilson to ask congress to declare war on April 2, 1917. Hereafter he gave himself unstintedly to the prosecution of the war and to the advocacy of the League of Nations. After securing the recognition of his principles in the Versailles Conference, which he attended in person, Wilson returned to America, began a speaking tour, but was stricken in September, 1920. From this time on, he was forced into virtual retirement from all public appearances. After leaving office in 1921, he returned to private life, dying February 3, 1924, in Washington, D.C. President Wilson was twice married, first to Ellen Louise Axton, 1885, who died in the White House in 1914, and then to Mrs. Edith Bolling Gault, who survived him. He left three daughters, all children of the first Mrs. Wilson.

WIRT, WILLIAM A. (1874-). Since 1907 has been superintendent of schools at Gary, Ind., where he has perfected a system of education by which classes alternate between a regular and special teacher. This has been tried in New York and many other places under various names, such as the Duplicate System, Gary System, Study Play School. It adds 40 per cent to the use of school rooms and 20 to the school time, without increase of teachers.

WRIGHT, CARROLL DAVIDSON (1840-1909). An American economist, statistician, and educator; born in Dunbarton, N. H.; United States commissioner of labor (1885-1902); member of the anthracite coal strike commission (1902); one of the original trustees of the Carnegie Institution; president of the College Department of Clark University, Worcester, Mass.; wrote *The Industrial Evolution of the United States, Outline of Practical Sociology,* and numerous essays.

YOUNG, ELLA FLAGG (1845-1918). Superintendent of Chicago schools (1909); a teacher 47 years; district superintendent (1887-1899); professor of education, University of Chicago (1899-1905); principal of Chicago Normal School (1905-1909); member of Illinois State Board of Education since 1888; president of Illinois State Teacher's Association (1910); editor and author; president of N. E. A. (1910-1914).

RELIGIOUS AND ETHICAL WRITERS AND REFORMERS.

ABBOTT, LYMAN (1835-1922). American clergyman, author, and editor; a lawyer (1856-1859); minister (1860-1898); editor-in-chief of *Outlook* since 1898; author of many ethical works, including *How to Study the Bible* and *Life of Christ*.

ABERDEEN, ISHBEL MARIA, COUNTESS OF (1857-). Wife of the Earl of Aberdeen, former viceroy of Canada. She has devoted much of her wealth, her talents, influence, and personal service to the amelioration of the condition of the people, particularly of the women, in Scotland, Ireland, and Canada. As president of several organizations, she has done much effective work.

ADDAMS, JANE (1860-). An American social settlement worker and a founder of the Hull House at Chicago (1889); born at Cedarville, Ill. Her work is eminently practical. Great executive ability and utter unselfishness have made her a leader of social workers in America; has written much on sociological matters.

ANTHONY, SUSAN BROWNELL (1820-1906). An American reformer; born at Adams, Mass. Very active in total abstinence and anti-slavery movements. After the Civil War she devoted her work to woman suffrage; founded (1868) and published for three years *The Revolution*, a journal advocating woman's rights. Voted at an election in 1872, for which she was fined. On the platform she has lectured eloquently on her life work; has appeared before committees of Congress; and has taken part in state campaigns. Much of her literary work was done with Elizabeth Cady Stanton and Matilda Joslyn Gage.

AUGUSTINE, SAINT (354-430). Famous scholar and preacher; born near Carthage; a teacher in Rome and Carthage; in 396 became a priest and was made Bishop of Hippo in Africa. *Confessions* and *City of God* are his best-known books.

AVERY, RACHEL FOSTER (1858-1919). An American reformer; born at Pittsburgh, Pa. Educated here and abroad, taking a special course in political economy at Zurich. Has always been active in woman suffrage movements; has had charge of many conventions and the Nebraska campaign; corresponding secretary of the National Suffrage Assembly for over 20 years.

BAKER, PURLEY A. (1858-1924). An American reformer and temperance worker; born in Jackson County, Ohio, Ordained to the Methodist Episcopal Church (1884) and has held several important charges. Managed the Cleveland, O., Anti-Saloon League (1896); state superintendent (1897-1903); national superintendent Anti-Saloon League of America since 1903.

BANKS, LOUIS ALBERT (1855-). An American M. E. clergyman, born in Corvallis, Ore. Evangelist of the American Anti-Saloon League; edited *The Pacific Censor* in Vancouver; shot down in the street through the agency of enraged liquor dealers; nominated for governor at state convention of Massachusetts Prohibitionists in 1893, but declined. Has written much on religious and social themes.

BARCLAY, ROBERT (1648-1690). A Scottish divine and writer, known as the celebrated apologist of the Quakers; became a Friend in 1667, and during his travels enjoyed the companionship of William Penn. His great work, "An Apology for the True Christian Divinity," was published in 1676.

BARKER, HELEN MORTON (1834-1910). American reformer; born in Richville, N. Y. Treasurer of the National Women's Christian Temperance Union since 1893; president of Dakota W. C. T. U. for eight years; assisted Mrs. Potter Palmer; member Board of Lady Managers of the World's Fair and superintendent of the industrial department there.

BARROWS, JOHN HENRY (1847-1902). Clergyman; successive pastorates in Lawrence and East Boston, Mass., and First Presbyterian Church of Chicago (1881); Christian lecturer in India in 1896 for Chicago University; organizer and president of the World's Parliament of Religions at Chicago (1893); lecturer throughout Indian Empire (1896-1897); president of Oberlin College (1898-1902). Author of "I believe in God" and "History of the World's Parliament of Religions."

BAXTER, RICHARD (1615-1691). English Non-Conformist divine; educated privately; always strongly religious; became a teacher, then a clergyman. During the Civil War he joined with the Puritans, participating in several sieges. His first and most famous book, *The Saints' Everlasting Rest* (1650), was followed by *Call to the Unconverted*, and then by *Paraphrase of the New Testament*, which book caused his imprisonment for 18 months. Other publications, aggregating 160, appeared while he continued preaching.

BEECHER, HENRY WARD (1813-1887). Protestant pulpit orator; (1837-1847) pastor of Presbyterian churches in Indiana; (1847-1887) pastor of Plymouth Church, Brooklyn, a new Congregational organization, where his fame became world-wide. His speeches delivered in England in 1863 changed English public opinion in favor of the North. His writings are extensive in number and scope.

BEECHER, LYMAN (1775-1863). American theologian. Became famous through a sermon on dueling after the killing of Alexander Hamilton by Aaron Burr (1804); pastor at Litchfield, Conn. (1810-1826), of Hanover Street Church, Boston (1826-1832); president of Lane Theological Seminary (1832-1852); tried by his presbytery for teaching false doctrines and acquitted; sided with the New School when the Presbyterian Church divided (1838). Published Sermons on Intemperance (1814).

BELLAMY, EDWARD (1850-1898). American author, socialist, and journalist; best known work is *Looking Backward or 2000–1887;* a strong socialistic force which led to the formation of Bellamy clubs and of the National Party; *Equality*, a sequel to the first, is on similar lines; other works include sociological essays and short stories.

BENEDICT XV. (Giacomo Della Chiesa) (1854-1922). Born at Pegli, Italy; ordained priest (1878); secretary to Cardinal Rampolla (1887); adviser to the Holy Office and archbishop of Bologna (1907); made cardinal in May and elected Pope in September (1914).

BERNARD, SAINT (1091-1153). Abbot of Clairvaux; born at Fontaines, in Burgundy; pronounced one of the grandest figures in the church militant; founded in 1113 a monastery at Citeaux, in Burgundy; drew around him disciples who rose to eminence as soldiers of the cross; prepared the statutes for the Knights-Templars; defeated Abélard in public debate and procured his condemnation; founded many monasteries; awoke Europe to a second crusade.

BESANT, ANNIE (1847-). An English writer and lecturer on Free Thought; born in London. Was associated with Bradlaugh as lecturer and editor of *The National Reformer*. Carried on work among the poor; associated with Madame Blavatsky, whom she succeeded. Her writings on sociological subjects are very numerous.

BIDDLE, JOHN (1615-1662). Father of the modern Unitarianism; was repeatedly imprisoned for his anti-Trinitarian views. To save his life, Cromwell banished him to one of the Scilly isles in 1655. Here he remained three years, until the Protector liberated him in 1658. He then continued to preach his opinions till the death of Cromwell, and also after the Restoration, when he was committed to jail in 1662, and died a few months after.

BLACKWELL, ALICE STONE (1857-). A prominent writer on woman suffrage; born in Orange, N. J. A member of the staff of the *Woman's Journal* of Boston, Mass.

BLACKWELL, EMILY (1832-1910). Physician and philanthropist; sister of Elizabeth Blackwell. Began study of medicine and graduated from the medical college at Cleveland, Ohio; founded a hospital in New York (1854), which was granted college authority in 1865, and has been a successful school ever since.

BONAR, HORATIUS (1808-1889). A celebrated Scotch hymnist; wrote *Hymns of Faith and Hope*, many of which have been taken into the hymnals of most of the Protestant churches.

BOOTH, BALLINGTON (1859-). Associate founder and head of the Volunteers of America; born in Yorkshire, England. Separated from the Salvation Army in 1896 on the ground that the organization was not sufficiently democratic for the best work in America.

BOOTH, (Mrs.) MAUD BALLINGTON (1865-). Wife of Ballington Booth and with him founder and head of the Volunteers of America; born in Surrey, England. Has done extensive work in Europe and America and, lately, in prison reform work.

BOOTH, WILLIAM (1829-1912). Founder of the Salvation Army; born in Nottinghamshire, England. Associated with the Methodist body; started the "Christian Mission" in London, from which the Salvation Army originated in 1878. The success of the movement is largely due to Booth's skill as an organizer and executive. Wrote "Darkest England" in 1890.

BORGHESE (*bor-gay'zay*), **PRINCESS MARIE PAULINE** (1780-1825). The beautiful sister of Napo-

leon; born in Ajaccio; died in Florence. She left many legacies, and a donation, the interest of which was to enable two young men of Ajaccio to study medicine and surgery. The rest of her property she left to her brothers, the count of St. Leu and the prince of Montfort. The whole property amounted to 2,000,000 francs.

BOSSUET, JACQUES BENIGNE (1627-1704). French prelate and controversialist, and considered the greatest of Christian orators; first attempted philosophical treatment of history. His orations at the funerals of the duchess of Orleans and the great Condé are masterpieces.

BOURDALOUE (*boor-da-loo'*), **LOUIS** (1632-1704). A Jesuit and one of the greatest preachers France ever produced. The extreme popularity of his sermons induced his superiors to call him to Paris, and he became the favorite preacher of Louis XIV.

BOURNE, HUGH (1772-1852). Founder of the sect of Primitive Methodists. He wrote *History of the Primitive Methodists*, and founded *The Primitive Methodist Magazine* (1824).

BOWEN, FRANCIS (1811-1890). An American author; instructor in intellectual philosophy and political economy at Harvard; proprietor and editor of the *North American Review* (1843-1854); Alford professor of natural religion, moral philosophy, and civil polity at Harvard.

BRACE, CHARLES LORING (1826-1890). An American founder of the Children's Aid Society; born at Litchfield, Conn.; studied prison reforms in Europe (1850-1852); returned to active missionary work in New York City. Was secretary and principal agent of the Children's Aid Society; and founded several industrial schools. Wrote extensively on sociological topics.

BRIDGET, SAINT (453-523). An Irish saint; born at Dundalk; takes rank in Ireland with St. Patrick and St. Columba. Also the name of a Swedish saint in the fourteenth century; founded a new order and 72 monasteries of the order.

BROOKS, PHILLIPS (1835-1893). Bishop of the Protestant Episcopal Church. Rector of Church of the Advent (1862), and Holy Trinity Church, Philadelphia, till 1869, when he became rector of Trinity Church, Boston; bishop of Massachusetts (1891-1893); published *Lectures on Preaching, The Influence of Jesus*, and several volumes of sermons.

BRUNO, SAINT (1030-1101). Born at Cologne; retired to a lonely spot near Grenoble, with 14 others, where they lived in cells apart, and met only on Sundays; founder of the Carthusian Order of Monks, the first house of which was established in the solitude of Chartreuse.

BUSHNELL, HORACE (1802-1876). An American clergyman and noted writer on religion, morality, and other topics.

BUTLER, JOSEPH (1692-1752). An eminent English divine; became preacher at the Rolls, where he delivered his celebrated *Sermons;* made dean of St. Paul's and finally bishop of Durham; his great work was *The Analogy of Religion, Natural and Revealed, to the Constitution and Course of Nature.*

CALVIN, JOHN (1509-1564). An eminent reformer of the sixteenth century; for his attempts at reforming theology was compelled to flee from France (1533); settled in Basel, where he wrote the *Institutes of the Christian Religion;* went to Geneva (1536) and worked for the Reformation. His religious works fill 59 volumes, published in Berlin (1863-1900). He established the Presbyterian form of church government; the fundamental principle of his theology is that of predestination to eternal happiness or misery by the absolute decree of God.

CAMPBELL, ALEXANDER (1788-1866). Irish founder of the denomination known as "Campbellites"; educated at the University of Glasgow; came to the United States in 1809 and settled at Bethany, W. Va.; founded Bethany College (1841) and was president of it until his death; established the *Christian Baptist* (1823), which became the *Millennial Harbinger* from 1829 until 1863.

CATHERINE, SAINT (1347-1380). An Italian nun at Siena; mediator between the rival popes in the great schism.

CAVALIER (*kah-val-yay'*), **JEAN** (1679-1740). Leader of the Camisards; born at Ribaute; fought for religious freedom against Louis XIV.; passed over to England; served against France, and was governor of Jersey.

CHALMERS, THOMAS (1780-1847). A noted Scotch divine; regarded as the founder of the Free Church of Scotland.

CHANNING, WILLIAM ELLERY (1740-1842). Noted American preacher, "the apostle of Unitarianism"; author of many religious and literary works; his widest influence was exerted upon social questions.

CHEMNITZ, MARTIN (1522-1586). German Protestant theologian; by inducing the Saxon and Swabian churches to adopt the *Concordien formel* as their confession of faith, he consolidated Luther's work.

CHRYSOSTOM, JOHN, SAINT (**"GOLDEN MOUTHED"**) (344?-407). A celebrated Greek father of the church; his works consist of *Homilies, Commentaries, Epistles, Treatises*, and *Liturgies*. The *Homilies* are considered to be finer than any other similar early Christian writings.

CLARKE, JAMES FREEMAN (1810-1888). An American Unitarian clergyman and author; settled in Boston, Mass., in 1841, and was pastor of the Church of the Disciples. From 1867 to 1871 he was professor of natural religion at Harvard.

CLEMENS, TITUS FLAVIUS, or **CLEMENT OF ALEXANDRIA** (about 150-about 215). One of the Greek fathers of the church; had Origen for pupil; brought up in Greek philosophy; converted in manhood to Christianity. Jerome called him "the most learned of men." In the *Stromata* is found one of the earliest Christian hymns, "Shepherd of Tender Youth."

COBB, HENRY EVERTON (1863-). Clergyman of the Reformed Church. In 1888 began to preach at West Troy, N. Y.; first pastor of West End Avenue Collegiate Church in New York City since 1893.

COLLYER, ROBERT (1823-1912). Unitarian clergyman of English birth; a blacksmith who became a Methodist preacher, changing to Unitarianism in 1859; founded Unity Church, Chicago (1860); since 1879 pastor of Church of Messiah, New York City (now pastor emeritus). Author of *Nature and Life, The Simple Truth, Talks to Young Men*, and *Things New and Old.*

COLUMBA, SAINT (521-597). A native of Ireland. About 563 he landed in the island of Hy, now called Iona, and founded his church; traversed the whole of northern Scotland, preaching the Christian faith and founding monasteries. The Columban Church was in some points of doctrine and ceremonial opposed to that of Rome, to which it owed no allegiance. He died in Iona.

CONWELL, RUSSELL HERMAN (1842-1925). Baptist clergyman; lawyer in Minneapolis and Boston till 1879, serving in the meantime as immigration agent and foreign correspondent for Boston and New York papers. Pastor of Grace Baptist Church, Philadelphia (1881-1891); founder and president of Temple College (1888); pastor of the Baptist Temple, Philadelphia, since 1891; Lyceum lecturer. Author of *Woman and the Law, Acres of Diamonds, Lives of the Presidents*, and *The New Day.*

COOPER, PETER (1791-1883). A manufacturer and philanthropist; born in New York City; apprenticed to a carriage maker; engaged in furniture manufacture; mover in laying the Atlantic cable; took great interest in education; founded Cooper Institute.

CORNELL, EZRA (1807-1874). An American philanthropist; born in Westchester Landing, N. Y. He accumulated a large fortune and is best known as the founder of Cornell University. He began life as a mechanic and miller at Ithaca, N. Y., and subsequently became a contractor for the erection of telegraph lines. He died in Ithaca.

CROSBY, HOWARD (1826-1891). American clergyman and scholar. In 1863 pastor of the Fourth Avenue Presbyterian Church in New York City; in 1877 a delegate to the first Presbyterian General Council, in Edinburgh; one of the founders and president of the Society for the Prevention of Crime.

CUYLER, THEODORE LEDYARD (1822-1909). American Presbyterian clergyman; after active pastoral work (1848-1890), became minister at large. Active in temperance and philanthropic work; published about 4,000 articles in religious periodicals.

DIONYSIUS EXIGUUS (about 470-about 540). A learned monk, a "Scythian by birth, but wholly Roman in other respects." His works include a collection of the first 50 canons of the Apostles, the canons of 10 Councils, and 38 decretals of the popes from 384 to 498; promulgated by Charlemagne in 802. Dionysius

completed the paschal year and introduced the system of counting the years from the birth of Christ.

DOL'LINGER, JOHANN JOSEPH IGNAZ VON (1799-1890). A Catholic theologian and historian; head of the old Catholic party in Germany; wrote extensively on theological and ecclesiastical topics.

DORNER, ISAAK AUGUST (1809-1884). A German Lutheran divine; born in Württemberg; professor of systematic theology and exegesis at the University of Berlin (1861).

DOW, NEAL (1804-1897). An American temperance reformer; born in Portland, Me. He was the author of the bill which prohibited the manufacture and sale of intoxicating liquors in the state of Maine, widely known as the "Maine Law." During the Civil War he was colonel of a Maine regiment, and a brigadier general of volunteers.

DRACHMAN, BERNARD (1861-). Rabbi Congregation Zichron Ephraim, New York, since 1889, and professor of Bible and Rabbinical Codes, Jewish Theological Seminary of America; author of *From the Heart of Israel;* translator of Hebrew literature.

DUNSTAN, SAINT (925?-988). An English monk who was made Archbishop of Canterbury, and obtained great political influence, which he subsequently lost.

ECK, JOHANN MAIER VON (1486-1543). A German theologian; a violent antagonist of Luther and Luther's doctrines; went to Rome, and procured a papal bull against both (1520); undertook at the Augsburg Diet to controvert Luther's doctrine from the Fathers, but not from the Scriptures; was present at the conferences of Worms and Regensburg; wrote the *Obelisci* to confute Luther's theses. He wrote a German translation of the Old Testament and revised Luther's translation of the New.

EDDY, MARY BAKER GLOVER (about 1822-1910). The founder of the Christian Scientist denomination. Mrs. Eddy assigns 1866 as the date of her discovery; founded the First Christian Science Church at Boston (1879) and opened the Massachusetts Metaphysical College (1881); wrote *Science and Health with Key to the Scriptures* (1875), *People's Idea of God, Christian Healing, Retrospection and Introspection, Unity of Good, Rudimental Divine Science, No and Yes, Manual, Miscellaneous Writings, Christ and Christmas, Christian Science versus Pantheism, Pulpit and Press,* and *Message to the Mother Church.*

EDWARDS, JONATHAN (1703-1758). Most celebrated early American divine; president of Princeton College for 34 days; after a successful pastorate of 17 years he was dismissed in 1750 by council; for eight years he was missionary to the Indians, during which time he wrote *Freedom of the Will, Original Sin,* and *Nature of Virtue,* all works of great power and influence, which led to a distinct theological movement in America.

ELIZABETH, SAINT (1207-1231). Daughter of Andrew II. of Hungary and wife of Louis IV., landgrave of Thuringia; spent her life in charitable and religious work; at the death of her husband, driven with her children from Thuringia to Marburg, she identified herself with a new religious order; four years after her death canonized by Gregory IX.

ERASTUS, THOMAS (1524-1583). A Swiss physician and theologian; occupied several positions as chief physician to dignitaries throughout Europe and held the chair of medicine in several colleges. His fame now rests on his theological writings.

ESCOBAR' Y MENDOZA, ANTONIO (1589-1669). A Spanish Jesuit and casuist; born at Valladolid; a preacher and voluminous writer. He was celebrated for his doctrine that the moral value of action lies in the nature of the intention.

FABER, FREDERICK WILLIAM (1814-1863). English clergyman and author; enthusiastic admirer of John Henry Newman; joined the Roman Catholic Church (1845) and became superior of the House of Oratorians in London (1850). Among his theological works are *All for Jesus, The Blessed Sacrament,* and *The Precious Blood;* best known as a hymn writer; *O gift of gifts, O grace of faith; O Paradise, O Paradise; Hark, hark, my soul;* and *Sweet Saviour, bless us ere we go,* have found a place in Protestant and Catholic hymnals.

FALCONIO, DIOMEDE (1842-1917). Roman Catholic archbishop and Apostolic Delegate; held various positions in educational institutions in United States and Newfoundland till 1883; returned to Italy, holding high ecclesiastical offices until 1892, when he became bishop, archbishop (1895), Apostolic Delegate to Canada and the United States (1902); cardinal (1911).

FARLEY, JOHN MURPHY (1842-1918). American Roman Catholic prelate; secretary to Archbishop McCloskey (1872-1884); private chamberlain to Pope Leo XIII. (1884); vicar general, New York (1891); domestic prelate to Pope Leo XIII. (1892); auxiliary bishop of New York (1895); fourth archbishop (1902); cardinal (1911).

FARRAR, FREDERIC WILLIAM (1831-1903). An English clergyman, dean of Canterbury; 16 years master at Harrow; canon and archdeacon of Westminster, and chaplain to the queen.

FLEISCHER, CHARLES (1871-). Jewish rabbi Temple Adath Israel, Boston, since 1894; prominent lecturer; his subjects include "Democracy and Women," "Aristocracy," and "My Discovery of America."

FOURIER (*foo're-ai*), **FRANCOIS MARIE CHARLES** (1772-1837). A French social economist; at first in trade, then in the army. After seeing a cargo of rice thrown into the sea to raise its price he was led to attempt a reform abolishing the competitive system, by means of associated production and life in "phalansteries." He died in Paris.

FOWLER, CHARLES HENRY (1837-1908). Methodist Episcopal bishop. President Northwestern University (1872-1876); elected bishop (1884); visited South America, Japan, Korea, China; made a trip around the world, holding conferences; organized universities at Peking and Nankin, China, and churches at St. Petersburg, Russia; established Macloy College of Theology in southern California; delegate to many important conferences at home and abroad.

FOX, GEORGE (1624-1691). An Englishman, founder of the Society of Friends, or Quakers. When 19 years old he believed himself called to preach, and wandered about England doing so; his numerous followers gained their name Quakers in 1650, because Fox had bidden the magistrates, who frequently arrested him, "to tremble (quake) at the word of the Lord."

FRANCIS OF ASSISI, SAINT (1182-1226). Founder of the Order of the Friars Minor, or Franciscans. Born in Assisi, Italy; in business with his father until 24, when he retired to lead a life like Christ's; with 11 others he received the approval of Pope Innocent III. to form the order (1209). His rule of life consisted of 23 chapters, prescribing poverty, obedience, chastity, giving up of property, and obligation to live upon alms. The order was formally sanctioned in 1216.

FRY, (Mrs.) ELIZABETH (1780-1845) An English philanthropist; born at Earlham; third daughter of John Gurney, the Quaker banker; devoted her life to prison reform and the reform of criminals, as well as to other benevolent enterprises.

FULGENTIUS OF RUSPE, SAINT (468-533). A Latin Christian father; went to Rome (500); founded a monastery in Ruspe and became bishop of Ruspe (508).

GARRISON, WILLIAM LLOYD (1805-1879). American abolitionist; with Benjamin Lundy, published *Genius of Universal Emancipation* in Baltimore (1829); published *The Liberator* (1831-1865), demanding emancipation and extinction of slavery; riots and violence followed in attempts to suppress the abolitionists, but Garrison was not daunted though dragged through the streets by a mob; his uncompromising spirit and heroic perseverance secured the liberty he desired and he lived to be honored in Europe and America for his efforts.

GAVAZZI (*ga-vat'see*), **ALESSANDRO** (1809-1889). An Italian preacher and reformer; one of the most energetic supporters of Pius IX. in his liberal policy; afterwards withdrew his allegiance, joined the Revolution of 1848, and ultimately fled to England on the occupation of Rome by the French.

GEORGE, SAINT (flourished third century). Bishop of Alexandria; patron saint of England. To him is attributed the destruction of a terrible dragon. This legend occurs first in the *Legenda Aurea* of Jacobus de Voragine in the Middle Ages.

GIBBONS, JAMES (1834-1921). Roman Catholic cardinal; ordained priest (1861); pastor, secretary to Archbishop Spalding and chancellor till 1868; Vicar Apostolic of North Carolina with rank and title of bishop (1868-1872); coadjutor archbishop of Baltimore and succeeded to the See (1872-1877); invested with insignia of cardinal (1886); best known work *The Faith of Our Fathers.*

GIRARD, STEPHEN (1750-1831). An American philanthropist; born in France; died in Philadelphia.

He made a large fortune as a merchant in Philadelphia, and at his death left $5,260,000 to found a college for orphan boys, to be conducted on strictly secular principles. The building is one of the finest in the country.

GLADDEN, WASHINGTON (1836-1918). Congregational clergyman, author, and editor. Since 1882, pastor of First Congregational Church, Columbus, O.; noted as a writer upon social reforms; some of his books are: *Being a Christian*, *Burning Questions*, and *Social Salvation*.

GOTTSCHALK or **FULGENTIUS** (about 805-about 868). A German theological controversialist; ardent believer in predestination; denounced as a heretic, yet wandered everywhere throughout Germany preaching his doctrine; condemned at the Synod of Mainz (848) and again at the Synod at Quircy (849); was whipped and imprisoned for the rest of his life.

GOUGH, JOHN BARTHOLOMEW (1817-1886). A temperance orator; born in Kent, England, became a bookbinder; early a victim to intemperance; took the pledge in 1842, and became an eloquent and powerful advocate of the temperance cause both in England and America.

GREGORY XIII., BUONCOMPAGNI (1502-1585). A native of Bologna, who succeeded Pope Pius V. in 1572. He was deeply versed in the canon and civil law and had distinguished himself at the Council of Trent. He ornamented Rome with many fine buildings and fountains; but his pontificate is chiefly memorable for the reformation of the calendar which bore his name. He published a valuable edition of the *Decretum Gratiani*.

GREGORY NAZIANZUS, SAINT (329-390). Bishop of Constantinople; excelled all his contemporaries in pulpit eloquence. Many of his works are extant, and consist of orations, letters, and poems. His theological system is best set forth in his *Theological Orations*.

GUNSAULUS, FRANK WAKELEY (1856-1921). Congregational clergyman; pastor Columbus, Ohio (1879-1881); Newtonville, Mass. (1881-1885); Baltimore (1885-1887); Plymouth Church, Chicago, till 1899; Central Church, Chicago, since 1899; president Armour Institute of Technology since 1893; lecturer at Yale Theological Seminary and Chicago University. Author of much poetry and religious prose.

HALE, EDWARD EVERETT (1822-1909). Unitarian clergyman, author, and social reformer. Pastor of Church of the Unity, Worcester, Mass. (1846-1856), and of South Congregational Church, Boston (1856-1909); chaplain of U. S. Senate (1902-1909); promoted the Chautauqua movement and assisted in organizing "lend-a-hand" clubs; founder and editor of *The Christian Examiner* and *Old and New*, which were finally merged into the original *Scribner's Monthly*; best known as the organizer of the "lend-a-hand" movement and as the author of *The Man Without a Country*.

HALL, CHARLES CUTHBERT (1852-1908). President of Union Theological Seminary (1897-1908). Pastorates in Newburgh, N. Y. (1875-1887), and Brooklyn, N. Y. (1887-1897). Lecturer at Chicago, Vanderbilt, and Harvard universities. Among his works are *Christian Belief Interpreted by Christian Experience*, *Christ and the Human Race*, and others.

HARRISON, LEON (1866-1928). Since 1891, rabbi Temple Israel (Reformed Jewish), St. Louis; founder of sisterhood of Personal Service, St. Louis, Social Settlement League, Fresh Air Society; Lyceum and Chautauqua lecturer.

HARVARD, JOHN (1607-1638). Founder of Harvard College. An English clergyman; M.A. Cambridge (1635); pastor at Charlestown, Mass. (1637); gave library of 260 volumes and about $2,000 to the college at "New Town" (Cambridge).

HENSON, POINDEXTER SMITH (1831-1914). Baptist clergyman; lawyer till 1856; pastor of Fluvanna Baptist Church, Broad Street Church, Memorial Church, Philadelphia, and First Church, Chicago, till 1901, Hanson Place, Brooklyn (1901-1903), and Tremont Temple, Boston (1903-1909). Editor *Baptist Teacher*.

HICKS, ELIAS (1748-1830). An American preacher of the Quaker connection, who adopted Unitarian views and caused a split in the body.

HILARY OF POITIERS, SAINT. Bishop of Poitiers about 353; banished into Phrygia in 356 for not sanctioning the condemnation of Athanasius; permitted to return in 359; a vigorous and consistent opponent of Arianism.

HILLIS, NEWELL DWIGHT (1858-1929). Presbyterian minister; pastorates in Peoria, Ill. (1887-1890); Evanston, Ill. (1890-1894); Central Church, Chicago (1894-1899), and Plymouth Church, Brooklyn, since 1899. Author of *The Investment of Influence*, *A Man's Value to Society*, *Great Books as Life Teachers*, and many others.

HOPKINS, JOHNS (1795-1873). An American philanthropist; born in Anne Arundel County, Md. In 1873 he gave property worth $4,500,000 to found a free hospital. He presented Baltimore with a public park and he also gave over $3,000,000 to found the Johns Hopkins University in Baltimore.

HORR, GEORGE EDWIN (1856-1927). Theologian and educator; pastor at Tarrytown, N. Y. (1879-1884), and Charlestown, Mass. (1884-1891); professor of Church history at Newton Theological Seminary since 1903; editor-in-chief of the *Watchman* (1891-1903); and since, president of the Watchman Publishing Company.

HOSS, ELIJAH EMBREE (1849-1919). Bishop of Methodist Episcopal Church, South, since 1902; pastor at Knoxville, Tenn., San Francisco, Cal., and Asheville, N. C.; professor and president of Martha Washington College, Va. (1876-1881); vice-president and later president of Emory and Henry College (1881-1885); on theological faculty of Vanderbilt University (1885-1890); editor of Nashville *Christian Advocate* (1890-1902).

HUNTINGTON, WILLIAM EDWARDS (1844-). Methodist clergyman and president of Boston University since 1904; pastor in Boston and vicinity (1870-1882); dean of the College of Liberal Arts, Boston University (1882-1904).

HURLBUT, JESSE LYMAN (1843-). Methodist Episcopal clergyman and editor. Pastor from 1865-1879; agent of Sunday School Union, to 1884; assistant and finally editor of *Sunday School Literature* (1884-1900); pastor in New Jersey since 1901; counselor of Chautauqua Society; author of *Outline Normal Lessons*, *Studies in the Four Gospels*, and other works.

HUSS (*hoos*), **JOHANN** (1373-1415). A distinguished religious reformer; born in Bohemia; convicted of heresy by the Council of Constance, and by the secular authorities burned at the stake. His followers, called Hussites, inaugurated a war for religious freedom (1419), continued until the emperor Sigismund granted acceptable terms and peace was restored.

IGNATIUS, SAINT, surnamed **THEOPHORUS** (32?-107). Bishop of Antioch; martyred in Rome. His writings are still held in high esteem and include seven Greek letters found in the writings of the apostolic fathers. He first applied the term "eucharist" to the Lord's Supper, and in his writings we first find the phrase "the Catholic Church."

IRELAND, JOHN (1838-1918). Roman Catholic archbishop of St. Paul since 1888; priest (1861); rector cathedral, St. Paul; coadjutor Bishop of Saint Paul (1875), succeeded Bishop Grace (1884) with the title of archbishop (1888); important figure in movements for total abstinence, colonization in the Northwest, and the establishment of the Catholic University at Washington; author of *The Church and Modern Society*.

IRENAEUS, SAINT (flourished second century). One of the fathers of the church; was bishop of Lyons, and suffered martyrdom about 202; wrote against the Gnostics in a work in Greek, of which all but a few fragments in Latin is lost.

JANSE'NIUS, CORNELIUS (1585-1638). A Flemish theologian; founded the body of sectaries in the Roman Catholic Church known as Jansenists; made bishop of Ypres; great work is *Augustinus sive Doctrina Sancti Augustini*.

JEROME OF PRAGUE (1360?-1416). A Bohemian reformer; was in faith and sufferings the companion of the famous John Huss; was burned at the stake, and his ashes thrown into the Rhine.

JOHN OF DAMASCUS (about 700-754). A father of the church; the author of the standard text-book on dogmatic theology in the Greek Church; canonized by both the Latin and Greek churches; one of the doctors of the Latin Church; the ablest philosopher of his time; wrote three *Operations* or letters on image-worship.

JONES, JENKINS LLOYD (1843-1917). Independent minister, editor, and lecturer; organizer of the Abraham Lincoln Center and All Souls' Church, Chicago, Ill., of which he has been pastor since 1882; secretary of the World's Parliament of Religions; lecturer in English, university extension department of Chicago

University; editor and founder of *Unity;* author of many books on religious subjects.

JUDSON, ADONIRAM (1788-1850). An American missionary; born in Malden, Mass. In February, 1812, he sailed with his wife for Asia. During the voyage he was converted from the Congregational faith to that of the Baptist church. In 1814, when the Baptists of the United States organized a missionary union, he was taken under its care. He settled in Burma, mastered the language, and labored there for nearly forty years. He died at sea.

JUDSON, EDWARD (1844-1914). Baptist clergyman; professor of Latin, Madison University (1867-1874); pastor of Baptist Church, Orange, N. J. (1875-1881); Berean Baptist Church, N. Y.; later secured a site and erected a church to the memory of his father, Adoniram Judson, of which he became pastor.

JUSTIN, surnamed **THE MARTYR** (about 100-about 165). An early Christian apologist; studied philosophy in the Stoic and Platonic schools, and was converted to Christianity; was the author of *Apologies for the Christians* and *Dialogue with Tryphon the Jew;* suffered martyrdom.

KNOX, JOHN (1505-1572). A Scotch religious reformer; pioneer of Puritanism; prisoner of war, for 19 months, in French galleys; friend of Calvin and Beza; a preacher of sermons that moved his hearers to demolish convents; arrested for treason, an armed "congregation" at his heels; burned in effigy; for years a dictator—he spent his life forwarding the Reformation in Scotland. His great work distinguished in Scottish prose was his *History of the Reformation of Religion within the Realm of Scotland.*

KOHLER, KAUFMANN (1843-1926). Jewish rabbi; president Hebrew Union College since 1903; elected honorary minister for life of Temple Beth-El, New York (1903); previous pastorates in Detroit (1869-1871); Chicago (1871-1879), where he introduced Sunday lectures; editor *Jewish Reformer* (1886); *Sabbath Visitor* (1881-1882); extensive writer and lecturer on Biblical topics.

KYRLE (*kurl*), **JOHN** (1637-1724). Philanthropist; born in Gloucestershire; was distinguished for his benefactions; has given name to a society founded, among other things, for the betterment of the homes of the people.

LACTAN'TIUS, LUCIUS COELIUS FIRMIANUS (290-325). The most eloquent and learned of the Christian fathers; chief works are *Divinarum Institutionum Libri VII., De Ira Dei,* and *De Mortibus Persecutorum.*

LAMPERIERE, ANNA M. J. (1854-). French social reformer, born at Lisieux, Normandy; in 1879 she became director of the Ecole Normale, having been the youngest person to receive the honor; she was delegate to the Congress of Social and Moral Reforms at Chicago in 1893, is especially interested in the advancement and social education of women, and has written much upon that and kindred topics.

LANFRANC (about 1005-1089). An Italian churchman in the medieval church in England; selected by William the Conqueror to fill the archbishopric of Canterbury (1070). After the death of the Conqueror, Lanfranc wielded a great influence over England. He wrote *Commentaries* on St. Paul, *De Corpore et Sanguine Domini,* sermons, and letters.

LASSALLE, FERDINAND (1825-1864). German socialist leader, born at Breslau; his parents were wealthy Hebrews; he was a student of philosophy, called by Humboldt "Das Wunderkind"; at the age of 33 he became an active socialist, and was repeatedly indicted for high treason; founded the Social Democratic party of Germany; was a friend of Bismarck; his death resulted from a duel fought over his fiancée, who had jilted him. Heine called this remarkable man "the Messiah of the nineteenth century." Lassalle was not a theorist, but a practical organizer, and did more for the success of labor organizations and the socialistic movements in Germany than any other man.

LATHROP, ROSE HAWTHORNE (1851-1926). An American poet and philanthropist; daughter of Nathaniel Hawthorne; studied and lived abroad; married George Parsons Lathrop (1871); wrote *Along the Shore* and *Memories of Hawthorne;* founded Saint Rose's Free Home for Cancer in New York (1896); took the title of Mother Mary Alphonsa and became the head of a Dominican community and director of a charitable home in New York City.

LATIMER, HUGH (about 1485-1555). An English reformer and martyr; made bishop of Worcester (1535); burned at the stake with Bishop Ridley. His *Remains and Sermons* was printed by the Parker Society (1844-1845).

LAUD, WILLIAM (1573-1645). An English prelate; archbishop of Canterbury in the reign of Charles I. His endeavors to introduce the liturgy into Scotland made him numerous enemies; therefore he was impeached by the Commons, and sent to the Tower. After lying there nearly three years he was declared guilty of treason, and was beheaded on Tower Hill. Laud enriched the University of Oxford with over 1,300 manuscripts; wrote a *Diary* and a few other works published in collected form in 1887.

LAVAL-MONTMORENCY, FRANCOIS XAVIER DE (1622-1708). French bishop, born at Laval; received the tonsure at nine years of age, becoming a priest at twenty-three and at thirty-one Archdeacon of Evreux; sent to Canada as vicar of Pope Alexander VII., with title of Bishop of Petra (1659); established Seminary of Quebec (1663); titular Bishop of Quebec (1674-1683). His name is perpetuated in Laval University, Quebec, founded in 1852.

LEE, ANN (1736-1784). Founder of the Society of Shakers in America; born in Manchester, England. She was poor and uneducated, and in 1758 joined the Shakers, a sect allied in their belief to the Friends, but who were peculiar in their form of worship. She believed herself inspired, and was imprisoned in 1770 for preaching the new doctrine of celibacy. In 1774 she emigrated to America and founded the Society of Shakers in 1776. She was greatly revered by her followers, and by them was called "Mother Ann." She died in Watervliet, N. Y.

LEVASSEUR, PIERRE EMILE (1828-1911). French political economist and writer, born in Paris; has belonged to the faculty of several different institutions of learning; member of numerous scientific societies; his exhaustive work, *Condition of the Working Classes in France, Before and Since the Revolution,* would alone have established him as an authority upon sociological matters.

LEVINTHAL, BERNARD LOUIS (1866-). Rabbi, United Orthodox Hebrew Congregation since 1891; founder of Hebrew Free Schools; president and founder of Hebrew Talmudic Institute; principal and founder of Hebrew High School, all of Philadelphia, Pa.

LICK, JAMES (1796-1876). An American philanthropist; born in Fredericksburg, Pa. In 1847 he emigrated to California, taking with him $30,000, which he invested in real estate in San Francisco, and its rapid advance in value made him wealthy. In 1874 he placed his entire property in the hands of trustees, to be devoted to public and charitable purposes. The total amount thus given was $13,000,000, of which $700,000 was for Lick Observatory, to be connected with the University of California; $150,000 for free public baths in San Francisco, and $540,000 for an institution to be called the California School of Mechanical Arts. He died in San Francisco, Cal.

LIDDON, HENRY PARRY (1829-1890). Canon of St. Paul's, London; eminent both as a scholar and a preacher; author of an eloquent course of lectures, the Bampton, *On the Divinity of Jesus Christ;* belonged to the Liberal section of the High-Church Party.

LINDSAY, SAMUEL McCUNE (1869-). American sociologist, born in Pittsburg, Pa.; professor of social legislation at Columbia University and director of the New York School of Philanthropy; is especially interested in educational and child labor problems and has written extensively upon these subjects; holds offices in various philanthropic and educational societies.

LIVERMORE, MARY ASHTON (RICE) (1821-1905). An American reformer and lecturer; born in Boston, Mass.; conspicuous in her efforts to promote the woman suffrage and temperance movements. Among her popular lectures are "What Shall We Do with Our Daughters?" "Women of the War," "The Moral Heroism of the Temperance Reform."

LONDON, JACK (1876-1916). American socialist and novelist, born in San Francisco. That he might have material for his books he became successively sailor, miner, fisherman, longshoreman, seal hunter, etc.; lived as tramp and vagabond in America and London; was frequently jailed. He was in the Klondike gold rush, and was war correspondent in Japan; has lectured frequently for the Socialist party, although he holds his own wealth for himself.

LUTHER, MARTIN (1483-1546)). Leader of the Protestant Reformation; ordained a priest (1507); professor of philosophy at Wittenberg (1508); denounced the sale of indulgences (1517); cited to appear before Leo X., he refused; burned papal bull containing order to destroy certain of his works, and denied the authority of the pope; excommunicated; enjoyed the support of the elector of Saxony; attended the Diet of Worms, convened for his trial, in 1521; laid aside his monastic dress in 1524, and married Catherine von Bora, an ex-nun, in 1525; wrote a translation of the New Testament and of the Old Testament. His most famous hymn, *Ein feste Burg ist unser Gott*, was published in 1529.

MacARTHUR, MARY R. (1880-1921). Scotch socialist, born at Glasgow; secretary of Women's Trade Union League and the National Union of Shop Assistants and Clerks; represented the former association at the Women's International Congress in Berlin in 1904; she is the only woman member of the Executive of the London Trades' Council; is a member of the Independent Labor party; her special object is the organization of women's trades unions.

McCABE, CHARLES CARDWELL (1836-1909). A Methodist Episcopal bishop; pastor (1860-1862) in Ohio; chaplain in the army till 1866; prominent in Methodist Church extension movement and raised over a million dollars a year for missions; became bishop in 1896 and chancellor of American University at Washington, D. C., in 1902.

MACKAY, DONALD SAGE (1863-1908). Pastor of Collegiate Church, New York City (1899-1908); previous pastorates at St. Albans, Vt. (1890-1895), and Newark, N. J. (1895-1899); noted for successful work among young men; extensive contributor to religious magazines.

MALLALIEU, WILLARD FRANCIS (1828-1911). Methodist Episcopal bishop (1884-1911); pastorates in Massachusetts until 1881; presiding elder till 1884; voluminous writer for the religious press.

MALTHUS, THOMAS ROBERT (1766-1834). English economist; made a special study of population; as a result wrote *Essay on the Principle of Population as It Affects the Future Improvement of Society*, the main thought of which was that population has tended to outgrow subsistence.

MANES or **MANICHAEUS** (about 216-about 277). A religious teacher in Babylon (242). His religious system of Manichaeism was based upon the Persian dual system.

MARSHMAN, JOSHUA (1768-1837). An English missionary; born in Westbury Leigh, England; was sent in 1799 by the Baptist Missionary Society to Serampore, where he had Carey, Ward, and others as fellow laborers; translated the Bible into Chinese. He died in Serampore, India. His son, John Clark Marshman, founded the first English weekly newspaper in India.

MARX, KARL (1818-1883). A German socialist; born at Treves, of Jewish descent; was at first a student of philosophy and a disciple of Hegel, but soon abandoned philosophy for social economy; early adopted socialistic opinions, for his zeal in which he was driven from Germany and France, to settle in London, where he spent the last 30 years of his life; one of the founders of the "Internationale," and wrote a work, *Das Kapital*, which has become the text-book of Socialism.

MASSILLON, JEAN BAPTISTE (1663-1742). A distinguished French pulpit orator; called to the Church of the Oratory in Paris (1699) and preached the *Advent Sermons* before Louis XIV. at Versailles. Among his celebrated works are *Le petit carême*, a course of 10 Lenten sermons (1718), and his earlier *Advent Sermons* and *Le grand carême;* won distinction through his many brilliant funeral orations; named bishop of Clermont (1717); consecrated in 1719; academician (1719).

MATHER, COTTON (1663-1728). An American theologian and writer; author of 382 works. He believed in witchcraft and became notorious for his zeal in persecuting those against whom it was charged. Among his works are *Magnalia, Wonders of the Invisible World*, and *Essays to Do Good*.

MATHEW, THEOBALD (1790-1856). An Irish reformer; born in Thomastown, near Cashel, Ireland; was ordained in the Franciscan order. On April 10, 1838, he signed a total abstinence pledge and began a temperance crusade. He traveled over all parts of Great Britain and Ireland, and in the United States. The immediate result of his preaching was a marked decrease in crime and intoxication. Thousands of Father Mathew Total Abstinence Societies have been organized throughout the world in his honor. He died in Queenstown.

MELANCH'THON, PHILIP, or P. SCHWARZERD (1479-1560). An eminent German theologian and reformer; was the contemporary, friend, and the successor of Luther as the head of the German Reformation; the foremost teacher of his time; and according to Hallam "far above all others the founder of general learning throughout Europe." His writings fill 28 volumes. At 19 he published an edition of Terence that ran through 73 editions.

MENDES, FREDERIC DE SOLA (1850-). Jewish preacher in London (1873); rabbi of West End Synagogue, New York, since 1874; elected for life (1904); founded *American Hebrew* (newspaper) (1879), and was its editor till 1885; revising editor of *Jewish Encyclopedia* till 1902; author of *Jewish School Books* and *Child's First Bible*.

MENDES, HENRY PEREIRA (1852-). Jewish clergyman and educator; called 1877 to Spanish and Portuguese Congregation, New York; one of the founders and now president of New York Board of Jewish Ministers; a founder of Jewish Theological Seminary; author of *Looking Ahead* and *Jewish Religion Ethically Presented*.

MILMAN, HENRY HART (1791-1868). Dean of St. Paul's or "The Great Dean" (1849-1868); ecclesiastical historian; edited Gibbon's *Decline and Fall;* wrote *History of the Jews, History of Christianity to the Abolition of Paganism in the Roman Empire*, and *History of Latin Christianity;* professor of poetry at Oxford.

MONTEFIO'RE, SIR MOSES (1784-1885). A philanthropic Jewish banker; born in Leghorn; a friend to the emancipation not only of the oppressed among his own race, but of the slaves in all lands; lived to a great age.

MOODY, DWIGHT LYMAN (1837-1899). American evangelist. Began missionary work in 1856 in Chicago, where later a church was erected for him, though he was not ordained as a minister. In 1873, with Ira D. Sankey, he began his famous series of revivals at home and abroad. He established a seminary for young women and a training school for Christian workers at Northfield, Mass., also the Mt. Hermon School for Boys at Gill.

MOTT, LUCRETIA (1793-1880). An American reformer; born in Nantucket, Mass. In 1818 she joined the Friends. In 1833 she assisted in the formation of the American Anti-Slavery Society, and in 1840 went to London as its delegate to the World's Anti-Slavery Convention; was one of the four promoters of the Woman's Rights Convention in the United States, an active exponent of the cause of equal suffrage, temperance, and universal peace.

MUENSTERBERG, EMIL (1855-1911). German political economist; author; jurist; born in Danzig; finally settled in Berlin; member of numerous benevolent organizations; is especially interested in the poor laws and charitable work.

MUHLENBERG, HEINRICH MELCHIOR (1711-1787). Founder of the German Lutheran Church in America; came to America (1742) to work among the destitute Lutherans in Pennsylvania; wrote an *Autobiography*.

MURPHY, FRANCIS (1836-1907). American temperance reformer, born in Wexford, Ireland; came to the United States as a child; lectured in America and England on total abstinence; 10,000,000 people are said to have signed the pledge through his influence; chaplain in the Spanish-American War (1898).

NEWMAN, JOHN HENRY (1801-1890). English religious leader, first in Church of England, later in Roman Catholic Church; vicar of St. Mary's, Oxford (1828); published *Tracts for the Times* (1833-1841); leader in "Oxford movement"; ordained Roman Catholic priest (1846); rector of University of Dublin (1854-1858); made a cardinal (1879); writer of marked ability; poem *Dream of Gerontius* and hymn *Lead, Kindly Light*, most famous; wrote much relating to affairs of the church.

NEWTON, RICHARD HEBER (1840-1914). An American clergyman. In 1869 he became rector of All Souls' Church, New York. Among his works are *The Children's Church, The Morals of Trade, Womanhood, Studies of Jesus, Right and Wrong Uses of the Bible, Book of the Beginnings, Philistinism, Social Studies, Church and Creed*, and *Christian Science*.

NIGHTINGALE, FLORENCE (1820-1910). An English philanthropist; born in Florence, Italy. During the Crimean War she promptly volunteered to organize a select band of nurses at Scutari. The offer was accepted by the British War Office, and within a week Miss Nightingale was on her way to the East, where she rendered invaluable service. She was consulted during the American Civil War and the Franco-German War. She has published *Notes on Hospitals, Notes on Nursing,* and *Notes on Lying-in Institutions.*

OASTLER, RICHARD (1787-1861). English reformer, born near Huddersfield; fought for the ten-hour law in the interest of factory laborers, especially child workers; spent five years in the Fleet Prison for debts, from which place he issued a weekly journal devoted to factory and poor laws; in 1847 he won his victory, and the ten-hour bill was passed; he died in poverty.

OBERHOLTZER, SARA LOUISA (1841-). Author, economist; born in Uwchlan, Pa.; authority on school savings banks; president of numerous philanthropic societies; superintendent of the school savings banks department of the National Woman's Christian Temperance Union.

OBERLIN, JEAN FREDERIC (1740-1826). A benevolent Alsatian Lutheran pastor; labored all his life at Ban de la Roche, a wild mountain district of Alsace, and devoted himself with untiring zeal to the spiritual and material welfare of the people. Oberlin College, Ohio, was named in his honor.

OECOLAMPADIUS (*ek-o-lam-pa'di-us*), **JOANNES** (1482-1531). One of the leaders of the Reformation; born at Weinsberg, in Württemberg; became preacher at Basel; assisted Erasmus in his edition of the New Testament; entered a convent at Augsburg; came under Luther's influence and adopted the reformed doctrine.

OGLETHORPE, JAMES EDWARD (1696-1785). An English military officer and philanthropist; born in London, England. It was through his efforts that a colony was formed of insolvent debtors and persecuted Protestants, whom he brought to America and settled in Georgia in 1733. He remained in America till 1743, when he returned to England. He died in Cranham Hall, Essex, England.

OTTERBEIN, PHILIP WILLIAM (1726-1813). Founder of the Church of the United Brethren in Christ; came as missionary to America in 1752; was a powerful preacher, and started a great revival in 1766.

OWEN, ROBERT (1771-1858). Social reformer; called "the father of modern communism"; born in Newtown, North Wales; at the age of 19 he was manager of a large cotton mill in Manchester; 10 years later brought the New Lanark Mills on the Clyde, where he at once proceeded to improve the condition of the mill employees, by providing better homes and good food at cost prices; transferred children from the factory to the schools which he had established; he worked for better factory laws. Owen contended that character is formed by circumstances; tried to start several communities on the socialistic plan, but as he seemed to lack judgment and discretion they amounted to nothing.

PAINE, ROBERT TREAT (1835-1910). American philanthropist, born in Boston; although a member of the bar he retired from the practice of his profession in order to promote his benevolent enterprises; one of the founders and, since 1878, president of the Associated Charities of Boston; organizer of the Workingmen's Loan Association and many similar societies; is in favor of lower tariff and free raw material; has written extensively upon themes in which he is interested.

PALEY, WILLIAM (1743-1805). An English divine and author; in 1775 became rector of Musgrave, and in 1782 was made archdeacon of Carlisle. It is said that he would have received a bishopric had not King George III. taken offense at a paragraph on "Property" in one of his writings. The principal works of Paley are *The Principles of Moral and Political Philosophy, Horae Paulinae, A View of the Evidences of Christianity,* and *Natural Theology.*

PALMER, RAY (1808-1887). An American hymnologist; taught in New York City and at New Haven, Conn.; occupied a pastorate in Bath, Me., until 1850, and then in Albany, N. Y. Among his hymns are *Jesus, the very thought of Thee* and *My faith looks up to Thee;* the latter has been translated into twenty languages. His chief collections are *Hymns and Sacred Pieces, Hymns of My Holy Hours,* and *Voices of Hope and Gladness.*

PANKHURST, CHRISTABEL (1880-). English lawyer and woman suffragist; born in Manchester; a member of the Independent Labor party, Woman's Trade Union and other similar organizations; all of her work as a reformer is in the interests of the advancement of woman; she is the daughter of Emmeline Goulden Pankhurst.

PANKHURST, EMMELINE GOULDEN (1858-). English woman suffragist, interested especially in the advancement of woman; born in Manchester; member of Independent Labor party; she formed the Women's Social and Political Union.

PARKER, MATTHEW (1504-1575). Archbishop of Canterbury; born in Norwich. In 1544 he was appointed master of Corpus Christi College, Cambridge, and elected vice chancellor of Cambridge University the following year. When Queen Mary succeeded to the throne Parker was deprived of his offices, and remained in concealment till the accession of Elizabeth in 1558. By royal command he was summoned to Lambeth and appointed archbishop of Canterbury.

PARKER, THEODORE (1810-1860). American preacher, scholar, and reformer; pastor of the West Roxbury Unitarian Church (1837-1842). His sermon, *The Transient and Permanent in Christianity* (1841), ranks with Channing's *Baltimore Sermon* of 1819 and Emerson's *Divinity School Address* of 1838; published *A Discourse on Matters Pertaining to Religion, Lessons from the World of Matter and the World of Man,* and *Experiences as a Minister.*

PARKHURST, CHARLES HENRY (1842-). An American clergyman; pastor at Lenox, Mass. (1874); and of Madison Square Presbyterian Church, New York City (1880); president of the Society for the Prevention of Crime (1891); made accusations against the New York City police force which were substantiated by the Lexow Committee appointed by the Senate (1894); wrote *Forms of the Latin Verb Illustrated by the Sanskrit, The Blind Man's Creed, Pattern in the Mount, The Question of the Hour, The Fellowship of Suffering, Our Fight with Tammany, Talks to Young Men,* and *Guarding the Cross with Krupp Guns.*

PATON, JOHN BROWN (1830-1911). English Congregational minister, editor and writer; founder of Young Men's and Young Women's Brigade of Service, and the Boys' and Girls' League of Honor; assisted in establishing the University Extension System, president British Institute of Social Service (1904).

PATRICK, SAINT (flourished fifth century). The apostle and patron saint of Ireland; his birthplace uncertain. His mission, which extended over a great part of Ireland, was eminently successful. Various miracles are ascribed to him. After the Apostles he was among the most successful of missionaries.

PATTON, FRANCIS LANDEY (1843-). Theologian and educator; pastorates in New York and Chicago till 1881, when he became professor of theology in Princeton Seminary and of ethics in the University; president of the University (1888-1902); president of Princeton Seminary (1902-1913).

PAUL, SAINT (originally called Saul) (flourished first century). The great Apostle of the Gentiles; born at Tarsus, in Cilicia; by birth a Jew and a Roman citizen. He did more for the extension, if not the exposition, of the Christian faith at its first promulgation than any of the Apostles, and perhaps all of them together, and it is questionable if but for him it would have become, as it has become, the professed religion of the most civilized section of the world.

PEABODY, GEORGE (1795-1869). Philanthropist; born at Danvers, now Peabody, Mass.; made a large fortune as a dry goods merchant in Baltimore and as a stockbroker in London; gave away for benevolent purposes in his lifetime more than $8,000,000; died in London.

PEASE, EDWARD R. (1857-). English socialist and political economist, born at Bristol; general secretary of Fabian Society; secretary of the National Labor Federation, and actively engaged in all plans for labor reform; founder of the London School of Economics and the British Library of Political Science.

PERIN, HENRI XAVIER CHARLES (1815-1905). Belgian Christian socialist and economist, born at Mons; held the chair of political economy and law in the Catholic University at Louvain for 37 years, when he retired, as professor emeritus (1881). Perin bases his hopes for the success of an ideal society upon the moral influence of the church.

PEROVSKAYA, SOPHIA (1854-1881). Russian revolutionist; born an aristocrat; ran away from home to take up the work of socialism, and became a nihil-

ist; suffered imprisonment and exile; was actively interested in the most desperate of the terrorist enterprises, including the assassination of the Czar in 1881, which she directed, and for which she, with four others, was hanged. In person she was beautiful, winning, and lovable.

PETER (-64?). The Greek surname of an apostle of Jesus. Peter's real name was Simon, his father's Jonas, his brother's Andrew. Peter was of an impulsive temperament, generous, but too forward in speech and rash in action. After the Ascension, he was for a time the most prominent of the Apostles. Tradition makes him die as a martyr at Rome, crucified with his head downward. Roman Catholics claim him as the first bishop of Rome, and consider that the authority delegated him by Jesus appertains also to his successors, the popes of Rome.

PHILLIPS, WENDELL (1811-1884). Slavery abolitionist and emancipationist generally; born at Boston, Mass., and bred to the bar; was Garrison's aid-de-camp in the cause, and chief after his death.

PINGREE, HAZEN S. (1842-1901). American municipal reformer, born in Denmark, Me.; served in the Civil War and was six months in Andersonville prison (1864); afterwards started a shoe factory in Detroit, having previously been employed in a shoe factory; was mayor of Detroit (1890-1896), and threw himself into the work of fighting political corruption; was the advocate of municipal ownership of street railways, free water, the eight-hour law, and other reforms; he secured a reduction in the price of gas; in 1896 he became the Republican governor of Michigan.

PIUS IX. (GIOVANNI MARIA MASTAI FERRETTI) (1792-1878). Chosen to the pontificate (1846). During his incumbency the dogmas of the immaculate conception and of papal infallibility were promulgated, temporal power overthrown (1870), and the papal states annexed to Italy.

PIUS X. (GIUSEPPE SARTO) (1835-1914). Ordained (1858); parish priest until 1875, when made episcopal chancelor; bishop of Mantua (1884-1893); cardinal (1893); chosen to the pontificate (1903).

POLAK, HENRI (1868-). Dutch socialist, born in Amsterdam; president of the Diamond Workers' Union; member of the Social Democratic Federation of Holland and other similar organizations; a founder of Social Democratic Labor party, and secretary of the 1894 strike committee; his efforts reduced the hours of labor; increased the wages two, three, and four fold; made diamond cutters best paid workmen in Europe.

POTTER, HENRY CODMAN (1834-1909). Protestant Episcopal bishop of New York since 1887. Pastorates: Christ Church, Greensburg, Pa. (1857-1858); St. John's, Troy (1859-1866); assistant Trinity Church, Boston; rector of Grace Church, New York, till 1887. Author of *Thirty Years Reviewed, The Church and Her Children, The Religion of To-day,* and many other works.

POWDERLY, TERENCE VINCENT (1849-). American labor reformer; writer; born in Carbondale, Pa.; was formerly general master workman of the Knights of Labor; in 1869 he removed to Scranton, Pa., and soon after became president of the Machinists' and Blacksmiths' Union; mayor of Scranton, representing the labor party (1878, 1880, and 1882); in 1901 he was admitted to the bar of the United States Supreme Court. In both of the McKinley campaigns he made a tour of several states, delivering political speeches for the Republican candidates; has been the chief of division of information in Bureau of Immigration and Naturalization at Washington since 1907. In 1890 he published *Thirty Years of Labor,* covering the period between 1859 and 1889.

PROUDHON, PIERRE JOSEPH (1809-1865). French philosophical anarchist; writer; born at Besançon; he was reared in poverty, but through his own efforts acquired an education; spent three years in prison, and was at other times threatened with imprisonment.

PUSEY, EDWARD BOUVERIE (1800-1882). An English theological writer; a leader of the Anglo-Catholic party in the Established Church; published revolutionary sermons which resulted in his suspension for three years. Of his larger works the most important are *The Doctrine of the Real Presence* and *The Real Presence of the Body and Blood of Christ the Doctrine of the English Church.*

QUELCH, HENRY (1858-1913). English socialist, editor, and author; born in Hungerford, Berkshire; organizer of the South Side Labor Protection League; has been prosecuted for connection with strikes; member of Social Democratic Federation; editor of *Justice.*

RAIFFEISEN, FRIEDRICH WILHELM (1818-1888). German economist; established coöperative savings and loan associations in the country districts of Germany, to save the peasants from the clutches of usurers.

REYNOLDS, JAMES BRONSON (1861-1924). American social reformer; born at Kiantone, New York; educated in the leading universities of America and Europe; head worker in the New York University settlement; member of the State Tenement House Commission; afterward special adviser to President Roosevelt on Washington municipal affairs.

RICHMOND, LEGH (1772-1827). An English divine and religious writer; active in the reforms of his day; best known by his *Annals of the Poor;* his *Dairyman's Daughter* reached, within 20 years after his death, a circulation of 4,000,000 copies in 19 languages; he edited a series of *Fathers of the English Church.*

RIIS, JACOB (1849-1914). Danish-American philanthropist, journalist, and author. Came to New York in 1868, and became police reporter for daily newspapers, and the experience gained in this occupation led him to devote himself to all phases of social uplift and betterment. Among his literary works, by which he accomplished much, were: *How the Other Half Lives, The Children of the Poor, Out of Mulberry Street, The Battle with the Slums, The Making of an American.*

ROBERTSON, FREDERICK WILLIAM (1816-1853). A distinguished English preacher; curate at Winchester, at Cheltenham, and Brighton; is widely known for his printed sermons.

ROGERS, AMES EDWIN THOROLD (1823-1890). English economist; professor of political economy at Oxford; devoted himself to historical research on economic subjects; his *History of Agriculture and Prices* necessitated 20 years of patient study among all kinds of old records.

RUSH, BENJAMIN (1746-1813). American abolitionist, born near Philadelphia; physician; one of the signers of the Declaration of Independence, surgeon general in the army; started the first dispensary in the United States, at Philadelphia; during the yellow fever scourge in 1793 Rush was said to have saved the lives of 6,000 Philadelphians, in recognition of which he received many honors from both Europe and America; president of many moral and religious societies; Rush Medical Institute of Chicago is named for him.

RUSSELL, HOWARD H. (1855-). American clergyman; temperance reformer; born in Stillwater, Minn.; founder of the anti-saloon league; league superintendent in New York State; Russell believes that the reforming power of the world lies in the Church and the Gospel. The anti-saloon league is spreading throughout the country, and now raises and expends about $400,000 a year.

SANKEY, IRA DAVID (1840-1908). An American evangelist; associated with the late Dwight L. Moody for some years, attracting and holding the attention of great audiences by singing hymns composed by himself, which are published as *Gospel Hymns, Sacred Songs,* and *Sacred Songs and Solos.*

SAVAGE, MINOT JUDSON (1841-1918). Unitarian clergyman; Congregational pastor from 1864-1873; Unitarian pastorates in Chicago; Church of the Unity, Boston (1874-1896); Church of the Messiah, New York (1896-1906). A voluminous writer on ethical topics as well as editor.

SAVONAROLA, GIROLAMO (1452-1497). Famous Italian religious and political reformer of noble birth, a member of the Dominican order; by his intense religious zeal and powerful oratory became a prophet to his followers. Political disturbances within Italy followed by French invasion resulted in its control by Savonarola and his party, who aimed to establish a Christian commonwealth. Through too high a standard and his attacks upon the pope, he was forbidden to preach; was imprisoned and tried for heresy and sedition; finally hanged and his body burned. His numerous writings include sermons, poems, religious and political essays.

SCHLEIERMACHER, FRIEDRICH DANIEL (1768-1834). A German theologian; took orders (1794); professor of theology at Halle (1804-1806) and Berlin (1810-1834); pastor of Trinity Church, Berlin. His productions include lectures and essays on church history, philosophy, psychology, politics, and theology. His books are *Reden über die Religion an die Gebildeten unter ihren Verächtern, Monologen, Translation of Plato,* and *Grundlinien einer Kritik der bisherigen Sittenlehre.*

SCOTT, ROSE (1847-). English woman suffragist; lecturer; born in Glendon. Active in many movements for the advancement and benefit of women.

SCUDDER, VIDA DUTTON (1861-). Author; professor at Wellesley College; born in southern India; was one of the prime movers in the establishment of the first college settlements; her special care is for the immigrant Italians, among whom she has done much educational work.

SEBASTIAN, SAINT. A Roman soldier at Narbonne, and martyred under Diocletian when it was discovered he was a Christian; is depicted in art bound naked to a tree and pierced with arrows; and sometimes, with arrows in his hand, offering them to heaven on his knees, he having been first shot with arrows and then beaten to death.

SELIGMAN, EDWIN ROBERT ANDERSON (1861-). Professor of political economy at Columbia University; president of the American Economic Association, Tenement House Building Company, and the Bureau of Municipal Research; editor and author.

SERVE'TUS, MICHAEL (1509-1553). A Spanish theologian; martyred through the intolerance of Calvin.

SHELDON, CHARLES MONROE (1857-). An American clergyman; pastor of the Central Congregational Church at Topeka, Kansas (1889); conducted a Topeka daily newspaper for one week in accordance with his views of Christian daily living (1900); wrote *Robert Hardy's Seven Days, The Crucifixion of Philip Strong, His Brother's Keeper,* and *In His Steps.*

SHEPARD, THOMAS (1605-1649). English Puritan divine; silenced for non-conformity, he went to Boston (1635); pastor at Cambridge, where he took active part in founding Harvard College and in Indian missionary work.

SIMPSON, ALBERT B. (1846-1919). Canadian clergyman, founder of the Christian Alliance (1887); incorporated with the International Missionary Alliance (1897) under the name, Christian and Missionary Alliance, of which he is president and superintendent; equipped hundreds of foreign missionaries and maintains a missionary training institute; pastor of Gospel Tabernacle in New York City.

SINCLAIR, UPTON (1878-). American author; socialist, born at Baltimore, Md. His book, *The Jungle,* which made him famous, exposed the conditions of the packing house industries, and created such a sensation that President Roosevelt ordered an investigation, which resulted in a reform in the meat inspection laws.

SMITH, ALEXANDER COKE (1849-). Bishop of Methodist Episcopal Church, South. A clergyman from 1872 to 1886; became professor of mental and moral philosophy at Wofford College, S. C.; professor of theology at Vanderbilt (1890-1892); returned to pastoral duties and was elected bishop in 1902. Author of *The Teacher's Meeting* and contributor to various church publications.

SMITH, CHARLES SPRAGUE (1853-1910). American municipal reformer; educator, lecturer, and writer; born in Andover, Mass.; director and founder of the People's Institute, New York City. While supporting government monopoly theories, he insisted that such institution be gradually brought about.

SMITH, JOSEPH FIELDING (1838-1914). President of the Church of Jesus Christ of Latter Day Saints since 1901, having been connected with this church as missionary, apostle, and counselor since 1854; has been a strong factor in the political life of Utah; editor of *Juvenile Instructor* and *Improvement Era.*

SOCINUS, or **SOZZINI.** Two Italians, founders of Socinianism, and the precursors of the modern Unitarians. **Lelio** (1525-1562) studied Greek, Hebrew, and Arabic, to understand better the Scriptures; he visited several countries, meeting other liberal leaders, including Calvin. Part of his writings were published, which fell into the hands of his nephew, **Fausto** (1539-1604), who became their champion. He went to Poland, but was banished; wrote several controversial works and an explanation of Socinian theology.

SOLLY, HENRY (1813-1903). Unitarian clergyman (1840); feeling need of social intercourse among workmen, he set himself the task of establishing clubs; traversed entire country to further his idea; formed nearly 3,000 clubs with almost a million members.

SOMERSET, LADY HENRY (1851-1921). President of the British Woman's Temperance Association; philanthropist; born in London; upon the death of her husband in 1884 she renounced society and devoted herself to the welfare of her tenants, numbering over 100,000; took an active part in the temperance movements in both England and America. In collaboration with Frances E. Willard, she organized the World's Woman's Christian Temperance Union, which unites the cause of temperance with that of social purity and woman's suffrage; is editor of *The Woman's Signal,* the leading woman's paper in England, voicing the cause of reform and philanthropy.

SPALDING, JOHN LANCASTER (1840-1916). Roman Catholic bishop of Peoria (1877-1908); built St. Augustine's Church for Catholic negroes of Louisville (1869); secretary and chancellor diocese of Louisville (1871); of New York (1872-1877); appointed in 1902 by the president arbitrator in coal strike; author of many essays and reviews upon social, educational, and ethical questions, also poetry of a high order.

SPARGO, JOHN (1870-). English socialist and reformer; born in Stithians, Cornwall; settlement worker, author, and lecturer; removed to America in 1901 where he now lives, at Yonkers, N. Y.

SPURGEON, CHARLES HADDON (1834-1892). An English preacher. His followers built for him his well known "Tabernacle" in Newington Butts in 1861. Spurgeon preached in the Tabernacle every Sunday to thousands of hearers. His sermons were published weekly from 1854, and yearly volumes were issued from 1856. They had an enormous circulation, many of them being translated into various languages.

STANFORD, JANE LATHROP (1825-1905). An American philanthropist; born in Albany, N. Y.; the wife of Leland Stanford, founder of the Leland Stanford Junior University. She built and endowed the Children's Hospital in Albany, N. Y., at a cost of $200,000; gave $160,000 to the kindergartens in San Francisco, Cal., and after the death of her husband in 1893 devoted herself to the development and support of the Leland Stanford Junior University. In 1901 she supplemented her gifts to the university by turning over to its trustees stocks valued at $18,000,000, her residence in San Francisco, valued at $400,000, for a museum and art gallery, and 1,000,000 acres of land worth $12,000,000. These gifts swelled the endowment of the university to more than $45,000,000, making it the most richly endowed educational institution in the world.

STANFORD, LELAND (1824-1893). An American lawyer and philanthropist; born in Watervliet, Albany County, N. Y. In 1852 he went to California, where he engaged in mining, but in 1856 removed to San Francisco and there engaged in business, laying the foundation of a fortune estimated at more than $50,000,000. He was elected president of the Central Pacific Railroad in 1861; was governor of California (1861-1863); and in 1885 was elected to the United States Senate. In memory of a deceased son, Leland Stanford, Jr., he gave $20,000,000 for the founding of Leland Stanford University at Palo Alto, Cal. He died in Palo Alto.

STANLEY, ARTHUR PENRHYN (1815-1881). Widely known as Dean Stanley; an English scholar and divine; professor of ecclesiastical history in Oxford, and published lectures on the Eastern Church, the Jewish Church, the Athanasian Creed, and the Church of Scotland; accompanied the Prince of Wales to the East in 1862, and became dean of Westminster (1864); wrote *Historical Monuments of Westminster Abbey* and *Christian Institutions.*

STONE, LUCY (MRS. BLACKWELL) (1818-1893). An American reformer; born in West Brookfield, Mass. She was graduated at Oberlin College in 1847. She published a protest, *Taxation Without Representation.* In 1869 she helped organize the American Woman's Suffrage Association. Her lectures on woman suffrage made her known throughout the country. She died in Boston.

SUTHERLAND, LADY MILLICENT FANNEY ST. CLAIR-ERSKINE (1869-). Economic and industrial reformer; influenced Parliament to appoint a commission to investigate the lead poisoning conditions among the pottery workers. President of many philanthropic societies; author of several books.

SUTTNER, BERTHA, BARONESS VON (1843-1914). Founder and president of the Austrian Society of Peace; author of numerous books; devoted to the cause of peace. Received Nobel peace prize.

SWEDENBORG, EMANUEL (1688-1772). A Swedish theosophist. In his theosophy the central point is the correspondence of the natural and the supernatural; founder of the sect known as Swedenborgians or the Church of the New Jerusalem. All of his works were written in Latin.

TACHE (*ta-shay'*), **ALEXANDRE ANTOINE** (1823-1894). A Canadian Catholic archbishop; joined the Order of the Oblate Fathers and conducted mission work in Northwest Canada among the Indians; archbishop of Saint Boniface (1871); founded the Saint Boniface Theological College; wrote *Vingt années de missions dans le nord-ouest l'Amérique and Esquisses sur le nord-ouest de l'Amérique,* which in its English translation is a most valuable work of reference on that region.

TALMAGE, THOMAS DE WITT (1832-1902). An American clergyman; pastor of the Central Presbyterian Church in Brooklyn, N. Y. (1869-1894); afterwards associate pastor of the First Presbyterian Church in Washington, D. C.; editor of the *Christian Herald* and author of *Crumbs Swept Up; Woman: Her Powers and Privileges, From Manger to Throne, Every-Day Religion,* etc.

TAYLOR, JEREMY (1613-1667). An English prelate and author; "the modern Chrysostom"; in 1638 rector of Uppingham in Rutlandshire. In the civil war Taylor took the royal side, and so lost all his preferments. For many years he lived in retirement in Wales, busily engaged in writing books. In 1658 he went to Ireland; immediately after the Restoration bishop of Down and Connor, also that of Dromore till his death; wrote *Episcopacy Asserted, The Liberty of Prophesying, Life of Christ, Holy Living,* and *Holy Dying.*

THERESA, SAINT (1515-1582). A Spanish Carmelite nun; eminent for learning and piety; founder of a reformed society of barefooted members of that order; canonized by Pope Gregory XV.

TINGLEY, (Mrs.) KATHERINE (1852-). Born at Newburyport, Mass.; appointed successor of Mme. P. Blavatsky and William Q. Judge in the "Universal Brotherhood and Theosophical Society" movement; head of the "Raja Yoga" schools of Point Loma, San Diego, and San Francisco, California, and the Brotherhood schools of England and Cuba; long engaged in philanthropic work, embracing East Side mission movements in New York, relief corps work in the Spanish War, emergency hospital work for sick soldiers at Montauk Point, and charitable work in Havana; first to make complete educational exposition of the idea of "theosophy in practice," upholding to the young the theosophic principles of "Karma," the all-pervading law of relentless justice, and the figure of Christ as one of the most important of the world's great teachers; at present engaged in establishing an eastern replica of the Point Loma institution at Newburyport, occupying the site of the historic "Lord" Timothy Dexter mansion; financial support for the movement is obtained by voluntary contributions. Her society is understood to be distinct from and unaffiliated with "The Theosophical Society," whose head is Mrs. Annie Besant, and the headquarters of which is at Adyar, Madras, India.

TOME, JACOB (1810-1898). An American philanthropist; born in Manheim township, York County, Pa.; went to Port Deposit, Md., in 1833. In 1884 he presented to Dickinson College a valuable building for scientific uses. His largest gift was for the foundation of the Jacob Tome Institute, at Port Deposit, $1,600,000, a sum that was increased by his will to more than $3,500,000. He died in Port Deposit, Md.

TRUEBLOOD, BENJAMIN FRANKLIN (1847-1916). General secretary of the American Peace Society since 1892; editor of the *Advocate of Peace;* in 1899 attended The Hague Peace Conference; holds radical views on the subject of peace, woman suffrage, temperance, and the municipal ownership of street railways; a prominent lecturer and writer on international subjects.

TUCKWELL, GERTRUDE M. (1862-). English Christian socialist; trade unionist; chairman of the Women's Trade Union League; born in Oxford; her father, Rev. William Tuckwell, known as "The radical parson," has a reputation throughout England for his strong views on labor, land, naturalization, etc.; Miss Tuckwell has written extensively upon industrial subjects.

TYSON, ROBERT (1845-1917). English political economist and social reformer; born in Canterbury; removed to Toronto, Canada, in 1870; worked in a machine shop as a boy; has worked vigorously in the cause of single tax, then for direct legislation and proportional representation; is the advocate of electoral reform; newspaper reporter and editor; writer.

ULFILAS (*ul'fi-las*) (about 311-about 381). The apostle and bishop of the Goths; labored among the Goths for over 30 years; preached and wrote in Greek, Latin, and Gothic; his translation of the Bible into Gothic is the beginning of all German literature; he omitted the books of Samuel and Kings, for he considered that they were too vivid a picture of war to present to his fierce countrymen.

URSULA, SAINT. A traditionary virgin martyr; reputed daughter of a British prince, who, with 11,000 other virgins, suffered cruel martyrdom at Cologne in the third or fourth century.

VAIL, CHARLES HENRY (1866-1924). Economic writer; pastor of Pullman Memorial Church, Albion, New York; is the advocate of national ownership of railways, collective ownership of means of production and distribution.

VERRIJN, STUART COENRAAD ALEXANDER (1865-). Professor of economics and industrial law at the Academy of Technology, Delft, Holland; born at Ueesp. A liberal in politics, he claims that social reform can come only through mental and moral improvement of the individual, not through the interference of the state

VINCENT DE PAUL, SAINT (1576-1660). An eminent French philanthropist and reformer; canonized by Pope Clement XII. (1737). He organized the Congregation of Missions and founded the order of Sisters of Charity.

VINCENT, JOHN HEYL (1832-1920). Since 1900 bishop of Methodist Episcopal Church, and since 1878 chancellor of the Chautauqua system, of which he was a founder in 1874. Previously he had been pastor eight years and connected with Sunday school work and publications nine years. He is preacher to Harvard, Yale, Cornell, and other colleges. Author of many books relating to Sunday school work and Bible teaching.

WATTS, ISAAC (1674-1748). An English hymnologist; wrote *Hymns and Spiritual Songs, Divine and Moral Songs for the Use of Children, A Manual of Logic,* several volumes of *Sermons.*

WARREN, JOSIAH (1799-1874). Philosophical anarchist; born near Boston; was associated with Robert Owen in the New Harmony community; individualist; believed that cost was the true standard of price; started an experimental store to exemplify his principles; founded communities which did not prosper.

WAXWEILER, EMILE (1861-1916). Economist, born in Belgium; director of the Solvay Sociological Institute, Brussels; lecturer on sociology and political economy.

WEBB, BEATRICE (1858-). Writer; economist; daughter of Richard Potter, for a time president of the Grand Trunk Railroad; student of working class life in English cities, especially the sweat shop system; member of Fabian Society, and the Royal Commission on the Poor Law.

WESLEY, JOHN (1703-1791). Founder of the sect called Wesleyans or Methodists; went with General Oglethorpe to Savannah, Ga., in 1736, hoping to convert the Indians; returned in 1738. His first hymn book was published at Charleston (1737); spent three months with the Moravians in Germany (1738); organized his religious system of Methodism.

WHITMAN, MARCUS (1802-1847). American pioneer and missionary; with his wife and three other missionaries took the first wagon across the Rocky Mountains to Washington (1836). He secured the Oregon territory for the United States (1842-1843).

WHITEFIELD, GEORGE (1714-1770). An English clergyman; a friend of Charles Wesley; ordained in 1736; preached with great effect, and in 1737 visited America; returned to England; held outdoor meetings and gathered immense crowds. He made seven voyages to America, preaching throughout the colonies with such power that he was called "the wonder of the age."

WICLIF, JOHN (about 1320-1384). An English patriot and reformer; in 1360 became master of Balliol College, and for a while was royal chaplain; translated the Bible into English; was repeatedly arraigned for heresy, and finally prohibited from teaching in the University; retired to his rectory of Lutterworth. His buried remains, by order of the rival pope, Clement VIII., were disinterred, burned, and the ashes cast into the Swift, a branch of the Avon River.

WILBERFORCE, WILLIAM (1759-1833). Founder of the English anti-slavery society; born at Hull, England; member of the House of Commons; framed the abolition of slavery bill which was passed one month after his death; was interested in many other reforms and philanthropies.

WILLARD, FRANCES ELIZABETH (1839-1898). An American temperance reformer; born in Churchville, near Rochester, N. Y. After some years spent in teaching she became professor of esthetics in the Northwestern University, and was made dean of the Woman's College in February, 1871. She began her active temperance work in 1874, and was made secretary of the National Woman's Christian Temperance Union. In 1879 she was made president of that organization and held the office till her death. She was chosen as president of the World's Christian Temperance Union in 1888, and in 1892 visited England as the guest of Lady Henry Somerset, the well known temperance worker. She was an orator of great eloquence, humor, and power. Her executive ability and genius for organization were wonderful, and her work for temperance and social purity will live in the history of her country. She died in New York City.

WILLIAMS, TALCOTT (1849-1928). Journalist; economist; born in Turkey; in favor of free contract, free competition and free labor, believing this régime to tend towards the distribution of wealth, and to result in the greatest good to the greatest number; head of school of journalism at Columbia, 1912.

WISEMAN, NICHOLAS PATRICK STEPHEN (1802-1865). An English Roman Catholic prelate; ordained to the priesthood in 1825; made professor of oriental languages in the University, and rector of the English College of Rome until 1835, when he returned to England, where he became noted as a preacher and lecturer; created by the pope a bishop in partibus (1840); made vicar apostolic of the London district (1849); and in 1850 Roman Catholic Archbishop of Westminster and a cardinal. His principal works are *Lectures on the Connection between Science and Revealed Religion, The Real Presence, Lectures on the Catholic Hierarchy, Recollections of the Last Four Popes,* and *Sermons on Our Lord Jesus Christ and His Blessed Mother.*

WOLFF, HENRY WILLIAM (1840-). English social reformer, born at Leeds; founder and chairman of the International Coöperative Alliance, prolific writer; believes in reform by means of self-help, moral and educational influences, and the breaking down of class distinctions.

WOOLLEY, JOHN GRANVILLE (1850-1922). Temperance reformer; born in Collinsville, Ohio; believes that all reform hinges upon temperance reform, and that the temperance question is the most important in practical politics.

WOOLMAN, JOHN (1720-1772). Philanthropist; abolitionist; Quaker; began by teaching the neglected children of the poor; his journal has been published with an introduction by Whittier; he died of smallpox in England.

YALE, ELIHU (1648-1721). An Anglo-American philanthropist; went to the East Indies as a trader (1672), and acquired great wealth. From 1687 to 1692 he was governor at Fort St. George, Madras. He gave to the Saybrook Collegiate School books and money valued at $4,000, a gift which resulted in the connection of his name with the college after its removal to New Haven.

YOUNG, BRIGHAM (1801-1877). Second president of the Mormon Church, or Church of Jesus Christ of the Latter Day Saints, and founder of the state of Utah. He was active in promoting agriculture; founded the University of Deseret and other schools; was interested in the construction of railroads and the prime mover in building the celebrated Mormon Temple. He displayed remarkable efficiency in organizing and consolidating the Mormon Church.

ZIN'ZENDORF, NIKOLAUS LUDWIG VON, COUNT (1700-1760). A German count; established the religious community of Herrnhut on his estate in Saxony, consisting chiefly of a body of Moravian brethren who had been driven out of Bohemia and Moravia, called Herrnhuters, of which he became one of the leaders and chief apostles; author of more than 100 works in prose and verse.

ZOROASTER, ZARATHUS'TRA or ZER'DUSHT (660-583 B. C.). The founder or reformer of the Parsee religion. Though certainly a historical personage, nothing whatever is known except that his family name was Spitama, that he was born in Bactria, and that he could not have flourished later than 580 B. C.

ZUEBLIN, CHARLES (1866-). Lecturer; writer; member of London Fabian Society; professor of sociology at the University of Chicago; born at Pendleton, Indiana; especially interested in municipal sociology in American cities.

DICTIONARY OF LEADING JURISTS.

Created Earl of Mansfield in 1776; resigned chief justiceship in 1778.

MARSHALL, JOHN (1755–1835). American jurist whose work on constitutional law constitutes a record. Born in Fauquier County, Va.; served in Revolution; admitted to bar (1781); member Virginia legislature (1782); member of the convention to ratify the Constitution (1788), its adoption by Virginia being largely due to him; went with Gen. C. Pinckney and Elbridge Gerry to influence the French Directory to remove restrictions laid on American commerce (1797); elected to the lower house of Congress, became an acknowledged leader on constitutional and international law; became secretary of state (1800); chief justice United States Supreme Court (1801–1835), when his great constitutional work was done.

MASON, JOHN YOUNG (1799–1859). A politician; born at Greensville, Sussex County, Va.; studied law and was admitted to the bar (1819); presided over Federal and state courts; served in the Virginia assembly; member of Congress (1831–1837); judge United States district court for Virginia (1837–1844); made secretary of the navy (1844); appointed attorney general in President Polk's cabinet (1845–1846); minister to France (1853); issued with Buchanan and Soulé, ministers of the United States to England and Spain, respectively, the famous Ostend manifesto.

MILLER, WILLIAM HENRY HARRISON (1840–1917). An American lawyer; born in Augusta, Oneida County, N. Y.; graduated at Hamilton College, Clinton, N. Y.; taught school; practiced law at Fort Wayne, Ind. (1866–1874); became law partner of Benjamin Harrison; attorney general of United States (1889–1893); on retirement from public life resumed his law practice.

MOODY, WILLIAM HENRY (1853-1917). American cabinet officer; born in Newbury, Mass.; member of Congress (1895–1902); in March, 1902, he succeeded John D. Long as secretary of the navy; in 1904 he was made attorney general; associate justice of the United States Supreme Court (1907–1910).

MORRISON, WILLIAM RALLS (1825–1909). Lawyer; born in Monroe County, Ill.; educated at McKendree College; served in Mexican War; went to California (1849); returned to Illinois (1851); admitted to the bar; clerk in circuit court (1852–1854); member Illinois legislature (1854–1860, 1871–1872); member Congress (1863–1865, 1873–1887); chairman Ways and Means Committee (1875–1877, 1883–1887); introduced "Morrison" bill and several others; interstate commerce commissioner (1887–1897).

NELSON, JOHN (1791–1860). Jurist; born in Fredericktown, Md.; was graduated from William and Mary College (1811); studied law and was admitted to the bar; was a member of Congress (1821–1823); appointed United States minister to Naples (1831); attorney general of the United States (1843).

OGLESBY, RICHARD JAMES (1824–1899). American soldier, lawyer, and politician; born in Oldham County, Ky.; served as lieutenant in Mexican War; represented his district in the state (Illinois) senate (1860), but at outbreak of Civil War resigned to become colonel of Eighth Illinois Volunteers; brigadier general of volunteers (March, 1862); major general (November, 1862); governor of Illinois (1864–1869), for a few months in 1873, and from 1884 to 1889; member of United States Senate (1873–1879).

OLNEY, RICHARD (1835–1917). An American politician; born in Oxford, Mass.; graduated Harvard Law School (1858); admitted to the bar (1859); served in Massachusetts legislature (1874); appointed attorney general of the United States by President Cleveland (1893); appointed secretary of state, serving from 1895 to 1897; carried the Venezuelan controversy with Great Britain to a successful issue (1895).

PAINE, ROBERT TREAT (1731–1814). American lawyer and patriot; born in Boston; graduated at Harvard (1749); admitted to the bar (1759); member of the Massachusetts general court (1773–1774), of the Continental Congress (1774–1778), and signed the Declaration of Independence; speaker in the Massachusetts house of representatives (1777); state attorney general (1780–1790); associate justice of the state supreme court (1790–1804).

PAPINIAN (about 150–212). The greatest of Roman jurists; his productions include, mostly, digests of decisions, and his writings were so valuable that they formed a part of the course of law study and were employed in settling disputed questions.

PARKER, ALTON BROOKS (1852-1926). American jurist; born at Cortland, N. Y.; graduated at the Cortland Normal School, and at Albany Law School (1872); surrogate of Ulster County (1877–1885); representative at the Democratic National Convention (1884); chairman of the Democratic state executive committee (1885); in the New York supreme court (1886), and court of appeals (1889); chief judge (1897); Democratic candidate for president (1904); and president of the American Bar Association (1906–1907).

PARSONS, THEOPHILUS (1750–1813). American jurist; born in Byfield, Mass.; graduated at Harvard (1769); began practice of law at Falmouth (now Portland, Me.) (1774); member of the constitutional convention which framed a new constitution for Massachusetts (1779–1780); member of the state convention called to ratify the Federal Constitution (1788); in 1801 was attorney general of the United States in John Adams's cabinet; from 1806 till his death he was chief justice of the state supreme court.

PIERREPONT (*peer'pont*), **EDWARDS** (1817–1892). American diplomat; born in New Haven, Ct. Admitted to the bar (1840), and in 1857 was elected judge of the New York superior court. He became attorney general of the United States (1875), tried many famous cases, and won distinction as an orator. United States minister to Great Britain (1876–1877).

PINKNEY, WILLIAM (1764–1822). An American statesman and lawyer; born at Annapolis, Md.; studied law with Justice Samuel Chase; admitted to the bar (1786); member of the convention to ratify the Federal Constitution (1788); elected to the house of delegates (1788); secured (1796) a claim of $800,000 for Maryland on the Bank of England as compensation due American merchants under the Jay Treaty; elected attorney general of Maryland (1805); sent as minister extraordinary to England (1806); recalled (1811); elected to Maryland state senate, but was appointed attorney general of the United States by President Madison (1811); entered the national House of Representatives (1815–1816); minister to Russia and special envoy to Naples (1816); elected to United States Senate (1820).

QUINCY, JOSIAH (1744-1775). American lawyer, orator, and essayist; born in Boston; graduated at Harvard (1763), and with John Adams conducted (1770) the defense of the British soldiers who took part in the Boston Massacre; went South (1773) and arranged for a system of communication between the patriots of that part of the country and those of the North. In 1774 he went to England in the interests of the Patriot party.

QUINCY, JOSIAH (1772-1864). Son of the foregoing; born in Boston; graduated at Harvard (1790); member of the state senate (1804); entered Congress (1805); opposed slavery and maintained that the purchase of Louisiana was sufficient ground for the dissolution of the Union. This was the first utterance of the right of secession made in Congress.

RANDOLPH, EDMUND JENNINGS (1753-1813). An American statesman; born in Williamsburg, Va.; graduated at William and Mary College; joined the cause of the colonies against Great Britain at the outbreak of the Revolution; elected to the Virginia constitutional convention (1776); chosen first attorney general under the new state constitution (1776); member of the Continental Congress from 1780-1782; became governor of Virginia from 1786-1788; appointed attorney general of the United States by Washington (1789) while working at a codification of the Virginia laws; succeeded Jefferson as secretary of state (1795); was counsel for Aaron Burr (1807).

ROUTHIER, HON. ADOLPHE BASILE (1839-1920). Born at St. Placide, P.Q. Educated at College Ste. Thérèse and Laval University, taking B.A. (1858); called to bar (1861); created queen's counsel (1873); puisne judge of Superior Court of Province of Quebec. Judge of Vice Admiralty Court (1897); president of St. Jean Baptiste Society. Declined appointment to lieutenant governorship of the Northwest Territories (1897). Wrote under the nom de plume of "Jean Piquefort"; a noted orator; appointed knight commander of the order of St. Gregory by the Pope.

RUSH, RICHARD (1780-1859). Born in Philadelphia; admitted to bar (1800); attorney general of Pennsylvania and United States comptroller (1811); United States attorney general (1814-1817); secretary of state (1817); minister to England (1817-1825); secretary of treasury (1825); Smithsonian commissioner to England (1836-1838); minister to France (1847-1851).

RUTLEDGE, JOHN (1739-1800). American politician and jurist; born at Charleston, S. C.; studied law in England, and began to practise in Charleston in 1761; sent as a delegate to the Stamp Act Congress (1765); sat in the South Carolina Convention of 1774 and the Continental Congress of the same year; in 1776 appointed chairman of the committee which framed the new constitution for South Carolina; became first president under that constitution; was governor of South Carolina in 1779; served during the Revolutionary War with the Army of the South; served in Congress from 1782-1783; was chancellor of South Carolina (1784); member of the convention which framed the Federal Constitution (1787); appointed an associate justice of the United States Supreme Court (1789-1791); chief justice of South Carolina (1791-1795).

SANFORD, EDWARD TERRY (1865-), judge, was graduated from the University of Tennessee and Harvard. Assistant attorney general of the United States, 1907-08, and judge of the Eastern and Middle Districts of Tennessee, U. S. Courts, from 1908 to 1923, when he was appointed an associate justice of the Supreme Court by President Harding.

SMITH, ROBERT (1757-1842). Jurist; was born in Lancaster, Pa.; was graduated from Princeton (1781); served during the Revolution; studied law, and was admitted to the bar; was state senator from Maryland (1793); member of the house of delegates (1796-1800); secretary of the navy (1802-1805); attorney general of the United States (1805); secretary of state (1809-1811); declined chief judgeship of the district of Baltimore (1806).

SOLEY, JAMES RUSSELL (1850-1911). Lawyer, author; born in Boston, Mass.; educated at Harvard College and Columbia University Law School; professor United States Naval Academy (1872-1882); professor United States navy (1876-1890); department of education Paris Exposition (1878); assistant secretary of the navy (1890-1893); member New York bar since 1893; Venezuelan counsel at Paris Arbitration, Venezuela and British Guiana Boundary (1899); lecturer Naval War College, Newport, R. I.

STANTON, EDWIN McMASTERS (1814-1869). American statesman; born at Steubenville, Ohio; a successful lawyer; attorney general of the United States (1860); secretary of war (1862-1868); made associate justice of the United States Supreme Court (1869), but did not live to assume his new duties.

STORY, JOSEPH (1779-1845). Eminent jurist; graduated from Harvard College (1798); admitted to bar (1801); in state legislature (1805); in Congress (1808); associate justice United States Supreme Court (1811-1845); professor of law, Harvard (1829-1845). His legal writings and decisions are now in use.

STRAUS, OSCAR SOLOMON (1850-1926). Lawyer; born in Rhenish Bavaria; came to the United States (1854); received degrees from several universities; practised law (1872-1881); became member of L. Straus & Sons, importers of pottery and glassware; minister to Turkey (1887-1889, 1898-1901); member permanent court of arbitration at The Hague since 1902; secretary of commerce and labor (1906-1909); minister to Turkey (1909-1911).

SUTHERLAND, GEORGE (1862-), jurist, born in England, for many years practiced law and held local offices in Utah. Member of the Fifty-seventh Congress, 1901-03, Senator from Utah, 1905-17. Associate justice of the Supreme Court from 1922 by appointment of President Harding. President American Bar Association, 1916-17.

TANEY (*taw'ni*), **ROGER BROOKE** (1777-1864). A celebrated American jurist; born in Calvert County, Md.; admitted to the bar (1799); attorney general of the United States (1831); succeeded Duane as secretary of the treasury; chief justice of the Supreme Court (1836-1864); rendered his most famous decision in the Dred Scott case; he denied the right of the president to suspend the writ of habeas corpus.

TAYLOR, HON. SIR THOMAS WARDLAW (1833-1917). Born in Scotland; educated at Edinburgh, taking B.A. (1852), and Toronto M.A. (1856); called to Toronto bar (1858); referee under Act for Quieting Titles (1869); master in Chancery (1872); queen's counsel (1881); puisne judge of Queen's Bench (1883); chief justice of Manitoba (1887); administrator to Province (1893); royal commissioner (1886, 1895); knighted (1897); author of important legal treatises.

VAN DEVANTER, WILLIS (1859-). American jurist; educated at DePauw University and Cincinnati College; city attorney of Cheyenne, Wyoming; chief justice of Wyoming supreme court; assistant United States attorney general (1897-1903); professor of equity pleading and process (1898-1903); of equity jurisprudence, Columbia University (1902-1903); associate justice United States Supreme Court (1910).

WAITE, MORRISON REMICK (1816-1888). American jurist; born at Lyme, Ct.; admitted to the bar (1839); member of Ohio legislature (1849); appointed (1871) to represent the United States at tribunal for arbitration of the *Alabama* and other claims at Geneva; chief justice of the Supreme Court of the United States (1874-1888).

WHITE, EDWARD D. (1845-1921). American jurist; educated at Mt. St. Mary's Jesuit College, New Orleans, and Georgetown College, Washington; served in Confederate army; admitted to bar (1868); state senator (1874); associate justice of Supreme Court, Louisiana (1878); United States senator (1891-1894); associate justice United States Supreme Court (1894-1910); chief justice (1910).

WHITNEY, SIR JAMES PLINY (1843-1914). Distinguished Canadian queen's counsel and legislator. Educated at Cornwall Grammar School; called to bar (1876); created queen's counsel (1890). Member (and now premier) of the Ontario Assembly since 1888. Fine orator; identified with bill to punish bribery. Member of commission to revise Ontario statutes; of council of Trinity College, Toronto. Vice-president Liberal Conservative Union of Ontario (1896).

WILLIAMS, GEORGE HENRY (1823-1910). Jurist; born in New Lebanon, N. Y.; admitted to the bar (1844); judge of the first judicial district of Iowa (1847-1852); chief justice of Oregon territory (1853-1857); U. S. senator from Oregon (1865-1871); member Joint High Commission to settle *Alabama* claims; attorney general of United States (1872-1875).

WIRT, WILLIAM (1772-1834). American lawyer, statesman, author; born at Bladensburg, Md.; settled in Richmond in 1806, and won distinction for prosecution of Aaron Burr; member of Virginia legislature (1807-1808); United States district attorney (1816); attorney general (1817-1829); nominated for president in 1832 by Anti-Masonic party.

CONTEMPORARY BIOGRAPHY.

ADAMS, MAUDE (1872–) was born in Salt Lake City as Minnie Kiskadden, but adopted the maiden and stage name of her mother, who attained some fame in a stock company. After attracting attention in children's parts, at sixteen she joined the E. H. Sothern Company in New York, gradually rising to eminence as a conscientious and finished artist on the stage. Later she was in Charles Frohman's Company, and then supported John Drew. Besides being good in various Shakespeare roles, she was greatly praised in *Peter Pan*, *The Little Minister*, *Chanticleer*, and *What Every Woman Knows*.

ALLENBY, SIR EDMUND (1861–), a distinguished English general, began his military career with the expedition to Bechuanaland in 1884, after which he also engaged in the campaigns in the Zulu War and the war in South Africa. During the World War he was placed in command of cavalry, which invaded Palestine from Egypt, and, after a brilliant campaign, captured Jerusalem from the Turks in December, 1917. Further victories followed and culminated in the battle of Samaria in September of the next year, when the forces of General Allenby routed one hundred thousand Turks instructed by a German field marshal, capturing the larger part of the enemy and 350 guns. This campaign led to far-reaching results with regard to Palestine and the rule of the Turk in Asia Minor.

ALMA-TADEMA, SIR LAWRENCE (1836–1912), of Dutch ancestry, was born in Friesland, studied painting at Antwerp and under Baron Leys, acquiring a classical style. After 1870 he settled in England, and later became a British subject, being made a member of the Royal Academy in 1879 and a knight in 1899. All his paintings are notable for accuracy in the manner, history, and spirit of the past; so far as details of archaeology are concerned, they have been pronounced preeminent. He attained considerable success in painting marble. Some of Alma-Tadema's best works are *The Children of Clotilde*, *Vintage Festival*, *Seasons*, and *Roses of Heliogabalus*.

ALTSCHULER, MODEST (1873–), Russian orchestra conductor, from 1886 to 1890 was a pupil at the Moscow Conservatory, and in 1903 brought to New York the Russian Symphony Orchestra, which introduced Russian music into many centers of America. Among the artists first presented by him are Elman, Lhevine, Rachmaninov, and Skriabin.

ANDREEV, LEONID N. (1871–1919), one of the greatest modern Russians, studied law, but soon turned to literature and was assisted to fame by Maxim Gorky. For a time he acted as an expert court reporter for a Russian newspaper. From the first collection of short stories in 1901 until Andreev died heartbroken because he could not adjust himself to new conditions after the Revolution of 1917 in Russia, he issued a large number of works of great merit. His *Red Laugh*, founded on the Russo-Japanese War, is a stern indictment of all warfare; *To the Stars* is a four-act poetic drama; *Silence and Other Stories* contains some of his best narratives; *Anathema*, a tragedy in seven scenes, sounds the depths of despair; and his *Sorrows of Belgium*, written during the War of Nations, is an eloquent tribute to the courage of the Belgians. Among his best-known works in America because of excellent translations is his *Life of Man*, a mystery play; and *He Who Gets Slapped*, a morality.

ANGELL, JAMES ROLAND (1869–), was graduated from the University of Michigan, of which his father was president for many years, in 1890; became assistant professor, professor, senior dean, and dean of all the university faculties at the University of Chicago, from 1894 to 1919. In 1918–1919 he was acting president of the University, then did important work in connection with The National Research Council, and as President of the Carnegie Corporation, until he was elected President of Yale in 1921. Dr. Angell holds various earned and honorary degrees and is the author of several important works on psychology.

ANTIN, MARY (1881–), born in Russia, has lived in the United States since 1894, having received her education at the public schools and Girls' Latin School in Boston, with a partial course at Teachers' College and Columbia, New York City, where she married Professor A. W. Grabau in 1901. Her books, notably *The Promised Land* and *They Who Knock at our Gates*, tell the stories of our immigrants and their first impressions of American life.

APPONYI, COUNT ALBERT (1846–), for a number of years was identified with the Liberal Party in Hungary, but resigned in 1904 to form the National Party. Among many offices, he was a member of parliament in Hungary during the War of Nations, for a time acting as speaker. He was one of the official representatives of Hungary at the Peace Conference in Paris in 1919. Count Apponyi has visited and lectured in the United States four different times.

ASTOR, NANCY WITCHER, VISCOUNTESS (1879–), was born in America, the daughter of Chiswell D. Langbourne of Greenwood, Virginia. She married William Waldorf Astor, later created Viscount, and represented the Sutton Division of Parliament after the death of her husband in 1919. She was the first woman to sit in the English Parliament. In 1923 she wrote *My Two Countries*.

BAKER, GEORGE FISHER (1840–), capitalist and philanthropist, was a native of Troy, N. Y. He has for many years been interested in various financial interests, including chairmanships of boards of banks and directorships of railroads, including the First National Bank of New York, the New York and Long Branch Railroad, U. S. Steel Corporation, Erie Railroad, American Telephone and Telegraph. As one of the trustees of the Metropolitan Museum in New York, he has taken interest in art, to which he has given large sums. Mr. Baker also gave the famous painting *Salome* in 1916 to the Metropolitan Museum; considerable sums for chemistry and other purposes to Cornell University; five millions to endow the Harvard Graduate School of Business Administration; and large gifts to Yale and various other educational and philanthropic institutions.

BAKER, GEORGE PIERCE (1866–), received his A. B. from Harvard in 1887 and a doctorate in literature from Allegheny College in 1915. He was an instructor and since 1905 a professor of English and of Dramatic Literature at Harvard; called to Yale in 1925 to organize a department of dramatics in the School of Fine Arts and establish a university theatre. As a director of the "47 Workshop," a course in playwriting at Harvard, Mr. Baker trained some of the prominent younger dramatists of America; he also assisted in various movements looking toward the dignity and professional honor of dramatic composition. In 1921 he wrote *The Pilgrim Spirit* and directed the production of this pagent for the Tercentenary Celebration at Plymouth, Mass. Previously he had made notable contributions to the literature of argument in his book *The Principles of Argumentation*, for college courses in debating, and in his *Development of Shakespeare as a Dramatist* and *Dramatic Technique*, a discussion of fundamentals in play construction.

BAKER, RAY STANNARD (1870–), journalist and author, received his collegiate training at the Michigan Agricultural College and the University of Michigan. After several years as a reporter in Chicago, he became identified with the McClure publications, acting as associate editor of *McClure's Magazine* for six years and as one of the editors of the *American Magazine* from 1906 to 1915. Mr. Baker directed the press bureau of the American Commission to Negotiate Peace with Germany and published in 1919 *What Wilson Did at Paris* following by *Woodrow Wilson and World Settlement, a History of the Peace Conference*, in three volumes, in 1922. Mr. Baker also compiled the *Boy's Book of Inventions*, 1899, of which a second book was published in 1903. Under the pseudonym of David Grayson, he also wrote a number of discussions like *Adventures in Contentment*, *The Friendly Road*, and *Great Possessions*.

BALDWIN, JAMES MARK (1861–), psychologist and author, was born in South Carolina, educated at Princeton, and received several honorary degrees, including the first honorary Sc. D. ever given by Oxford University. He was successively professor of philosophy at Lake Forest College, University of Toronto, Princeton, Johns Hopkins, and the National University of Mexico. Since 1913 he has devoted himself to lecturing and teaching abroad, being a member of many learned societies and receiving several decorations, including the Cross of the Legion of Honor, bestowed in person by the president of France. Besides being editor of the *Psychological Review* for fifteen years, he and assistants compiled the *Dictionary of Philosophy and Psychology*, completed in 1906. Some of his original works are *Handbook of Psychology, Story of the Mind, Darwin and the Humanities, History of Psychology, American Neutrality*.

BALDWIN, STANLEY (1867–), Prime Minister of Great Britain and First Lord of the Treasury, was educated at Harrow, and Trinity College, Cambridge. He entered Parliament in 1908; became Financial Secretary of the Treasury, 1917; President of the Board of Trade, 1921; and Premier on the resignation of Ramsey McDonald in 1923.

BALMONT, KONSTANTIN D. (1867–), one of the founders of the modern symbolist poetry, has translated many English works into his native Russian, including Poe, Shakespeare, and Whitman. He has also translated Ibsen, Calderon, some German, Polish, and Sanskrit works. Some of his own poems include *Under Northern Skies, Burning Buildings, Let Us Be Like the Sun,* and *Phlox Clusters,* the last after a journey to Mexico.

BANTING, FREDERICK GRANT (1891–), born near Allison, Ont., and educated at the University of Toronto. Enlisted in the ambulance corps in 1914, and was discharged because of wounds received at Cambrai. In 1920 settled at London, Ont., as a practicing physician and demonstrator of anatomy at Western University. At the age of 30 he discovered insulin in the laboratory of Prof. J. J. McLeod at Toronto, with the assistance of Dr. C. H. Best and with some help also from Dr. J. J. Collip. This remedy, refined from an extract of the pancreas of sheep, is used in diabetes, allowing sufferers to live for years in comfort. Banting was awarded the Nobel prize in medicine, which he shared with his colleagues. He is now Banting-Best Professor at the University of Toronto.

BARBUSSE, HENRI (1874–), in 1916 became famous over night after he published in French his novel, *La Feu,* which is the story of the poilu in the trenches, with his thoughts, ideals, and language. For this work, though it is anti-militaristic, he was awarded the Prix Goncourt. Barbusse since 1917 has allied himself with the internationalists and moderate socialists as the center of a society for promoting humanitarian ideals.

BARRON, CLARENCE WALKER (1855-1928), editor and financial authority, has lived in Boston most of his life. After eight years with the *Boston Transcript,* he founded the *Boston News Bureau* and later the *Philadelphia News Bureau,* tabloid journals devoted mainly to financial news. He is also connected with the *Wall Street Journal, Barron's Financial Weekly,* and other financial and civic organizations, including the Cohasset Harbor Improvement Association and the Massachusetts Inland Waterways Commission. Mr. Barron also wrote *The Federal Reserve Act, The Audacious War, The Mexican Problem, A World Remaking.*

BARTON, CLARA (1821–1912), for many years president of the American Red Cross Society, was born in Massachusetts. She founded a school at Bordentown, N. J., entered the government service in the war department in 1854, and at the outbreak of the Civil War resigned to devote her attention to humanitarian service at the front. She was honored by Lincoln, and after the war marked the graves of some 12,000 Union soldiers who were buried in the South. In the Franco-Prussian War of 1870 she engaged in social service, was decorated by several governments, and in 1881 became president of the American Red Cross, a position she held till 1904. Largely by her suggestions the scope of the Society was changed to include relief work in times of distress other than war, including her services at the time of the Johnstown, Pa., flood, Russian famines, Armenian disasters, and the Galveston flood.

BEATTY, DAVID (1871–), created Earl of the North Sea and Brooksby in 1919, distinguished himself during the World War at various times. He was made a rear admiral in 1910, vice admiral in 1915, admiral in 1919. He was in command of the Grand Fleet of England from 1916 to 1919, and in the Battle of Jutland Banks successfully engaged the Germans in 1916. He was made a Grand Officer of the Legion of Honor. Admiral Beatty married Ethel, oldest daughter of the late Marshall Field of Chicago.

BECK, JAMES MONTGOMERY (1861–), solicitor general of the United States from 1921 to 1925, was educated at the Moravian College at Bethlehem, Pennsylvania. Admitted to the bar in 1884, he held successively positions as U. S. attorney in eastern Pennsylvania and assistant U. S. attorney general, and then from 1903 to 1921 was a member of law firms in New York City. Delivered many orations on various notable occasions. Author of *War and Humanity, The Passing of the New Freedom,* and *The Constitution of the United States.*

BEEBE, WILLIAM (1877–), leader of the expedition in 1925 to study the Sargasso Sea in the Atlantic Ocean, since 1899 has been honorary curator of birds in the New York Zoological Society. He is the member or fellow of many learned societies in America and abroad, and the author of *The Bird, Our Search for A Wilderness, Tropical Wild Life, Edge of the Jungle, Galapagos and World's End.*

BENET, WILLIAM ROSE (1886–), has written several volumes of poetry, among which are *Merchants from Cathay, The Falconer of God, The Burglar of the Zodiac,* and *Moons of Grandeur.* For a number of years after his graduation from Yale in 1907 he was a free lance writer in California, editor and reader connected with magazines in New York, until he joined the staff of the *Literary Review,* of the *New York Evening Post,* established by Henry Canby in 1920, and later with him a member of the staff also of the *Saturday Review.* Mr. Benet is also widely known as a writer of genial and humorous comment on books and authors.

BERGER, VICTOR L. (1860–), first socialist ever elected to the United States Congress, was born in Austria-Hungary, but came to America in 1878. For many years he was connected with various socialist journals in Milwaukee and with the executive committee of the Socialist Party from 1898 to 1923. From 1911 to 1913 he served in the House of Representatives, being again elected in 1918 and in 1919 but refused admission. In 1923 after the U. S. Supreme Court had reversed a decision of Judge Landis sentencing Berger to twenty years in prison for aiding the enemies of the United States in time of war, Berger was again sent to Congress and then admitted without opposition. Author of many essays on social and economic topics.

BERGSON, HENRI (1859–), French philosopher, was educated in Paris, taught school, and then took the doctorate in letters in 1889. In 1900 he became a professor at the College of France; in 1913 he came to America and lectured at Columbia University, New York; and in the same year was elected president of the English Society of Psychical Research, to which he has given considerable attention. Some of his books are *Time and Free Will, Matter and Memory,* and the *Creative Evolution,* upon which his fame securely rests. He also wrote *The Meaning of War.*

BERNHARDI, FRIEDRICH VON (1849–), general in the German armies and interpreter of the necessity of militarism, first became widely known abroad as the author in 1911 of *Germany and the Next War,* which many have taken to be a representative account of the point of view of the German military party. Among other things of interest, Bernhardi said that the World War was determined by conflicting forces as early as 1902. To men like Bernhardi war appears as a biological necessity, and the dream of peace as only evidence of a weak and placid era. Bernhardi doubts the sincerity of those who organize movements like that of the Hague Conference, since he believes many such are only cloaks to mask selfish and national ambitions, according to stern necessity of national growth and expansion. Another book of his, somewhat widely read, is *How Germany Makes War.*

BETHMANN-HOLLWEG, THEOBALD T. VON (1856–1921), German chancellor at the outbreak of the World War, was a friend of the Kaiser when both attended the same school. He entered the Civil Service in 1879, held various political offices, such as the presidency of Potsdam; was Prussian Minister of Education in 1905; Imperial Secretary of Interior in 1907, and Imperial Chancellor in 1909. At the outbreak of the World War, Bethmann-Hollweg inclined to the view that the neutrality of Belgium was of much less importance than maintaining the friendship of England. His famous "scrap of paper" phrase meant that England should not allow a smaller concern like Belgium to stand in the way of friendship for Germany. Through the growing influence of the Junker militarists, Bethmann-Hollweg, at heart a moderate and somewhat peaceful man, finally was forced to give way, and he was replaced by the appointment of another to his position in July, 1917.

BEVERIDGE, ALBERT JEREMIAH (1862-1927), was born in Ohio, but has lived most of his life in Indianapolis. He read law in the office of Senator McDonald, entered the firm, but afterward singly became identified with many important legal cases. Early attaining a great reputation as a speaker, Mr. Beveridge for years was a chief campaign orator for the Republican Party, until in 1912 he became chairman of the Progressive Convention in Chicago. He was senator from Indiana from 1899 to 1911. Mr. Beveridge wrote many notable books, some of which are *The Young Man and the World, The Bible as Good Reading, The Invisible Government,* and an elaborate biography of Chief Justice John Marshall, in four volumes, completed in 1919. This promises to rank among the great biographies.

BIERCE, AMBROSE (1842–1914), an original genius in American letters, after his early life in Ohio, entered the Civil War and at the end was brevetted a major for gallantry. He then became intimately identified with the literary life of San Francisco, writing for the *Overland Monthly,* and editing in turn the *Argonaut* and the *Wasp.* After 1872 he lived for many years in London, where he worked on several humorous papers and compiled a series of volumes. Bierce is best known, however,

by his short stories, many of which, though cynical, show marks of true art and craftmanship. His best volumes are *Can Such Things Be?* and *Tales of Soldiers and Civilians.* Bierce acted as war correspondent in Mexico in 1914, and never returned, presumably having been killed in some skirmish.

BINET, ALFRED (1857–1911), French psychologist and mathematician, studied law and medicine, but soon abandoned thought of either as a profession. Binet may be called the father of the measuring scales to determine intelligence. For many years he worked to devise a series of tests, eventually leading to the celebrated Binet-Simon group, finally perfected in 1909. Altogether more than 90 tests of this nature have been devised in Europe and America since the pioneer work of Binet.

BISPHAM, DAVID S. (1857–), the great baritone singer, was born in Philadelphia and was educated at Haverford College, with a thorough musical training in England and Italy. He made his first appearance on the opera stage in 1891, and for years was one of the leading singers at Covent Garden, London, and the Metropolitan Opera House in New York. Later he attained unusual fame as a concert singer, teacher and critic of music. An ardent advocate of the use of English in opera and concert, Bispham was greatly applauded in his renderings of translation of German and other foreign songs. In opera Wagner rôles were among his favorites.

BLAKELOCK, RALPH ALBERT (1847–1919), one of the greatest landscape artists of his age, after graduation from the City College of New York, educated himself as a painter. From the first crude beginnings he rose rapidly to the heights of his art, using evening and moonlight subjects and Indian life and color as his chief themes. Some of his best works are *Indian Girl, Autumn, Pipe Dance,* now in the Metropolitan Museum, New York, and *Moonlight,* for which the Toledo Museum paid twenty thousand dollars. During the latter part of his life, except for two or three years, he was confined in the state hospital for the insane at Binghamton, New York, but he died at the camp of a friend in the Adirondacks.

BLASCO-IBANEZ, VINCENT (1867-1928), socialist, journalist, and author is best known in America for his *Four Horsemen of the Apocalypse.* He early abandoned the law for writing and soon embraced republican principles, for which at different times he was a political prisoner in Spain. Recently, from his home in France he has carried on an energetic campaign to introduce greater democracy into Spanish life and politics, advocating also the establishment of a republic. Other notable novels by this author are *The Shadow of the Cathedral, Blood and Sand,* *Woman Triumphant.*

BLISS, TASKER HOWARD (1853–), studied for two years at Bucknell University and then completed a course at West Point, receiving in 1884 honors in the U. S. Artillery School. General Bliss was professor in the Naval War College from 1885 to 1888. He rose from the rank of first lieutenant to that of General, which he attained on October 6, 1917, reaching the age of retirement in the following December. By presidential order General Bliss was kept on active duty. He was then a member of the Allied Conference in 1917, of the Supreme War Council in France, of the Commission to Negotiate Peace with the Central Powers in 1818–9, after which he was detailed as governor of the U. S. Soldiers' Home in 1920. By act of Congress in 1918 he was brevetted general and awarded the U. S. Distinguished Service Medal.

BOK, EDWARD WILLIAM (1863–), was brought to the United States from Holland at the age of six and received his educational training in the Brooklyn schools. At the age of 19 he edited the *Brooklyn Magazine* and then conducted a syndicate press from 1886 to 1891. From 1889 to 1919 he edited the *Ladies' Home Journal* and was vice president of the Curtis Publishing Company. In 1923 Mr. Bok gave one hundred thousand dollars to establish a Peace Award, which was won by Charles H. Levermore (q. v.). Mr. Bok wrote *The Young Man in Business, Why I Believe in Poverty, The Americanization of Edward Bok, A Man from Maine.*

BORAH, WILLIAM EDGAR (1865–), was born in Illinois and attended the University of Kansas. Since 1889 he has practiced law in Kansas and Boise, Idaho, until he was elected a senator from Idaho in 1907 and re-elected twice since then. From 1908 to 1912 he was a member of the National Republican Committee, but since then he has allied himself with progressive elements in Congress. Chairman of the Foreign Relations Committee of the U. S. Senate.

BRANTING, KARL HJALMAR (1860–1925), a Swedish statesman, was born in Stockholm and received his university education at Upsala. For many years he was active as a journalist and interested in the democratic movements of his country. He entered the Parliament of Sweden in 1896 and served as premier at three different times in 1920 and 1921. He was a delegate to the Assembly of the League of Nations at Geneva from 1920 to 1922. The Nobel Peace Prize, for the most constructive services in the interests of peace, went to Branting in 1921.

BRENT, CHARLES HENRY (1862-1929), bishop and humanitarian, was born in Canada, trained for the priesthood of the Protestant Episcopal Church at Trinity College, Toronto, and has received many honorary degrees from American, Canadian, and Scotch universities. He served as a minister in Boston and Buffalo until he was consecreated bishop of the Philippines in 1901. After being elected bishop of Washington (twice) and of New Jersey, he became bishop of Western New York in 1918. Being recognized as an authority on the opium traffic, Bishop Brent served on several commissions, including the International Opium Conference, 1908–9; the Opium Conference at the Hague, 1911, being president of the Conference in 1911–12, and adviser to the League of Nations in regard to control of narcotics in 1923. He was one of the chiefs of the chaplain service in France in 1918–19, received decorations, and invitations to lecture before colleges and universities. Among Bishop Brent's books are *With God in the World, Liberty and Other Sermons, Leadership, The Sixth Sense, The Mount of Vision.*

BRISBANE, ARTHUR (1864–), distinguished editor and writer on current topics, began newspaper work on the *Sun* in New York, finally becoming editor of the *New York Evening Journal,* 1897–1921. Since May 1918, he has been editor of the *Chicago Herald and Examiner,* being also syndicate writer for various Hearst newspapers. Mr. Brisbane is reputed to be among the most resourceful and most highly paid newspaper-men in the United States.

BUCKLEY, JAMES MONROE (1836–1920), editor, parliamentarian, and church historian, was educated at Wesleyan University, and for a number of years, after taking a course in theology, held pastorates in New Hampshire, Michigan, and New York. During his editorship of the *New York Christian Advocate,* 1880–1912, he was recognized as a powerful influence in the Methodist Episcopal Church. As a parliamentarian he was widely recognized for many years. His best known works probably are *Christian Science and Kindred Phenomena, History of Methodism in the United States, Extemporaneous Oratory for Professional and Amateur Speakers.*

BULLARD, ROBERT LEE (1861–), United States army officer, after graduation from West Point in 1885, rose to become a major general in 1917. In the meantime he served in Cuba and the Philippines and on the Mexican border. He commanded the second brigade, first division in France in 1917, and after the World War remained in charge of various operations along the Rhine till April, 1919. General Bullard will long be remembered as the author of the famous message at the second battle of the Marne, July, 1918, "We are going to counter-attack," which marked the turning point of the conflict.

BURTON, ERNEST DEWITT (1856–1925), theologian and university president, taught in the Newton Theological Institution, but for many years has been connected with the University of Chicago, as professor in the department of New Testament interpretation and literature, director of the university libraries, and after 1923 as president. He is also notable as an editor, chairman of several religious commissions, and author of many books on biblical criticism. Some of his works are *Harmony of the Gospels* (with W. A. Stevens), *Handbook of the Life of Paul, Studies in the Gospel of Mark, Paul's Epistle to the Galatians.*

BYNG, JULIAN (1862–), general, created Baron Byng of Vimy in 1919, in recognition of his services in the World War, has been connected with the English army since 1883, becoming a major general in 1909 and general in 1917. From 1912 to 1914 he served in Egypt, and in 1917 commanded the third army in France, during the various battles near Vimy Ridge. He received decorations from Belgium, Russia, France, and England in consequence of the World War.

CAMP, WALTER (1859–1925), called the father of modern American football, received his collegiate training at Yale, where he received the A. B. degree in 1880. He played Rugby ball in his preparatory school, and as an undergraduate at Yale had much influence in starting football with Harvard. In 1883 he suggested the rule of five yards in three downs, changed in 1906 to four. During the World War, Mr. Camp was chairman of the athletic department of the Navy Commission on Training Camp Activities. Out of this position developed the exercises later recorded on phonograph disks and called the Daily Dozen. His selection of a national All-American football team yearly for many seasons was a national feature of the sport. Mr. Camp was also active in business and as

an author of books of stories and discussions of sports, including *Book of College Sports, American Football, Keeping Fit All the Way, Jack Hall of Yale,* and *Captain Danny.*

CANBY, HENRY SEIDEL (1878–), author and critic, was born in Delaware and educated at Yale, where he began to teach English in 1900. From 1920 to 1924 he was chief editor of the *Literary Review* of the *New York Evening Post* until he founded an independent critical medium known as *The Saturday Review.* Prof. Canby wrote *The Short Story,* an account of short narratives in English from the beginning to 1900, *College Sons and College Fathers,* a group of essays for college students, *Everyday Americans, Definitions,* and other literary and critical essays.

CANNON, ANNIE JUMP (1863–), astronomer, educated at Wellesley College, did special work in astronomy at Radcliffe College, and became connected with the Harvard Observatory in 1897. She made observations of variable stars of long period, photographed large portions of the heavens, and discovered 200 variable stars, 4 new stars, and phenomena of bright lines and variable spectra of many stars. Her catalog of 225,000 stellar spectra fills nine quarto volumes.

CANNON, JOSEPH GURNEY (1836-1926), for many years a member of the U. S. House of Representatives, was born in Guilford, N. C., but lived most of his life in Illinois. After seven years as a states attorney, he entered the House in 1873, retired in 1891, and again from 1893 to 1913 served continuously. From 1903 to 1911 he was Speaker of the House during the 58th to 61st Congresses. He again served, this time the 18th district of Illinois, from 1915 to 1917, having served previously the 12th district.

CARREL, ALEXIS (1873–), for many years a resident of France, where he was educated at the University of Lyons, came to America in 1905 and became connected with the Rockefeller Institute of Medical Research in 1906. In 1912 he won the Nobel prize in science for successfully suturing blood vessels and proving that organs may be transplanted in the human body. He served during the World War in medical military service in France. Dr. Carrel is the author of many notable monographs on surgical methods. For a time after his arrival in the United States he taught at McGill and Chicago Universities.

CARTER, HOWARD (1873–), discoverer of various tombs of great historical interest in Egypt, began his professional life as a painter. He was trained as an explorer under Lord Amherst, Professors Griffith, Flinders Petrie, and Naville, and Sir Gaston Maspero. He was assistant to Professor Petrie in the Amherst expedition of Tel-el-Amarna in 1892; inspector general of antiquities for the Egyptian government, reorganizing the antiquities administration of Upper Egypt. Acting for the Egyptian government, he discovered many tombs, and others as assistant to the Earl of Carnarvon. In 1916 they began an elaborate series of investigations, which led in 1923 to the discovery of the tomb of Tutankamen, of greatest historical and antiquarian value.

CAVELL, EDITH (1866-1915), English nurse put to death by the Germans in Belgium in 1915, was born in Norfolkshire. From 1907 till her death she lived at or near Brussels, having established a school for nurses there, which trained many Belgian and German nurses before the World War. In 1915 she was suddenly arrested as a spy and accused of aiding English and Belgian men who came under her care as nurse. Brand Whitlock, the United States ambassador to Belgium, protested in vain that she be spared; but after some delay and secrecy, she was finally executed in the early morning of October 13, 1915. The death of Edith Cavell stirred the entire world with pity, and served in England to hasten and greatly accentuate the military efforts of the whole people.

CHAPLIN, CHARLES SPENCER (1889–), comedian, was born in London, of theatrical parentage, became attached to theatres at the age of seven, and was engaged in vaudeville in London for a number of years before coming to America. Began as an actor in moving pictures in 1914, with Keystone Film Company, and has continued with Mutual, First National Exhibitors, and National Artists Corporation. In 1917 he executed a contract for eight two-reel pictures for one million dollars. Perhaps *The Kid* is his most famous motion picture. Chaplin received tremendous ovations when he toured Europe in 1921.

CHESTERTON, GILBERT KEITH (1874–), English author and wit, was born in Kensington and educated at St. Paul's School and the Slade School, after which he spent some years reviewing books of art for various magazines. Chesterton then became widely known as the author of various books of comment, in which his wit and paradoxes abound in the midst of sober criticism. Some of his volumes are *Browning* (in English Men of Letters series), *The Club of Queer Trades, Heretics, Dickens, The Man Who Was Thursday, Tremendous Trifles, George Bernard Shaw, Poems, The Superstition of Divorce, What I Saw in America,* and poems, plays, and sketches.

CHURCHILL, WINSTON LEONARD SPENCER (1874–). Entered the army in 1895, and served as war correspondent with the forces of Spain in Cuba, 1895; then in India; and next in South Africa during the Boer War, when he was captured but escaped in about a month, witnessing many important engagements in 1900. Elected to Parliament in 1900; president of the board of trade, 1908–10; home secretary, 1910–11; first lord of the admiralty, 1911–15. Served in France in 1916, and became minister of munitions the next year. Wrote books describing his experiences in various campaigns.

CLARK, FRANCIS EDWARD (1851-1927), born in Quebec of American parentage, was adopted by an uncle and took his name when his own father, Charles C. Symmes, died in 1859. After a successful pastorate of five years in Portland, Maine, he founded the Society of Christian Endeavor, to which since 1887 as president he has devoted his chief attention, serving also as editor of the *Christian Endeavor World.* He circled the globe five times in the interests of the Society, which has been a world institution for many years. Some of Mr. Clark's many books are *World Wide Endeavor, Old Lanterns for New Paths,* and *Training the Church of the Future.*

CLEMENCEAU, GEORGES (1841–), French journalist, physician, and statesman, born in Vendee, spent four years after 1865 in the United States as a teacher and journalist. He was with the army of Grant at Richmond. Returning to France, he practiced as a physician at Montmarte, of which he served as mayor. He was a member of the Chamber of Deputies from 1876 to 1893 and from 1902 to the close of World War. With Zola he espoused the cause of Alfred Dreyfus, and to defend him founded a daily in 1903, in which Zola's celebrated letter "I Accuse" was printed. For many years Clemenceau has been known as the destroyer of ministries by his oratory, his brilliant editorials, and sympathies for the cause of justice. During his first term as premier from 1906 to 1909, the law separating church and state in France was put into effective operation. In November 1917, after the fall of the ministry of M. Painlevé, Clemenceau again became premier, at the age of 76, and succeeded in uniting the various political elements of France in one grand effort toward victory. Always a dominant figure during these last years, during the Peace Conference his influence was felt as president and spokesman for all of France. Having achieved most of his own ideals, especially in the defeat of Germany and the restoration of Alsace-Lorraine, M. Clemenceau retired to a well earned rest from public life.

COBB, IRVIN S. (1876–), humorous author, born in Kentucky, became a shorthand reporter, contributor to comic weeklies, and editor of papers in his native state. Since 1904 he has been connected as staff correspondent or contributor with *New York Sun, Evening World, Saturday Evening Post,* which last he represented as staff correspondent in Europe in 1914–15 and 1917–18. Among his humorous sketches are *Speaking of Operations, Cobb's Bill of Fare,* and *A Laugh a Day.* His short story *The Belled Buzzard* attracted considerable attention. In 1922 Mr. Cobb won the O. Henry prize for the best short story.

COLLIER, WILLIAM MILLER (1867–), born near Auburn, New York, received his college education at Hamilton, became referee in bankruptcy in 1898, and is known as an authority on the subject. He edited American Bankruptcy Reports, 1–12, from 1899 to 1905, and wrote Collier's *Annotated Rules in Bankruptcy,* served also as a lecturer on bankruptcy in the New York Law School for two years. In 1904 he entered the department of commerce as solicitor; served as U. S. Minister to Spain from 1905 to 1909; lectured on international law at the New York Law School from 1912 to 1918; was president of George Washington University, Washington, from 1917 to 1921, when he was appointed Minister to Chili.

COMMONS, JOHN ROGERS, (1862–), economist, authority on labor organizations, was graduated from Oberlin in 1888, taught political economy at Wesleyan University, sociology at Oberlin, at Syracuse, and since 1904 has been a professor at the University of Wisconsin. During much of this time he has been Director of the American Bureau of Research. Some of his works on labor problems are *Trade Unionism, Labor and Administration, Legal Foundations of Capitalism,* and (with others) *History of Labor in the United States.* Professor Commons has served as member of the Wisconsin Minimum Wage Board, President of the American Economics Association, National Consumers League, and National Monetary Association, and as chairman of the Unemployment Insurance Board.

CONRAD, JOSEPH (1857–1924), distinguished author of sea stories and novels, was born in Poland, learned English when he was man grown, became an English subject, and for many years was a captain in the merchant marine. Beginning with his first novel in 1895, *Almayer's Folly*, he produced a score of books of great literary distinction. Conrad is a master of description, as his *Typhoon, Youth and Other Tales*, and *A Set of Six*, and many other short stories, abundantly reveal. Among his best novels are *Lord Jim*, the story of a coward who became a noble soul, *Nostromo, A Tale of the Seaboard, Chance, Victory*, and *The Arrow of Gold*. Most of his characters have known the sea at first hand; and they are usually shown either in conflict with the powers of the ocean, or as swayed on land by inevitable forces that lead them into strange experience. Throughout, the glamor, the mystery, the stern relentless fate of the sea pervades every page. For a person whose original language was not English, Conrad wrote with admirable freedom from affectation or mannerism.

COUÉ, EMILE (1857-1926), born at Troyes, France, was educated at Nancy in arts and sciences. After serving an apprenticeship for three years in a drug store, he went to Paris to study pharmacy, where he won a scholarship of twelve hundred francs yearly. An old druggist at Nancy offered him a partnership and the entire business by will. Before the bargain could be effected, the druggist died, but his widow decided to carry out the terms of the oral contract. Here Coué remained for twenty-four years, gradually enlarging the business, and marrying the daughter of a local horticulturist, who first propagated the modern gladiolus. After 1910, he retired and then began to take pupils into his home and to cure the sick by autosuggestion. Coué never altogether abandoned drugs as curative agents, and he never claimed credit for making remarkable cures. His familiar "Every day, in every way, I am getting better and better" has inspired many to better mental health at least.

CROSBY, FANNY J. (1820–1915), was born in Putnam County, New York, becoming blind at the age of six weeks. Her education was received mainly in the New York Institution for the Blind, where she spent more than twenty years as pupil and teacher, withdrawing on her marriage to Alexander Van Alstyne in 1858. Before she began to write hymns in 1864, she had already published three books of prose and poetry. For forty years she was associated with most of the great hymn composers of the United States, including William B. Bradbury, Ira D. Sankey, William H. Doane, Philip Phillips, and Hubert P. Main. Altogether she wrote upwards of eight thousand hymn poems, a large number of which were set to music and used under her own name and many pseudonyms. For many years she went about delivering addresses to Y. M. C. A. and other audiences in eastern cities.

DANIELS, JOSEPHUS (1862–), editor and former secretary of the United States Navy, has spent most of his life in North Carolina, his native state. For a time he was state printer of North Carolina and chief clerk, Department of the Interior; since 1885 he has been editor of the *State Chronicle*, with which he consolidated the *News and Observer* in 1894. Mr. Daniels was Secretary of the Navy in the Cabinet of President Wilson for eight years, ending in 1921.

DAVIS, JOHN WILLIAM (1873–), lawyer and public official, a West Virginian by birth, received his college training at Washington and Lee University, taught law there for a year, and was a member of a prominent law firm in Clarksburg, West Va., from 1897 to 1913. Having been a member from West Virginia in Congress from 1911 to 1913, he resigned to become solicitor general of the United States, a position he held from 1913 to 1918. He was Ambassador to Great Britain from 1918 to 1921; counsellor of the Red Cross from 1913 to 1918; and a member of the commission appointed to negotiate with the Germans for the exchange of prisoners after the World War. President of the American Bar Association, 1922. Mr. Davis, as Democratic candidate for the presidency in 1924, received 136 electoral votes to 382 for Mr. Coolidge.

DAWES, CHARLES GATES (1865–), financier and vice president, was graduated from Marietta College, practiced law in Lincoln, Nebr., from 1887 to 1892; and then engaged in business and banking interests in Evanston and Chicago, Illinois. Assisted in the movement resulting in the nomination of William McKinley for the presidency in 1896. Controller of the Currency, 1897–1902. Since 1902 served as chairman of the board, Central Trust Company of Illinois. Served in the engineering corps during the World War, attaining the rank of Brigadier General in October, 1918, but resigned from the Army in 1919, and returned to the United States. Director of the Federal Budget in 1921 and president of commission to inquire into the ability of the Germans to manage a budget. Elected vice president in 1924.

DEBS, EUGENE VICTOR (1855-1926) socialist and labor leader, was a candidate for the presidency as a socialist in 1904 and 1912. From 1880 to 1893 he was grand secretary of the brotherhood of locomotive firemen, and then for four years was president of the American railway union. He won a strike on the Great Northern, but later in 1894 was charged with conspiracy, though acquitted, when he attempted to manage a similar strike on western railroads. Having been adjudged in contempt of court, he served a number of months in jail. During the World War, Mr. Debs was arrested for violation of laws against inciting disorders and for a time was imprisoned in the Federal prison at Atlanta. He was pardoned by President Harding. Though in his time considered ultra-radical, Mr. Debs more recently repudiated some propaganda of communists and others.

De MILLE, CECIL B. (1881–), motion picture producer, for ten years with David Belasco and others acted and produced regular dramas. Since 1914 interested in scenic and spectacular motion pictures, some of which are the Ten Commandments, Feet of Clay, Road to Yesterday, and many others. Now president of his own company and officer of many banks.

DENEEN, CHARLES SAMUEL (1863–), governor and senator, was born in Illinois and graduated from McKendree College in 1882. Member of the Illinois House in 1892; served as attorney for sanitary district of Chicago, 1895–6; state's attorney, Cook County, Illinois from 1896 to 1904; governor of Illinois from 1904 to 1913. Defeated Medill McCormick for nomination as senator from Illinois in the primaries of 1924, was elected on the Republican ticket, and served out the unexpired term at the death of Mr. McCormick a few days before his own term was to begin on March 4, 1925.

DESCHANEL, PAUL (1856–1922), member of the French Academy, 1899, orator and statesman, was president of France in 1920, having been elected for a seven year term, but resigned because of ill health. On being made a member of the Chamber of Deputies in 1885, he became known as a brilliant orator and parliamentary leader, especially as an advocate of the separation of the church from the state in France. He served as president of the Chamber from 1898 to 1902 and from 1913 to 1914, and was the author of several social and political volumes.

DE VALERA, EAMMON (1889–), born in New York of an Irish mother and Spanish father, became a professor in Ireland and from 1917 a member of Parliament. In 1917 he also became president of the Gaelic league and was called president of Ireland by his adherents, who vigorously opposed the establishment of the Irish Free State on any other ground than an absolute republic.

DEWEY, JOHN (1859–), author of works on psychology and education, received his A. B. at the University of Vermont and his Ph. D. at Johns Hopkins. He has taught at Minnesota, Michigan, University of Chicago, and since 1904 has been professor of philosophy at Columbia University. He is a member of the National Academy of Sciences and has been president of both the American Psychological and the American Philosophical Associations. Some of his important works are *Study of Ethics, How We Think, Democracy and Education, Human Nature and Conduct*.

DOHENY, EDWARD LAURENCE (1856–), after prospecting for gold and silver for twenty years, turned his attention toward the production of petroleum in 1894. Discovered new fields in California, Mexico, and other regions. President or director of several companies, including the Pan-American Petroleum and Transport Company.

DOLLIVER, JONATHAN PRENTISS (1858–1910), born in West Virginia near Kingwood, received his education there and at West Virginia University, from which he was graduated in 1875. After being admitted to the bar, he emigrated to Iowa, and represented the tenth district of that state in the U. S. Congresses from the 51st to the 56th. In August, 1900, he was appointed U. S. Senator to succeed Hon. J. H. Geer, and served till 1913. He was one of the leading orators and lecturers of his day.

DOUMERGUE, GASTON (1863–), engaged in law practice at Nimes, his birthplace, France, from 1885 to 1890, and acted as magistrate in Cochin China and Algeria, for the next three years. Then he was successively Radical-Socialist Deputy from Nimes, Minister of the Colonies, of Commerce, and of Public Education. In 1917 he represented France in the mission to Russia to persuade the Kerensky regime not to make a separate peace with Germany. On June 13, 1924 he became twelfth President of France, the first Protestant to hold that office.

DUKE, JAMES BUCHANAN (1857–1925), engaged with his family in the tobacco business at Durham, North Carolina, and then in New York organized the American Tobacco Company, and other corporations. In 1912 he became chairman of the board of directors of the British-American Tobacco Company. Mr. Duke gave large sums to charitable enterprises, the most important gifts being to various educational bodies in North Carolina, including a fund of thirty-two millions, a considerable part of which went to Trinity College at Durham, which was renamed Duke University.

EASTMAN, GEORGE (1854–), inventor, manufacturer, and philanthropist, began as an amateur photographer, perfected a system of making dry plates, and originated the Kodak. For many years at the head of the Eastman Kodak Company, Rochester, and other concerns. Being specially interested in music, he has given large sums to develop a civic opera and music center in Rochester, N. Y., and at the University of Rochester, to which he has added considerable money for general purposes. Mr. Eastman also gave millions to the Massachusetts Institute of Technology, and two millions to Hampton and Tuskegee Institutes.

EBERT, FRIEDRICH (1871–1925), first president of the German Republic, was born at Heidelberg. Rising from the people, first a maker of saddles, he early became a leader in the Social Democratic Party and editor of a party organ in Bremen. After many years he was finally elected to the Reichstag in 1912. During the World War he endeavored to unite all social elements into harmonious action, and after the war he led in uniting sentiment of Germans for a republic. Elected president first in 1919, he was voted an extension of his term to 1925, but he died on February 25, 1925, before the end of his term.

EHRLICH, PAUL (1854-1915), authority on the making of serums, was born in Silesia, received his M. D. in 1878, and in 1890 became a professor in Berlin. In 1896 he became attached to the Royal Institute of Serum Research at Steglitz, which as director he transferred to Frankfort three years later. In 1908 he received half of the Nobel prize in medicine for that year. Though he perfected ways of making and propagating serums, his greatest discovery was an arsenical preparation now called salvarsan (Ehrlich 606) and neosalvarsan (Ehrlich 614), now valuable in the treatment of blood diseases.

EINSTEIN, ALBERT (1874–), formulator of the theory of relativity, was born of Jewish parents in Germany. For years he was professor in the technical institute at Zurich, but returned to Germany about the time of the World War, and was a professor in the Kaiser Wilhelm Academy of Research. He refused to sign the manifesto of German men of science denying responsibility of Germans for the war; and afterwards he eagerly championed the cause of the Republic. His theories of relativity were first announced in 1905 and extended in 1915. Certain astronomical tests and observations of total eclipses of the sun by many are said to confirm the main essentials of his theory.

ELMAN, MISCHA (1891–), eminent violinist born in Russia, played in public at the age of five, and then studied for five years with Fiedelmann at Odessa, afterward accepting the invitation of Prof. Auer to become his pupil at St. Petersburg in 1902. At the age of 13, Elman was greeted as a finished artist in several European capitals. With the Russian Symphony Orchestra he came to the United States in 1908, and since then has toured the country six times.

FAIRBANKS, DOUGLAS (1883–), actor, was born in Denver and educated at the East Denver High School and Colorado School of Mines. Married, second, Mary Pickford in 1920. First appeared in New York in regular plays, including *Frenzied Finance, Gentleman of Leisure, Henrietta,* and *Show Shop.* Since 1916 he has starred in his own company producing motion pictures, some of which have been *His Majesty the American, The Mollycoddle, The Mark of Zorro, The Musketeers, Robin Hood, The Thief of Bagdad.*

FAISAL (1885–), King of Iraq, is the third surviving son of Hussein, King of the Hedjaz. He was educated at Mecca and at Constantinople, where his father was living at request of the Sultan of Turkey. For a number of years Faisal was interested in politics in Turkey and in 1917 assisted the Allies in their Egyptian campaigns. At the Peace Conference at Versailles he represented Syria. In 1920 he became King of Syria, but the French entered Damascus, after which Great Britain recognized Faisal as King of Iraq under British mandate.

FARRAND, LIVINGSTON (1867–), received his A. B. from Princeton in 1888 and honorary degrees from various colleges. Took an M. D. at the Columbia Medical School, New York, and later studied in Cambridge and Berlin. Instructor at psychology 1893–1901 at Columbia, and from 1901 professor of psychology and later of anthropology till 1914. President of the University of Colorado, 1914 to 1919, and then Chairman Central Committee of the Red Cross till October, 1921, when Dr. Farrand became president of Cornell University. An authority on tuberculosis.

FARRAR, GERALDINE (1882–), singer, was educated in the public schools of Melrose, Mass., where she was born, and for music in Paris and Berlin. Her first appearance in opera was in Germany in 1901 as Marguerite in *Faust.* Some of her later roles in Berlin and at the Metropolitan Opera House, New York, from 1906 to 1922 are Madame Butterfly, Manon, Mignon, Tosca, Juliet, and Violetta.

FOCH, FERDINAND (1851-1929), one of the marshals of France, became an international figure during the World War as generalissimo of all the allied armies against Germany, to which position he was appointed by the suggestion of both America and England. From 1870 to the time of the war, Foch fought against Prussia, became professor of strategy and tactics and later, 1910, commander of the war college of France. After he successfully withstood the German advance toward Calais, and won a decisive victory at Ypres, and laid some of the plans that aided Joffre at the Marne, Foch became known as a master tactician. He was placed in supreme command of all the allies on March 26, 1918, blocked the fifth German drive on July 18, and gradually forced the German Armies back toward the borders of France. After the World War Marshal Foch was placed in charge of the military preparations looking toward the enforcement of the guarantees made by Germany. On his visit to the United States in 1921 Marshal Foch was acclaimed in the principal cities.

FORAKER, JOSEPH BENSON (1846–1917), United States Senator from Ohio from 1897 to 1909, served in the Civil War, received his degree from Cornell 1869; and was an attorney and judge in Ohio from 1869 to 1882, when he resigned because of ill-health. Entering politics, after being defeated in Ohio for the governorship in 1883, he was elected in 1885 and 1887, but again lost two years later. From 1886 to his death he was prominent in most of the national Republican conventions, and helped shape the policies of the Republican Party. In both 1896 and 1900 he nominated William McKinley.

FORBES, BERTIE CHARLES (1880–), born in Scotland, was educated in the evening school of University College, Dundee. He learned shorthand at 13, acted as a printer's devil at 14, and editorial writer at 19. Going to South Africa, he assisted in founding the *Rand Daily Mail,* but since 1904 Forbes has lived in New York. He has been reporter and financial editor of the *Journal of Commerce,* and the *New York American* (1912–16), also writing numerous syndicate articles on various topics. Some of his books are *Business and the Business of Life, Keys to Success, Teamwork, The Highest Possible Wage and How to Earn It,* and *Men Who Are Making the West.* He resigned from the *American* to found his own magazine, which he has edited and published since 1916.

FORD, HENRY (1863–), creator largely of the Ford industries, received a district school education at Greenfield, Mich., his birthplace, learned the machinist's trade, and was for a time chief engineer for the Edison Illuminating Company in Detroit. In 1903 he organized The Ford Motor Company, a concern that by 1925 was turning out 3,500 cars a day and employing 75,000 persons. Mr. Ford established a system of profit sharing, increased the wages of his employees to a high level, and interested himself in editorial, charitable, and social schemes. He built the Henry Ford Hospital, costing five millions.

FOSDICK, HARRY EMERSON (1878–), clergyman and author, received degrees from Colgate, Union Theological Seminary, and Columbia, and honorary degrees from several other institutions. Ordained in the Baptist ministry, he was pastor of the first church in Montclair, N. J., from 1904 to 1915. Professor in Union Theological Seminary of practical theology since 1915, after serving as instructor in homiletics from 1908 to 1915. Dr. Fosdick attracted national attention when he retired from acting as assistant minister of a Presbyterian church in New York City, in 1924, which position, since he is a Baptist, subjected him to criticism from those who disagreed with him on points of creed and church policy. He refused to become a Presbyterian that he might continue more acceptably to the church at large in the pastorate of a church of this denomination. His books, which have been widely popular, are represented by *The Manhood of the Master,* 1913; *The Challenge of the Present Crisis,* 1917; *The Meaning of the Service,* 1920, and *Twelve Tests of Character,* 1923.

GABRILOWITSCH, OSSIP (1878–), was born in St. Petersburg and studied piano under Rubenstein and Leschetizky, taking the Rubenstein prize at the St. Petersburg Conservatory in 1894. Since 1900 he has made many concert tours in the United States, and since 1918 has conducted the Detroit Symphony Orchestra, having previously conducted in Munich from 1910 to 1914. Married Clara Clemens, daughter of "Mark Twain" in 1909.

GALLI-CURCI, AMELITA (1889–), born of Italian and Spanish parentage and educated in Milan, Italy, became a great prima donna without the help of professional teachers. She studied piano and composition at Milan and acted as professor there in the Conservatory when she was 19. She appeared first as Gilda in *Rigoletto* at Rome, toured the principal cities of Europe and South America, and came to sing in Chicago with the local Opera Association in 1916. Later she appeared in New York, and since 1921 has appeared at the Metropolitan Opera House, some of her main characters being Violetta in *La Traviata*, Madame Butterfly, Juliette, Lucia in *Lucia di Lammermoor*, Mimi in *La Boheme*, Elvira in *I Puritani*, and Leila in the *Pearl Fishers*. Her voice is remarkable for range and richness of tone.

GANDHI, MOHANDAS KARAMCHAND (MAHATMA) (1868–), was born at Probandar, India. Parents independent members of the Jainist cult, those who refuse to harm any living creature. His education was completed in England from 1888 to 1891. For several years he practiced law at the Supreme Court of Bombay, but gave this up as distasteful. From 1893 to 1914 much of his time was spent in South Africa quietly inciting the Indian immigrants to passive resistance, a plan which caused most restrictive laws to be repealed. Gandhi gave up a five thousand pound law practice and took vows of virtual poverty. In 1914 he went to England and attempted to raise an ambulance corps, but finally decided he could not assist England actively.

GARDEN, MARY (1877–), soprano and director of opera, was born in Aberdeen, Scotland. Brought by her parents to America when she was six, five years later moved to Chicago, Mary Garden studied violin and piano, and then in 1896 went to Paris, where she studied under several great masters. As substitute for an actress who was taken ill, she continued to sing in April, 1900, in Paris, for one hundred nights, and later in London and Brussels. She appeared first as Thais in America, later appeared as Melisande in Paris, and Salome in Chicago. Since 1910 she has appeared yearly in Chicago in these and other characters, including Marguerite, Sappho, and Louise. Appointed general director, Chicago Opera Association in 1921.

GARIBALDI, GIUSEPPE (1879–), the son of the great Italian patriot, was born in Australia. He began his military career early and by 1897 was a seasoned soldier, afterward entering the Greco-Turkish War and the revolution in Venezuela, when he was imprisoned by the troops of President Castro, but later escaped; then he assisted General Goethals in digging the Panama Canal, fought in Mexico under Madero, and in the World War raised fourteen thousand Italians to assist France before his country entered the conflict. Later he joined the Italian army and rose to be Brigadier General in 1918, retiring in 1919.

GIGLI, BENIAMINO (1890–), celebrated tenor, an Italian by birth, studied under Enrico Rosati at Rome, began his operatic career in Italy in October, 1915, later touring Spain and S. America. He served in the Italian army from 1909 to 1911 and in 1915. Came to the Metropolitan Opera House, New York, in 1920, and since then has appeared in many characters in operas like *Cavaleria Rusticana, Lucia, Tosca, Boheme, Iris, Lucrezia Borgia, Lohengrin, Rigoletto, Martha,* and *Compagnacci.*

GILLET, FREDERICK HUNTINGTON (1851–), senator from Massachusetts since 1924, obtained his collegiate education at Amherst and his law course at Harvard. From 1877 he practiced law in Springfield, Massachusetts, but from 1893 to 1924 was a member of the 53rd to the 68th Congresses as Representative from Massachusetts. From 1919 to 1924 he was Speaker of the House, until appointed Senator after the death of Henry Cabot Lodge.

GISH, DOROTHY (1898–), motion picture actress, born in Dayton, O., appeared early on the stage. As leading woman in motion pictures she has been seen in *Old Heidelberg, Stage Struck, The Little Yankee, That Colby Girl,* and *Hearts of the World.*

GISH, LILLIAN (1896–), sister of Dorothy, was born in Springfield, O. She appeared on the stage at the age of five, and since 1913 has acted mainly as leading lady in motion pictures, including the *Birth of a Nation, Souls Triumphant, Way Down East, The Greatest Thing in the World,* and *The White Sister,* which was filmed in Italy.

GLUCK, ALMA (1886–), soprano singer, was born in Roumania. Attended the public schools and Hunter College, New York, and Union College, Schenectady. In 1909 she made her first appearance, singing in *Werther* in New York, never having studied in Europe. Before the end of the season she sang in eleven roles, only two of which she had studied previously. On both operatic and concert stage she has been highly popular. In 1914 she married Efrem Zimbalist, the Russian violinist, who now makes his home in the United States.

GOMPERS, SAMUEL (1850–1924), was president of the American Federation of Labor from 1886 to his death in 1924, with the exception of 1895. Mr. Gompers was born in England and after his fourteenth year advocated the rights of labor with zeal and fidelity. He was one of the sponsors of the Cigarmakers International Union, representing the trade to which he belonged. For years he also edited the *American Federationist,* official organ of most of the unions of America. He was honored during the World War by being made a member of the Advisory Committee on the Council of National Defense, and president of the international commission of labor at the Peace Conference, besides being appointed by the president of the United States to several important commissions, including the *Unemployment Conference,* 1921. Mr. Gompers openly opposed some of the later radical and communistic movements here and abroad.

GORE, HOWARD MASON (1877–), identified with the farming and stock raising interests of West Virginia for many years, became assistant secretary of agriculture in 1923, and secretary on the death of Secretary Wallace, the next year, serving till March 4, 1925. Mr. Gore then assumed office as governor of West Virginia. He has been president of the West Virginia Live Stock Association and of the Hereford Breeders Association, a member of the Committee on National Defense, and of the Board of Education of West Virginia.

GRAVES, FRANK PIERREPONT, (1869–), educator, after graduating from Columbia in 1890, taught at Tufts College mainly till he became President of the University of Wyoming in 1896. Dr. Graves served as President of the University of Washington from 1898 to 1903, as dean and professor at the University of Missouri, Ohio State University, and the University of Pennsylvania till 1921, when he became President of the University of the State of New York and Commissioner of Education. From 1920 to 1924 he edited the *Educational Review.* Dr. Graves is the author of several books, including *The State University Ideal,* various histories of education in different periods, and *What Did Jesus Teach?*

GREEN, WILLIAM (1873–), now president of the American Federation of Labor, was born in Ohio. After serving in various district offices of the Mine Workers of America, Mr. Green became secretary-treasurer of the international union in 1913, and fourth vice-president of the Federation of Labor, from which position he was advanced to the Presidency on the death of Mr. Gompers. He is the author of the Ohio Workmen's Compensation Law.

GREY, ZANE (1875–), received his name from the place of his birth, Zanesville, Ohio. In 1898 he obtained his degree in dentistry at the University of Pennsylvania and practiced in New York City from 1898 to 1904, when he began to devote himself to writing stories. His works have been tremendously popular because of their life, color and realism. Of thirty books a few of the most popular are *The Last of the Plainsmen, Riders of the Purple Sage, The Light of Western Stars, Wildfire, Desert of Wheat, Tales of Fishes, The Mysterious Rider, Tales of the Lonely Trails,* and *The Call of the Canyon.*

GRIFFITH, DAVID WARK (1880–), a native of Kentucky, attended the public schools and then for two years acted on the stage. Since 1908 he has devoted himself to the production of motion pictures on a large scale. His independent screen successes include *The Birth of a Nation, Intolerance, Hearts of the World, Way Down East, Orphans of the Storm,* and *America.*

GUEST, EDGAR ALBERT (1881–), a native of Birmingham, England, has resided in the United States since 1891, and since 1895 has been a writer for the *Detroit Free Press.* His humorous and kindly prose poems have struck the right American note in thousands of sympathetic hearts. Mr. Guest is a former president of the Press Humorists Association. The verse that he has published in hundreds of columns of newspapers from one end of America to the other has been collected in volumes like *A Heap o' Livin',* 1916; *Just Folks,* 1917, *Over Here,* 1918, *Path to Home,* 1919, *When Day Is Done,* 1921, *The Passing Throng,* 1923.

HAIG, DOUGLAS (1861-1928), created first Earl Haig in 1919, was educated at Brasenose College, Oxford, and began his military career in 1885. He served in the Soudan and at Khartoum, in South Africa, and in India, receiving various citations and military honors. He was made a major general in 1904, lieutenant general in 1910, and general in 1914, and a field marshal in France in 1917, for distinguished services. He commanded the first army, 1914-15, and was commander in chief of all the English expeditionary forces from then till 1919, receiving various medals and decorations from different governments.

HAMPDEN, WALTER (1879–), stage name of Walter Hampden Dougherty, who was born in Brooklyn, and educated at Harvard and the Brooklyn Polytechnic Institute, from which he graduated in 1900. First appeared at an English theatre with the Benson Company in 1901 and later played for three years at the Adelphi in London. In 1905 Hampden succeeded the younger Irving in Hamlet, returning to New York two years later to begin an engagement with Nazimova. Later he appeared in *The Servant in the House* as Manson, in *The Yellow Jacket, Salome, Caliban, The Wayfarer,* and in 1923–24 in a revival of *Cyrano de Bergerac,* which was immensely popular in New York. In various Shakespeare tragedies Hampden is now acknowledged the peer of actors still on the stage.

HANIHARA, MASANAO (1876–), recently Japanese Ambassador to the United States, came to America first in 1902 as a member of the diplomatic corps. In 1916–17 he represented Japan in San Francisco, later attended the Conference on Limitation of Armaments in Washington, and in February of 1923 became the Japanese envoy to the United States. While the debate on the immigration bill was going on in the Senate in 1924, Hanihara wrote a letter of protest because of the provisions of the bill, and this was misinterpreted, it is said, leading to much unnecessary friction on both sides of the Pacific.

HARBORD, JAMES GUTHRIE (1866–), army officer now retired and president of the Radio Corporation of America, entered the army in 1888 and rose through the different ranks, until he was made a major general in 1919. From 1903 to 1914 he served as assistant chief of the Philippine constabulary. He was chief of staff of the A. E. F., in France, 1917–1918, commanded a Marine Brigade at Chateau-Thierry in the summer of 1918, the second division in the Soissons offensive, and was reappointed chief of staff in 1919, A. E. F., and deputy chief of staff U. S. A., 1921–1922. Awarded the D. S. M. by both army and navy and various other decorations.

HARDEN, MAXIMILIAN (1861-1927), the adopted name of Isidore Wittkovsky, for many years has been a stirring journalist in Germany. In 1892 he published a collection of essays he had previously written under the name of Apostata; and seven years later interested himself with Otto Brahm in establishing a Free Theatre in Berlin. Always an outspoken and keen critic, Harden in 1900 fell under the displeasure of the German authorities and was sentenced to prison for six months. In 1892 he founded a journal called *Die Jukunft,* which attained an enormous circulation and influenced opinion widely. When the *Lusitania* was sunk by a German submarine, Harden uttered a strong protest in the name of humanity; and during the entire War of Nations he often commended the spirit and acts of men like President Wilson and Lloyd-George. Friends of Harden afterwards urged that he be appointed ambassador to the United States.

HASSAM, CHILDE (1859–), etcher and painter, born in Boston, 1859, and was educated there in the public schools, and in art in Boston and Paris. He has been awarded many medals in exhibitions and is permanently represented in the Philadelphia Academy of Fine Arts, Carnegie Gallery, Pittsburgh, Cincinnati Museum, Boston Museum, Corcoran Art Gallery, Washington, Art Institute, Chicago, and in many other places. He is a member of the National Institute of Arts and Letters and of the American Academy of Arts and Letters.

HAYES, PATRICK JOSEPH (1867–), Roman Catholic cardinal resident in New York City, received his education at Manhattan College and the Catholic University of America. After ordination as a priest in 1892 he rose successively, holding positions as chancellor of New York, president of Cathedral College, auxiliary bishop, rector of St. Stephen's Church, and archbishop of New York, until March, 1924, when he was elevated to the rank of cardinal.

HENEY, FRANCIS JOSEPH (1859–), though born in New York, lived in San Francisco and in Arizona, after 1864. Educated at the University of California and the Hastings Law School, Mr. Heney began practice in 1885, but for a number of years after 1885 engaged in the cattle business in Arizona, resuming the practice of law at Tucson in 1889. Engaged as attorney in numerous cases involving titles of land under Mexican grants. Then became attorney general of Arizona for a year, and returned to civil practice in San Francisco in 1895. Having gained a national reputation as a fearless counsel, he was urged by the attorney general of the United States, Philander C. Knox, to represent the government in certain land fraud cases in Oregon. Several persons were indicted, and most of them were convicted. He was also attorney in the San Francisco cases involving Mayor Eugene Schmitz and Abe Ruef, serving for nearly three years without compensation. He was Progressive candidate for senator from California in 1912 and Democratic candidate for governor in 1918, but was prevented by legal technicality from having his name on the official ballot. Appointed special counsel of the U. S. Senate in 1924 for the investigation of the Internal Revenue Bureau.

HERBERT, VICTOR (1859-1924), orchestra conductor and writer of light operas, was born in Ireland and educated in Germany, where he was principal violoncello player in the Court Orchestra, Stuttgart. Came to the Metropolitan, 1886, and since then has been connected with the Thomas, Seidl, and other United States orchestras. He conducted the Pittsburgh Orchestra from 1898 to 1904, and since 1894 has been bandmaster of the 22d. Regiment Band, New York, and the Herbert New York Orchestra, since 1904. Author of several comic operas, including *The Wizard of the Nile, Cyrano de Bergerac, The Viceroy, The Fortune Teller, Babes in Toyland.*

HERRIOT, EDOUARD (1872–), premier of France from June, 1924 to April, 1925, is leading socialist and man of letters. He was a professor of rhetoric at the University of Lyons. During 1922 his visit to Russia resulted in a book describing recent conditions among the Soviets. A previous work on the Jewish-Alexandrian school of philosophy was crowned by the Academy of Political and Moral Science in France.

HERSHEY, MILTON SNAVELY (1857–), chocolate manufacturer and philanthropist, began the making of candy at Lancaster, Pennsylvania, in 1893. From this beginning an immense business was built up in the United States, with interests in Cuba. In 1918 Mr. Hershey made a provision whereby his estate will eventually become available for a boys industrial home at Hershey, Pennsylvania, involving an investment of more than sixty millions.

HIBBEN, JOHN GRIER (1861–), president of Princeton University, received his education at Princeton and the University of Berlin. For a number of years he held pastorates and from 1891 taught logic at Princeton until 1912, when he was elected president in succession to Woodrow Wilson. Among his philosophical works are *Inductive Logic, Problems of Philosophy, The Philosophy of Enlightenment, A Defense of Prejudice and other Essays,* and *The Higher Patriotism.*

HILL, DAVID JAYNE (1850–), historian and diplomatist, was educated at Bucknell University, of which he was president from 1879 to 1888. For the next eight years he was president of the University of Rochester, and then spent three years studying international affairs in Europe, after which he taught diplomacy in Washington. Dr. Hill was assistant secretary of state from 1898 to 1903, and minister to Switzerland, for two years, to the Netherlands for two years, and from 1908 to 1911, to Germany. He was a delegate to the second peace conference at the Hague in 1907. The author of many books, Dr. Hill is known for his Life of Bryant and of Irving, his works on Rhetoric, his American adaptation of Stanley Jevons' *Logic, History of Diplomacy, Americanism—What is It? The Rebuilding of Europe, Impressions of the Kaiser, American World Policies.*

HILLQUIT, MORRIS, (1869–), an attorney in New York since 1893, attracted considerable attention by his work on socialism. He was prominent in the Socialist Party and various international socialist organizations, including the Congresses at Amsterdam, 1904, Stuttgart, 1907, Copenhagen, 1910, and Hamburg, 1923. In 1917 he was the Socialist candidate for mayor in New York City. *History of Socialism in the United States,* 1903; *Socialism in Theory and Practice,* 1909; *From Marx to Lenine,* 1921, are his chief writings.

HINDENBURG, PAUL VON (1847–), elected president of Germany on April 26, 1925, was born at Posen. From 1866 he rose through all the grades of army service, seeing part of the war against Austria and the Franco-Prussian campaign. In 1911 he retired to private life, but was recalled at the beginning of the World War, to take command of the armies of the East and later on the Austrian front, becoming eventually chief of staff and leader in most of the great movements on the western front. After the war he retired once more, wrote his biography in 1920, and again emerged from comparative

seclusion to become candidate against Marx in 1925. His vote was a popular one, claimed a tribute to personal popularity and not because of any particular doctrines advocated by von Hindenburg.

HIROHITO, PRINCE (1901–), regent of Japan, in 1912, was proclaimed heir apparent when his father became Emperor of Japan. His education consisted of private lessons and a course at the Imperial Educational Institute of Tokyo. Owing to the illness of his father, in 1920 some duties of government were assigned him, and in 1921 he toured the world, after which he was proclaimed Prince Regent in November. In January, 1924, he married Princess Nagako.

HOMER, LOUISE BEATTY (about 1872–), singer, was born in Pittsburgh, married Sidney Homer, composer, in 1895. Made first appearance in Paris, 1898, went the next year to Covent Garden, London, and to New York in 1900. Of her many roles at the Metropolitan Opera, New York, some of the most famous are Amneris in *Aida*, Laura in *Gioconda*, Ortrud in *Lohengrin*, Dame Quickly in Verdi's *Falstaff*, Bragem in *Tristan and Isolde*.

HOOVER, HERBERT CLARK (1877–), mining engineer and cabinet member, perhaps is best known for his relief administration during and since the war in Europe. He was born in Iowa, was graduated from Leland Stanford in engineering, and for several years followed his profession in many lands, going to London in 1902. During the World War he acted as chairman of the American Relief Commission in England and Commission of Relief in Belgium. He was U. S. food administrator from 1917 to 1919, and chairman of American Relief, devoted mainly to Children's Relief in Europe, 1919, and Secretary of Commerce in the cabinets of Presidents Harding and Coolidge from 1919. Elected President, 1928.

HORNADAY, WILLIAM TEMPLE (1854–), since 1896 director of the New York Zoological Park, has spent almost a lifetime in advocating the protection of birds and game in the United States. Several societies have bestowed gold medals for his work, which includes the assistance in securing the game preserves in Montana and British Columbia, and various laws to prevent the use of bird plumage in millinery.

HOUDINI, HARRY (originally WEISS) (1874-1927), the son of a Wisconsin minister, very early became interested in tricks and legerdemain. Since he began as a trapeze performer in 1882, he has made a number of world tours, and has entertained countless thousands in vaudeville and other popular audiences. He popularized certain tricks by using handcuffs and other methods of arrest from which he escaped by clever manipulation. Engaged in making motion pictures and in writing for the press on exposure of ancient tricks and originating new ones. In 1910 the Aeronautic League of Australia awarded him a prize for the first successful airplane flight in that continent. Houdini has also written on the methods of spiritualistic mediums and the means used by some of them to deceive.

HOUGH, LYNN HAROLD (1877–), educator and minister, served appointments under the Methodist Episcopal Church in New Jersey, New York and Baltimore until he became a professor at Garret Biblical Institute, Evanston, Illinois in 1914. In 1919 he became president of Northwestern University and resigned in 1920, after which he entered upon the pastorate of the Central M. E. Church in Detroit. Dr. Hough is among the great preachers of his time. As an author of inspirational religious and social books, he is always widely known, some of which are *The Lure of Books, The Theology of A Preacher, The Quest for Wonder, A Living Book in a Living Age, The Eyes of Faith, The Strategy of the Devotional Life, The Inevitable Book.*

HOUGHTON, ALANSON BIGELOW (1863–), Ambassador to Germany, for many years was connected with the manufacture of glass at Corning, New York. From 1919 to 1922 he represented the 37th New York district in the House of Representatives, resigning to become minister to Germany. In March, 1925, he succeeded Ambassador Kellogg at the Court of St. James.

HOUSTON, DAVID FRANKLIN (1866–), college president and former cabinet secretary, received his educational training in North Carolina, where he was born, and at Harvard. Taught at S. C. College and the University of Texas for a number of years; president Agricultural and Mechanical College of Texas, 1902-5; University of Texas, 1905-8; Chancellor of Washington University, St. Louis, 1908-16. Secretary of Agriculture in the Cabinet of Mr. Wilson, and of the Treasury, 1913 to 1921; and then President of the Bell Telephone Securities Corporation.

HURST, FANNY (1889–), obtained her education in St. Louis, where she was graduated from Washington University in 1909, and in New York, where she studied literature at Columbia for two years. In 1915 she married Jaques S. Danielson of New York. Much of the material for her stories and plays was obtained at first hand while the author acted as shopgirl, waitress, and made a trip across the Atlantic in the steerage. Miss Hurst wrote *Every Soul Hath Its Song, Gaslight Sonatas, Humoresque,* (also in play form, 1923), *The Vertical City, Lummox,* and various plays.

HUSSEIN, IBN ALI (1856–), first King of the Hedjaz, came of an ancient family and is recognized as the senior descendant of Mohammed. From 1890 to 1908 he was virtually a prisoner in Constantinople, where his four sons were educated in modern customs and ways. After the revolution in Turkey in 1918, Hussein became Grand Sheriff of Mecca. In this position he refused the suggestions that a holy war against Christians should be proclaimed. Then he took the side of the Allies and rendered valuable service in the campaign in Arabia and Mesopotamia. Being proclaimed King of Hedjaz, a new Arab state with Mecca as the capital, on October 29, 1919, Hussein was at once recognized by all the allied powers.

JENKS, JEREMIAH WHIPPLE (1856–), economic expert, became professor of political economy at Cornell in 1891 and at New York University since 1912. Acted as expert agent of the United States Industrial Commission from 1899 to 1901; U. S. Immigration Commission from 1907 to 1910; founder and director of the Far East Bureau, 1913-1921; chairman of the board of Alexander Hamilton Institute; director American Motion Picture Corporation; and many other honors and offices of trust. Author of *Citizenship and the Schools, Great Fortunes, The Political and Social Significance of the Life and Teachings of Jesus, Life Questions of High School Boys; Business and the Government,* and many others.

JELLICOE, JOHN RUSHWORTH (1859–), created first Viscount of Scapa after the World War, was in charge of the English Grand Fleet during the first part of war, especially in the Battle of Jutland. He was made a full admiral in 1915, first sea lord of the admiralty in 1916, after which he established the anti-submarine division of the British Navy, and in May, 1917, was made Chief of the Naval Staff, and retired from active duties in December of the same year.

JOFFRE, JOSEPH JACQUES CESAIRE (1852–), marshal of France, studied military engineering at the Polytechnical School of France, 1868; left to fight in the Franco-Prussian War; and returned after the peace was signed. Lieutenant in 1872, captain in 1876, brigadier general in 1901. Served in Tongking, Dahomey, Madagascar Campaigns, and organized the defenses of Formosa in 1911. At the outbreak of the World War, he was chief of the general staff of France. On the birthday of Lafayette, he ordered the French to halt their retreat and stand to face the Germans, in consequence of which the latter were thrown back at the Somme, and Paris was saved. He was general commander of the French armies from 1915 to 1917, when he came to the United States as a member of the French high commission. Marshal Joffre gained considerable distinction in mathematics. Member of the French Academy from 1918.

JOHNSON, HIRAM WARREN (1866–), Senior Senator from California, studied two years in the University of California before entering on the study of law. From 1888 to 1902 he practiced in Sacramento, removing to San Francisco and becoming a member of the staff of prosecuting attorneys in the graft cases. Assisted in securing the conviction of Abe Ruef and others after Francis J. Heney had been shot down in court. Governor of California from 1911 to 1917 and senator since then. Nominee of Progressives for President in 1912.

JOHNSON, ROBERT UNDERWOOD (1853–), editor and author, was associate editor, and editor, of the *Century Magazine* from 1881 to 1913, succeeding the late Richard Watson Gilder. With C. C. Buel edited the *Century War Series* of memorials of the Civil War, and induced General Grant to write his *Memoirs,* part of which appeared in the *Series.* For years as secretary of the American Copyright League he worked to secure uniform copyright laws throughout the world, and for his success was awarded an A. M. by Yale. Leader in many public movements, including the Keats and Shelley memorial in Italy, the preservation of Yosemite Valley as a park, and the League to Enforce Peace, and the American Poets Ambulances in Italy, an organization that presented 112 ambulances for use during the World War. Ambassador to Italy from February, 1920, to July, 1921. Author of several volumes of poems.

JUSSERAND, JEAN JULES (1855–), French scholar and diplomatist, served as French Ambassador to the United States from 1902 to 1924, and for years was the oldest minister of a foreign nation in residence at Washington. He began his diplomatic career in 1876 as legal adviser to the French embassy in London, and from 1898 for a time represented France at Copenhagen. M. Jusserand's *History of the English in the Middle Ages,* known in English translation as *English Wayfaring Life in the Middle Ages* was crowned by the French Academy. Two other books of great interest to scholars are his *History of the English People,* in three volumes, and *The English Novel.*

KELLER, HELEN (1880–), from the age of 19 months has been both deaf and blind through illness. Miss Anne M. Sullivan (now Mrs. John A. Macy) began to train her in 1887, and since has been her companion and mentor. Miss Keller was graduated from Radcliffe College in 1904, and since then has given much of her time to services to assist the blind, and to lecturing and writing. She has contributed papers to some of the best magazines and has written a number of interesting books, some of which are *The Story of My Life, Optimism, The World I Live In, Out of the Dark.*

KEMAL PASHA, MUSTAPHA (1879–), first president of the Turkish Republic, was born in Macedonia. After a course at the Imperial Turkish Military School, he adopted the military as his life pursuit. In the World War he led in the defenses at Gallipoli, and in 1919 he went to Anatolia, reorganized the third army corps there, and in 1920 renounced all allegiance to the Turkish Constitution. As president of the assembly at Angora, he defeated Greece, extended his territory, and became first president of Turkey in 1924.

KERENSKY, ALEXANDER F. (1881–), since his graduation in law from the University of St. Petersburg, advocated the cause of the poor and oppressed. He constantly urged the people to throw off the power of the czars in Russia; though suspected of inciting a revolt in 1915, he was not arrested as others were. After the overthrow of the monarchy in 1917, he counselled a moderate course, being made minister of justice in the new government. For a time afterward he was Premier also and tried to persuade the Russians to continue in the war with the Allies. Though he was able to stem the tide of several counter revolts, notably that led by General Kornilof, he finally gave way to the Soviets and went into exile.

KING, WILLIAM LYON MACKENZIE (1874–), born at Kitchener, Ontario, was graduated from the University of Toronto in 1895, and received a Ph. D. at Harvard in 1909. For eight years after 1900 he was Deputy Minister of Labour of Canada and also edited the *Labour Gazette.* Acted as conciliator in many disputes involving capital and labor. He represented Canada on different commissions in regard to Immigration and Opium, especially during the World War, acting also as Minister of Labour in Canada. From 1914 to 1917 he investigated labor conditions for the Rockefeller Foundation which resulted in a volume called *Industry and Humanity.* For a number of years he had been prominent in the Liberal Party, and, when the Meighen ministry fell in 1921, King became Prime Minister.

KOHLSAAT, HERMAN HENRY (1853–1924), business man and editor, after education in the public schools of Galena and Chicago, entered the baking business, became a junior partner in 1880, and later extended his own lunch room business to include large wholesale bakeries and restaurants in Chicago. After 1891 he engaged in newspaper publication and was part owner or editor of the *Inter Ocean, Times-Herald,* and *Record-Herald,* and *Chicago Evening Post* at various times until 1913.

KUBELIK, JAN (1880–), Bohemian violinist, educated at the Conservatory of Prague. Gave first recitals in 1898, won great success in central Europe in 1900, and then went to England on invitation of Dr. Richter. Since 1905 has travelled in various countries giving recitals annually.

LADD, EDWIN FREMONT (1859–1925), senator and educator, was graduated from the University of Maine, was connected with the New York State Experiment Station, from 1884 to 1890, dean of the school of chemistry, N. D. Agricultural College from 1890 to 1916, and then president. Elected to the United States Senate for the term 1921–1927. He was an authority on foods.

LAGERLOF, SELMA (1858–), Swedish authoress, after an education in the Royal Women's Superior Training College, taught in a girls high school for ten years, and after 1895 devoted herself entirely to literature. In 1890 she received a prize for parts of her *Gosta Berling Saga,* and in 1909 received the Nobel prize in literature. She excels in simple, home-like stories and psychological novels. *From A Swedish Homestead, Legends of Christ, The Adventures of Nils,* a book written by request of teachers for use in the common schools of Sweden, *Emperor of Portugalia* are some of her chief works.

LAMONT, THOMAS WILLIAM (1870–), financier, after his preparatory training at Phillips Exeter Academy and Harvard, became a newspaper reporter, secretary, and treasurer and vice-president of the Bankers Trust Company, 1903-5; vice-president of the First National Bank, 1909-1911, and since then a member of the firm of J. P. Morgan and Company. At several times he has been called upon to represent the United States on commissions, especially as representative of the Treasury on the American Commission to Negotiate Peace, 1919; he is also an Overseer of Harvard University, Trustee of Smith College and of the Phillips Exeter Academy, to which he gave an infirmary.

LANDIS, KENESAW MOUNTAIN (1866–), born in Ohio, educated at Logansport, Ind., and the Union College of law, Chicago. Except for two years, when he was private secretary to J. Q. Gresham, U. S. Secretary of State, Mr. Landis practiced in Chicago from 1891 to 1905; and was U. S. Judge for Northern Ills. District, from 1905 to 1922, when he resigned to become Commissioner of the American and National Base Ball Leagues of America. Judge Landis became well known in 1907 by has handling of the Standard Oil rebate cases in Chicago. As arbitrator, in 1921, he fixed the wages of the building trades employes in Chicago.

LANSING, ROBERT (1864-1928), authority on international law and former secretary of state, received his A. B. at Amherst in 1886. For much of his life he has been an attorney, representing the United States in the Bering Sea Arbitration and in the Alaskan boundary dispute with Canada, the Chinese government, and the republic of Chili in the Tacna-Arica arbitration in 1923-4. He was solicitor in the department of state at Washington from 1914 to 1915, when he was appointed in June to the portfolio of state, which he held till Feb. 13, 1920, when he was forced to withdraw because of differences with President Wilson. As one of the commissioners to the Peace Conference in 1919, he wielded a considerable influence in events after the World War. Since his retirement he has written *The Peace Negotiations,* 1921, *The Big Four and Others at the Peace Conference,* 1921, *Notes on Sovereignty,* 1921.

LAUDER, HARRY (1870–), created a knight in 1919, for years has been a popular entertainer in song and story. His early advantages were meager, and for some years he was a mill-boy in a flax-spinning concern at Arbroath in Scotland and then a miner. He first appeared on the stage at Arbroath. Much of his own music and songs have been featured by him on the stage. He entertained thousands of soldiers in France during the World War, and wrote a book, *A Minstrel in France,* outlining his adventures. He also wrote *Harry Lauder at Home and Abroad* and *Harry Lauder's Logic.*

LAWRENCE, DAVID HERBERT (1885–), author, received his education at the Nottingham, England, High School and University. His main works include the novels *The White Peacock, The Rainbow, The Lost Girl;* short stories, *The Prussian Officer* and *The Ladybird;* dramas, *The Widowing of Mrs. Holroyd* and *Touch and Go;* and poems, *Amores, New Poems, Look! We have Come Through.*

LENIN, NIKOLAI (VLADIMIR ILYITCH ULYANOV) (1870–1924), was born at Simbrisk on the Volga. In 1890 he became prominent in the Social Democratic party. At the outbreak of the World War he was living in Switzerland, and sought, by advising sabotage and by other means, to discourage cooperation of socialists in the conflict. After the downfall of the Kerensky government in Russia in 1917, Lenin returned and became premier. He was considered less advanced in some of his views than others of the Soviets. After an illness of about two years, he died in 1924.

LEVERMORE, CHARLES HERBERT (1856-1927), educator and authority on peace, won the Bok Peace Prize of $50,000 for the plan judged to be best for maintaining peace among the nations. Mr. Levermore received his A. B. from Yale, and after a number of years engaged in teaching, was awarded a Ph. D. at Johns Hopkins. He was professor at the University of California and Massachusetts Institute of Technology, principal of Adelphi Academy and then president of Adelphi College in Brooklyn. After 1913 he gave his attention mainly to peace societies, and was secretary of the New York Peace Society from 1917. He is also author of several pamphlets on peace.

LINDBERGH, CHARLES A. (1902–), first man to fly alone across the Atlantic, was born in Detroit, graduated from high school at Little Falls, Minn., and studied at Univ. of Wisconsin. Learned to fly at Lincoln, Nebr., 1922. U. S. Air Reserve, 1923. Made first mail flight Chicago to St. Louis, 1926. Flew across Atlantic in *Spirit of St. Louis*, about 3,600 miles in less than 34 hours, May 20 and 21, 1927. Awarded scores of honors and prizes.

LLOYD-GEORGE, DAVID (1863–), rose from humble circumstances to be premier of England from 1916 to 1923. He was educated in a Welsh school, admitted to practice law in 1884, and was a member of Parliament after 1890, and president of the board of trade from 1905 to 1908. Mr. Lloyd-George helped secure the passage of an old age pension law, a workmen's insurance law, and advocated the minimum wage law which settled the great English strike of coal miners in 1912. He was chancellor of the exchequer from 1908 to 1915; minister of munitions, 1916, and secretary of state for war, after the death of Kitchener in June, 1916. On the fall of the Asquith ministry, Lloyd-George formed a coalition cabinet, which continued till after the World War. In the elections of 1918 he was returned to power by a great majority, but gave way to the partisan ministry of Stanley Baldwin, after being refused a vote of confidence in Parliament.

LOWELL, AMY (1874–1925), American poet, sister of A. Lawrence Lowell, is known for her freedom and independence in writing. Miss Lowell was a champion of the modern free verse school of poetic composition. Besides her several volumes of poetry, some of which are *Sword Blades and Poppy Seeds, Pictures of the Floating World*, she wrote some criticisms of French and English poetry. Her *Life of John Keats*, published in 1924, promises to be the definitive work on the biography and writings of that English poet.

LUDENDORF, ERICH (1865–), major German general in the World War, was born at Posen and rose gradually in the military ranks. In 1913 his bill for support of the war budget was passed, with little change, in the Reichstag, except that three extra army divisions were not approved. Early in the war on the west front, he took Liege, and then turned to the east, where he was again highly successful. In the last year of the war he organized the campaign which finally led to failure on the western front. Since the World War Ludendorf with others has been interested largely in advocating the restoration of the old regime, if not indeed the old monarchy.

McADOO, WILLIAM GIBBS (1863–), secretary of the treasury under his father-in-law, President Wilson, and candidate for the presidency on the Democratic ticket in 1924, when John W. Davis was nominated, began his law practice in Tennessee, but removed to New York in 1892. As president of the Hudson and Manhattan Railway, he constructed the first tunnel across to New Jersey under the Hudson River, opened for traffic in 1908. From March 6, 1913 to Dec. 16, 1918 he acted as head of the U. S. Treasury Department, and also as director general of railways, 1917-1919.

McCORMACK, JOHN (1884–), tenor singer, born at Athlone, Ireland, studied vocal music under Signor Sabatini in Milan. After taking the first prize in an Irish musical festival in 1904, he studied hard for two years in London and then appeared in *Cavaleria Rusticana*, 1907. From this time his success and progress rapidly followed, until he had been invited to sing in many prominent opera houses. McCormack became a naturalized citizen of the United States in 1919. Some of his chief roles are Rodolfo in *La Boheme, Faust*, Pinkerton in *Madame Butterfly* and Don Ottavio in *Don Giovanni*. Pope Benedict bestowed upon him two orders of knighthood in 1921.

McGRAW, JOHN J. (1873–), professional baseball player and manager, was born in Truxton, New York. He joined the Olean Club in 1890, the Cedar Rapids the next season, and played with Baltimore from 1891 to 1899, managing the team in the latter year. Then he joined the St. Louis League Team in 1900, managed the Baltimore American Team in 1901 and 1902, and since 1902 has had charge of the New York National League Team (called the Giants). This team won the pennant in 1904, 1905, 1911, 1912, 1913, 1917, 1921, 1922, 1923, and the World's Championship Series in 1905, 1921, and 1922, this record constituting the most brilliant series of victories in the history of national league baseball.

McKENZIE, ALEXANDER (1830–1914), American Congregational clergyman, held various positions of responsibility and was minister of the First Church, Cambridge, Mass., from 1867 to 1914. He was a college preacher at Harvard, Wellesley, and other institutions of learning, president of the Board of trustees of Wellesley College, and a trustee of several other educational foundations.

McMILLAN, DONALD BAXTER (1874–), explorer and scientist, educated at Bowdoin College, for several years taught in preparatory schools, till he joined the Peary expedition in 1908. He was also a member of the Cabot exploring party in 1910, worked as an ethnologist among the Eskimos for two years, and from 1913 to 1917 was leader of the Crocker Land expedition, and in 1920-2, commander of the Baffin Land Expedition. Besides numerous contributions to magazines and scientific reports, he wrote in 1918 *Four Years in the White North*.

McREYNOLDS, JAMES CLARK (1862–), jurist, received a B. S. from Vanderbilt University and an LL. B. from the University of Virginia. For many years he practiced in Nashville, then became assistant attorney general from 1903-7, returned to private practice, and was chosen as attorney general by President Wilson, serving from 1913 to 1917, when he became an associate justice of the Supreme Court. Mr. McReynolds handled many government cases, especially those against the trusts and other combinations.

MARCONI, GUGLIELMO (WILLIAM) (1874–), inventor of a system of wireless telegraphy, was born in Italy, his mother being an Irish lady. After successful experiments at Bologna and at places in England, he established communication across the English Channel in 1899. He first transmitted signals across the Atlantic Ocean in 1901, made of commercial use in December 1902; and soon afterwards from the United States to Cornwall, England. Many of the principal warships and commercial craft in the world are now equipped with the Marconi system. Signor Marconi received the Nobel prize in 1907 for advancement in physics and also many other awards and decorations. His wireless telegraph service to England from Cape Cod, Mass., was opened for commercial messages in 1907.

MARLOWE, JULIA (now Mrs. E. H. Sothern, q. v.) (1870–), though born in England, resided from early youth in the United States, mainly in Cincinnati, till her first appearance in her twelfth year on the stage. Before spending three years in New York for further study, she had appeared in *Pinafore*, the *Chimes of Normandy*, and other light operas, and in *Rip Van Winkle* and other popular plays in juvenile parts. As Parthenia in *Ingomar*, she made her Metropolitan debut in 1888, and then for many years acted in Shakespeare and other dramas. In 1911 she married the actor, E. H. Sothern, with whom she had appeared in many plays, achieving remarkable successes in Shakespeare by their sympathetic impersonation. Mr. and Mrs. Sothern have frequently appeared since in the old favorite characters and also in several new creations.

MARSHALL, HENRY RUTGERS (1852–1925), though a practicing architect for many years, is best known for his books on esthetic principles, and for his valuable scientific papers in various journals. *Pain, Pleasure, and Aesthetic, Instinct and Reason, Principles of Aesthetics* are his chief works.

MARX, WILLIAM (1863–), chancellor of Germany from 1922 to 1925, spent several years in earlier life as a lawyer and jurist. For twelve years he was a member of the Reichstag, being one of the leaders of the Clerical Party. During his term as chancellor he engaged in several important conferences with France and England, exerting his influence to secure the adoption of the Dawes Plan in Germany. In the elections of April, 1925, he was defeated for the presidency of Germany by von Hindenburg.

MASARYK, THOMAS GARRIGUE (1850–), president of the republic of Czecho-Slovakia, was born in Moravia, interested himself early in the education of his countrymen. At various times he taught schools and did much literary work, principally in showing that the famous documents of Koeninghof and Gruenberg were forgeries. For a time he sat in parliament, but resigned to devote himself to the moral education of the people of Bohemia, whom he tried to protect from the encroachments of Austria, as he likewise tried to shield Austria from the domination of Germany. During the World War he became an exile in Italy and finally in England, where he taught in King's College. Later he organized the national movement of his people, became their first president, and established a semblance of stability in Czecho-Slovakia. His works include treatises on history, philosophy and logic.

MASEFIELD, JOHN (1875–), English poet and novelist, is the author of *Salt Water Ballads, The Tragedy of Pompey the Great, William Shakespeare, Personal Recollections of John M. Synge, Gallipoli, Sonnets and Poems, The War of the Future*.

MASSEY, WILLIAM FERGUSON (1856-1925), statesman of New Zealand, emigrated from Ireland to that country in 1870. For many years he held various positions in the government, being a member of Parliament from 1894. In 1912 Massey was Prime Minister and later held portfolios of Finance and other departments, until 1917 when he represented his land in the Imperial War Conference, in 1919 in the Peace Conference at Versailles, and in 1921 in the British Imperial Conference.

MAYO, WILLIAM JAMES (1861–), and **MAYO, CHARLES HORACE** (1865–), celebrated surgeons, since 1883 and 1889, respectively, in charge of the Mayo clinics at Rochester, Minnesota. In 1915 they donated a million and a half to the Mayo Foundation of Medical Research, in affiliation with the University of Minnesota. Both have acted as consultant to the United States Army medical corps and have been made members of many learned medical and scientific associations.

MELLON, ANDREW WILLIAM (1854–), banker and secretary of the treasury, for many years was identified with the commercial and manufacturing life of the Pittsburgh district. He was an associate in the enterprises of the late Henry C. Frick and founded the town of Donora, Pa., where extensive mills were established. Resigning from the presidency of the Mellon National Bank, Pittsburgh, on March 1, 1921, he entered the cabinet of President Harding and continued as secretary of the treasury in the Coolidge administration.

MILLIKAN, ROBERT ANDREWS (1868–), studied and taught at Oberlin College, went to the University of Chicago in 1896, and was professor of physics there from 1910 to 1921, and then went to California where he became director of the Norman Birge Laboratory and president of the California Institute of Technology at Pasadena. He lectured at other colleges, was first exchange professor to Belgium on the C. R. B. Foundation in 1922, and vice chairman of the National Research Council from 1917. For isolating and measuring the ultimate electrical unit, the electron, Dr. Millikan was awarded the Nobel prize for physics in 1923.

MITCHELL, WILLIAM (1879–), assistant to the chief of the U. S. Air Service from 1920 to 1925, with rank of brigadier general, was born at Nice, France, of American parentage. In 1899 he was graduated from George Washington University, and with distinction, from the Army School of the Line in 1908 and from the Army Staff College in 1909. Beginning as a private in the Wisconsin Infantry, 1898, he rose through various ranks in the signal service to become a lieutenant colonel in 1917. In 1914 he went to Europe as a military observer, attached to the French army, and was the first American officer to fly over the lines. Later he participated in many important operations, commanding the air unit of the First Army and later of a group of armies in the Argonne, and then participated in American, French, and English attacks, receiving the Croix de Guerre with five palms and other honors and decorations. Author of magazine articles advocating the development of the air service.

MONTESSORI, MARIA (1872–), was the first woman graduate in medicine at the University of Rome in 1894. After making some preliminary studies in medicine and psychology, she became associated for six years with a hospital for defective children. When an association in Rome was building a series of better houses for the poor, Miss Montessori took advantage of the opportunity to instruct the tenants. Here she taught from 1907 to 1911. Out of her experiences and her theories that children should be selected with a view to their inclinations, and drawn in the direction of their main talents, grew her theories of education. She developed her ideas in several treatises, one of which, *The Montessori Method*, was translated into English in 1912, and another *Pedagogic Anthropology*, was translated in 1913.

MOORE, JOHN BASSETT (1860–), expert in international law and diplomacy, was born in Delaware and received his collegiate training at the University of Virginia. From 1885 to 1891 he was associated with the department of state in Washington, part of the time as an assistant secretary. In 1891 he became professor of international law and diplomacy at Columbia University, and he resigned from this position in 1924 to devote himself exclusively to his duties as one of the judges of the Court of International Justice at Geneva, to which he was appointed in 1921. From 1913 he was also a member of the Permanent Court at the Hague. He was also temporarily connected with the department of state in 1913–1914 as special counsel, and represented the United States and acted as president of the International Conference in 1922–23, at the Hague, to consider rules of aircraft and radio in time of war. Besides many other works on diplomacy and law, he is the compiler of a *Digest of International Law* and a *History and Digest of International Arbitrations.*

MORGAN, ARTHUR ERNEST (1878–), civil engineer and college president, after engaging in the private practice of engineering at St. Cloud, Minnesota, for five years, assumed charge for the United States in 1907 of the reclamation works in the South, planning the eight million dollar project for the St. Francis Valley, Ark. He was in charge of the plans in Ohio to prevent floods like the Dayton catastrophe and also in Pueblo, Colo., for a similar purpose, besides seventy other water control enterprises. Since 1909 Mr. Morgan has been head of his own firm, and in 1920 he accepted the presidency of Antioch College according to a new plan of education. Here students alternate work with study in certain periods of a number of weeks each, in the effort to provide both a trade and a theoretical knowledge as a qualification for success in life.

MORLEY, JOHN (1838–1923), created a viscount in 1908, was a close friend of Mr. Gladstone and supported him in efforts to secure the passing of the Home Rule Bill for Ireland. From 1867 to 1885 he gave his attention largely to editorial enterprises, including the *Fortnightly Review* and the *Pall Mall Gazette.* After 1883 he was a member of Parliament from Newcastle-on-Tyne till 1895 and after 1896 from Melrose Burgh to 1908. Lord Morley was Secretary of State from India, 1905–10 and Lord President of the Council, 1910–14. He wrote many books on literary, political, and social subjects, including volumes on Edmund Burke, Voltaire, Rousseau, Studies in Literature, Oliver Cromwell, and Recollections.

MORGENTHAU, HENRY (1856–), United States Ambassador to Turkey during the War of Nations, came to America from Germany in 1865. After an academic course at the City College of New York and a legal course at Columbia, he entered upon the practice of law, which he followed actively for ten years, before engaging in real estate and other business. While he was in Turkey from 1913 to 1916, he acted as official representative for various nations that broke off diplomatic relations before the United States entered the war. President Wilson appointed him a member of the commission to study conditions in Poland in 1919; the League of Nations designated him as chairman of the Greek Refugee Commission; and the United States designated him as vice chairman of the Near East Relief, incorporated by Congress.

MOTON, ROBERT RUSSA (1867–), distinguished educator of the Negro race, for many years after his graduation at Hampden Institute, Virginia, taught in his alma mater and in 1915 succeeded Booker T. Washington as President of Tuskegee Institute, Alabama. Trustee of various enterprises designed to assist the colored race; president of the National Negro Business League; director of the American Bible Society and of the International Y. M. C. A. Author of *Racial Good-Will*, 1916; *Finding a Way Out*, 1920, an autobiographical narrative.

MOTT, JOHN R. (1865–), Y. M. C. A. official, received his Ph. B. at Cornell in 1888 and has since been engaged in various activities connected with the Christian students of the world. He was student secretary from 1888 to 1915 and general secretary since 1915. Mr. Mott toured the world in the interests of the Y. M. C. A., 1895–7; made special trips to Europe, South America, South Africa, and Australia; and during the World War served as general secretary of the national war work council. He was a member of the Wilson commission to Mexico and of the diplomatic mission to Russia. Recent books by this leader are *The Decisive Hour in Christian Missions, The Present World Situation, Confronting Young Men With the Living Christ.*

MOULTON, RICHARD GREEN (1849–1924), for many years after his graduation from the University of London acted as extension lecturer for the University of Cambridge, and from 1892 to his retirement in 1920 was professor of literature at the University of Chicago. Prof. Moulton is best known by his *Modern Reader's Bible*, an attempt to bring the scriptures into the language of the present day, *A Short Introduction to the Literature of the Bible, The Moral System of Shakespeare, World Literature and Its Place in General Education, and the Modern Study of Literature.*

MUNDELEIN, GEORGE WILLIAM (1872–), Roman Catholic cardinal residing in Chicago, until 1915 lived in New York and Brooklyn. In 1895 he was ordained a priest, then acted as secretary to Bishop McConnel, pastor of the Lithuanian church chancellor of the diocese, and auxiliary bishop of Brooklyn from 1909 to 1915. On March 24, 1924, he was elevated to the cardinalate.

MUNSEY, FRANK ANDREW (1854-1925), newspaper and magazine publisher, began life as a clerk in a country store and then managed the Western Union Telegraph office in Augusta, Me. After he went to New

York City in 1882, he started or acquired various magazines and newspapers, including the *Golden Argosy*, for young people, *Munsey's Magazine*, *All-Story Weekly*, *New York Sun* and *Globe*, *Evening Mail*, and *Telegram*. Mr. Munsey has given to Bowdoin College and to other educational enterprises.

MURRAY, SIR JAMES AUGUSTUS HENRY (1837–1915), English philologist, was a graduate of the University of London. His great reputation as a lexicographer rests on the *Dialect of the Southern Counties of England* and the main editorship of the *New English Dictionary*, for the philological society, which was started in 1888 and is just being finished in 1925, ten years after Dr. Murray's death.

MUSSOLINI, BENITO (1883–), leader of the Italian Fascisti and Premier of Italy, for several years was journalist, teacher and traveler. For much of his life he was an adherent of a somewhat radical form of socialism, which he gradually abandoned after 1908. During the World War he was detached from the socialist party altogether and turned his attention toward the ideals of Italian nationalism. Discipline for all is the main principle of Fascism. Through the exortation of Mussolini this group, enlarged to a party in 1921, became the dominant factor suddenly in Italy, and assumed power with Mussolini as Premier or virtual dictator of Italy.

NAZIMOVA, ALLA (1879–), Russian-American actress, in private life is Mrs. Charles Bryant. Born in the Crimea, Russia, educated in Switzerland in the German and French languages, she learned to play the violin in St. Petersburg and Odessa, and then studied dramatic art in Moscow. After acting as leading woman at Kostroma and elsewhere in stock companies, she made her debut in St. Petersburg, and in New York in the Russian play, *The Chosen People*, in 1905. Later she studied the English language and appeared in many plays, including *Hedda Gabler*, *A Doll's House*, *The Comet*, *Bella Donna*, *War Brides*, and *Captain Sholes*.

NORTHCLIFFE, LORD (Alfred Charles William Harmsworth), (1865–1922), first viscount, newspaper proprietor and publicist, was born in Dublin. Harmsworth founded *Answers* in 1888 and achieved his first success in journalism. Gradually he acquired ownership or control over several other periodicals, including the *Evening News*, 1894, *Daily Mail*, 1896, and finally, his great achievement, the *London Times*, 1908. To encourage aviation he offered a fifty thousand dollar prize. In 1900 on a visit to the United States, he edited a thirty-two page paper to illustrate his theories of a good newspaper; and in 1917 he came as one of the commissioners during the World War. He strongly opposed the policies of Kitchener and supported Lloyd-George.

OBREGON, ALVARO (1880-1928), for many years was a scientific farmer and stockman in Mexico. To aid President Madero in 1912 he recruited some thousands of Indians, and later he lent important aid to Carranza, defeating Zapata, Villa, and other bandit chiefs who were warring against the stability of Mexico. In the battle of Celaya he lost an arm, 1915. Later he quarreled with Carranza and sought to replace him. Obregon became president of Mexico in 1920 and served four years, doing much to promote peace and stability in the country, in spite of counter movements.

OLMSTEAD, FREDERICK LAW (1870–), landscape architect, after taking a course under his father and an A. B. at Harvard, began practice in 1895. He was an instructor and professor of architecture at Harvard from 1901 to 1914. Since then he has given all his time to landscaping many parks, municipal improvements, private and institutional grounds in many cities. Member of the National Commission on Fine Arts, 1910–19; chairman executive committee National Conference on City Planning, 1910–1919; fellow and past president of the American Society of Landscape Architects.

ORLANDO, VITTORIO EMANUELE (1860–), Italian statesman and war premier, was minister of justice in the Salandra cabinet and minister of the interior in the Boselli ministry. When the Italian armies met disaster at the battle of Corporetto in 1917, Orlando became premier, retaining this post till the time of the Peace Conference in 1919. During his administration the power of the Austrian armies in Italy and surrounding countries was broken by resisting the great attack of the enemy in June, 1918, and launching a tremendous counter offensive late in October of the same year.

ORPEN, SIR WILLIAM (1878–), artist of Irish birth, entered the Dublin Art School when he was eleven and later studied in the Slade School in London. Irish subjects, in great variety of light and color, predominate among his best paintings. During the World War Sir William was official British painter, and in 1918 he presented some of his pictures to the nation. During the Peace Conference he made two large canvasses of the gathering at Versailles, and in 1923 he created a sensation by painting a variation of this scene to show sarcasm and regret. *Irish Volunteer, The Costermonger* (now in the Worcester, Mass., Art Gallery), *Man from Arran, Poilu and Tommy, Bombing at Night, Dead Germans in the Trenches*, portraits of Hon. Percy Wyndham, Sir Douglas Haig, and Marshal Foch are among his best paintings.

OSBORN, HENRY FAIRFIELD (1857–), from 1881 to 1910, was assistant professor and professor of zoology at Princeton and Columbia Universities, and since 1910 has given most of his time to the American Museum of Natural History, New York, of which he has been president since 1908. He has directed expeditions into many lands, including one to the desert of Gobi in Mongolia, where the dinosaur eggs were found. Explorations in the far west of the United States have also yielded abundant results of great scientific value. Prof. Osborn is a member of many learned societies, has been decorated and awarded several gold medals, and has written valuable books on anthropology and the history of the human race.

OSLER, WILLIAM (1849–1919), celebrated medical authority, received his scientific training mainly at McGill University, where he was a professor also from 1874 to 1884, after which he held successively professorships in medicine at the University of Pennsylvania, Johns Hopkins, and from 1905 to 1919 at Oxford, England. Popularly Dr. Osler is best known because of his jocose remark, at a banquet of physicians, that the average person should be chloroformed at 58 or 59,—a bit of pleasantry well advertised in the newspapers. Dr. Osler wrote authoritative books on some of the diseases of children, afflictions of the digestive apparatus, and several treatises on the general practice of medicine.

OYAMA, IWAO (1844–1916), a Japanese prince and general, rose from the rank of colonel in 1871 to that of field marshal in 1898. During the war with Russia, as chief of staff of the Japanese army, he became the active leader of all forces in the field and won the important battles of Liao-Yang, the Shako, and Mukden. In the Franco-Prussian war of 1870 he had acted as observer with the German forces. At different times he held important posts in the Nippon military organization, resigning as chief of staff in 1906.

PADEREWSKI, IGNACE JAN (1860–), pianist and composer, began playing at an early age and taught at eighteen. In 1884 he began a course of three years under Leschetizky in Vienna. In the autumn of 1889 he first visited Paris, and in 1890 appeared first in London. In 1891 he made the first of several tours in the United States. To encourage American composers of music, he offered prizes every three years beginning in 1900. During the World War he zealously espoused the cause of his native Poland, went about lecturing and recruiting soldiers, and gave much of his private fortune to help his countrymen. Premier of Poland, 1919.

PAPINI, GIOVANNI (1881–), an Italian author, edited *Lacerba*, 1913–15. In 1920 he was converted to Catholicism, and then set about writing his *Life of Christ*, from the point of view of a sincere man of letters and not as a critic or scholar. Though this has pleased multitudes of people in all christian lands, professional scholars have found various faults in its style and material. He is also author of *The Failure*, called an autobiography, which was translated into English in 1924.

PERSHING, JOHN JOSEPH (1860–), American commander-in-chief in the World War, was born in Missouri, educated at Kirksville Normal School and at West Point, where he was graduated in 1886. He served in several Indian campaigns, in the war in Cuba, in the Philippines at two different times, was military observer in the army of General Kuroki for six months in 1905 during the Russian-Japanese War. He commanded the eighth brigade at the Presidio, San Francisco, and here his wife and three daughters were burned to death Aug. 27th, 1915. On duty temporarily on the Mexican border in 1916, he was sent into Mexico in pursuit of Villa. As commander of the American forces in Europe, he placed the United States Army at the services of General Foch as allied generalissimo. In June, 1918, part of General Pershing's men began to drive back the Germans and won the offense at Chateau Thierry and Belleau Wood, followed by the victory at Soissons during the next month. In the middle of September the American troops captured the St. Mihiel salient, fought the battles of the Argonne and the Meuse in October, and by November 7 had pushed on as far as Sedan, when the preparations for the armistice commenced. On Sept. 4, 1919, the Senate confirmed

Pershing as "General of the Armies of the United States," and from July, 1921, to his retirement in 1924, he was chief of staff.

PETAIN, HENRI PHILLIPE (1856–), general of the French army in 1914, commanded the retreat from Charleroi to the Marne. In 1916 his army, however, saved Verdun. In May, 1916, as commander of the western front, he struck a heavy blow at Verdun and the Chemin des Dames and won other important victories. At the close of the war, he was created a field marshal of France.

PHELPS, WILLIAM LYON (1865–), writer on literature, has been a teacher of English at Yale since 1892, and Lampson Professor of English Literature since 1901. As a lecturer and college preacher he is well known. Besides editing many books and complete novels of Jane Austen and Samuel Richardson, he has written a score of books of criticism, some of which are *The Beginnings of the English Romantic Movement, Essays on Modern Novelists, Teaching in School and College, Browning, Reading the Bible, Human Nature in the Bible, The Twentieth Century Theatre.*

PICKFORD, MARY (Mrs. Douglas Fairbanks) (1893–), motion picture actress, whose original name was Smith, was born in Toronto. She appeared on the stage at five, her mother being a character actress, but attained first great success in the films in *Hearts Adrift,* after which she returned to the regular stage. From leading woman to star in motion pictures she rose in popularity, until she became head of the Mary Pickford Company. A few of her notable plays have been *Tess of the Storm Country, Daddy Long Legs, Pollyanna, Rebecca of Sunnybrook Farm, Little Lord Fauntleroy.*

PIUS XI (1857–), Roman Catholic pope, (Achille Ratti), came from an humble family, being educated for the church from an early age. Most of his life was spent in teaching and in directing the Ambrosine library at Milan and the Vatican library in Rome. During the World War, 1918, he became apostolic delegate to Poland, and there made notable contributions to peace and stability of that land. Then he became papal nuncio, 1919, archbishop of Lepanto, 1920, cardinal in 1921, and pope on Feb. 2, 1922, on the death of Benedict XV.

PORTER, WILLIAM SIDNEY (1867–1910), better known as O. Henry, the celebrated short story writer, was born in North Carolina, educated in the common schools, and went to Texas for his health and afterward to Central America, where he picked up much local color for his stories. After several years in journalism, including a paper of his own called *The Rolling Stone,* he came to New York, where he lived till his early death in 1910. O. Henry wrote twelve volumes of short stories, full of wit, life, and unconventional language, at times decidedly slangy. Some of his best volumes are *Cabbages and Kings, The Four Million, The Gentle Grafter, The Trimmed Lamp,* and *Whirligigs.*

POUND, ROSCOE (1870–), authority on law, was born in Nebraska and educated at the University of Nebraska and at the Harvard Law School, with honorary degrees from many other institutions. He practiced law in Lincoln, Nebraska, from 1890 to 1901 and from 1903 to 1907, taught law at the University of Nebraska, Northwestern, University of Chicago, and at Harvard since 1910, being dean since 1916. He has written several books on various phases of the law, notably *The Spirit of the Common Law, Introduction to the Philosophy of Law, Interpretation of Legal History.*

PUPIN, MICHAEL IDVORSKY (1858–), born at Idvor, Banat, Hungary, since 1889 has been connected with Columbia University, after 1901 as professor of electro-mechanics. Recognized as a world authority in electricity. Some of his inventions made possible long distance telephony and the sending of more than one message on the same telegraph wire at one time.

RACHMANINOV, SERGEI V. (1873–), composer and pianist, born in Russia, received his education at the Moscow Conservatory. He conducted the orchestra at the Private Opera, Moscow, and the Imperial Theatre. His own compositions include *The Niggardly Knight, Francesca da Rimini, Isle of Death.* Rachmaninov has appered often in America as a concert pianist.

REED, WALTER (1851–1902), bacteriologist, proved that yellow fever is propagated by a certain kind of mosquito and that typhoid is spread in military camps more by flies and personal contacts than by drinking infected water. By following his precautionary measure, medical men were able to stamp out yellow fever in Cuba after the war of 1898. Reed received his medical education at the University of Virginia and Bellevue Hospital in New York City.

REMSEN, IRA (1846-1927), university president and chemist, received his A. B. at the College of the City of New York, and his M. D. at the College of Physicians and Surgeons at Columbia University, and his Ph. D. at Gottingen, Germany. After six years as a professor of chemistry at Williams College, he became identified with Johns Hopkins in 1876, as professor and from 1901 to 1912 as president. In 1879 he founded the *American Chemical Journal* and became its editor. Besides many scientific articles and addresses, President Remsen wrote books on chemistry and allied subjects, some of which are *The Principles of Theoretical Chemistry, Elements of Chemistry,* and *Inorganic Chemistry.*

RHODES, JAMES FORD (1848-1927), historian, is the author of *History of the United States* from the Compromise of 1850 to 1877, seven volumes; *History of the Civil War, History of the United States from Hayes to McKinley,* eight volumes. For these and other volumes he was awarded several medals and prizes, including the Loubat prize, Berlin Academy of Science, a gold medal by the National Institute of Arts and Letters, and the Pulitzer Prize at Columbia for a work of distinction in history. A later work, published in 1922, entitled *The McKinley and Roosevelt Administrations,* brings Dr. Rhodes' histories down to the last decade.

RICKENBACKER, EDWARD VERNON (Eddie) (1890–),for several years was widely known as an auto-racer, winning many trophies. At the time America entered the World War, he accompanied General Pershing to France as a member of the motor car staff, but in August, 1917, was transferred to the air service. After acting as training officer, he commanded the American 94th Aero Pursuit Squadron (which won 69 victories, 26 of which were credited to Rickenbacker), and conducted his own squadron into Coblenz, as first American officer to enter. At the close of the war he was awarded the Distinguished Service Cross with 9 palms and the Croix de Guerre (French) with 4 palms. Retired from service with the rank of major.

RINEHART, MARY ROBERTS (1876–), was educated in the schools of Pittsburgh and the Pittsburgh Training School for Nurses. She is the author of many plays, novels, and short stories, besides writing much for magazines and syndicates. During the war she served at the front in France as a nurse and wrote a series of articles treating of experiences at the front. A few of her books are *The Man in Lower Ten, Amazing Adventures of Letitia Carberry, "K," The Amazing Interlude, Twenty-three and One-Half Hours' Leave,* and plays, *Seven Days* (farce), *Bab, The Breaking Point,* and *The Bat* (with Avery Hopwood).

RIVERA, FERDINAND PRIMO DE (1871–), Spanish General and dictator, resigned as Minister of War in 1917 because of differences as to civilian control of the army in Spain. He assisted in forming a national committee of defense to end the war in Morocco; then acted as military governor of Barcelona; and in September, 1923, assumed virtual control of the Spanish government as dictator and prime minister.

ROBERT, HENRY MARTYN (1837–1923), authority on parliamentary law and brigadier general, U. S. Engineers, was born at Robertsville in South Carolina and was graduated from the U. S. Military Academy in 1857. General Robert planned many coast, fort, and light-house defenses for the army, including the operations at Galveston which make the district safe from invasions of the sea. In civil life he is widely known as the author of three books on parliamentary law that are standard,—*Robert's Rules of Order,* 1876 (Revised, 1915), *Parliamentary Practice,* 1919, and *Parliamentary Law,* his magnum opus, 1922.

ROBINSON, EDWIN ARLINGTON (1869–), American poet, was educated at Gardiner, Maine, and Harvard. Twice the Pulitzer award for the best book of poems has fallen to him, in 1921 and 1924. Some of his volumes are *The Children of the Night, The Man Against the Sky, The Man Who Died Twice.*

ROBINSON, JOSEPH TAYLOR (1872–), minority leader in the United States Senate, practiced law in Arkansas from 1895. For ten years he was a member of the House from the 6th Arkansas district. Elected governor of his state in 1912, he resigned from the House on January 14, 1913, but on March 10 of the same year relinquished his office to become Senator, being re-elected in 1918 and 1924, after which he acted as Democratic leader on the floor.

ROENTGEN, WILHELM CONRAD (1845–1923), the discoverer of the rays called "X" by him, but which are now often called Roentgen rays, was a distinguished German professor of physics and authority on the effect of passing electricity through various media, such as

steam and gases. Much of his training was received under Professor Kundt of Strassburg, whose assistant he became in 1873. He also taught at several other German universities, notably at Wurzburg and Munich. Among many other bestowed honors, Professor Roentgen received the Nobel prize for physics in 1901.

ROGERS, HENRY WADE (1853-1927), judge, legal authority, and college administrator, received his training at the University of Michigan, where he taught law from 1883 to 1890, after which he was president of Northwestern University for ten years. From 1900 to 1916 he was connected with Yale University as lecturer, professor, and from 1903 as dean. Since 1913 U. S. Circuit Judge, second district. Judge Rogers has held many positions of trust, committee chairmanships, and other offices in college, church, and nation, including the M. E. Church, several legal associations, peace societies, and civic federations author of *Illinois Citations, Expert Testimony, Introduction to Constitutional History as Seen in American Law,* and many articles in cyclopedias and legal journals.

ROLLAND, ROMAIN (1866–), French author, born at Clamecy and educated at the Ecole Normale Superieure, was for a number of years professor of the history of art there, till called to the Sorbonne. His doctorial thesis, *Origin of The Modern Lyric Theatre,* was crowned by the French Academy in 1895. He wrote plays, including *The Triumph of Reason* and *The 14th of July;* various works on art and lives of Beethoven, Michelangelo, and Toistoi; and a very long novel *Jean Christophe,* full of philosophy. This received one-fourth of the Nobel prize in literature for 1915.

ROOSEVELT, THEODORE, JR., (1887–), assistant secretary of the navy from 1921 to 1924, received an A. B. from Harvard in 1908 and an honorary A. M. in 1919. After being in business for eleven years, he resigned directorships of several corporations on being elected a member of the New York Assembly in 1919. Commissioned as a major in the 26th. Infantry, U. S. A., he reached France in June, 1917, and rose to the rank of lieutenant colonel in September of the next year, after having taken part in the battles of Cantigny, Soissons, Argonne-Meuse, St. Mihiel, and receiving the D. S. C. and the Croix de Guerre. One of the organizers of the American Legion. Governor Alfred E. Smith defeated him for the governorship of New York in 1924.

RUOFF, HENRY WOLDMAR (1867–), editor and author, born in Germantown, Pa., graduated from Indiana University 1890. Studied at Harvard and Columbian (now George Washington University), and later in several foreign universities. Traveled extensively in Europe, Asia, Africa. For a time he was instructor in Psychology and Philosophy at Pennsylvania State College. Acted as editor of *Ridgway's American Spectator* and *Nashville Tennessean* 1904-7. Member of American Academy of political and social science, National Geographic Society. Through his efforts the single volume reference work has become a valuable adjunct to the school. He is either the main author or editor of *Home and State, Women in the Middle Ages, Century Book of Facts, Capitals of the World, Universal Cyclopedia Handbook, The Standard Dictionary of Facts, Masters of Achievement, The Volume Library,* and *The Circle of Knowledge.*

RUTH, GEORGE HERMAN (Babe), (1894–), professional baseball player, was born in Baltimore and in 1914 first attracted wide attention while playing with the Baltimore International League team. In 1915 the manager of the Boston Club, American League, engaged the services of Ruth, and in 1920 he was sold to the New York American League Club, this time for $150,000, the largest sum ever paid for a ball player. In 1921 Ruth set the world's record for home runs in one season, making 59 altogether; in 1923 he was voted the most valuable all-round player in the American League.

RYKOV, ALEXIS IVANOVITCH (1881–), premier of Russia since the death of Lenin, received his early education in economics mainly. In 1903 he met Lenin at Geneva, and became his warm adherent. From 1921 to the death of Lenine, during the illness of the latter, Rykov acted as premier, and shortly after the death of Lenin in 1923, became premier in his own name. One of his first acts was the coining of silver pieces that the peasants might use them in making change.

SCHURMAN, JACOB GOULD (1854–), was born on Prince Edward Island, Canada, and won the Canadian Gilchrist scholarship to the University of London, from which he was graduated in 1877, with further studies in Germany and Italy. He was professor of philosophy at Acadia College, and Dalhousie College, Nova Scotia, for six years and then went to Cornell, where he was Sage Professor of Philosophy from 1886 to 1892, and president from 1892 to 1920. Dr. Schurman spent much of 1899 in the Philippines as president of the U. S. Commission; from 1912 to 1913, he was minister to Greece and Montenegro; and from 1921 Envoy to China. In 1925 he was appointed ambassador to Germany.

SERVICE, ROBERT W. (1876–), was born in Preston, England, but came to Canada in 1905. After spending a number of years in the Canadian Northwest, he began to write popular verses, of which several volumes have been published. Some of them are *Songs of a Sourdough, Rhymes of a Cheechako, Rhymes of the Trail, Rhymes of a Red Cross Man.* During the Balkan and World Wars he acted as a war correspondent, and during the latter drove an ambulance for two years. Service now resides in Paris.

SIMS, WILLIAM SOWDEN (1858–), appointed from Pennsylvania to the Naval Academy and was graduated in 1880. He rose through the different grades to that of rear admiral in 1917, but during the period of the World War was in charge of some of the major naval operations of the United States in European waters, with the rank of vice-admiral. Though decorated by many foreign nations, for reasons of his own, Admiral Sims begged to decline the D. S. M. offered him by Congress. From 1897 to 1915 he spent considerable of his time as a naval observer and in command of several battleships on many cruises. From early in 1917 until assigned to active duty abroad, Admiral Sims was in charge of the Naval War College at Newport, to which he again returned as president in 1919, serving till his retirement because of age in 1922.

SKEAT, WILLIAM WALTER (1835–1912), English philologist was graduated from Christ's Church College, Cambridge University, and became a fellow and then professor of Anglo-Saxon there. His field was Old and Middle English, and he contributed more than any other scholar of his age to our knowledge of the history of English words. Prof. Skeat's major works are the *Etymological Dictionary, Principles of English Etymology,* and his great edition of Chaucer in six volumes.

SMITH, ALFRED EMANUEL (1873–), received his education in the parochial schools of New York City, where he has lived most of his life. From 1895 to 1903 he served in the office of the commissioner of jurors; from 1903 to 1915, in the New York Assembly, acting as Democratic leader in 1911 and Speaker in 1913. Then he became sheriff of New York County from 1915 to 1917; President of the Board of Aldermen in 1917; and then Governor of New York for three terms, beginning in 1919, 1923, and 1925.

SMUTS, JAN CHRISTIAN (1870–), South African statesman, though an enemy of England during the Boar War, became an ardent ally in the fight against the power of Germany in Africa. In 1916 he broke the hold of Germany on East Africa, and Lloyd-George summoned him to England, where he became the only colonial member of the Imperial War Cabinet. In 1919 Smuts was elected premier of the Union of South Africa, but was defeated again in 1920, though he became premier when the South African Party was joined by the Unionists. Smuts continued as Premier till a new alignment of parties forced his cabinet out in 1924.

SOTHERN, EDWARD HUGH (1859–), son of the late E. A. Sothern, prominent English actor, was educated in England. He first appeared in a minor part at the Park Theatre, New York, in 1879, and first at the Royalty, London, two years later. As Jack Hammerton in *The Highest Bidder,* he attracted wide notice at the Lyceum, New York, in 1887, where he appeared from 1885 to 1898 continually. In lighter roles he appeared to best advantage in plays like *Lord Chumley, The Prisoner of Zenda, Under the Red Robe, The Sunken Bell, When Knighthood was in Flower, Richard Lovelace, If I Were King.* Later he revived with some success his old part Lord Dundrery in which his father had attained preeminence. With Julia Marlowe (whom he married in 1911) he won additional laurels in *Romeo and Juliet* and *Hamlet* among notable Shakespearean revivals.

STAGG, AMOS ALONZO (1862–), teacher of physical education, was graduated from Yale in 1888 and from the Y. M. C. A. College in Springfield, Mass., in 1892. He joined the staff of the department of physical training in the University of Chicago in 1892 and became director of athletics in 1900. In 1904 he became a member of the football rules committee and a member of the American committee on the Olympic Games held in Athens, 1906, London, 1908, Stockholm, 1912, and Brussels, 1916. In 1914 the athletic field of the University of Chicago was named in his honor.

STEELE, WILBUR DANIEL (1886–), after graduating from the University of Denver in 1907, spent three years in the study of art in Boston, Paris, and New York. Since 1914 he has become widely known as the author of short stories and two or three novels. His best works are found in the current magazines like the *Atlantic, Century, Harper's,* and *Scribner's.* The O. Henry prize, second class, went to him in 1919 for his short story entitled *For They Know Not What They Do,* and in 1921 he received a special award for maintaining the highest level for three years in the short narrative in America.

STEFANSSON, VILHJALMUR (1879–), was born in Manitoba, educated at the State Universities of North Dakota and Iowa, and at the Harvard Divinity and Graduate Schools. Leader of several expeditions into the frozen north,—to Iceland, 1904; to mouth of the Mackenzie River and Northern Alaska, 1906-7, to the Arctic, 1908-12; to Banks Island, 1914; to Prince Patrick Island and to land he discovered, 1915 and again in 1916; on moving ice across the polar seas at different times. Stefansson interviewed several tribes of Eskimos who claimed they never had seen a white man. He has written scientific papers, a number of books on the arctic regions, including *My Life with the Eskimo, The Friendly Arctic, Hunters of the Great North,* and has lectured frequently before clubs and popular audiences.

STEINMETZ, CHARLES PROTEUS (1865–1923), electrical expert and inventor, for many years was connected with the General Electric Company at Schenectady, N. Y., and with Union College as professor of physics. Many problems were worked out under his direction, the results being published in valuable monographs and books.

STILL, ANDREW TAYLOR (1828–1917), was successively farmer, soldier in the Civil War, country doctor, prospector, and discoverer of the principles of osteopathy. For many years he closely studied human anatomy, but the death of four children in 1864 of cerebro-spinal meningitis turned his attention to the spinal cord as the center of the human mechanism. Out of his studies came the ideas of osteopathy, or adjustments of bones and other parts of the body which cause disease.

STIMSON, FREDERICK JESUP (1855–), lawyer, author, and ambassador to the Argentine 1914-21, and special envoy to Brazil, 1919, was professor of comparative legislation at Harvard from 1903 to 1914, and general counsel of the Industrial Commission of the United States from 1898 to 1902. His legal texts include *Stimson's Law Glossary, Government by Injunction, and American Constitution as it Protects Private Rights.* Mr. Stimson also wrote many poems, novels, and short stories, the earliest of them under the pen-name of J. S. of Dale. These include *Guerndale, The Sentimental Calendar, Mrs. Knollys* and *other Stories,* and the *King of Provence* (poem play).

STINNES, HUGO (1870–1924), German financial baron, from a business in which only a few thousands were invested a generation ago, by the end of the World War, secured control of much of the industrial life of Rhenish-Westphalia and had arteries of commerce extending into various parts of the world. After the War he and his companions made much from the continual fall of the value of German money.

STONE, HARLAN FISKE (1872–), was called from Columbia University, where he was dean of the School of Law, to succeed Harry F. Daugherty as attorney general of the United States in April, 1924. He was made a justice of the Supreme Court in 1925. He was a member of various bar associations and a director in several corporations.

STONE, WARREN SANFORD (1860–1925), labor chief and banker, for years was fireman and engine-man on the Rock Island lines. In 1903 became chief of the International Brotherhood of Locomotive Engineers, with headquarters in Cleveland, Ohio. He organized the co-operative national bank of the Brotherhood of Locomotive Engineers, which was the first of its kind in the world.

STRAUS, OSCAR SOLOMON (1850-1926), merchant and diplomatist, member of the importing firm of L. Straus and Sons, pottery and glassware, 1881-1906. U. S. Minister to Turkey, 1887-9, 1898-1901, 1909-11; Secretary of Commerce and Labor in Cabinet of President Roosevelt, 1906-9; Chairman of Public Service Commission, first district, New York, 1915-18; member of the Court of Arbitration at the Hague, 1902, and reappointed by Presidents Taft and Wilson; member of commissions and boards affecting labor and civic affairs. Author of *Reform in the Consular Service, United States Doctrine of Citizenship, Our Diplomacy with Reference to our Foreign Service, The American Spirit, Under Four Administrations.*

TAGORE, RABINDRANATH (1861–), Hindu poet and nationalist, at seventeen was taken from his native Calcutta to England to complete his education. In his native Bangali language he has wielded a strong influence over the language, education, and philosophy of his countrymen. In his English poems and translations of his own prose works, he has become known as a spiritual philosopher and mystic. In 1900 he founded a school in Bangal, where he has spent much of his time since, teaching and talking with his disciples. Tagore was awarded the Nobel prize for literature in 1913, shortly after he had visited England and had translated his chief works. Of the works now available in English translation, *The Gardener, The Crescent Moon, The Post Office* (play), *Fruit-Gathering, Nationalism, Glimpses of Bengal,* and *Gora,* a novel, are important.

TAKAHIRA, KOGORO (1854–), one of the "elder statesmen" of Japan, Baron, and diplomatist, entered the Foreign Office, as a translator in 1877; became connected with the Japanese Embassy at Washington in 1879; was minister there 1901-05, 1908-9. With Baron Komura he signed the Russian Peace Treaty at Portsmouth, N. H. in 1905. Also was minister of Japan in Italy, Austria, and Switzerland at different times.

TAUSSIG, FRANK WILLIAM (1859–), political economist, received his A. B., A. M., L. L. B., and Ph. D. at Harvard, where he became professor of political economy in 1892, having served as instructor and assistant professor from 1882. Being a recognized authority on the tariff, he was appointed Chairman of the U. S. Tariff Commission in 1917 and served till 1919. He is the editor of the *Quarterly Journal of Economics.* Some of his publications are *Tariff History of the United States, Wages and Capital, Some Phases of the Tariff Question, Free Trade, The Tariff and Reciprocity.*

TETRAZZINI, LOUISA (1874–), operatic prima donna, born in Florence, as a child learned several operas by hearing an elder sister (later the wife of Campanini) practice them. She made her first formal stage appearance as Inez in *L'Africaine* in 1895, and soon she became known as "the second Patti." At Covent Garden, London, her success was tremendous. Oscar Hammerstein brought her to the Metropolitan Opera House, New York, in 1908, where she has appeared many times.

THOMSON, ELIHU (1853–), inventor, taught chemistry and mechanics in the Central High School, Philadelphia, from which he was graduated in 1870, and since 1880 has been connected with the Thomson-Houston Electric Company and the General Electric Laboratories at Lynn, Mass. Over 500 of his inventions have been patented, including the method of electric welding that bears his name. He was awarded the Grand Prize at Paris in 1899 and 1900 for his inventions, the Rumford medal, 1902; the first Edison medal, 1910, the Elliott Cresson medal, John Fritz medal and Hughes medal of the Royal Society, London, 1916. Dr. Thomson is a trustee of several institutions, including Massachusetts Institute of Technology, of which he was acting president from 1920 to 1922.

TROTSKY, LEON (Leon Braunstein), (1877–), was born in South Russia and educated at the University of Odessa. In 1898 he was deported to Siberia but soon escaped. After being refused an asylum in several European countries, he came to the United States in 1917 and assisted in editing *Novy Mir,* the Russian progressive daily newspaper in New York. He had been active in international socialistic congresses. On his return to Russia in 1917, he was elected President of the Soviets, organized a red army, and finally became war secretary, a position he held till 1924 when he was superseded.

VAN DYKE, JOHN CHARLES (1856–), authority on art, has been librarian of Rutgers College since 1878 and professor of the history of art since 1888. Studied art extensively in European galleries. Author of *How to Judge of a Picture, Art for Art's Sake,* a discussion of the province of painting, *The Desert* and *The Opal Sea,* descriptions of the beauties of nature, *The Grand Canyon of the Colorado, Rembrant and his School,* a discussion partly of the genuineness of certain pictures attributed to Rembrant, *History of Painting.*

VAN LOON, HENRICK WILLEM (1882–), historian, was born in Rotterdam and educated at Cornell University, Harvard, and Munich. From 1911 to 1914 he lectured on history at Cornell and other places. During 1914 he acted as a reporter in Belgium, being expelled finally by the Germans. Lectured on modern European history at Cornell, 1915-6, and later was professor of history at Antioch College, after which he became associated with the *Baltimore Sun.* Besides histories of Holland, Van Loon wrote widely-read books like the *Story of Mankind,* 1921, and *Story of the Bible,* 1924.

VAN SWERINGEN, ORIS PAXTON (1879–), financier and president of corporations, was educated in the public schools of Ohio, having been born in Wooster. Chairman of the Board of the Nickel Plate, C. and O. Railway, and the Hocking Valley Ry., and president of the Nickel Plate Securities Corporation. Planned and developed Shaker Heights, Cleveland suburb, largest undertaking of its kind previous to 1921. With his brother M. J. Van Sweringen interested in forming a group of railways into a unified system from New York to the west.

VENIZELOS, ELEUTHERIOS (1864–), Greek statesman born in Crete, led in the movement uniting Crete and Greece. About 1910 he moved to Athens and formed the league which made war on Turkey in 1912. During the World War, as premier of Greece, he used every method in his power to bring Greece into union with the allies against Germany, but the king of Greece, for family reasons, prevented, and Venizelos resigned in 1915. Following the first abdication of Constantine, he returned to Greece as premier in 1917, and Greece joined the allies. During the Peace Conference he was one of the most enlightened delegates, wielding a large influence. Afterward he returned to be premier for a brief time, but was forced by ill-health and other reasons to withdraw actively from politics.

VILLA, FRANCISCO (Pancho) (1868–1923), revolutionary leader of Mexican peons, in 1910 was captured by Huerta, but escaped. He then raised 35,000 men to assist Carranza against Huerta, but he quarreled with his chief and joined Zapata in one of the insurrections against Carranza. Villa fled into the United States, shot up the town of Columbus, N. M., killing 17 Americans and wounding 7 others. He was pursued into the fastnesses of Mexico by American troops. Later he was persuaded to settle on a large estate with his men about him, but in 1923 he was assassinated, presumably by friends of those whom he had killed in his banditry.

VINOGRADOFF, PAUL (1854-1925), professor of jurisprudence at Oxford since 1903. For many years he taught in Russia, where he was born, but came into conflict with bureaucratic management because of his advanced ideas of education. Lectured at many universities, including Harvard in 1907, the University of Leyden, 1921, Columbia, Johns Hopkins, Michigan, and California in 1923. Director of Publications of the British Academy and editor of Russian Section of social and economic history of the War (1914-17) for the Carnegie Foundation of New York. He has edited many series of books and has written several on English social and economic life and history, the article on *Russia* in the 12th edition of Britannica, and *Outlines of Historical Jurisprudence.* Knighted in 1917.

WALES, PRINCE OF, EDWARD ALBERT (1894–), in 1909 entered the Royal Naval College at Dartmouth, England, on his sixteenth birthday was proclaimed Prince of Wales, and in 1911 was presented to the Welsh people at Carnavon Castle. His course at Magdalen College, Oxford, which he began in 1912, was interrupted by the World War, in which he served in various capacities, with Sir John French in France, with the English forces in Egypt, in Italy, and last with the Canadian corps in France. In 1919, 1923, and 1924, he visited Canada, having a ranch in Alberta; in 1920 he visited New Zealand and Australia; and in 1925, South Africa.

WALSH, THOMAS JAMES (1859–), senator from Montana since 1913, received a law degree from the University of Wisconsin in 1884, was principal of a high school, and then began the practice of law at Redfield, South Dakota. Since 1890 he has resided in Helena, Montana. From 1908 he has been a member of the Democratic national conventions, being on the committee on platform. In 1924 he rose to national prominence by his energetic prosecution of the cases involving the sale or lease of public lands to private companies.

WELLS, HERBERT GEORGE (1866–), English man of letters, received his education at the Royal College of Science, where he took honors in zoology. His many volumes of writings cover a great range of subjects. The ones most frequently mentioned are *The Stolen Bacillus and Other Stories, The Lost World, The Future in America, New Worlds for Old,* (an account of socialism), *Tony Bungay,* a novel of contemporary life, *Floor Games for Children, Mr. Britling Sees it Through,* a novel, *In the Fourth Year* (an account of the League of Nations), *The Undying Fire, Outline of History, The Salvaging of Civilization, Washington and the Hope of Peace.*

WHEELER, BURTON KENDALL (1882–), junior senator from Montana, since 1923, received his law education at the University of Michigan, and since 1906 has practiced at Butte, Montana. Member of the Montana House of Representatives from 1911 to 1913, U. S. district attorney in Montana, 1913-1918, when he resigned; Senator for the term beginning in 1923. Candidate with Senator LaFollette for vice-president in 1924.

WHITE, WILLIAM ALLEN (1868–), newspaper man and author, since 1895 has been editor and proprietor of the *Emporia Gazette.* From his editorial *What's the Matter of Kansas* he became widely known in 1896 at the time of the free silver discussion. Two other editorials have brought him the Pulitzer prize of the School of Journalism of Columbia University for the best current editorial. He was independent anti-Klan candidate for governor of Kansas in 1924, and was a member of the Progressive National Committee from 1912 to 1916. *The Court of Boyville* contains some fine stories of youth in a small town; *A Certain Rich Man* is a celebrated novel of American modern life; and *The Martial Adventures of Henry and Me* details his experiences in France with Henry J. Allen, afterwards governor of Kansas.

WHITLOCK, BRAND (1869–), author and diplomatist, was born at Urbana, Ohio. From 1887 to 1893 he was engaged in newspaper work; from 1893 to 1897 was connected with the office of the secretary of state of Illinois; and from 1897 to 1905 practiced law in Toledo, Ohio. Then as an independent he was elected mayor against four others in the field, and was re-elected in 1907, 1909, and 1911, declining to run for a fifth term. During the World War he was minister of the United States to Belgium and from 1919 to Feb. 1922, was ambassador there. He was thanked by the Belgian parliament in special session for his services during the War and a boulevard was named for him in Brussels. Many more honors were also awarded him by Belgium and other nations. Some of his writings include *The Happy Average, The Turn of the Balance,* fictions, *Abraham Lincoln* (trans. into French by the author in 1918), *Forty Years of It,* 1914, *Memories of Belgium under the German Occupation,* 1918, which was translated into French, Danish, and other tongues.

WILSON, HENRY BRAID (1861–), naval officer, after graduating from the U. S. Naval Academy in 1881 became an ensign and rose to the rank of rear admiral in 1917, vice admiral in 1918, and admiral in 1919. During the Spanish-American War, he was on the Bancroft; on duty in the Bureau of Navigation from 1904 to 1908; commanded the Chester, 1908-10; assistant in charge of Bureau of Navigation, 1910-11; commanded the North Dakota, 1911-13, the Pennsylvania, 1916-17, commander of the Patrol Force of the Atlantic Fleet, 1917-1918; commander of the U. S. Naval Forces in France, 1918 and of the Atlantic Fleet, 1919. Admiral Wilson was Superintendent of the Naval Academy, Annapolis, from July 5th, 1921 to his retirement from active duty in February, 1925.

WISE, STEPHEN SAMUEL (1872–), rabbi and Zionist, received at Columbia an A. B. in 1892 and a Ph. D. in 1901. He was in charge of a Synagogue on Madison Avenue in New York for seven years and then for six of one in Portland, Oregon, returning to New York to found the Free Synagogue in 1907. Rabbi Wise has interested himself in many public movements, including peace societies, Woodrow Wilson Foundation, Near East Relief, American Jewish Congress, Council of National Defense during the World War, and the general Zionist movement.

WRIGHT, HAROLD BELL (1872–), novelist and clergyman, was born in Rome, New York, and for five years was a painter and decorator, and next from 1892 to 1897 a landscape artist; and then for eleven years pastor of Disciples churches in Missouri, Kansas, and California. He wrote books that were extremely popular, including *That Printer of Udell's, The Winning of Barbara Worth, The Eyes of the World, When a Man's a Man.* All of his books have a strong social and economic tendency, but also contain wholesome romances.

ZIMBALIST, EFREM (1889–), violinist, until he was twenty-two lived mainly in Russia, where he was born at Rostow-on-Don. His musical education was received from his father, the Imperial School of St. Petersburg, and from Leopold Auer. In 1911 he came to the United States and in 1914, married Alma Gluck, the eminent singer. Since he first appeared in St. Petersburg when he was seventeen, he has toured the main musical centers of Europe and America. He has composed numerous pieces for the violin, orchestra, and piano.

BABYLONIAN ART AND ARCHITECTURE.

Investigations by archæologists during the last ten years have done much to make it almost certain that the earliest forms of architecture were the Babylonian. Previous to this recent information it was thought that the Egyptian was the oldest. The characteristics of Babylonian architecture are a construction almost wholly of bricks, sun-dried and kiln-baked, owing to the absence of stone and forests of wood; very thick walls and narrow vaulted interiors, owing to the small size of the bricks used; the consequent invention of the arch and vault; a massive and lofty stage or foundation upon which the building was to rest, because of the low, level nature of the land, and the lack of elevations to make the buildings loom large on the horizon; the entire absence of pillars, columns, piers or carving; the prevalence of decorations of faïence, fresco, and hangings; and artistic decoration of buildings by reliefs, glyptics, or cuttings of precious stones.

There are four well-defined periods, viz.:—

1. The pre-Sargonic era, from the earliest times to 3800 B. C.
2. The golden age of Sargon, from 3800 to 2800 B. C.
3. The age of Hammurabbi, from 2200 to 1700 B. C., the silver age.
4. The Kassite age, from 1700 to 1000 B. C.
5. The Renaissance under Nebuchadnezzar, from 600 to 500 B. C.

The royal palace unearthed by the French at Tel-l[illegible] or Shirpurla dates back to 5000 B. C., though it was restored by King Gudea. Its platform was 12 meters high, 200 meters long, and 50 meters wide. This is by no means the largest or finest of the royal palaces of Babylonia. The excavations by the Peters expedition or the University of Pennsylvania expedition, in which Professor Hilprecht has figured so prominently, have done much to increase our knowledge of Babylonian architecture. The Hanging Gardens of Babylon, which remained for so many years one of the seven wonders of the world, may well be included among the architectural wonders of Babylon. They were built by Nebuchadnezzar to please his queen Amytis; and consisted of great terraces one above the other upon which earth deep enough to support the growth of the largest trees was placed. Grass, trees, flowers, and walks made it appear as a mountain of vegetation within the city. The walls of the city, in the form of a square, are said to have been 56 miles around, and broad enough on the top for a four-horse chariot to be safely driven between the buildings and towers which occupied its inner edge. The hundred brazen gates, the wide and deep surrounding moat filled with water, and the beauty and adornment of the palaces, temples, and gardens within the gates, made the city one of the most famous of ancient times.

Tower of Babel.—The Tower of Babel is inseparably connected with Babylonian architecture. According to the account in Genesis xi. it was the result of the knowledge that the people gained who went down into the valley of Shinar and there learned the art of making buildings of clay cemented with bitumen. Much surmise is indulged in as to its exact location. Among the buildings which seem to have the greatest claim to this distinction is the great temple to Marduk in the city of Babylon, which was seven stages high and was known to the people as the house of the foundation-

stone of heaven and earth. This was the building which Nebuchadnezzar restored. Another seven stage tower opposite Babylon in Borsippa, sacred to Nebo, has claims to this distinction. Many believe that the tower of Zikkurat in the city of Babylon may have been the building the writers had in mind.

EGYPTIAN ART AND ARCHITECTURE.

The history of Egyptian art may be broadly divided into three main periods—the Ancient or Pagan, the Christian or Coptic, and the Mohammedan.

The Ancient or Pagan Period extends from the First Dynasty (about 4500 B. C.) to the time of the Roman Empire. The monuments of the first six dynasties were marvelous feats of engineering, but with a simplicity and grandeur of their own. This was an era of gigantic pyramids and mastabas. Over 100 of these ponderous tombs were erected, establishing the existence of the use of metals and a knowledge of mathematics and mechanics of no mean order, 40 centuries before Christ. The pyramids were the royal tombs of the earlier dynasties; the mastabas, built in rectangular form, were designed for persons not of royal birth. No decoration had as yet been attempted, but during the Middle Empire (from 3000 to 2100 B. C.) a great change spread over Egyptian architecture; non-sepulchral temples of a grand and imposing type first appear, and the mastabas give place to rock-cut tombs rich in design and ornamentation. Of these rock-cut sepulchers the most celebrated group is at Beni-Hassan on the Nile. The creation of a distinct order of temple architecture is most noteworthy, as not only was a model set for succeeding generations in Egypt, but likewise for the Greeks. The lintel, and not the vault, became the basis of design; quarried blocks were carefully dressed and laid; columns supporting architraves were lavishly used; while color and relief sculpture embellished the whole. The period that followed, known as the New Empire (1700 to 1100 B. C.), was the golden age of Egyptian art and architecture. The land was covered with temples and palaces of a size and grandeur never before attempted. Some of the most impressive monuments of the New Empire were the Amenopheum; the temple of Rameses III. at Medinet Abu; the mausoleum of Queen Hatsu at Deir-el-Bahari and the Ramesseum close by; the temples of Abydos, Medinet Abu, and Gurneh; the little temple of Khonsu at Karnak; and the gigantic temples of Karnak and Luxor. The colossal temple of Karnak was begun during the Middle Empire, succeeding dynasties carrying on the work till its completion in the time of Euergetes, the third of the Ptolemies. Except in matters of scale and ornament, all these monuments conformed to the same general type. The splendid achievements of the reigns of Thothmes, Amenophis, Seti, and Rameses were followed by an era of decline; and not till the time of the Macedonian conquest did architecture revive. The temples of the Ptolemaic and Roman period maintained the best traditions of Egyptian art. The majestic group of temples on the island of Philæ near the second cataract rival the splendor of the new Empire. The temples of Denderah and Edfu are still well preserved, while others of less importance may be seen at Esneh, Dakkeh, Kalabshé, and Kardassy. Of secular and military architecture there are few remains of importance. The fortresses of Semneh, Thebes, and Memphis; the fortified walls of Sān, Saïs, and Thebes; besides scattered remains of forts, granaries, and domestic buildings, bear witness to the activity of this period.

The Coptic Period.—From the third to the seventh century Egyptian art fell into decay, and did not revive till the Moslem conquest in 638. The Coptic Christians covered the land with their churches and monasteries, built in a cosmopolitan style which ignored both Egyptian tradition and Byzantine practice. Few traces of Coptic architecture remain, being swept away by the Arab invaders.

The Copts were the first to introduce into architecture the systematic employment of the pointed arch. The later Coptic churches were basilican in design, and lacking in architectural beauty.

The Mohammedan Period.—For several centuries the Moslems in Egypt followed the Coptic type. The pointed arch was used; the ceilings were of wood and richly decorated. Some of these mosques were very large. About the middle of the tenth century the vault and dome first appeared in Moslem structures in Egypt, designed by Coptic architects from Byzantine or Persian models. The dome was long confined to sepulchral edifices. The minaret also came into use about the same time, and became a feature of great elegance in Moslem architecture. The most important monuments of the Mohammedan period are in Cairo, the tomb-mosque of Kaid Bey in the Karafah (1470-1480) being one of the finest examples of this era. The mosque of Ghouri, the last of the Mamelukes, is one of the last of the strictly Arab structures. When Egypt in 1517 became a Turkish province, a Turkish style, based on Byzantine models, was adopted. The spacious mosque of Mohammed Ali in the citadel (1815-1821) is a typical example of this later style.

Sculpture.—Unlike architecture, sculptural works of importance were produced in Egypt at an earlier date than in Babylonia. The aim of the early sculptor was to make a figure as life-like as possible, so that its *ba* (spirit) and *ka* (soul) might easily recognize it after death. These sculptures were mostly deposited in tombs, and in the inner chamber of each tomb were placed several statues illustrating different periods of the individual's life, as well as several scenes in low relief vividly colored. Under the New Empire sculpture became even more pictorial, and two new forms came into use—the outline relief (*stiacciato*) and the sunken relief (*cavo-rilievo*). Wooden statues, usually of acacia and sycamore, were very popular during the earlier dynasties. Color was an essential feature of Egyptian sculpture. Colored stones, such as basalt, red granite, and diorite, were invariably used, or, when softer stones were employed, the colored effect was produced by stucco and paint. Sculpture conformed to a rigid conventionality, without regard to perspective or realism. In reliefs, the head was in profile, with the eye in front view; the shoulders full front; the trunk three quarters; the arms and hands, also the legs and feet, in profile. It seems to have been the idea of the artist to present as much as possible to the view, hence these flattened-out representations. As a makeshift for perspective

design, the Egyptians placed one row of figures above another to represent different planes. But, though lacking in this essential of art, they were lavish in details and decoration. Conventional Egyptian ornament was mainly based on flower-forms such as the lotus, as well as on the papyrus.

Side by side with the traditional sculpture peculiar to tombs and temples there grew up a secular kind, freer and bolder in design and of more varied types. Such is the famous statue of King Khafra, sitting in the conventional attitude with hands on knees. A familiar type is the seated figures of husband and wife. The celebrated Sphinx of Gizeh stands apart from any class. The Egyptian deities were usually represented in a composite form, it being customary to set an animal's head on a human body, or else the god in human form was accompanied by his particular emblem, such for instance as a cat, jackal, ibis, ram, hawk, lion, or crocodile. In its political representation Egyptian art is still more interesting. One of the commonest scenes is that of a gigantic king with cowering captives at his feet; another is that of a triumphant monarch in his chariot overwhelming his foes. These scenes throw great light on the customs and industrial arts of those early periods. Under the Ptolemies, sculpture came under the influence of Greek art.

Egyptian painting cannot be considered as a distinct art; it was chiefly an auxiliary to sculpture and architecture. The minor arts developed very early. Gold and enamel jewelry of delicate workmanship can be traced back even to the Ancient Empire. The traditional designs were applied also to furniture, ornaments, and utensils—wood, ivory, and metals being fashioned with equal skill. The distribution of these articles by Phœnician and Greek traders considerably affected the growth of European design.

Pyramids.—Colossal pyramidal tombs or cairns are a striking feature of Egyptian architecture. They are built of solid masses of stone, or of brick; and each pyramid has one or more chambers with concealed passages leading to them, while in the larger pyramids false passages were made to render desecration more difficult. The sarcophagus, or mummy case, was placed in the chamber before the superstructure was erected. The pyramids of Gizeh are nine in number, but the six small ones sink into insignificance by the side of the three great pyramids of Khufu (or Cheops), Schefren (or Khafra), and Menkaura (or Mycerinus), which were constructed from 3969 to 3784 B. C. They are accurately oriented, and that of Khufu and of Schefren are "so proportioned that the perimeter of the base closely approximates the circumference of a circle having the altitude of the pyramid for its radius." The Great Pyramid had a base of 764 feet and was 482 feet high (it is now 450). It has an unfinished subterranean chamber, from which an upward sloping passage leads to two other rooms, the larger one (the "King's") being ventilated by two air flues about nine inches square which lead off to the north and south sides of the pyramid. The King's Chamber is 19 feet 1 inch high, and 34 feet 3 inches by 17 feet 1 inch in area; the Queen's Chamber is 20 feet 3 inches high, and its area is 17 feet by 18 feet 9 inches. The pyramid of Schefren was 454 feet high on a base of 717 feet; that of Menkaura is steeper, and was 213 feet in height and 253 feet square. Each of these pyramids was originally faced with polished granite. Pyramidal sepulchers are not confined to Egypt; the tomb of Caius Cestius in Rome is in this form.

Sphinx (from the Greek *σφίγξ*, the "strangler").—In Egypt the Sphinx is generally represented as a wingless lion with a human (male) head; the Greek Sphinx on the other hand was a winged lion with a woman's head and breast. One of the earliest and most famous of these monuments is the Great Sphinx at Gizeh. It is partly cut from the solid rock and partly constructed of masonry, with a shrine built at its base. It is 172½ feet long and 66 feet in height. The name by which it is known is Horemkhu (or Hu), a word derived from Horus. The face of the Great Sphinx was orignally colored red, though few traces of the coloring now remain.

Karnak and Luxor.—Of the group of temples at Karnak, near the site of ancient Thebes, the most important was the temple of Ammon founded during the Twelfth Dynasty. It stood in an inclosure about 1,500 feet square, and an avenue of ram-headed sphinxes led from the river to the main gateway—a colossal pylon, 370 feet in breadth by 142 feet in height. Within the great court and in a line with the gateway were twelve enormous columns, six on either side; six of these are well preserved. A second pylon gate leads into a magnificent hypostyle hall, 171 feet long by 338 feet broad, its roof supported by 134 columns in 16 rows. This hall is one of the finest works of Egyptian architecture. At the upper end of the great hall is another pylon gate, now in ruins, leading to an open court, in the center of which is an obelisk 76 feet high. Beyond this again is another court in which stands the tallest obelisk in existence. There are a succession of smaller courts, corridors, pylon gates and halls. To the southwest of Karnak and on the site of Thebes stands Luxor with its famous ruins of palaces and of the temple dedicated to Ammon, Mut, and Chons, the Theban triad. Near the main gateway of the great temple stood two obelisks erected by Rameses II.; one is still there, and the other is now in the Place de la Concorde, Paris. In the great court stood six huge statues of Rameses II., three of which are still in position.

Colossus of Memnon.—On the Theban plain stand two colossal portal statues of King Amenhotep III. of the Eighteenth Dynasty. One of them, the famous "Vocal Memnon," was said to emit a sound when struck by the rays of the rising sun. This phenomenon, first mentioned by Strabo (about 20 B. C.), was probably due to the sudden expansion of the sandstone conglomerate. Greek and Roman visitors innumerable have carved their names on the sides of the statue. Hadrian and his wife, Sabina, visited it in 130 A. D. The sounds ceased in the time of the emperor Severus.

Obelisk (from the Greek *ὀβελίσκος*, diminutive of *ὀβελός*, a spit; pointed pillar).—An obelisk is a tall and tapering four-sided pillar terminating in a pyramidion, and is generally a monolith. The pyramidion was invariably capped with metal, usually gilded bronze. These monuments originated in Egypt, and were placed at the entrance of the temples and palaces, both for decorative effect and as a record of royal deeds and victories. Their sides were generally covered with hieroglyphic inscriptions deeply cut into the granite. One of the tallest obelisks is that of Queen Hat-shepsut at Karnak, which rises to 97½ feet, its diameter at the base being 8½ feet; its mass is estimated at 4,873 cubic feet and its weight at 367 tons. An obelisk of red granite, 66 feet high, still stands on the Nile, the solitary monument of the fallen city of Heliopolis. This is the oldest obelisk existing, and is said to have been erected by Usertesen I., the second king of the Twelfth Dynasty. The famous

"needles of Cleopatra" were erected originally at Heliopolis by Thothmes III. During the rule

EGYPTIAN OBELISK IN CENTRAL PARK, NEW YORK.

of the Ptolemies they were transferred to Alexandria. In 1879 one was taken to London and placed on the Thames Embankment; the other was brought to New York, in 1880, at the expense of William H. Vanderbilt, and erected in Central Park, February 22, 1881.

GREEK ART AND ARCHITECTURE.

The Greeks carried architectural art to a high degree of excellence. They made no use of the principles of the arch in their important buildings, but confined themselves to the columnar form; yet their architecture combined Egyptian massiveness with a chasteness and symmetry of design unrivaled by any other nation. As native architecture is generally influenced by available building materials, Grecian temples were originally made of wood, which largely accounts for the variety of forms found in their more permanent architecture. Stone was gradually introduced, but the traditional forms remained; the architrave represented the girder resting on the columns, and which supported the principal rafters; the triglyphs were the beam ends; the small circular ornaments in low relief, called guttæ, were the nail heads; the metope slabs filled the former intervals between the beams; the pediment was occasioned by the gable formed by the sloping roof.

The three distinct orders of architecture developed by the Greeks were the Doric, Ionic, and Corinthian. The distinctive character of the orders is chiefly shown in the column and the entablature. The Romans adopted the Grecian styles, modifying them and adding two others, viz., the Tuscan and the Composite.

The Doric Order.—This is the earliest of the Greek orders, and the one generally used in their temples. The Doric column tapered toward the top and had a strong entasis or curved profile. It had no base, but rested directly upon the *stylobate* or upper step. It had generally 20 flutings, and in height ranged from four to six times its lower diameter. The capital was plain, and consisted of (1) the annuleted necking, (2) the echinus or ovolo, whose peculiar curve is supposed to have been taken from the sea egg, and (3) the abacus, which was a square flat stone without moldings of any kind. The entablature was divided into (1) the architrave, which was either quite plain or composed of three projecting horizontal fillets; (2) the frieze, which was divided horizontally into triglyphs—vertical blocks reminiscent of the outer ends of the ceiling beams; (3) metopes, or the spaces between the triglyphs, decorated with painted ornament or relief sculptures; and (4) the cornice, which projected its own height. The Doric style was used in the greater number of Greek temples known to us, of which the Parthenon at Athens is the finest example.

The Ionic Order.—The more graceful Ionic shaft tapered less, and was longer than the Doric, being from eight and a half to ten diameters in height. It had a slighter entasis, and was ornamented by 24 elliptical flutings. The column had a base consisting of a series of hollow moldings divided by narrow fillets, below which was a larger cove between two fillets, and below this again a convex molding called a torus. The so-called Attic base was composed of an upper and lower torus between which was a scotia and two narrow fillets, and was in height one third of the thickness of the column. The capital consisted of (*a*) an ornamented neck, (*b*) two parallel scrolls or volutes occupying opposite sides and supporting (*c*) an abacus. The volutes form the distinctive feature of the Ionic capital, and a side view gives the appearance of a scroll of parchment with the rolls hanging downward on each side. The Ionic entablature consisted of (*a*) an architrave, divided vertically into three parallel and horizontal bands; (*b*) a frieze, which was continuous or unbroken (having neither triglyphs nor metopes) and ornamented by a band of painted or relief ornament; and (*c*) a molded cornice. Unlike the Dorians, who preferred moldings of simple lines decorated with severe ornament, the Ionians introduced a more refined profile and more delicate decoration. The best examples of the Ionic style were the famous Erechtheum at Athens, and the temples of Ilissus and Minerva Polias, all three of which are in ruins.

The Corinthian Order.—This order was developed later, and there are only two remaining specimens in Greece dating from pre-Roman times, viz., the choragic monument of Lysicrates at Athens, and the Tholos, or circular building, of Epidaurus in the Morea. No traces of the order are to be found in the remains of Corinth. The Corinthian was the lightest and most ornamented of the Greek orders, its most important change from the Ionic being in the different capital. The base, an elaborated copy of the Ionic, was two fifths diameters in height. The column was 10 diameters high, with flutings like the Ionic. The capital resembled an inverted bell with two rows of acanthus leaves clustered round it, above which were eight pairs of small

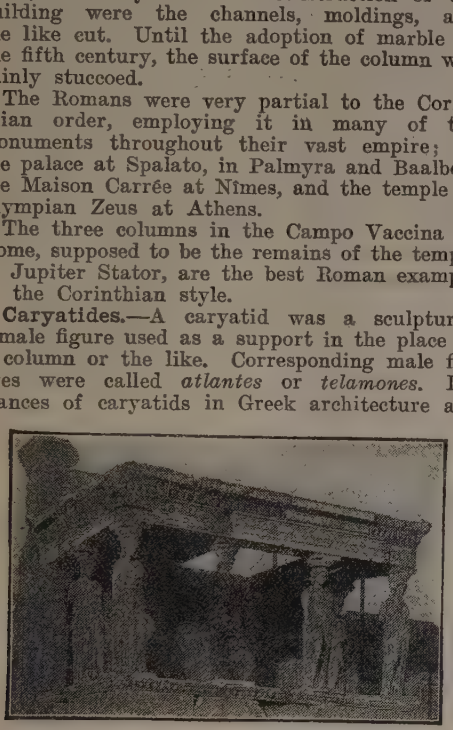
volutes, surrounded by a molded abacus with concave sides. The entablature was more elaborate than the Ionic, the architrave being divided into three horizontal fillets separated by a narrow molding from the frieze, which latter was decorated with bas-reliefs; while the cornice was both richer and more varied with the addition of volute-like mutules and modillions.

It is interesting to note that the Greeks usually blocked out their columns before erecting them, and only after the construction of the building were the channels, moldings, and the like cut. Until the adoption of marble in the fifth century, the surface of the column was thinly stuccoed.

The Romans were very partial to the Corinthian order, employing it in many of the monuments throughout their vast empire; in the palace at Spalato, in Palmyra and Baalbek, the Maison Carrée at Nîmes, and the temple of Olympian Zeus at Athens.

The three columns in the Campo Vaccina at Rome, supposed to be the remains of the temple of Jupiter Stator, are the best Roman example of the Corinthian style.

Caryatides.—A caryatid was a sculptured female figure used as a support in the place of a column or the like. Corresponding male figures were called *atlantes* or *telamones*. Instances of caryatids in Greek architecture are



CARYATID PORCH OF THE TEMPLE OF ERECHTHEUS AT ATHENS.

rare, the most important remains being the portico called Pandrosium, forming part of the Erechtheum at Athens. In this example the figures take the place of columns, and support the entablature.

What we know of Greek architecture is derived from the remains of ancient temples. Unlike the Egyptians, the Greeks sacrificed the interior in order to secure a fine exterior, relying for beauty and stateliness on the columns surrounding their structures. Their temples were generally of moderate size, being shrines rather than places of worship. The sunlight streaming through the main doorway was enough for the purpose, and windows were unnecessary. Flat roofed buildings, such as the Telesterion at Eleusis, may have been lighted from the roof, but the ordinary gable-roofed temple had no such device. The Greeks, after having fixed upon the types of their architecture, never departed from them, but generation after generation went on refining and perfecting their lines; and no matter whether the temple was great or small, the change of scale did not affect the harmony or simplicity of the composition. The life and requirements of the Greeks did not call for large buildings. Even in their largest temples the chamber or cella barely exceeded 40 feet in width. Buildings for the shelter of the public were called *stoas*, long galleries or colonnades facing the street or public square, and in these also the column was the chief architectural feature.

Sculpture.—As a concrete art, sculpture attained supreme perfection at the hands of the Greeks, who developed it from the stereotyped archaism of the Egyptians to the fullest expression of human beauty. Greek art culminated during the Attic period from about 480 B. C. to 323 B. C. The influence of the palæstra and the Olympic games were considerable. An appreciation of living beauty, combined with the ease of obtaining the finest models, gave an unbounded stimulus to sculpture. Added to this was a great demand for statues of the victorious athletes. Calamis, Pythagoras of Rhegium, and Myron adorned this period of transition; but with Phidias we enter at once into the full glory of Greek art. It was an age of giant minds and giant builders. The artist sought to embody some high ideal, and uniting consummate skill with nobleness of conception, he created masterpieces for all time. Sharing with Phidias the splendor of this golden era were Polyclitus of Argos; Agoracritus of Paros; Alcamenes, the creator of the celebrated *Aphrodite in the Gardens;* Cresilas of Cydonia; and Pæonios of Mende, the sculptor of the famous flying *Niké* (Victory) at Olympia. During the succeeding age of Praxiteles and Scopas, the sculptor gave emphasis to individual traits; and portraiture, which the two great schools of Athens and Argos had idealized, became more and more realistic. Even the conception of the gods followed the general tendency, and, instead of embodying the loftiest aspirations of popular religion, the statues of the gods expressed but the varying moods of men. Scopas was the foremost among the depictors of realism, while the *Hermes* of his great contemporary, Praxiteles, shows the mastery over technique possessed by the great artists of this era.

The conquests of Alexander had let in a flood of Eastern thought and tradition, and Athens no longer maintained its old supremacy. During the Hellenistic period from 323-146 B. C., the chief centers of art were Alexandria, Pergamus, and Rhodes. The increase of wealth stimulated the patronage of art, and the taste of the purchaser determined the subject of the artist. Genre groups, and the so-called "Hellenistic reliefs," reveal a new tendency in which the human figure is no longer of first importance in the composition. In spite of this, portraiture reached a high level of excellence in technical mastery combined with elegance in conception. No artist of this period can compare with Lysippus of Sicyon, who exercised a remarkable influence over Hellenistic art. A copy of his famous bronze *Apoxyomenos* is in the Vatican.

In Alexandria, art was mainly decorative, but at Pergamus the victories of Attalus I. (241-197 B. C.) were immortalized in a series of statues of which the *Dying Gaul* is one of the best examples. The celebrated frieze, *The Battle of the Gods and Giants*, which adorns the altar at Pergamus, shows the vigor and boldness of Pergamese art. The proclivities of this school

found new expression at Rhodes and culminated in the famous Laocoön group.

The Roman period of Greek art, from 136 B. C. to 330 A. D., was one of imitation rather than of striking originality. The works of the great sculptors were freely imitated, and it is to this age we owe so many of our copies of earlier masterpieces. The school of Pasiteles was particularly noted for these reproductions.

Painting.—This art did not reach the same development in Greece as did the sister arts of sculpture and architecture. This was partly owing to a limited knowledge of pigments. Few specimens of ancient painting exist, though from the Greek vases we can follow the progress of drawing. The earliest efforts were in monochrome; then, as in Egypt, came the employment of a varied palette, but with no pretensions to perspective or to light and shade. The first creative genius who advanced the art was Polygnotus of Thasos, whose works adorned the walls of public buildings, such as the *Painted Portico* at Athens. His contemporaries, Micon and Panænus, brother of Phidias, were also famous, and lent their art to architectural decoration. Polygnotus is reputed to have produced a variety of shades from a simple palette containing only black, white, red, and yellow. He won great fame by his composition and correctness of line. The scene painter, Agatharchus of Samos (about 480 B. C.), rendered the greatest service to painting when he discovered the methods of shading and perspective; and soon afterwards there arose what is known as the Asiatic or Ionic school, whose leading exponents were the rivals Zeuxis of Heraclea and Parrhasius of Ephesus, whom tradition credits with most realistic skill. With such meager remains it is difficult to appraise the work of the ancient artists. The Etruscans were undoubtedly inspired by Greek models, and examples of their work, such as the tempera painting on the Corneto sarcophagus now in Florence, give us some indication of the beauty and power of the original. Many specimens have come down to us from the later period of Hellenistic art; the greatest number of these are from the buried cities of Pompeii and Herculaneum.

Delphi, Temple at.—The original building, said to have been designed by the architects Trophonius and Agamedes, having been destroyed, a new one dedicated to Apollo was undertaken about 548 B. C. This is supposed to have been of the Doric order without and the Ionic within. The front was of Parian marble, and the walls were richly sculptured with mythological scenes. Bronze and marble statues adorned the interior, while golden shields and kindred trophies gleamed from the architraves. In 88 B. C. the temple was plundered by the Roman general Sulla; and Nero is said to have carried away about 500 of its statues. Worship was finally abolished by the emperor Theodosius (379-395).

Parthenon.—The famous Doric temple of the goddess Athene Parthenos on the Acropolis at Athens. Its architects were Ictinus and Callicrates, and the entire work was done under the supervision of the celebrated sculptor Phidias, during the reign of Pericles (465-439 B. C.). It is 227 feet in length, 101 in breadth, and 65 in height, and was built wholly of Pentelic marble except the roof, which was of Parian marble. In the eastern end of the temple stood the colossal ivory and gold statue of Athene by Phidias. It was 39 feet high, and the value of the gold alone is estimated at about $465,000. The edifice was surrounded by columns 34 feet 3 inches in height. The sculpture on the pediments represented the birth of Athene, and the dispute between her and Poseidon for the possession of Attica; the metopes depicted the battles of the Centaurs and the Lapithae; while the great frieze showed the procession of the Panathenaea. A number of the slabs of this frieze, with 15 metopes and other sculptures, were removed by Lord Elgin in 1801 and are now in the British Museum. The artistic effect of the sculptures and architecture was heightened by the use of color and metal to throw up the details. The Parthenon was transformed into a Christian church about the beginning of the sixth century, and was dedicated first to St. Sophia and later to the Virgin. After the conquest by the Turks (1458) it became a mosque, and a minaret was constructed in the southwest corner. During the siege of Athens (1687) by the Venetians it was used as a powder magazine, and on September 26, a shell crashed through the roof and destroyed the inner portion of the temple.

Mausoleum at Halicarnassus.—This tomb—one of the seven wonders of the ancient world—was erected in 353 B. C. by Queen Artemisia in honor of her husband, Mausolus. It was the work of the sculptors Scopas, Bryaxis, Leochares, and Timotheus. It was built of white marble with Ionic columns. Its total height was 140 feet. The Knights of St. John pillaged it in 1622 to build the citadel of Budrum, and specimens of these "Budrum Marbles" were sent to the British Museum by Sir Stratford Canning (1846) and by Newton (1857).

Colossus of Rhodes.—The famous statue of Apollo at Rhodes was one of the seven wonders of the old world. It stood at the entrance of the harbor, though not bestriding it, as is often said. It is said to have been made of bronze, cast in sections, and occupied the artist 12 years. It was over 100 feet in height and was erected about 280 B. C., but was overthrown by an earthquake in 224 B. C. It remained lying till 672, when Moawyia, general of the caliph Othman IV., sold it to a Jew, who loaded its material on 900 camels.

ROMAN ART AND ARCHITECTURE.

The practical and warlike Romans adopted the art of the vanquished Etruscans and afterwards that of the conquered Greeks. From the Etruscans they acquired the principles of the arch and the vault. At first the Romans preserved the inviolability of the classic orders, retaining the ancient form of the temple with its purity and simplicity of style. But with the growth of Roman power came the necessity for more varied monuments, and architectural traditions were no longer found adequate to growing secular needs. The temple, which in Greece had been the glory of a nation's art, sank into comparative insignificance, and gave place to civic buildings in national importance and splendor of design. At the beginning of the Christian era the introduction of circular-formed structures with majestic domes enabled the Romans to erect buildings of imposing grandeur throughout their vast empire. The arch, lending itself to any scale and supporting any burden, was made the constructive basis of civic architecture. Disdaining convention, the Romans combined the arch and the order, and subordinated chasteness of design to grandeur of conception and effect. They have been blamed for this innovation, as well as for not designing an architecture of their own to harmonize with the arch. But their genius lay in successfully combining these various styles, evolving harmony out of complexity, and giving a dignity to interiors such as had never been known before. The spaciousness of their edifices was made possible by the use of concrete, which became general in the time of Augustus. The Tabularium on the Capitoline is one of the earliest examples of this combination; the Colosseum, the Basilica, and the theater of Marcellus are on a similar plan, and in all of these the Greek

orders serve as an ornamental addition to the Roman arch and vault. The Romans also employed the segments of circles in place of the Greek moldings, and carried decoration to a point of unrivaled magnificence. Such were their temples at Baalbek and Palmyra, and those of Castor and of Faustina in Rome. The richer Corinthian and Composite orders were used instead of the Doric and Ionic.

The Pantheon is the noblest work in Roman architecture, but where the Romans excelled was in their theaters and amphitheaters, their fora and basilicas, their colossal baths and sumptuous palaces. Their triumphal arches set the model for all later generations. Monuments of the Golden Age bear eloquent testimony to the splendor and might of Rome. The ruined Roman cities of Asia Minor and Africa; impressive remains in France and Rhenish Germany; world-famed ruins in Italy, such as those of Pompeii and Herculaneum, the amphitheaters at Casinum, Capua, Puteoli, and Verona, Hadrian's villa at Tivoli, the arch of Trajan at Benevento, the triumphal arches of Titus, Septimius Severus, and Constantine, the Colosseum, the Roman and Trajan Fora, the imperial baths of Titus, Trajan, Caracalla, and Diocletian, the sculptured columns of Trajan and Marcus Aurelius, the imperial palaces on the Palatine, the Tabularium, the Senate House, and the Admiralty (Neptunium), these are the chief among countless remains of a great historic past.

Tuscan Order.—This order resembles the Doric, but has fewer and bolder moldings, no triglyphs, and no ornamental details. The shaft has a simple base decorated with one torus, and is seven diameters in height. The order was derived from the Etruscans, but owing to its primitive nature it was never much favored by the Romans except for domestic buildings. In a superimposition of orders the Tuscan was used for the basement.

Composite Order.—This is mostly an ornate and elaborated copy of the Corinthian. The column is not so high; and the capital, consisting of volutes and ovolo between them, is a combination of Corinthian and Ionic styles. The entablature has a small architrave, divided into three projecting fillets; the frieze is plain, but the cornice is adorned with a number of carved moldings.

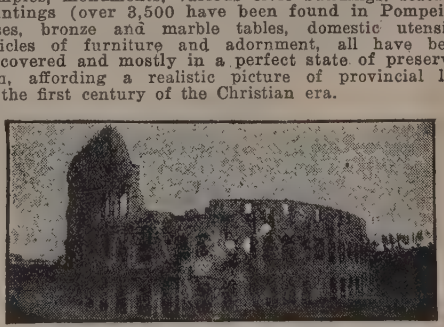
Sculpture.—In sculpture as in architecture the Romans were the inheritors of Etruscan art and Greek tradition. But the Greek incentive—the decoration of temples—was lacking, and sculpture was for a long time represented by portrait statues of Roman citizens. These statues adorned the bridges, basilicas, baths, theaters, and other edifices of Imperial Rome; while the worship of ancestors called for many statues to set up in the houses and to carry around in funeral processions. The only development which the Romans gave to the art was in the sculptured reliefs that adorned their architecture. Rome was filled with the art treasures of conquered Greece. Pasiteles, Stephanus, Menelaus, Arcesilaus, and other Greek artists flocked to the Imperial city, and found ready patronage among a luxurious people. The ideal in art rapidly disappeared from Græco-Roman sculpture, and popular taste demanded the bold, the sensual, and realistic instead. In reliefs this tendency is likewise apparent, as in the arch of Titus and the columns of Trajan and Marcus Aurelius. With the wane of Paganism Græco-Roman art declined; technique suffered too in the general dearth of creative talent. With the barbarian conquest of Italy, classical art came to an end.

Painting.—Roman painting developed on similar lines to sculpture; it was chiefly decorative and characterized by little originality. Greek models were slavishly copied both in method and technique. Mural decorations are the only extant examples of Roman painting; but we know from literature that frescoes adorned the temples, and that pictures of Roman victories were carried in triumphal processions. The general tendency toward realism is shown in the surviving mural paintings; in such, for instance, as the celebrated *Aldobrandini Marriage* and the garden scenes in Livia's *Villa ad Gallinas*.

Pantheon.—The first Pantheon ("temple to all the gods") was erected by Valerius of Ostia for M. Vipsanius Agrippa in 27 B. C. Becoming damaged or destroyed, Hadrian replaced it in 123 by the present circular edifice, which is still well preserved. The walls are of immense thickness. The rotunda is 142½ feet in internal diameter and supports a cupola which rises to a height of 142 feet. The only window is an oculus 27 feet in diameter. Since 608 the Pantheon has been a Christian church, and is known as the Church of Santa Maria Rotonda. The term Pantheon has been applied to a number of domical structures, chief of which is the Church of Sainte Geneviève at Paris, erected from 1764-1781.

Arch of Titus.—A triumphal arch on the Sacred Way in Rome, erected by Domitian (81) in commemoration of the conquest of Jerusalem. Its reliefs, representing the victory of Titus, show the Roman soldiers carrying the spoils of the temple, including the seven-branched candlestick, the table for the shewbread, and the golden trumpets. The arch was taken down and rebuilt in 1822 to insure its safety.

Pompeii and Herculaneum.—The two ruined cities of Italy which were overwhelmed by the eruptions of Vesuvius in 63 and 79. The ruins of Herculaneum were accidentally discovered about 1710, and excavations have been carried on, more or less intermittently, since 1737. As modern villages are built on the site of the ancient city, excavations can be made only by tunneling. The work of excavation at Pompeii was begun by King Charles III. of Naples in 1748, but not until 1860 was the work carried on systematically. The discoveries have thro a flood of light on Roman art and customs. Temples, monuments, various civic buildings, statues, paintings (over 3,500 have been found in Pompeii), vases, bronze and marble tables, domestic utensils, articles of furniture and adornment, all have been discovered and mostly in a perfect state of preservation, affording a realistic picture of provincial life in the first century of the Christian era.



THE COLOSSEUM AT ROME.

Colosseum, The.—The amphitheater was designed by the Romans for exhibiting gladiatorial combats, wild beast fights, and other spectacles. The Colosseum is the largest Roman amphitheater known, and stands on the site of Nero's palace in Rome. It was begun by Vespasian in 72 and finished by

Domitian in 86. A fourth story was added by Severus Alexander (died 235) and Gordianus (died 238). It covers five acres of ground and its seating capacity is variously estimated at from 50,000 to 87,000, besides standing room for about 20,000 more. Externally the Colosseum has four stories, the three lower with arcades,—the lowest, Etruscan; the second, Ionic; the third and fourth, Corinthian—according to the general Roman usage. Its height is 157 feet. The seats were of marble, the exterior walls and the chief corridors of travertine stone, the inner walls of tufa and concrete. There were four tiers of seats, corresponding to the four stories. The arena measured 280 by 176 feet, and underneath were dens for wild beasts with appliances for hoisting them to the arena. Early Christians were frequently thrown to the wild beasts in this same amphitheater; one of the first of such martyrs being St. Ignatius, who was torn to pieces by lions. The Colosseum was chiefly destroyed in the fifteenth century, when it was being used as a quarry for marble and other building material. An end was put to the spoliation by Pope Benedict XIV. (1740-1758), who consecrated it as a monument to the Christian martyrs who had been persecuted within its walls.

Palace of the Caesars.—The term is given to the buildings on the Palatine Hill at Rome, where Augustus first erected his palace on the site of the houses of Cicero and Catiline, succeeding emperors making alterations and additions. The ruins cover an area of 1,500 feet in length and 1,300 feet in breadth. The "Golden House," added by Nero, was of imposing grandeur. It was surrounded by a triple portico a mile in extent, and supported by a thousand columns; and within this was a picturesque lake bordered with stately buildings, each representing a miniature city. A statue of Nero, 120 feet high, stood in the main vestibule.

Trajan's Column.—A famous column at Rome erected in 114 in honor of the emperor Trajan. This noble masterpiece was constructed by the architect, Apollodorus. The pedestal is covered with warlike designs in bas-relief, while a similar decoration representing the victories of Trajan form a spiral around the shaft. These are all well preserved and form a valuable record of ancient costumes. In the interior of the column a spiral staircase leads to the summit, which was originally crowned by a statue of Trajan, but this has been incongruously replaced by one of St. Peter. The height of the column is 132 feet.

Mausoleum of Hadrian.—This great structure, on the right bank of the Tiber, in Rome, was erected in 136 in memory of the emperor Hadrian. Upon a base 247 feet square was built a circular mass of masonry 230 feet in diameter. The tomb was adorned with marble statues and surrounded by a bronze railing ornamented with gilded peacocks, two of which are now in the Vatican. The reconstructed remains of the mausoleum are now known as the Castel Sant' Angelo.

Arch of Septimius Severus.—A triumphal arch in Rome at the northwest end of the Forum, erected in 203 to commemorate the conquest of the East by Septimius Severus and his sons, Caracalla and Geta. It has three direct arches and one transverse arch.

The Arch of Constantine.—A triumphal arch near the Colosseum in Rome, erected in 312 by Constantine the Great to commemorate the victory over Maxentius. There are three arches and an attic, all supported on each face by four Corinthian columns, and partly adorned by sculptures taken from earlier monuments. It was restored in 1731.

Maison Carrée.—A Roman Corinthian temple at Nîmes in southern France, and the most important Roman temple now remaining. It probably dates from the time of the Antonines. The building measures 45 by 85 feet, and stands on a platform approached by 15 steps, and is surrounded by 30 columns. It is now used as a museum.

Column of Marcus Aurelius.—A Roman-Doric marble column on a square pedestal. It is now surmounted by a statue of St. Paul which Pope Sixtus V. placed there. The original column, 123 feet high, was erected to commemorate the victories of Marcus Aurelius over the Marcomanni.

EARLY CHRISTIAN AND BYZANTINE ART AND ARCHITECTURE.

The earliest churches of which we have any record were built in the time of Constantine, who, in 313, was the first to sanction Christian buildings, and so give an impulse to Christian architecture. Unlike the pagan worship, which was chiefly in the open air, the new religion necessitated large interiors to accommodate large assemblies; hence was evolved the style known as basilican, adapted from the architecture of the Romans. This was the distinctive style of the earlier Western or Latin church, and passed from Italy northward with the spread of Christianity. After the eighth century it was gradually superseded by the Romanesque, and then by the Gothic. The basilican church consisted of three, and occasionally five, aisles, divided by columns. The middle aisle, or nave, and the side aisles were for the clergy. In large churches there was generally a transept between the nave and the apse. The upper part of the nave, called the clerestory, rose high above the side aisles. The roofs were usually flat. The interior was lighted by arched windows in the clerestory and in the walls of the aisles. Three enormous churches of this type were erected in Rome by Constantine or shortly after his death, namely, those of St. John Lateran, St. Peter, and St. Paul Without the Walls. The last named is a surviving monument, while in the desert cities of Syria and North Africa are preserved some interesting remains of this style of architecture.

In the East, Christian architecture developed into the Byzantine style, which differed from all earlier forms in its exclusive adoption of vaulted roofs, its rejection of timber, and its substitution of brick for the concrete of the Romans. The erection of the dome on pendentives was a revolution in architectural design, the rest of the structure being subordinated to this one dominant feature. The Oriental love of color was a characteristic of this style, and the interiors were resplendent with rich mosaics and ornate decorations. The most magnificent example of Byzantine architecture is the church of San Marco at Venice, which combines an Eastern grandeur with an idealism suggestive of Greek art at its noblest. The first church in which this order was perfected was St. Sophia's at Byzantium, the old name of Constantinople. It still is the distinctive style of the Eastern church, and is prevalent in Russia, the Balkan States, and Asia Minor; from there it spread to Italy dominating Venice, Ravenna, and the South. Though a number of ecclesiastical monuments still remain, few secular examples are in existence; of these the oldest Venetian palaces are thoroughly representative of Byzantine art. The iconoclasm that characterized the sixth, seventh, and eighth centuries of the Christian era had a calamitous effect on Byzantine art, especially sculpture and painting; hence few remains have come down to us.

The most notable examples of Byzantine figured sculpture are the colossal bronze statue (now in Naples) of the Eastern emperor, from Barletta, the Madonna in the cathedral at Ravenna, the reliefs of Christ at the Eski-Diuma mosque in Constantinople, and certain reliefs at the Mount Athos monasteries.

Byzantine fresco paintings were famous and exercised an influence over Christian art till the time of the Renaissance. The finest examples of these paintings in the East were swept away as a result of Christian iconoclasm or Mohammedan vandalism. The West, however, furnished numerous specimens, especially of the iconographic era. When fresco painting was revived in the thirteenth century it was the Byzantines who taught the artists of Italy. But the fourteenth century saw the emancipation of Western art as well as the decline of Eastern painting.

Mosaic, particularly glass mosaic, was a Byzantine art, and was much used for the ornamentation of churches. Other arts successfully cultivated were enameling, ivory carving, and miniature painting.

Alhambra.—The great fortress and palace of the Moorish kings of Granada. It is built upon a hill overlooking Granada, Spain. Within massive walls, surmounted by square towers, are the citadel and palace surrounded by beautiful gardens. It is the finest existing example of Moorish art; built of marble and alabaster, and ornamented with fretwork and delicate arabesques. The ceilings are of cedar, inlaid with mother-of-pearl, silver, and ivory. The Hall of the Lions is so named from the 12 marble lions which support the fountain. The Hall of the Abencerrages is also noted.

Catacombs.—The group of subterranean vaults and labyrinths on the Via Appia near Rome are practically the only Christian remains of the first three centuries. It is believed these underground chambers were the meeting places of the early Christians in times of persecution, as well as their burial place. The Roman catacombs consist of long, narrow galleries and chambers cut out of the soft tufa. Some are near the surface, but beneath these are other stories to a depth of seventy feet. Though the superficial area of these catacombs is little over 600 acres, it is estimated that if the galleries could be arranged in a continuous line they would stretch a distance of 545 miles. Niches or ledges were cut out of the rocky sides to form a resting place for a corpse, each niche being closed with a marble or terra-cotta slab on which was inscribed the name of the deceased. The catacombs at Naples are similar to those at Rome, and are covered with Christian symbols as well as relics of pagan art. Many of the frescoes at Naples are distinctly classical in design, while, in the catacomb of St. Praetextatus, Hermes is represented as the conductor of the dead. The frescoes are for the most part devoted to Scriptural subjects. Similar catacombs have been discovered at Palermo, Syracuse, and Chiusi, as well as in Greece, Asia Minor, Syria, Egypt, Peru, and elsewhere.

Church of St. Sophia.—The original church of St. Sophia was built at Constantinople in the days of Constantine, and dedicated to *Sancta Sophia* or "Divine Wisdom." It was twice destroyed and the present edifice, which marks the zenith of Byzantine architecture, was begun by the emperor Justinian in 532, and dedicated 537. The interior of the church forms a Greek cross, and in the center rises a spacious dome to a height of 175 feet. The dome on pendentives, that is, supported on four arches bounding a squared space, was the masterly conception of the architect Anthemius, who wished to combine in one edifice the Roman basilica with its nave and side aisles, and the rotunda as illustrated in the church of St. Sergius in Constantinople. The world was ransacked for materials, and pagan temples were robbed of their marble and porphyry that the new church might lack nothing in intrinsic costliness. Rich mosaics and columns gave an appearance of unprecedented magnificence. The building is approached by a double porch, about 100 feet in depth. On the capture of the city by the Turks in 1453, the church was transformed into a mosque. It was renovated in 1847-1849.

Cordova Cathedral.—One of the finest existing specimens of Moorish architecture; begun in 785 by Abd-er-Rahman I. After the capture of Cordova (1236) it became a Christian church. The roof is supported by 1,000 columns of porphyry, jasper, and vari-colored marbles. The interior is enriched with arabesques and bas-reliefs, and was once lighted by 800 silver lamps.

St. Mark's at Venice.—The church of San Marco, modeled on its prototype, St. Sophia, is the most magnificent example of polychromatic architecture in the world. It was built in 830 to receive the relics of the apostle Mark, the patron saint of Venice, and rebuilt in 976 after a conflagration. From the eleventh to the fifteenth centuries a number of alterations were made till it assumed its present form. The church is cruciform with five massive domes on pendentives and several smaller domes in subordinate positions. The four famous bronze horses set above the central porch originally came from Constantinople. The interior of the church, with its soft dim light, its richness and harmony of detail, its idealistic designs and the consummate blending of various styles, is one of the most impressive in Europe. The description of St. Mark's in *The Stones of Venice* by Ruskin will be remembered by all lovers of art.

SAINT MARK'S AT VENICE.

ROMANESQUE ART AND ARCHITECTURE.

A term generally applied to art and architecture in Europe from about 800 to 1200, before the division into nations was completed. Several schools are distinguished, such as the Lombard in northern Italy, the Rhenish in Germany, the Saxon and Norman in England, and the Provençal and Norman in France. In architecture these schools may all be divided into two groups: the unvaulted and the vaulted. The vaulted style came into use about 1000 and prepared the way for the Gothic. The more noticeable features of the Romanesque are the use of heavy walls to support the vaults, which took the place of the wooden ceiling and roof; decoration of doors and windows with moldings, carving, and sculptures; a higher and narrower nave; and the use of heavy piers in place of columns. The ground plan was in the form of a Latin cross. The substitution of vaulted roofs gave architects a problem which was not solved until the introduction of the Gothic. The bell tower was one of the most marked innovations of the Romanesque. The chief examples of Romanesque architecture are to be seen in the cathedrals of Treves and Worms in Germany; in parts of Winchester cathedral, and in the vaulted roof of Durham cathedral in England; in the cathedrals of Angoulême, Angers, and Poitiers, and of St. Front at Périgueux in France; but the most noted example of all is the cathedral of Pisa (built between 1063 and 1118), with its baptistery and leaning tower.

Romanesque sculpture mostly followed the models of the early Christian and Byzantine period, and was extensively introduced into the scheme of architectural decoration. At St. Mark's in Venice the sculptures of the main doorway and the angels under the dome are Romanesque in style. Mural painting received its chief encouragement from the churches, more especially in Germany; while contemporary pictorial art in Italy found its expression chiefly in mosaics.

Baptistery, Cathedral, and Leaning Tower of Pisa.

Leaning Tower of Pisa.—A campanile, or bell-tower, begun in 1174. It is a round tower, 180 feet high, and 50 feet in diameter. It leans 13 feet from the perpendicular, owing to the sinking of the foundation on one side. It consists of eight stories and is ascended by 330 steps. There are seven bells in the tower.

GOTHIC ART AND ARCHITECTURE.

It is said that the term Gothic was first applied to this style of architecture by Raphael in a report to Leo X. concerning some projected building in Rome. It was meant to convey the idea of barbarous as opposed to Roman. The name is misleading, for the style did not originate in Germany, as the name Gothic implies, but in France. Some have tried to substitute "Pointed Architecture," but that is insufficient, for the use of the pointed window is only an incident and not a fundamental characteristic. Others have used the term "French Art," but to convey the exact idea one must add "of the last third of the Middle Ages," which makes an unwieldy name. It seems therefore that the error must be perpetuated. The strongest impressions which a Gothic building conveys are those of height and lightness. Such a building seems to be made up of windows, rose-windows, pinnacles, and lace-like traceries of stone. Vertical lines and pointed arches abound. The flying buttress is peculiar to Gothic architecture. The added height of the walls, and the additional weakening of them by the use of many and large windows, required that they be reinforced from the outside by means of stone arches supported by buttresses designed to carry the lateral thrust of the lofty interior vaults.

In England Gothic architecture developed on distinct lines, while retaining some of the features of the traditional Norman style. The early English or Lancet style, so named from the shape of the windows, was marked by simplicity and sparing use of buttresses. The choir of Canterbury cathedral, and the cathedrals of Salisbury, Lincoln, Lichfield, and Wells are notable examples of this style. This period was followed by the Decorative (1280-1400), which is distinguished by profuse ornamentation and lighter construction, as illustrated by the cathedrals of Winchester, Exeter, York, and Carlisle. The Perpendicular style extended to the middle of the sixteenth century, when it became known as the Tudor. Its main features were the vertical character of the buildings, and an elaborate system of vaulting, particularly fan-shaped vaulting. Many of the college buildings at Oxford and Cambridge are representative of this style; so also are St. George's chapel, Windsor, and the chapel of Henry VII. in Westminster Abbey. Towers and spires were always characteristic of English architecture, and attained their greatest perfection in the fifteenth century.

Sculpture was more and more introduced into the decorations of Gothic structures, the use of statuary reaching its climax in the thirteenth century. In France exteriors were lavishly ornamented, and to still further accommodate such ornamentation portals were developed into porches. The English Gothic did not lend itself so well to this exterior decoration. Mural painting was in less demand on account of the smaller wall spaces of Gothic buildings, and glass painting began to be developed instead. In France and Italy during the pre-Renaissance period considerable attention was given to miniature painting.

Amiens Cathedral.—The largest ecclesiastical edifice in France, and one of the finest specimens of Gothic architecture in Europe. It was begun in 1220 and finished in 1288. While many additions have since been made, the two side towers of the western façade are still unfinished. It is 470 feet long, the transept is 213 feet long, and the nave is 144 feet wide. The very slender central spire over the transept is 360 feet high.

Cathedral and Campanile, Florence, Italy.

Beauvais, Cathedral of.—It is a fragment, consisting of only the choir and the transepts. It was begun in 1225 with the aspiration of

making it the finest of churches, but too strict economy in the building of the foundations made them too weak to support the projected superstructure. The vaulting and tracery of the choir are of the finest of the thirteenth century, and the glass, of the same time, is exquisite. The choir is 104 feet long and 157 feet high from pavement to vaulting.

Campanile.—A famous bell-tower in Florence, erected by Giotto, who began it in 1334. It is a square tower 292 feet high, divided into five stories. The Campanile of St. Mark's at Venice was begun in the ninth century and finished in the sixteenth. It fell suddenly in 1902, but is now being restored.

Canterbury Cathedral.—Founded in the eleventh century. The choir was built in 1174, and is the first example of the Gothic style in England. This is raised several feet above the nave and separated from it by a fifteenth century screen. The building is long and narrow; the interior is light and impressive; it is 514 feet long and 71 feet wide. The vaulting of the nave is 80 feet high, and the great central tower, dating from the fifteenth century, is 235 feet high. Some of the glass in the choir dates from the thirteenth century.

Chartres, Cathedral of.—One of the great churches of the world, built in the twelfth and thirteenth centuries. Noted for its great beauty and solidity. The great triple sculptured portals are matchless. The thirteenth century glass in over 160 of the windows cannot be surpassed.

Cologne Cathedral.—One of the great buildings of the world; begun in 1248, completed in 1880, after being neglected from the fifteenth century until 1823. It was suggested by the cathedral at Amiens. The building has double aisles, with two

COLOGNE CATHEDRAL.

enormous towers and spires at the west end. The vast cathedral loses a great deal of its immensity by the dominating size of the towers. It is 468 feet long and covers 91,464 square feet. The spires are 512 feet high and are surpassed only by those of Ulm.

Dryburgh Abbey.—A famous Scottish ruin, about four miles from Melrose. It dates from the twelfth and fourteenth centuries. The chapter house, the refectory, cloisters, domestic buildings, and parts of the church are standing. Sir Walter Scott and his son-in-law, John Gibson Lockhart, are buried in the church.

Jedburgh Abbey.—Situated 41 miles from Edinburgh, Scotland; founded in 1118 by David I. The nave and central part of the church are nearly perfect except for the loss of some of the vaulting and parts of the side walls. The choir is Norman; the nave, Early English; and the doorway, Romanesque.

LICHFIELD CATHEDRAL, ENGLAND.

Lichfield Cathedral.—A large and impressive church dating from the thirteenth century, and one of the most beautiful ecclesiastical buildings in England. Its proportions are exquisite and its ornamentation is of great beauty. It has three lofty spires, the central one 260 feet in height.

Lincoln Cathedral.—This grand building was founded in the eleventh century and rebuilt in the end of the twelfth and the beginning of the thirteenth centuries. It is an example of the thoroughly English Gothic style, showing no trace of the French influence so noticeable in Westminster Abbey. It has three square towers, that in the center being 262

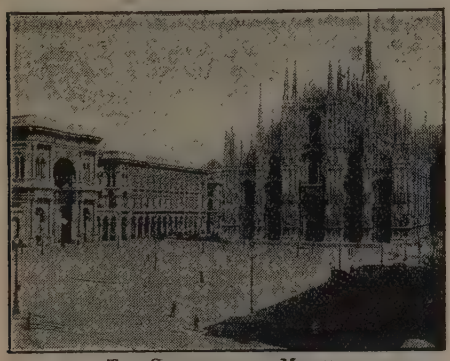
LINCOLN CATHEDRAL, ENGLAND.

feet high, and each of the two on the west front, 200 feet high. The choir, with its decorated screen, is Early English, except the five bays, known as the Angel Choir from its decorations. The building is 430 feet by 80 feet, and the height of the vaulting is 82 feet.

Melrose Abbey.—This famous ruin on the Tweed, 29 miles from Edinburgh, dates from the fifteenth century. It is regarded as the finest

ruin of Scotland. The choir is noted for its rich capitals. The large traceried windows are notable. A few of the bays retain their vaulting.

Milan, Cathedral of.—This famous building is of Gothic architecture, but the façade is marred by classic doors and windows, and the



THE CATHEDRAL OF MILAN.

altars within are in the same style. The edifice is nearly 500 feet long, and 250 feet wide through the transepts, and the height of the nave is about 150 feet. The central spire is more than 350 feet high. The throng of statues (some 4,500 in all) and the many pinnacles are marked features of the exterior.

Notre Dame Cathedral.—The famous cathedral church of Paris, situated on the site of a Roman temple on the Ile de la Cité. Though begun in 1163 it dates from the early thirteenth century. It is one of two or three of the finest examples of early Gothic architecture. It measures 156 by

NOTRE DAME AT PARIS, WEST FRONT.

420 feet and 110 feet high. The two western towers are 224 feet high. The spire, erected in 1845 by Viollet-le-Duc, is 385 feet high. This cathedral became the "Temple of Reason" during the Revolution, and not till Hugo's *Notre Dame de Paris* had drawn attention to the venerable edifice was it restored (1844-1845).

Rheims, Cathedral of.—Begun in 1212, is noted for its vast interior (466 feet long and 124 feet high) of perfect symmetry and imposing majesty. Its gorgeous rose-window is filled with exquisite amber-colored glass of the thirteenth century. Six hundred statues adorn the triple portal of the western front. Rheims was the coronation place of the kings of France from earliest times down to 1830. The façade of the church is the finest produced in the Middle Ages. There were originally seven lofty spires, but these were destroyed in the fire of 1480.

Rouen, Cathedral of.—One of the most impressive in existence. It is 447 feet long, the nave is 92 feet high, and a tower, built to replace an old one struck by lightning, is of iron, 500 feet high. The front varies in date from Romanesque to the Flamboyant. The fine rose-windows and the sculpture about their rich gabled portals are remarkable. The whole building is noted for its lightness.

Salisbury Cathedral.—Probably the most beautiful of English ecclesiastical structures, begun in 1220 and finished in 1260. The superb central tower with its spire is 406 feet high. The building is 473 by 99 feet, and the height of the vaulting is 81 feet. It is a consistent example of early Gothic.

Strassburg Cathedral.—An interesting monument begun in the eleventh century, and finished in the fifteenth. It is famous for the spire,—468 feet high,—the west front, very delicately and richly decorated with traceried windows and arcading, fine sculptured portals, and magnificent rose-window. The openwork tower is also remarkable. The nave is thirteenth century and 100 feet high. The east end is massive Romanesque. The glass is extremely gorgeous in color. The huge astronomical clock, conceived in the early part of the sixteenth century and rebuilt in 1842, is one of the great curiosities. A perpetual calendar, forming a ring around a dial 30 feet in circumference, occupies the central part of the lower division of the clock. At midnight, December 31st, the clock regulates itself (for the new year) for 365 or 366 days, as the case may be—even the omission of the bissextile day every 400 years being provided for. The disc within the calendar shows the eclipses of the sun and moon, calculated for all time to come. On one side Apollo points with an arrow to the date and name of the saint for the day. On the opposite side stands Diana, the goddess of night. Above the calendar is a niche in which, on each day, the mythological deity of the day appears—Apollo on Sunday, Diana on Monday, Mars on Tuesday, Mercury on Wednesday, Jupiter on Thursday, Venus on Friday, and Saturn on Saturday. Above this is a dial marking the mean time in hours and quarters, with two genii, one on each side, the one striking the first stroke of every quarter, the other turning over the hourglass at the last stroke of the last quarter. Then follows an orrery, showing the revolution of the seven visible planets around the sun, and, above, a globe giving the phases of the moon. Still above this, in a niche, four figures revolve around the skeleton image of Death, in the center. Childhood strikes the first quarter, Youth the second, Manhood the third, and Old Age the last—Death strikes the hour. In a higher niche stands the image of our Saviour. At 12 o'clock the Twelve Apostles pass before Him in line, and He raises His hands to bless them. St. Peter closes the procession, and, as he passes, the mechanical cock on top of the case flaps his wings and crows three times. The left turret of this wonderful clock contains the weights and machinery, and has in its lower part the portrait of Schwilgue, above this the figure of Copernicus, and yet above, the muse Urania. At the foot of the case is a celestial globe, calculated for observation at the latitude of Strassburg. The clock is wound every eight days.

Ulm, Cathedral of.—A fine example of late Gothic in Germany; is the largest church edifice in Germany excepting the cathedral at Cologne. It was begun in 1377 and finished in the sixteenth century. The splendid triple portal at the west end, the tower terminating in an octagonal form, and the spire, which is 529 feet high and the tallest church spire in the world, are the chief points of interest. The building is 420 by 165 feet and the height of the nave to the vaulting is 141 feet.

Westminster Abbey.—Founded on the site of an earlier church by Edward the Confessor, and rebuilt in the thirteenth century by Henry III. and Edward I. Early in the sixteenth century the chapel of Henry VII. was added. Including the chapel the building is 513 feet long and 75 feet wide; the transepts are 200 feet long; the height to the vaulting is 102 feet. The three portals, graceful arcade, and

large wheel on the north transept façade are very fine. The square west towers are rather incongruous and were designed by Sir Christopher Wren. The Abbey is world-famous as the burial place of Great Britain's distinguished dead. The famous Poets' Corner is in the south transept. Here are found memorials to most of the great names honored in English literature, including a bust of Longfellow. The famous metal tomb of Henry VII. by Torrigiano is the most notable of the many which the building contains.

RENAISSANCE ART AND ARCHITECTURE.

The division known as the Renaissance in architecture is subdivided into three periods: the Early or Free Renaissance (1420-1500), the High or Classical Renaissance (1500-1575), and the Declining Renaissance or Baroque (1575-1780). The style was a result of the study of classical models of antiquity and the effort to adapt the old styles to meet the new conditions. It was personal rather than national, decorative rather than constructive, and depended more than any other style of architecture upon the individuality of the architect. It began in Florence, and its founder may be said to be Brunellesco, or Brunelleschi, and among its great names are those of Bramante and Michelangelo. The churches of San Spirito and San Lorenzo at Florence were the first of Brunelleschi's works, and the revival of the Roman art is to be seen in the moldings and other details of classic architecture.

The Renaissance made its appearance in England in the time of Elizabeth, and left its impress on English architecture, chiefly in the form of classic detail. Some fine country seats were built in what became known as the Elizabethan style; of these the houses of Longleat in Wiltshire and Bramshill in Surrey are typical examples.

Renaissance sculpture found its purest expression in the works of Donatello and of that titanic figure which was at once the embodiment of mediæval Christianity and the herald of modern sculpture—Michelangelo.

Pictorial art was preëminently stimulated by the great intellectual revival, and, unlike the sister arts which drew their models from the past, Renaissance painting was characterized by great originality. Conventionalism gave way to a closer following of nature and a higher poetic truth. Florence was the chief center of the arts, and gave birth to numerous schools of painting in Italy. Oil painting began to rapidly take the place of tempera, and the art was no longer considered the exclusive handmaid of religion. This was the age that gave birth to the great masters, Raphael, Leonardo da Vinci, Titian, Giorgione, Tintoretto, Veronese, Bellini, and Correggio in Italy; the Van Eycks, Teniers, Vandyck, and Rubens in Flanders; Hals and Rembrandt in Holland; Holbein and Dürer in Germany; Velâsquez and Murillo in Spain; and Claude Lorrain, Boucher, Watteau, Lancret, and Chardin in France. With the greater wall spaces afforded by Renaissance architecture, mural paintings received new impetus, and truthfully reflect the ideals of the period.

Campo Santo.—The cemetery of Pisa, Italy; a beautiful oblong court, 490 by 170 feet, surrounded by a cloister of white marble 60 feet high and beautifully adorned with reliefs and sculptures. The earth within it is said to have been brought from Palestine by Crusaders. The art treasures of the cloister are famous.

Certosa of Pavia.—A former Carthusian monastery, one of the largest and most splendid in existence. The church was founded in 1396 and contains the tomb of Visconti.

Chihuahua, the Parish Church of.—This the most important building in the city, was erected between the years 1717 and 1789 by revenues derived from a tax on the silver output of the mine of Santa Eulalia, amounting, it is believed, to $800,000. The most noticeable characteristics of the building are the sense of lightness and grace not usually found in Spanish architectural designs. This effect is secured largely by the unusual height in proportion to the width, not only of the main building but of the towers. The façade is richly adorned by statues of San Francisco and the twelve Apostles.

Doge's Palace.—Though begun in 1354 only the south and west façades are of the Venetian Pointed or Gothic style. The grand entrance, the Porta della Carta, the court, and the Giants' Staircase are splendid examples of the Renaissance. The walls of the interior are covered with masterpieces of the great masters.

Escorial.—A celebrated monastery and palace, about 27 miles from Madrid. It was built in fulfillment of a vow made by Philip II. of

THE ESCORIAL NEAR MADRID, SPAIN.

Spain to Saint Laurence, upon whose day (August 10, 1557) the victory of St. Quentin was won. It was erected in the fanciful form of a huge gridiron to commemorate the martyrdom of Saint Laurence. The great interior courts form the intervals between the bars, and a group of buildings on the east forms the handle. The mass of buildings is 786 by 623 feet, and tall towers on the angles represent the legs of the gridiron.

Farnese Palace at Rome.—One of the finest pieces of architecture in the city. Built of stones from the Colosseum and the Theater of Marcellus; finished by Michelangelo and adorned with frescoes by Carracci and his pupils. On the extinction of the Farnese family in 1731 the palace went to the Infante of Spain and, later, to the King of Naples. The latter removed some of its famous art treasures to the museum at Naples.

Heidelberg, Castle of.—The most noteworthy example of German Renaissance; was founded in the thirteenth century by the elector palatine, Rudolph I., and enlarged by his successors. It has suffered much from war and lightning, and its ruins are the most imposing in Germany. Its walls and towers are broken and clad with ivy, but the glories of the inner court remain.

Hotel des Invalides.—An establishment in Paris founded by Louis XIV. in 1670 for the accommodation of the wounded soldiers of the French army. Its dome was built by Mansart and is regarded as one of the most imposing structures in Paris. In its crypt is the tomb of Napoleon, a large monolithic sarcophagus of red granite. The crypt is 20 feet deep and 36 feet in diameter.

Louvre.—The chief royal palace of the kings of France in Paris down to the time of Louis XIV., when Versailles was built. The Louvre was begun in 1541 by Francis I., and large additions

and alterations have been made at various times. The imposing east front with its colonnade, 570 feet long, with 28 pairs of Corinthian columns, is celebrated. The oldest parts of the existing palace are the western side

General View of the Louvre at Paris.

south of the Tour d'Orloge, the Pavilion du Roi (now remodeled), and the western half of the south side (now remodeled). These were built by Pierre Lescot (1510-1578), a famous architect of the Renaissance in France and architect to the Louvre from 1546 till his death. The west side of the court ranks as the finest existing example of early French Renaissance. A large part of the interior has been used since 1793 as a museum of art, which is world-famous.

Cathedral of the City of Mexico.—Built of a gray stone, ornamented by basso-rilievos, statues, friezes, bases, and capitals of white marble. There are two towers, each 203 feet 6 inches high, Doric in the lower divisions and Ionic in the upper; and the crown of each is a bell-shaped dome capped by spheres and crosses of stone. The walls are very thick; but the inside measurements of the edifice are 387 feet from north to south, 177 feet from east to west, and 179 feet interior height. The cornices on the façade are adorned by vases, statues of the doctors of the Church, of the patriarchs of the monastic orders, and of the theological virtues and their attributes. The corner stone was laid in 1573 near the site of an ancient Aztec temple; the foundations and part of the walls were completed in 1615, and the roof of the sacristy erected in 1623; the first service was held in 1626, the first dedication occurred on February 2, 1656, and the final dedication on December 22, 1667. The towers were completed in 1791. The total cost was over $2,000,000, of which $190,000 was for bells. The great bell cost $10,000 and is 19 feet high.

Palazzo Pitti.—A palace in Florence designed by Brunelleschi, begun in 1435. It is both a royal palace and the repository of a world-famous collection of paintings. It is built of quarry-faced ashlars and has a series of columns composed of blocks of stone alternately large and small.

Ponte di Rialto, Venice.

St. Paul's, in London.—Though architecturally inferior to many church buildings, it is yet of great historical interest. It is built in the form of a cross, 514 feet long and 287 feet wide. The cost of the whole building, which is of Portland stone, was nearly $4,000,000, being the proceeds of a tax on the coal brought into the port of London during its erection. The edifice was built under the direction of Sir Christopher Wren, was 35 years in course of erection, and was commenced and finished under the same bishop, the same architect, and the same mason. The great bell of this cathedral is tolled only on the occasion of a death in the royal family.

St. Peter's, at Rome.—Commenced about the year 1503 by Julius II. under the direction of Bramante, but the present form of the basilica is due almost entirely to Michelangelo. The interior is 613 feet in length, the height of the nave 152½ feet; the length of the transepts is 446½ feet; the interior diameter of the dome is 139 feet, the exterior 195½ feet. The colonnades around the piazza inclose a space 787 feet in diameter, and are connected with the façade by two galleries 296 feet in length. The façade is 379 feet long and 148½ feet high, and contains five doors, that admit to the grand entrance, which occupies the whole width of the church, 468 feet long, 66 feet high, and 50 feet wide. The height from the pavement to the top of the cross is 476 feet.

San Lorenzo at Florence, Church of.—Begun in 1425 by Brunelleschi and decorated in part by Michelangelo. It is one of the earliest Renaissance churches.

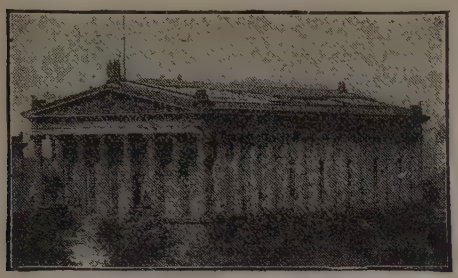
Church of Santa Maria della Salute at Venice.

Santa Maria del Fiore, Cathedral of.—Begun in 1298. When in 1420 the building was ready for the dome, it was believed that the aperture of 138½ feet was too great to be covered by a dome; but Brunelleschi undertook the task, and in 1446 completed the work, which was the first great triumph of the Renaissance. The dome is octagonal, slightly pointed, and surmounted by a lantern which is 387 feet from the ground. The building is 500 feet long and 128 feet across the nave and aisles. At the side of the cathedral is Giotto's famous campanile. The dome is second in magnitude only to that of St. Peter's.

Whitehall Palace.—Originally built by Hubert de Burgh in the reign of Henry III. James I. undertook to rebuild it after its destruction by fire in 1615. Inigo Jones designed the banqueting hall, which is the only part of the old palace remaining. This is 111 feet long, 55½ feet wide by 55½ feet high. Its ceiling is covered with paintings by Rubens representing the apotheosis of James I., events in the life of Charles I., and numerous allegories. Whitehall was the scene of Wolsey's disgrace, and the deaths of Henry VIII., Cromwell, and Charles II., while on a scaffold erected in the shadow of its walls Charles I. met his doom. The banqueting hall was transformed into a chapel by George I. and is known now as the "Chapel Royal of Whitehall."

MODERN ART AND ARCHITECTURE.

The first period of Modern Architecture was a protest against the excesses and extravagances of the Baroque period of the Renaissance. It was marked by a more rigid return than ever to the classic forms and a stricter adherence to



National Gallery at Berlin.

the principles of Roman architecture. The contrast was so great that many have termed the results lifeless and cold. As most of the monuments of this style and period date from the time of Napoleon it is often styled the Empire. This is seen in such models as the Arc de Triomphe and the church of the Madeleine. Even in the time of Louis XV. the work was begun on these lines, as may be seen in the Pantheon by Soufflot. The products of this period in Great Britain are the works of Inigo Jones and Sir Christopher Wren (St. Paul's Cathedral, London), many mansions by the brothers Adam, whose severe classical style preceded the change from that of Louis XVI. to the Empire later on, the British Museum, the Edinburgh High School, and St. George's Hall in Liverpool. In Germany the best examples of this style are seen in the Old Museum in Berlin, the Walhalla near Ratisbon, the Glyptothek at Munich, and, in Austria, in the Parliament House at Vienna. It was found, however, that this too strict adherence to classic models was not well suited to the demands of modern life. Then followed the reaction in the Gothic revival. Pugin and others in England initiated the movement, and between 1850 and 1870 the style was known as the Victorian Gothic. Its most important monuments are the Houses of Parliament and the Natural History Museum in London. In our own times the tendency in England has been to revert to Renaissance forms, as in the Imperial Institute and the Albert Hall, London, and the imposing Catholic Cathedral at Westminster.

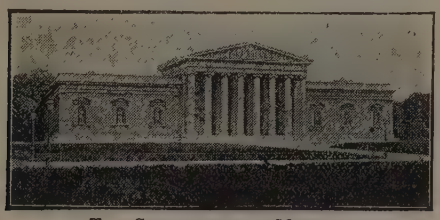
Sculpture.—The seventeenth century was a period of decadence, and Bernini was the only sculptor of eminence it produced. In the north a rigid Puritanism saw in statuary something to condemn, and the Church was no longer the universal mother of the arts. The pseudo-classical revival in the eighteenth and early part of the nineteenth centuries produced Flaxman and Chantrey in England, and Rauch, Rietschel, Tieck, and Schwanthaler in Germany. In France the conventions of the age of Louis Quatorze were broken away from by Puget and Houdon, and a freer and a nobler style was introduced. Sculpture was but little affected by the far-spreading wave of Romanticism, but sought its inspiration from ancient models, until the genius of such men as Rude, Carpeaux, and Barye (the great sculptor of animals) supplied newer models for their contemporaries. Barye has been called "the Michelangelo of wild beasts." Upon the old models of the Greeks, French sculptors, for the most part, have grafted a newer realism; while such masters as Rodin and Meunier, the Belgian, have added an intense naturalism, and their works have brought about a new awakening of sculpture in France. One of the finest sculptors of modern times was the Englishman, Alfred Stevens (1818-1875), whose Wellington memorial in St. Paul's is a fine conception. Other eminent sculptors produced by England in recent years are Ford, Thornycroft, Foley, Drury, Brock, Frampton, Colton, Leighton, and Gilbert. At the present day there is a tendency to revive the colored statuary of classic and mediæval days, though polychromy has never really been abandoned in devotional imagery. The leader of this movement was the French artist Gérôme. Barras in France and Klinger in Germany are his most successful imitators.

Painting.—After the French Revolution there was a return to classical models; but no sooner had Romanticism swept through Europe than tradition was cast to the winds, and painting entered upon a new stage of development—naturalistic, emotional, and revolutionary. French art gained the supremacy and its influence spread throughout Europe and America. Each broad phase of the Romantic movement in France found its own group of interpreters. For example, there were the Barbizon painters—Corot, Millet, Rousseau, Diaz, Daubigny, and Troyon,—who gave expression to the emotional side; the Realists, led by Courbet; the Semi-Classicists, among whom were Bouguereau, Cabanel, and Lefebre, who tried to combine the meritorious features of the past and the present; and, finally, the school of Impressionists aiming at a better representation of life and motion. Among other eminent painters produced by modern France were Manet, Degas, Monet, Bonnat, Carolus Duran, Meissonier, Laurens, the idealist Moreau, and Brascassat and Rosa Bonheur, the gifted animal painters.

Modern English painting may be said to have begun with Hogarth (1697-1764), the close of the eighteenth century producing the celebrated group consisting of Reynolds, Gainsborough, Romney, Wilson, and Morland. Genre painting was successfully developed by such men as Wilkie; but the school of English landscape achieved the greatest originality, and was rendered famous by the works of Constable and Turner. The latter was largely instrumental in bringing the art of water-color painting to perfection. Other noted water-colorists were Cox, Prout, Müller, De Wint, and Varley. The pre-Raphaelite movement led by Rossetti, Hunt, and Millais was largely brought about by the teachings of Ruskin. British art came under the influence of France and Holland, and various schools of painting began to flourish. Among distinguished modern painters are the portraitists, Ramsay, Holl, Herkomer, Reid, Shannon, and Peacock; the landscapists, Forbes, Parsons, Fildes, and Lawson; the subject painters, Chalmers, Phillips, Pettie, Stone, and Orchardson;

the decorative painters, Watts, Leighton, and Burne-Jones.

In other European countries French influence has been dominant, though here and there a painter of originality has arisen who has developed some national trait. Such were Fortuny of Spain, Segantini of Italy, Menzel and Liebermann of Germany, Verestchagin and Repin of Russia, Boulanger and De Groux of Belgium, Matejko and Siemiradzki of Poland, Johansen of Denmark, and Israëls of Holland.



THE GLYPTOTHEK AT MUNICH.

Albert Memorial.—A monument on the south side of Kensington Gardens in London, erected (1862-1863) to the memory of Albert, Prince Consort of Queen Victoria. A colossal bronze-gilt statue of Prince Albert, seated, is supported under a Gothic canopy upon a basement raised on a spacious platform ascended by granite steps. There are 169 marble reliefs adorning the basement; projecting pedestals support the angles and are adorned by marble groups representing Agriculture, Manufacturing, Commerce, and Engineering; and at the lower angles are groups representing Europe, Asia, Africa, and America. Sir George Gilbert Scott was the designer.

Alexander Column.—A column to honor Emperor Alexander I. erected in 1832 in St. Petersburg. It is of polished red granite, 84 feet high and 14 feet in diameter at the base. The shaft supports a Roman-Doric capital of bronze, which bears the figure of an angel with the cross. It is the largest monolith of modern times. The total height is 155 feet.

Arc de Triomphe de l'Etoile.—The largest existing triumphal arch, at the head of the Champs Elysées in Paris, erected by Napoleon in commemoration of his victories, but not completed until 1836. It is 146 feet wide, 160 feet high, and 72 feet deep. One of the many noteworthy sculptures upon it is the vigorous group. "The Marseillaise," by Rude, which has in it a touch of the sublime. The name means "the triumphal arch of the star." It is so named because it is located at the point whence 12 avenues radiate in the form of a star.

BRANDENBURG GATE, BERLIN.

British Museum.—While the interest in this building centers in the magnificent collections which it contains, it must not be forgotten that in its present aspect it is one of the best examples to be found in England of the Classic Revival and protest against the Baroque. It reached its present stage in 1847 and is the result of many additions made to the original Montague House, which was acquired early in 1700. It is now a hollow square of Ionic architectural design, with an imposing façade of 370 feet fronting on Great Russell Street and flanked by the residences of the highest officials. The reading room is circular and surmounted by a dome 106 feet high and 140 feet in diameter. Several acres of land have been recently acquired to provide for the unceasing extension necessary to keep pace with the frequent additions and steady growth of the collections.

Column of July.—A monument in Paris, erected upon the site of the Bastille in 1840. It is a Corinthian column of bronze on a marble base and surmounted by a gilded statue of Liberty. The total height is 154 feet.

Madeleine, Church of the.—Begun in Paris under Louis XV. but not completed until 1842. Work upon it was delayed by the Revolution but was resumed with increased vigor under the Empire. It is a huge Roman-Corinthian temple, 141 by 354 feet and 100 feet high. The building is without windows and is lighted wholly from above. Reinach says: "Parisians and visitors to Paris, having seen the Madeleine, have some general idea of the form of a Greek temple."

Houses of Parliament in London or **The New Palace of Westminster.**—The rebuilding of this edifice, which began in 1836 according to plans by Sir Charles Barry, was a result of the efforts of Scott and Ruskin to influence the popular mind in the revival of the Gothic. The buildings cover eight acres and contain upward of 500 apartments clustered around 11 open quadrangles or courts. They are of gray limestone, of a rich but not ornate Gothic style, with square towers of support at certain points. This is one of the noblest structures of the last century and a most successful attempt to apply the truly northern style of architecture to secular buildings. The architect, who was a classical student, was compelled to work out his design in the Gothic style, which he did most loyally, helped by W. Pugin, to whom he intrusted the whole of the decorative features. Neither would have produced such a perfect work single handed.

Cathedral of St. Isaac's at St. Petersburg.—Finished about 1850. It is built in the form of a Greek cross, surmounted by a dome 336 feet high, upon which is a lantern. Each of its four grand entrances has a Corinthian portico supported by monolithic columns of polished granite, 60 feet high, surmounted by bronze capitals. The dome, supported by 30 granite columns, is of gilded copper. The interior is rich in fine marbles and columns of lapis lazuli and malachite.

Column of Vendome.—A Roman-Doric column of stone, covered with bronze plates in relief to commemorate Napoleon's victories over the Austrians and Russians in 1805. It is in the Place Vendôme, Paris. During the Commune (1871) Courbet, in an effort to distract the raging mob from the Louvre, directed them against this column. Courbet restored it at his own expense in 1875.

Winter Palace.—The imperial palace at St. Petersburg, Russia. One of the largest palaces in the world; 455 feet long, 350 feet wide, and provides accommodations for the complete household of over 6,000 persons. It is of the Renaissance style, with three stories. Magnificent tables, vases, and doors of malachite; the richest statuary, pictures, and gems; a magnificent series of Russian historical paintings and portraits are among its wonders. It is connected with the Hermitage, the famous art gallery which contains many of the world's masterpieces. It was burned in 1837 and rebuilt in 1839.

ART AND ARCHITECTURE IN THE UNITED STATES.

Down to about 1876 the architecture in the United States was, as a general thing, English in its origin. We must exclude from this general statement the architecture of those regions which were essentially Spanish in their settlement and development. This includes the cathedral of St. Augustine and the fort now called Marion in Florida, and the buildings of the

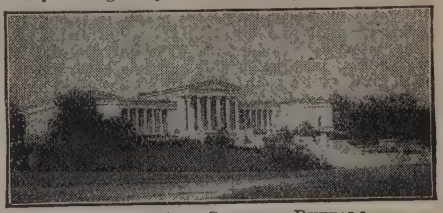
Catholic Missions, to each of which, in California and the Southwest, a church is attached. In New Orleans there are to be seen some traces of French influence, especially in the Ursuline Convent, now known as the Archbishop's Palace. The cathedral there is unmistakably Spanish in its influence. The Dutch and the Swedes on the Hudson and the Delaware respectively followed their own national characteristics as far as possible. Among these are the Van Cortlandt manor on the Hudson, built in 1681, the Slip house on Bergen Heights, New Jersey, built in 1666, a part of the Philipse manor, now the City Hall of Yonkers, built in 1682 by Frederic Philipse, the wealthiest merchant of his day, and the church at Sleepy Hollow, built in 1699 by Philipse. There are also the "Old Swedes Church" at Wilmington, built in 1699, and that in Philadelphia, in 1700.

During the early republican period many monumental buildings were erected, such, for example, as the Capitol at Washington, the State House at Boston, and the University of Virginia; but towards the middle of the century architecture declined, and most of the buildings constructed from 1850 to 1876 reflect the deterioration of public taste. Church architecture alone showed signs of vigor. In the last quarter of the nineteenth century, architecture revived, and, as the result of foreign study, architects like Hunt and H. H. Richardson produced some excellent work, and greatly stimulated the art in the United States. The present tendency is towards the style of the French Renaissance, especially for more pretentious residences and hotels. Gothic and Romanesque still remain popular for churches, though there are not wanting signs of a return to classical forms. Strictly speaking, there seems to be no aspiration towards a distinctly national architecture. Only in the colossal elevator buildings of the great cities, especially of New York and Chicago, has a new American type been evolved at once characteristic, serviceable, and imposing. The towering "skyscraper" would be more fittingly described under engineering, for it is but a steel skeleton incased in a shell of masonry. And yet these tall buildings are assuming more architectural pretensions. While the first efforts were void of all distinction and beauty, the more recent structures possess an elegance of line and a dignity of appearance eminently suitable to their surroundings. To relieve the plainness of such buildings as the "Flatiron" in New York, recourse was had to a triple division analogous to that of a classic column. The lower two or three stories constitute the base, and a similar number correspond to the capital, while the intermediate stories represent the simplicity of the shaft. But a more effective skyline is now aimed at, hence the tower is being adapted to the newer architecture. The Metropolitan building in Madison Square, New York, is an illustration of this later type.

Painting.—The first Americans to win distinction as painters were Copley (1737-1815) and Benjamin West (1738-1820). American art was under British influence till long after the Revolution, and United States artists of the early period spent the greater part of their lives in England. About 1825 American painting assumed a more national tone, under the influence of Thomas Cole, founder of the so-called Hudson River School, and of the painters of Rocky Mountain scenes—Bierstadt, Hill, Hubbard, and Moran. With the Centennial Exposition at Philadelphia in 1876 began a great revival in American art, and an awakening to the achievements of foreign artists. French influence in particular became dominant, and artists from the United States sped forthwith to Paris. But, in the main, American artists, while drawing vigor and inspiration from European art, have developed originality in subjects and motives. Two of the greatest American names are Whistler and Sargent, who hold high rank among their contemporaries. Other well-known figures of the older generation are Winslow Homer, Eastman Johnson, John La Farge, and Edwin A. Abbey. American landscape has been successfully developed, and has become the most distinctly national feature of United States art. The foremost exponent of this school is George Inness. Other well-known representatives are A. H. Wyant and Homer Martin. Of artists who have established their reputation in our own day may be mentioned Chase, Blum, Dewing, Thayer, Brush, Benson, Beckwith, Blashfield, Henry, Bunce, Tarbell, Alexander, Vedder, Pearce, Kenyon Cox, Walker, Melchers, and Low.

Sculpture.—Hiram Powers (1805-1873) was the first American sculptor worthy of the name. His contemporary, Thomas Crawford (1813-1857), produced the figure of Liberty on the dome of the Capitol at Washington. T. Ball, H. K. Brown, L. G. Mead, Launt Thompson, W. Rimmer, and Olin Warner are sculptors of the same period. With the brilliant creations of Augustus Saint-Gaudens (1848-1907) America entered the lists of European sculpture. Among the more distinguished United States sculptors are J. Q. A. Ward, D. C. French, F. MacMonnies, S. H. Borglum, Edward Kemeys, P. W. Bartlett, and a group of decorative sculptors including Isidore Konti, Philip Martiny, J. M. Rhind, Karl Bitter, Charles Grafly, and F. W. Ruckstuhl.

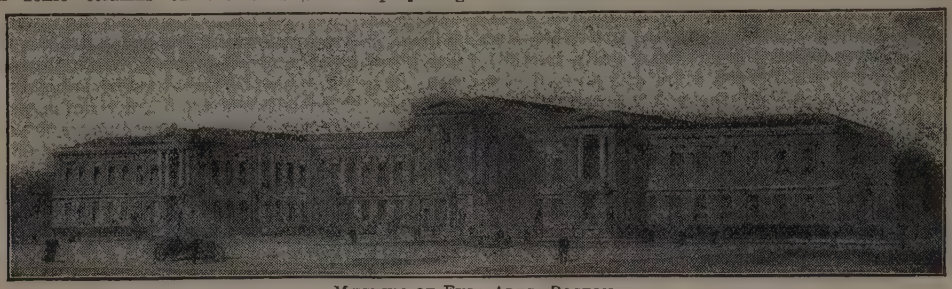
The State Capitol at Albany.—As originally designed, was an immense rectangular Renaissance block, in which an order was given to each story, much after the style practised at Venice by Sansovino and San Micheli, and was crowned by a domical tower of grand proportions. The design was improved by Richardson, and the upper portions of the edifice were completed according to it. There is great beauty in the newer portion, but it cannot be said that there is congruity. The towers are Romanesque, while the cornice of the order below is changed to Gothic. Parts of the interior, as the Hall of Assembly, the work of Eidlitz, are Gothic of the most beautiful kind. Seriously damaged by fire in March, 1911.



ALBRIGHT ART GALLERY, BUFFALO.

Albright Art Gallery at Buffalo.—This building stands in a park. It is a magnificent white marble structure, and was designed by Green and Wicks. Among its valuable collections are some notable etchings by Seymour Haden and others.

Museum of Fine Arts, Boston.—This building, located on Huntington Avenue and the Fenway, has a frontage of 501 feet and occupies an area of 12 acres. The main building, 320 by 120 feet, consists of two stories, and is pierced by two courts, 48 feet square, with advancing wings, inclosing a forecourt 232 by 110 feet. It is built of Maine granite of a warm gray tone. The style is simple, with Ionic columns on the ends of the projecting wings, and is in pleasing harmony with the surroundings. The design and arrangement embody three chief purposes: unity of the entire plan; each department is a complete museum; each collection is divided into an exhibition and a study series.



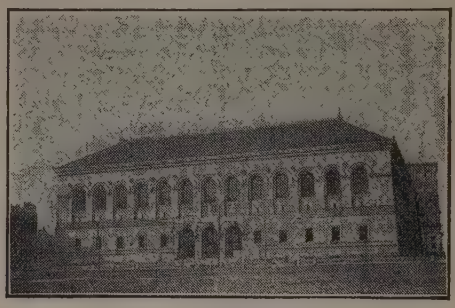
Museum of Fine Arts, Boston.

Public Library of Boston.—The style of this magnificent building is the Italian Renaissance. The walls are of Milford granite of a delicate pink tint and the roof is of brown Spanish tiles. A noticeable feature is the long, unbroken, heavy cornice of 225 feet. The walls of the vestibule are of Tennessee marble and from this three large portals admit to the entrance hall. The steps of the grand staircase are of Echaillon marble and the sides are of Siena marble. The mural decorations are by Puvis de Chavannes, Saint-Gaudens, Edwin A. Abbey, and John S. Sargent.

National Capitol at Washington.

The Capitol at Washington.—The inception of this belongs to the eighteenth century, and it is one of the most imposing and striking pieces of architecture in the United States. Notwithstanding its conventionally classic style, it is an edifice of which a great nation may be proud, majestic both within and without, and gaining in effect from its position on a commanding site. The corner stone of the Capitol was laid in 1793. The structure is of the Renaissance, and consists of two stories rising from an appropriate base The ground plan is a central pavilion with north and south wings. The principal façade is on the east side, where a portico of Corinthian columns 30 feet in height fronts the pavilion, while pilasters of the same order are continued along the wings. The eight middle columns project so as to admit of another inner row, and these 16 columns support a noble pediment adorned with a bas-relief. The subject is allegorical, Liberty attended by Hope and Justice, and is said to have been designed by John Quincy Adams. The approach to this imposing portico is by a flight of broad marble steps. The central portion of the edifice is, for the most part, occupied by a circular apartment, measuring 96 feet in diameter and 180 feet in height, known as the Rotunda. It is ornamented with paintings and bas-reliefs illustrative of our national history. The paintings are separated from one another by gilded pilasters, which rise to the dome, forming the roof. The dome compares well with those that are famous in the world, and, taken as a whole, the Capitol is more stately than the Houses of Parliament, and is open to as little criticism as the buildings of its class in other lands.

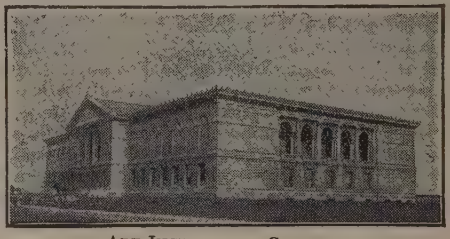
The Art Museum at Cincinnati.—In the Romanesque style, has two ranges of rectangular twin windows, and the plain walls of the uppermost story are unrelieved save by blind arches. The central hall is the most striking feature of the interior.



Public Library, Boston.

The walls are of local blue limestone, with cornices and arches of Missouri granite; the roof is of red Akron pantiles. The eastern wing has a fine polygonal apse with nine pairs of windows and a tall tower on the line of the entrance front.

Girard College at Philadelphia.—Of white marble, and modeled, as to the exterior, after the Parthenon,—that is, so far as possible, while employing a different order of architecture. It is considered the Greek building par excellence of America, as the Madeleine is of France, and is a Corinthian peristyle resting upon a Grecian stylobate.



Art Institute of Chicago.

Art Institute of Chicago.—On Michigan Avenue and north from the Auditorium stands this imposing building. It is in a semi-classical style, erected between 1892 and 1893 from designs by Charles A. Coolidge. In addition to its large and valuable collections of art objects, it supports one of the largest and most comprehensive art schools in America, numbering over 2,000 students annually.

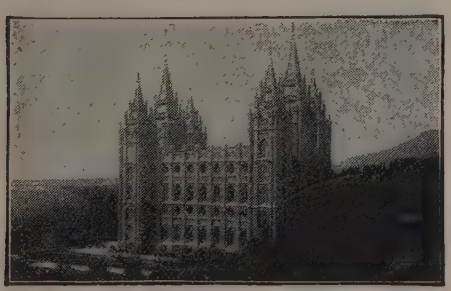
The Capitol at Hartford, Connecticut.—This is far from being an ordinary structure, and may be reckoned one of the finest public buildings in the United States. The style is Gothic, and the regular façade is broken into a center, curtains, and wings. The center has two low towers in every way subordinate to the tall tambour and dome which rise behind them. This cupola crown tower is decidedly Gothic in the sentiment of its details.

GRANT'S TOMB, NEW YORK CITY.

Grant's Tomb, New York.—A huge and solid mausoleum of white granite erected near the north end of Riverside Drive, between the years 1891 and 1897 from designs by J. H. Duncan, and at a cost of $600,000. The lower story, 90 feet square, is in the Doric style; while the cupola, borne on Ionic columns, attains a total height of 150 feet. The interior is arranged similarly to the tomb of Napoleon at the Hotel des Invalides in Paris. In an open crypt below the center of the dome the bodies of General Grant and his wife rest side by side in sarcophagi of red porphyry. Bas-reliefs on the pendentives of the dome are emblematic of events in Grant's life and were made by J. Massey Rhind.

Liberty Enlightening the World.—A colossal statue in New York Harbor on Bedloe's Island, erected in 1886 and executed by Frederic August Bartholdi. It is the figure of a woman clad in a Greek tunic and mantle, bearing aloft a torch in her right hand. The statue, 151 feet high, stands upon a pedestal 155 feet high. It was a gift from the people of France to the people of the United States.

Memorial Hall of Harvard University.—Built of brick banded in the Lombard style with buff tiles bearing geometric designs in blue. The central tower rises above the Memorial Hall, while smaller towers, all of the English Gothic, flank its walls.



MORMON TEMPLE, SALT LAKE CITY.

Mormon Temple at Salt Lake City.—This large and handsome granite building was erected between 1853 and 1893 at a cost of over $4,000,000. It is 186 feet long and 99 feet wide, surmounted at each end by three pointed towers. The tallest of these towers is on the east or principal façade and attains a height of 210 feet. Upon it is a colossal gilded figure of an angel by C. E. Dallin, which measures 12½ feet in height. The interior is elaborately designed and artistically adorned.

Metropolitan Museum of Art, New York.—On the east side of Central Park and opposite 82d street. This institution has been developing since 1879, the various wings being designed by different architects. The façade of gray Indiana limestone in Renaissance style was put up in 1902. This is from designs by the late Richard M. Hunt. The more recent extensions, two galleries on the north side and a library on the south, are after designs by Messrs. McKim, Meade & White. The original building was erected between the years 1879 and 1898. The value of the collection of art works which the building houses is over $20,000,000.

METROPOLITAN MUSEUM OF ART, NEW YORK CITY.

Custom House, New York.—This magnificent building occupies an entire block adjoining Battery Park, with a maximum length of 288 feet, and depth of 191 feet. It consists of seven stories above and two below the sidewalk, and is built of Penobscot granite. The architecture is rich and imposing, in the style of the modern French Renaissance. Large granite columns crowned with composite capitals extend around the entire building, which is ornamented by sculptures of a high order, among them the seventh story cartouche representing the arms of the United States, by Karl Bitter, and four large marble groups on pedestals at the street level, representing America, Europe, Asia, and Africa, by D. C. French.

CUSTOM HOUSE, NEW YORK CITY.

The City Hall, Philadelphia.—Is among the largest of modern buildings, slightly exceeding the Capitol at Washington in area. Seldom has a better opportunity been afforded for architectural display than is given by its position at the junction of two of the principal streets of the city. It occupies what was once Penn Square and thus stands free all around. This immense structure is conceived in the style of the Louvre at Paris with central and angle pavilions, the whole surmounted by a mansard roof of great height. Each front is a symmetrical whole, and, with the exception of the slight difference in length, the fronts are alike. The central feature is a gigantic tower which rises upward of 537 feet above the pavement. This tower was designed to be the loftiest in the world, but in this respect has already been surpassed by the Washington Monument at the National Capital. The magnificence of this edifice consists in its imposing dimensions, the rich array of marble and polished granite, and the beautiful sculpture which adorns its façades and entrance halls.

Episcopal Cathedral of Saint John the Divine.—In process of erection at the corner of Morningside Avenue and 112th Street, New York City, from designs by Heins and La Farge. The corner stone was laid in 1892, but little progress has been made upon the work. An arch of the crossing and the granite columns of the choir (more than 50 feet high) have been erected; the crypt, with the Tiffany Chapel of mosaic glass, having an altar composed of 150,000 separate pieces of glass, and the Belmont or St. Saviour's Chapel are completed.

CATHEDRAL ST. JOHN THE DIVINE, NEW YORK CITY.

Old State House of Pennsylvania or Independence Hall.—Built in Philadelphia (1731-1735), from designs furnished by Andrew Hamilton. It is noted for its free use of cut stone. It was the seat of the Provincial Government. The second Continental Congress convened within its halls in 1776 and adopted the Declaration of Independence. Upon its walls are portraits of many of the signers, and the building contains many interesting relics.

New York Public Library.—This fine structure in the classic Greek style, built of white marble, was completed in 1908. It stands on the site of the old reservoir at Fifth Avenue and Forty-second Street. There are three stories with a frontage of 366 feet on Fifth Avenue, and a depth of 246 feet. The height from ground to top of cornice is 68 feet on the east front and 98 on the west front. The wings are built around two courts 80 feet square, open from the ground upward, insuring excellent interior light, and other courts have glass roofs. The bookstacks have a capacity of 1,700,000 volumes, the third largest in the world; the library opened with about 1,000,000 volumes.

NEW YORK PUBLIC LIBRARY.

Temple Emanu-El in New York City.—A most ornate and symmetrical exterior, with two towers and an arcade in the center, and although the effect is pretty and fanciful rather than grand, it ranks among the finest of the religious edifices of that city.

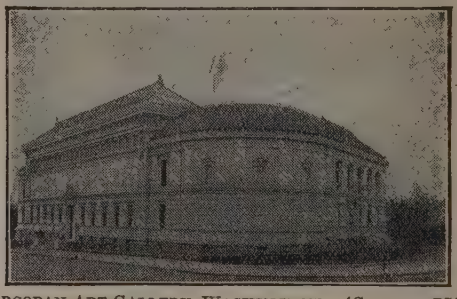
Trinity Church in New York.—A fine example of Perpendicular Gothic in brownstone, erected in 1846. Its tower and spire to the height of 284 feet are extremely effective, and the reredos and bronze doors are very noteworthy.

Saint Patrick's Cathedral in New York.—A most magnificent edifice of white marble in the decorated Gothic. It has two richly carved marble spires, 70 stained-glass windows from Chartres, and several costly altars of marble and gems. It was built between the years 1858 and 1879 at a cost of

SAINT PATRICK'S CATHEDRAL, NEW YORK CITY.

over $2,000,000. It is the best example of European fourteenth century Gothic. Some have applied to it the name of Geometric or Decorated Gothic.

Tabernacle at Salt Lake City.—This is one of the most extraordinary structures in America. It was built between 1864 and 1867, in the shape of an oval 250 feet long, 150 feet wide, and 70 feet high. Its roof is covered with iron shingles and closely resembles the hull of a ship inverted. It is supported by 44 sandstone pillars and by an interior arch which is said to be one of the largest unsupported arches in the world. The building seats 8,000 people and will hold over 12,000. It is imposing and striking in its immensity.



CORCORAN ART GALLERY, WASHINGTON. (See page 755.)

The University of Pennsylvania.—A group of Gothic structures built of green serpentine, with dressings of Ohio stone. There is little ornament, but the grouping is effective and the general effect satisfactory. Buildings of a very pleasing style, which admirably express their purpose, have recently been added.

Trinity Church at Boston.—Completed in 1877 from designs of Henry H. Richardson. The central tower is splendidly adapted from that of the cathedral at Salamanca. It is 211 feet high. The style is the simple, massive, rudimentary Romanesque of the south of France. Not only is this building in excellent architectural taste and congruity and noteworthy for its fine color effects, but it was at once a

TRINITY CHURCH, BOSTON.

great popular success. Its interior is enriched with masterly frescoes and stained-glass windows.

Tyler-Davidson Fountain.—This adorns Fountain Square, an expansion of Fifth Street, Cincinnati, and is one of the most successful works of art in the United States. The fountain was

TYLER-DAVIDSON FOUNTAIN, CINCINNATI.

erected in 1871 from designs made by August von Kreling. It was cast in bronze in the Royal Bronze Foundry at Munich.

Smithsonian Institution.—A red sandstone building in the late Norman style, which was erected between 1847 and 1856 at a cost of over $450,000. It has nine towers, the loftiest of which is 145 feet high. The statue of Prof. Joseph Henry (1799-1878), the first secretary of the institution, stands in front of the building and was erected by Story.

Washington Monument.—A white marble obelisk erected on the Mall in Washington, D. C., in honor of Washington. The base is 55 feet square and the total height of the monument is 555 feet. Though the corner stone was laid in 1848, the work was not completed until 1884. The states of the Union and many foreign governments contributed blocks of stone, appropriately inscribed, which were placed conspicuously on the inner wall.

SMITHSONIAN INSTITUTION, WASHINGTON.

Washington Arch.—A triumphal arch in New York City at the Fifth Avenue entrance to Washington Square, designed by Stanford White. It was erected in 1889 to commemorate the centennial anniversary of Washington's inauguration as president of the United States. It is 77 feet high, 62 feet wide, and pierced by a single arch of 30 feet span and 47 feet height. The arch is of white marble.

SOLDIERS' AND SAILORS' MONUMENT, INDIANAPOLIS.

Stone Hall, Wellesley College.—A fine structure and of what may be called Free Classic, but in its stepped gables and in the lines of its

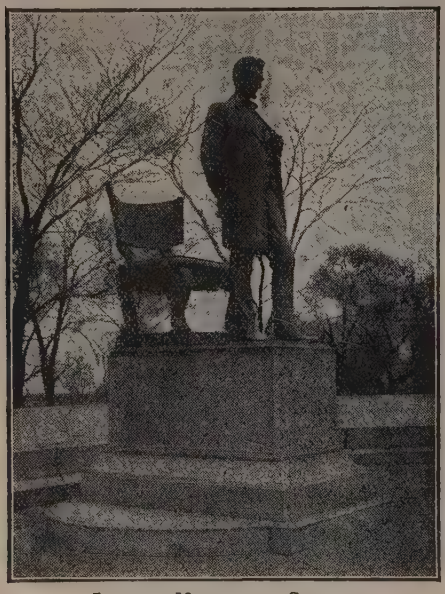
central pavilion approaches Flemish Renaissance. The entrance is well accentuated, contrasting admirably with the curtain-walls which intervene between it and the tower-like blocks which mark the intersection of the center with its wings.

American Museum of Natural History.—The museum is located in Manhattan Square on the west side of Central Park, between 77th

American Museum of Natural History, New York City.

and 81st streets, and was incorporated in 1869. It consists of two adjoining blocks, the one to the north being of red brick with granite trimmings (erected 1874-1877); and the one to the south having a façade of red granite (completed 1891). The entrance is on the south side of the structure. The ground and building belong to the City of New York, while the expenses of maintenance are defrayed by the city, the trustees, and by private subscriptions. The collections are valued at $3,000,000.

Soldiers' and Sailors' Monument, Indianapolis.—This is, perhaps, the most remarkable structure in the city, and was erected from the design of Bruno Schmitz of Berlin to commemorate the part borne by Indiana in the Civil War. About the base are to be seen allegorical figures representing peace and war, and near the monument are smaller bronze statues of Gen. George Rogers Clark, Gen. William Henry Harrison, Oliver Perry Morton, and Governor James Whitcomb. The corner stone was laid on August 22, 1889, in the presence of President Harrison. The monument is about 265 feet high and cost over $222,000.



Lincoln Monument, Chicago.

Lincoln Monument, Chicago.—This monument, one of the finest works of Augustus Saint-Gaudens, stands in Lincoln Park, facing the main entrance. The statue cost $50,000, was the gift of Eli Bates in 1887, and is considered a perfect likeness of the famous president. The cut of Lincoln, used on the two-cent stamps issued (1909) to commemorate his birth, was taken from this statue.

Grant Monument, Chicago.—This colossal memorial to the great general and president is situated at the entrance of Lincoln Park overlooking Lake Michigan, and is the work of Rebisso of Cincinnati. It has been the object of much criticism, especially the masonry foundation, which would be more appropriate for a viaduct than for a statue. The

Grant Monument, Chicago.

modeling on the whole is crude, the best part being that portion of General Grant's figure which is above the saddle. The statue was a gift to the park trustees by several citizens of Chicago. In clear weather it can be seen from the water for many miles.

Chicago Public Library.—This magnificent structure was built in 1893-1897 at a cost of

Chicago Public Library.

about $2,125,000. The architecture is of the classic type, and the interior is embellished with beautiful frescoes, mottoes. Siena and Carrara marble, and

about 10,000 square feet of glass mosaic. The library was made to accommodate 2,000,000 volumes; the present number, however, is considerably under this. Two notable features of the building are its large

LINCOLN MONUMENT, SPRINGFIELD, ILLINOIS.

G. A. R. Memorial Hall, and an immense delivery room, measuring 139 by 49 feet.

Metropolitan Building.—The tower is greater in all dimensions than that of the Singer Build-

METROPOLITAN BUILDING, NEW YORK CITY.

ing. On each of its marble-sheathed sides are the conspicuous faces of an enormous clock, each 25½ feet in diameter. At night the quarter hours are signaled by colored lights; in the day by "Cambridge" chimes rung on four colossal bells cast at Troy, N. Y. The tower is 50 stories high, 46 stories rising 700 feet above the sidewalk. The floor area of the whole building available for the company's business or for rental is about 25 acres. There is a lookout platform 660 feet above the sidewalk, which may be reached by elevator or by walking up 1,057 steps.

Lincoln Monument, Springfield, Illinois.—A granite structure of imposing dimensions in the Oak Ridge Cemetery, where it marks the resting place of Abraham Lincoln. It cost about $200,000, and was erected in 1874. One hundred and twenty feet from the ground is a bronze statue of the martyr president.

Singer Building, New York.—The main building is 14 stories high, with 40 offices on each floor. The tower, of modern French architecture and designed by Ernest Flagg, is 612 feet high, or 47 stories, its 42 office floors each having 16 offices. The entire building affords for rental about nine and one half acres of floor space. The walls are of brick and limestone, copper sheathing being used conspic-

SINGER BUILDING, NEW YORK CITY.

uously, especially in the tower. There are 16 electric elevators, 546¾ feet being the length of the highest shaft. The interior is illuminated by 14,500 electric lights, while for the exterior there are 1,800 incandescent lights, and 25 search lights each of 13,000,000 candle power, making the tower visible 40 miles away at night.

Corcoran Gallery of Art.—This building stands near the State, War, and Navy building in Washington, D. C. It was erected between 1894 and 1897 from endowment funds donated by W. W. Corcoran. It is a handsome white marble structure in a Neo-Grecian style from designs by Ernest Flagg. The semicircular part of the building is the School of Art, with over 300 pupils. The colossal bronze lions which flank the steps at the main entrance are modeled on those by Canova on the tomb of Pope Clement XIII. (See page 752.)

Custom House and Post Office at Chicago.—This is often called the new Federal Building. It occupies an entire block on Jackson Boulevard. The building is in the Corinthian style with a large dome in the center, 200 feet in height.

New Capitol of Pennsylvania.—Dedicated October 4, 1906, is 520 feet long, breadth at the center 254 feet, and through each of the wings 212 feet. It covers 86,178 square feet, or a little more than 2,000 square feet than does St. Paul's, London. The height from the ground to the top of the statue is 272 feet. The walls are of granite from Vermont, and the stone, despite a bluish-gray speckle, is of remarkable whiteness in general effect. The architect was Mr. Joseph M. Huston of Philadelphia. The dome is modeled upon that of St. Peter's at Rome. The general style of the structure is the Renaissance use of the Greek classic, with Corinthian columns on the façade. The walls are decorated with paintings by Messrs. E. A. Abbey, John W. Alexander, and W. B. Van Ingen.

Auditorium, Chicago.—Erected 1887-1889 at a cost of about $3,500,000. The longest front, toward Congress street, is 360 feet. The main

Auditorium Building, Chicago.

building is 10 stories high, and includes a large hotel, and one of the handsomest theaters in the world. The tower, 270 feet high, is occupied as a United States signal service station.

White House.—The official residence of the President of the United States at Washington. A two-storied mansion of English Renaissance with a portico of eight Ionic columns in front and a colonnade of six Ionic columns in the rear. Begun in 1792, it was first occupied by John Adams in 1800; burned by the British in 1814; rebuilt and again occupied in 1818. The grounds include 75 acres.

Fuller Building, New York.—The Fuller Building, or, as it is popularly known, the "Flatiron Building," occupies a prominent position at the intersection of Broadway, Fifth Avenue, and

Fuller or "Flatiron" Building, New York City.

Twenty-third street. It was completed in 1903 from designs made by Frederick Burnham. Its odd triangular shape, great height, and small base solved many problems in "sky-scraper" architecture. It is 20 stories in height, making a total of 286 feet from the pavement.

Times Building.—This conspicuous office building at Broadway and Forty-second street, New York, has given the name of "Times

Times Building, New York City.

Square" to the locality. It rises 375 feet above the pavement, while below are five underground stories, affording connection with the subway by a station.

The Art School at Yale.—A species of Gothic, but of heavy outline, and its tower is without sufficient prominence. Most of the newer Yale buildings are in this style, including the Peabody Museum, which is the best.

New Plaza Hotel, New York.—This great structure stands 18 stories high. Its architect was Mr. H. J. Hardenbergh. The building is of steel frame construction, with hollow tile floors, the stairways and the elevator shafts all inclosed with wire glass and all woodwork fire-proofed. About

Plaza Hotel, New York City.

17,000 incandescent lights illumine the building. There are 10 passenger cars, three sidewalk lifts, and 13 electric dumb waiters; also a very complete pneumatic equipment for distributing documentary matter. There were 400 tons of galvanized sheet metal used in the construction of the ventilating system, which includes 14 Sturtevant ventilating fans, electrically operated.

Soldiers' and Sailors' Monument at Riverside Drive, New York.—In 1902 this monument was dedicated to the memory of the soldiers and sailors who fought in defense of the Union. It is in the form of a small, circular Greek temple, 100

SOLDIERS' AND SAILORS' MONUMENT. New York.

feet high, of white Dorset marble on a base of pink granite, resembling the Choragic Monument of Lysicrates. A peristyle of 12 Corinthian columns, 35 feet high, resting on a high circular base, supports an entablature, surmounted by a conical roof. There is a bronze door in the base, at the south, admitting to a high vaulted chamber containing niches for battle flags. The circular base on which the monument stands is 100 feet in diameter, paved with brick panels, surrounded by a marble balustrade.

Canadian Architecture.—This is a blend of early French and English styles; the French with solid stone houses, high steep roofs, gable ends, molded springer stones, and small dormers, and the English following the more stolid, but excellently designed utilitarianism of existing edifices in England prior to 1750. After 1840 is Greco-Roman; the City Hall of Toronto, the Library and Physics Buildings of McGill at Montreal, are prominent specimens of Romanesque; the Houses of Legislature at Victoria, Laval University, recent buildings of McGill, and the Houses of Legislature at Quebec are in Renaissance, and the Chateau Frontenac at Quebec is a clever adaptation of the famed chateau architecture of the Loire Valley, in France. Lately a phase of Scotch-Baronial has been

TORONTO UNIVERSITY. Canada. (Main Building.)

effectively introduced in the Royal Victoria Hospital at Montreal.

Houses of Parliament at Ottawa, Canada.—These imposing buildings are on Barrack Hill, 186 feet above the Ottawa river, and were built (1859-1865) for the use of the Parliament and Civil Service of Canada, which was then represented by the two provinces known as Ontario and Quebec. The material is cream colored Canadian and New York sandstone, with red sandstone facings; the entire

CANADIAN HOUSES OF PARLIAMENT. Ottawa.

these began to be agreeably merged into what may prove a composite Canadian type. After the confederation of Canada the distinct provincial features disappeared in favor of the accepted modernized forms of Gothic, Colonial, Romanesque, or Renaissance of the older world, and of the United States. The Montreal Court House edifice is ornamental and substantial, as should be all government buildings, combining the structural grace and simplicity of adapted Gothic. The foundations were commenced in 1859, the foundation stone being laid by King Edward VII. (when Prince of Wales) in 1860, the buildings being completed and occupied in 1865 at a cost of $4,000,000. The arrangement is a three-sided square, the three stories merging into the massive tower reaching 220 feet, the ground

area being four acres. The towers and pinnacles are adorned with iron trellis-work. The main or central building is 500 feet long, containing the House of Commons and the Senate; the interior decorations are very rich and effective, with columns and arches of marble. Detached wings extend on either side constituting the various departmental offices of the government service. Directly opposite the front tower on the north side of the quadrangle is the beautiful

McGILL UNIVERSITY. Montreal, Canada.

octagonal Library of Parliament; the dome supported by the flying buttresses peculiar to the true Gothic structure, adding strength to the height and lightness consequent upon the windows, pinnacles, and traceries; the buttresses being designed to carry the lateral thrust of the lofty walls. The interior paneling of the Library is of Canadian pine, carrying some excel-

LAVAL UNIVERSITY (Montreal Branch). Canada.

lent carvings; the cases contain over 250,000 books under constant addition.

Toronto University, Canada.—The architecture is the grandly impressive Norman Gothic; the tower is 120 feet high, and the main building has a frontage of 300 feet. It was erected in 1857-1858, and is justly regarded as the flower of Toronto's structural types. A few years ago fire injured the buildings but fortunately spared the wonderful sculptured doorway. It was once said by an enthusiastic admirer that "Toronto University is one of the few pieces of collegiate architecture on the continent of America worthy of standing in the streets of Oxford." Included in Toronto University is the historic Trinity College, which is a Church of England institution, founded by Bishop Strachan when old King's College of Upper Canada was secularized and became the University of Toronto; it was founded in 1852, has a frontage of 250 feet, with deep projecting wings, standing in a park of about 20 acres. Prior to 1892 Trinity was empowered by Royal Charter to confer degrees in divinity, art, law, medicine, etc.; it was then affiliated with Toronto University.

McGill University at Montreal, Canada.—This is essentially a modern, up-to-date institution, founded by the Hon. Alexander James McGill, who was a Canadian fur trader prior to the American War of Independence (1770-1783). Later he became a leading merchant of Montreal, and did a grand and lasting work in planning, organizing, and carrying to fruition the great and varied schools of learning that now comprise McGill University. The buildings are of differing types, Gothic, Renaissance, etc., but all are imposing, clear in outline, of white stone, with well-shaped, lofty rooms, having good windows, open on all sides, and an abundance of the very necessary "north light" where it is desired, as in the decorative arts, painting, sculpture, etc. McGill is a university of high utilitarian trend, as well as of the older classic ideals.

Laval University at Quebec, Canada.—Was named after the French bishop, François Xavier de Laval-Montmorency, who established the famed Seminary of Quebec (1663). It is one of

CHATEAU FRONTENAC. Quebec, Canada.

the most conspicuous buildings in Quebec, towering to a height of five stories. From the roof is seen one of the most imposing panoramas of the New World. The university consists of three well-balanced buildings of cut stone, the main edifice being 286 feet long, costing $240,000. It is in Renaissance, pure in outline, with harmonious utility, light, and space breathing from every line. A fit monument to one of the greatest men of his times. In 1878 a branch of Laval University was founded in Montreal to accommodate the French speaking citizens.

SCHOOLS OF PAINTING.

Painters who are controlled by the same ideals, methods, or principles in their work are classed together into a school or group, without regard to the times in which they live. There is one use of the word wherein it signifies all the painters of one country, distinguished from all painters of other countries. Also one master may influence several painters, and his followers are grouped into a school. Sometimes a narrower sense is implied by the application of the term to the painters of a city. So we may speak of the "Italian School," the "School of Raphael," or the "Florentine School."

BOLOGNESE SCHOOL. At Bologna, in Italy, in the fifteenth, sixteenth, and seventeenth centuries. Leaders were Francesco Francia, Lorenzo Costa; the three Carracci—Lodovico, Agostino, and Annibale, Guido, Domenichino, and Guercino.

FLORENTINE SCHOOL. At Florence, in Italy, in the thirteenth, fourteenth, fifteenth, and sixteenth centuries. Leaders were Cimabue, Giotto, Leonardo da Vinci, Fra Bartolommeo, Michelangelo, Fra Angelico, Andrea del Sarto, Filippo Lippi, Filippino Lippi, Masaccio, Botticelli, and Domenico Ghirlandajo.

MILANESE SCHOOL. At Milan, in Italy, in the fifteenth and sixteenth centuries. Leaders were Vincenzo Foppa, Ambrogio Borgognone, Bernardino Luini, Cesare da Sesto, Beltraffio, Marco d'Oggiono, Andrea Solari, and Guadenzio Ferrari.

MODENA AND PARMA SCHOOLS. At Modena and Parma, in Italy, in the sixteenth century. Leaders were Correggio and Tommaso.

NEAPOLITAN SCHOOL. At Naples, in Italy, in the sixteenth and seventeenth centuries. Leaders were Caravaggio, Ribera, Salvator Rosa, and Giordano.

PADUAN SCHOOL. At Padua, in Italy, in the sixteenth century. The leader was Andrea Mantegna.

ROMAN SCHOOL. At Rome, in Italy, in the sixteenth and seventeenth centuries. The leaders were Raphael, Francesco Penni, Innocenzo da Imola, Giulio Romano, Perino del Vaga, and Sassoferrato.

UMBRIAN SCHOOL. In the province of Umbria, in Italy, in the fourteenth, fifteenth, and sixteenth centuries. Leaders were Gentile da Fabriano, Piero della Francesca, Fiorenzo di Lorenzo, Perugino, Pinturicchio, Raphael, Lo Spagna, and Timoteo della Viti.

VENETIAN SCHOOL. At Venice, in Italy, in the fifteenth and sixteenth centuries. Leaders were Gentile Bellini, Giovanni Bellini, Vittore Carpaccio, Palma Vecchio, Giorgione, Titian, Lorenzo Lotto, Paris Bordone, Tintoretto, and Paolo Veronese.

BRITISH SCHOOL. In Great Britain in the eighteenth and nineteenth centuries. Leaders were Hogarth, Sir Joshua Reynolds, Gainsborough, Richard Wilson, Sir Thomas Lawrence, Turner, Constable, Sir David Wilkie, and Sir Edwin Landseer.

DUTCH SCHOOL. In Holland. Leaders were Rembrandt, Ruysdael, the Teniers, Brouwer, Ostade, Jan Steen, Cuyp, Hobbema, Wouvermans, and Hals.

FLEMISH SCHOOL. In Flanders in the fifteenth, sixteenth, and seventeenth centuries. Leaders were the Van Eycks, Memling, the Massys, Van der Heyden, Mabuse, Rubens, Van Dyck, Jordaens, and Snyders.

FRENCH SCHOOL. In France after the fifteenth century. Leaders were Nicolas Poussin, Claude Lorrain, Watteau, Boucher, Greuze, Claude Vernet, Fragonard, David, Prud'hon, Ingres, Horace Vernet, Géricault, Delaroche, Delacroix, Rousseau, Scheffer, Millet, Meissonier, Corot, Regnault, and Decamps.

GERMAN SCHOOL. In Germany after the fourteenth century. Leaders were Wilhelm of Cologne (1358-1372), Martin Schöngauer, Albert Dürer, Lucas Cranach (2), Hans Holbein (2), Cornelius, Overbeck, Kaulbach, Schadow, and Lessing.

SPANISH SCHOOL. In Spain after the fifteenth century. Leaders were Francisco de Ribalta, Francisco Zurbaran, Velasquez, Murillo, Goya, and Fortuny.

SCHOOLS OF SCULPTURE.

AEGINETAN SCHOOL. In the island of Aegina after 480 B. C. Leaders were Smilis, Callow, Anaxagoras, Glaucias, Onatas, and Calliteles.

ATTIC SCHOOL. At Athens after the fifth century B. C. Leaders were Critias, Hegesias, Calamis, Phidias, Alcamenes, Myron, Lycias, Scopas, and Praxiteles.

CHIAN SCHOOL. In the island of Chios in the sixth century B. C. Leaders: Bupalus and Anthermus.

PERGAMENE SCHOOL. At Pergamum, near Troy, in Asia Minor. Leaders were Isogonus, Phyromachus, Stratonicus, and Antigonus.

RHODIAN SCHOOL. At Rhodes after 290 B. C. Leaders were Chares, Agesander, Athenodorus, Polydorus, Apollonius, and Tauriscus.

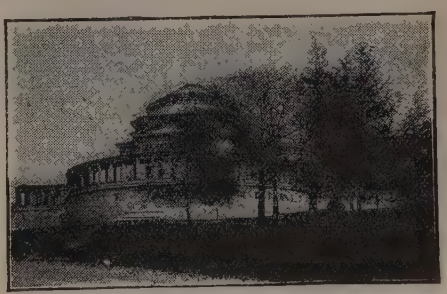
SAMIAN SCHOOL. In the island of Samos about 500 B. C. Leaders: Rhoecus, Theodorus, and Telecles.

SICYONIAN SCHOOL. At Sicyon, in the Peloponnesus, about 560 B. C. Leaders were Canachus, Euphranor, Lysippus, and Eutychides.

THE HALL OF FAME.

March 5, 1900, the Council of New York University accepted a gift of $100,000 (subsequently raised to $250,000) from a donor, whose name was withheld, for the erection and completion on University Heights, New York City, of a building to be called "The Hall of Fame for Great Americans." A structure was accordingly built in the form of a semicircle, 506 feet long, 15 feet wide, and 170 feet high, connecting the University Hall of Philosophy with the Hall of Languages. Within the colonnade 150 panels, each 2 by 8 feet, were placed, to bear the names of Americans deemed the greatest in their respective fields. An additional hall, having 30 panels, for names of foreign-born Americans, and a Hall of Fame for women are planned.

Only persons born on United States territory and who shall have been dead 10 or more years are eligible, to be chosen from 15 classes of citizens: Authors and editors, business men, educators, inventors, missionaries and explorers, philanthropists and reformers, preachers and theologians, scientists, engineers and architects, lawyers and judges, musicians, painters and sculptors, physicians and surgeons, rulers and statesmen, soldiers and sailors, distinguished men and women outside the above classes. Fifty names were to be inscribed on the tablets at the beginning, and five additional names every fifth year thereafter, until the year 2000, when the 150 inscriptions will be completed. Through a failure to select the entire 50 names at the beginning, the vacancies were to be filled in a following year.



HALL OF FAME.

In 1900, the University Senate received the ballots of 100 judges selected, 97 voting. Of 252 names submitted, each judge returned a vote for 50. No name receiving less than 51 votes could be accepted. But 29 candidates received the required number, as follows: George Washington, Abraham Lincoln, Daniel Webster, Benjamin Franklin, U. S. Grant, John Marshall, Thomas Jefferson, R. W. Emerson, H. W. Longfellow, Robert Fulton, Washington Irving, Jonathan Edwards, S. F. B. Morse, D. G. Farragut, Henry Clay, Nathaniel Hawthorne, George Peabody, R. E. Lee, Peter Cooper, Eli Whitney, J. J. Audubon, Horace Mann, H. W. Beecher, James Kent, Joseph Story, John Adams, W. E. Channing, Gilbert Stuart, Asa Gray.

Eight names were added in 1905, as follows: John Quincy Adams, James Russell Lowell, William Tecumseh Sherman, James Madison, John G. Whittier, Mary Lyon, Emma Willard, Maria Mitchell; 10 names in 1910: Harriet Beecher Stowe, Oliver Wendell Holmes, Edgar Allan Poe, James F. Cooper, Phillips Brooks, W. C. Bryant, Frances E. Willard, Andrew Jackson, George Bancroft, John L. Motley; 9 names in 1915: Alexander Hamilton, Louis Agassiz, Mark Hopkins, Francis Parkman, Elias Howe, Joseph Henry, Rufus Choate, Daniel Boone, Charlotte Cushman.

The total number of names admitted in the four quinquennial elections, 1900, 1905, 1910, 1915, is fifty men and six women.

FAMOUS MASTERPIECES OF ART.

ABRAHAM, SACRIFICE OF. Painted by Rembrandt; now in the Hermitage Gallery at St. Petersburg. It portrays the scene as depicted in Genesis xxii. Murillo, Raphael, Andrea del Sarto, and Teniers have also treated this subject.

ACHILLES, EDUCATION OF. Painted by Henri Regnault; now in the Louvre. Chiron, the centaur, is teaching the young Achilles to shoot with the bow.

ADAMS MEMORIAL. By Saint-Gaudens; in Rock Creek Cemetery at Washington. It is frequently called "Grief," "Death," or "The Peace of God." A memorial to a woman who lived and died. Nothing else is known about her. A mysterious bronze figure of a woman leaning against a slab of polished granite.

ADORATION OF THE LAMB. Painted by Jan and Hubert van Eyck; formerly an altarpiece in the cathedral at Ghent. The central part is still there; the other parts are in the Berlin Museum. The greatest example of the Flemish school and one of the most wonderful works of art in the world.

ADORATION OF THE MAGI. VERONESE. Vienna Gallery.

ADORATION OF THE MAGI. Homage paid to the infant Jesus by the wise men from the East (Matthew ii. 1-12). A favorite subject of painters. The most famous are by Botticelli, in the Uffizi, Florence; Albrecht Dürer, in the Uffizi, Florence; Gentile da Fabriano, in the Florence Academy; Raphael, in the Berlin Museum; Rembrandt, at Buckingham Palace; Rubens, in the Antwerp Museum, Brussels Museum, the Hermitage, and the Louvre; Titian, in the Madrid Museum; Velasquez, at Madrid; Veronese, at the Brera of Milan, Dresden Museum, National Gallery of London, and Vienna Museum; and Leonardo da Vinci, at the Uffizi, Florence.

AEGINETAN MARBLES. Sculptures found in the temple of Athena in the island of Aegina; found in 1811 and restored by Thorwaldsen; supposed to have been executed about 475 B. C.; now in the Glyptothek at Munich.

AGE OF INNOCENCE. Painted by Sir Joshua Reynolds; now in the National Gallery at London. It represents a little girl seated under trees upon the grass.

THE DOCTORS. Detail from the Anatomy Lecture. REMBRANDT. Royal Museum, The Hague.

ALEXANDER, HISTORY OF. A series of five paintings by Charles Le Brun; now in the Louvre. The subjects are The Passage of the Granicus, Battle of Arbela, Tent of Darius, Alexander and Porus, and Alexander Entering Babylon.

THE ANGELUS. MILLET. Paris.

ALMA MATER. A statue by French; in the approach to the Library of Columbia University in New York. A colossal figure seated in a curule chair, with elbows resting upon the arms, her head crowned by a wreath, and bearing a mace upright in her right hand.

AMAZONS, BATTLE OF THE. Painted by Rubens; now in the Munich Gallery. It represents the conquest of the Amazons by Theseus. He is shown upon a prancing horse and about to hurl his javelin at the Amazons, many of whom are falling from the bridge or struggling in the water.

AMBROSE AND THEODOSIUS. Painted by Rubens; now in the Vienna Museum. It is the scene of the refusal of Archbishop Ambrose of Milan to admit the emperor Theodosius into the cathedral until he shall do penance for his massacre of the people of Thessalonica (390).

AMOR CARITAS. By Saint-Gaudens; in the Luxembourg Gallery in Paris. One of the most admirable angel forms known to modern art.

ANATOMY LECTURE. A masterly composition by Rembrandt, now in the Royal Museum, The Hague. This painting shows the marvelous handling of light and shadow and the clear portrayal of character on every face, the whole being bathed in the luminous atmosphere so characteristic of Rembrandt's genius.

ANGEL OF DEATH AND THE YOUNG SCULPTOR. A relief by Daniel French; in Forest Hills Cemetery, near Boston. The Angel of Death is staying the hand of a young sculptor just as his work nears completion. It is a memorial to Martin Milmore.

ANGELUS. A celebrated painting by the French genre and landscape painter Millet (Paris, 1859). A peasant youth and maid pause from their outdoor work at the sound of the angelus, and stand in an attitude of silent prayer. This picture was purchased by the American Art Association in 1889 for 580,650 francs and resold in 1890 to M. Chauchard for $150,000.

THE ANNUNCIATION. TINTORETTO. Berlin Gallery

ANNUNCIATION, THE. The announcement by the angel Gabriel to the Virgin Mary of the coming birth of

Christ. A favorite subject of painters. Among the most famous are those by Fra Angelico, in the Madrid Museum; Fra Bartolommeo, in the Louvre; Ludovico Carracci, in the Louvre; Murillo, in the Madrid and the Seville museums; Andrea del Sarto, in the Pitti Palace, Florence; and Titian, in the Scuola di San Rocco at Venice. One of a series of paintings from the life of Christ by Tintoretto (1518-1594), and now in the Berlin Gallery. It was painted for the Guild of San Rocco, Venice, by whom he was engaged to paint three pictures a year at a salary of 100 ducats.

ANTINOUS. The illustration shows the marble bust of Antinoüs in the Vatican Museum, Rome. This is only one of several busts and statues of Hadrian's favorite, who lost his life in saving his master from drowning in the Nile. Antinoüs was a popular figure with Roman sculptors, and they made of him a new Apollo.

ANTINOUS. Vatican Museum, Rome.

ANTIOPE. Painted by Correggio; now in the Louvre. Antiope sleeps upon a blue drapery at the foot of a tree, while Cupid lies sleeping upon a lion's skin near her. A satyr stands near her head.

APOLLO BELVEDERE. A famous statue in the museum of the Vatican. It is a copy of a bronze statue executed soon after the death of Alexander. The original is attributed to Leochares, one of the artists engaged upon the Mausoleum under the direction of Scopas. The god has just hurled a dart and his expression is one of divine anger, not unmingled with contempt.

APOLLO CITHAROEDUS or **APOLLO MUSAGAETES.** A copy of a statue by Scopas, placed in the Palatine Temple by Augustus; now in the Vatican. Apollo is dressed in a tunic and crowned with a laurel wreath. He is playing the cithara or lyre.

APOLLO SAUROCTONUS or **APOLLO THE LIZARD SLAYER.** A copy of a work in bronze by Praxiteles. One is in the Vatican; a second, in the Louvre; and a third, in bronze, in the Villa Albani. Apollo is represented as a beautiful youth standing by a tree trunk and about to pierce a lizard with a dart.

ARAB SCOUT. Painted by Adolf Schreyer, the animal painter. This work was sold at the Morgan sale in New York, in 1886, for $3,500.

ARES or **MARS, STATUE OF.** In the Villa Ludovisi at Rome. The god holds his sword in his hand; one knee is raised; his shield is beside him; while at his feet Cupid or Eros, his son, plays.

ASHMOLEAN MUSEUM. At Oxford University; built (1679-1683) to receive the natural and antiquarian curiosity collections donated by Elias Ashmole. The Arundelian Marbles and other antiquities are contained in it.

APOLLO BELVEDERE. Vatican Museum, Rome.

ASSUMPTION, THE. The ascent to heaven of the Virgin Mary after death. The most famous paintings of this event are by Titian, in the Venice Academy and the Cathedral of Verona; Rubens, in the Antwerp Cathedral; and Andrea del Sarto, in the Pitti Palace at Florence.

AUGUSTUS CÆSAR. Vatican Museum, Rome.

AUGUSTUS CAESAR. This fine statue, now in the Vatican Museum, was found near Velletri (Veliterae), the birthplace of the conqueror of Actium. It is a lifelike figure of Augustus proudly haranguing the people.

AURORA. A fresco painting by Guido Reni on a ceiling of the Rospigliosi Palace at Rome. The goddess flies before the car of Phoebus (Apollo), scattering

roses. Graceful figures representing the hours attend the god. Guercino executed a similar, but inferior, fresco on a ceiling of the Villa Ludovisi at Rome.

AVENUE AT MIDDELHARNIS. One of the earlier works of Hobbema, the Dutch landscape painter. It is noted for its truth of atmospheric effect and for tone and brilliancy of color. It is in the National Gallery at London.

BACCHANTE. Statue by Macmonnies; in the Metropolitan Museum in New York. A remarkably realistic and idealistic conception.

BACCHUS AND ARIADNE. Painted by Titian; in the National Gallery at London. Ariadne is fleeing from Bacchus, who is leaping from his leopard-drawn car to pursue her, after she has been deserted by Theseus on the shore of Naxos.

BATTLE OF ISSUS. A mosaic picture, 17 feet by 8, found in Pompeii; now in the Naples Museum. Alexander is charging towards Darius, who is standing in a chariot attended by his horsemen and soldiers.

BEAR-TAMER, BOHEMIAN. Executed by Paul Wayland Bartlett while in Paris and exhibited at the Salon. Two years' work was expended upon it. The plaster cast of his first effort is in the Art Institute in Chicago, the bronze is in New York.

BEATRICE CENCI (*ba-ah-tre'chay chen'che*). Painted (it is said) by Guido; now in the Barberini Palace at Rome; but much doubt is cast upon both the subject and the artist.

BEATRICE CENCI. A statue by Harriet Hosmer; in the Mercantile Library at St. Louis. As a prisoner she sleeps on her hard pallet; the left hand has fallen to the floor and holds a rosary.

BEECHER, STATUE OF. By J. Q. A. Ward; in front of the Court House in Brooklyn. It presents the great orator, clad in overcoat with cape, his hat in hand, standing solidly upon both feet in an attitude which he so often assumed while addressing the people.

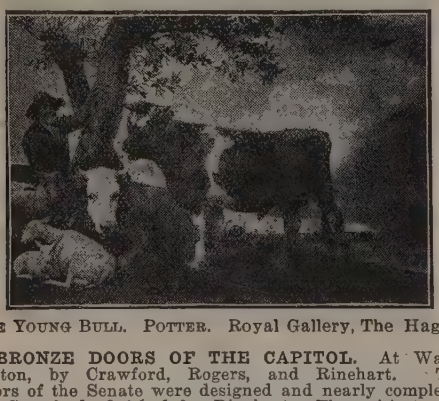
BEETHOVEN. Bronze statue by Crawford; stood for years in Music Hall in Boston, Mass.; now in the new Symphony Hall, Back Bay.

BELSHAZZAR'S FEAST. Painted by Washington Allston; now in the Museum of Fine Arts at Boston, Mass. Daniel is interpreting the handwriting on the wall. The picture was begun in 1818, but was never completed.

BELVEDERE. A part of the Vatican at Rome; noted for its collection of art treasures, which include the Apollo Belvedere and the Laocoön.

BLUE BOY, THE. Painted by Gainsborough; now in Grosvenor House, the residence of the duke of Westminster. Sir Joshua Reynolds had said that cold colors (blue being the chief) cannot be effectively used in painting portraits. This work was done in that color to disprove his theory.

BRERA (*bra'rah*). Originally a Jesuit church called Santa Maria; now the Palace of Science and Art in Milan, Italy; noted for its picture gallery, library, observatory, etc.



THE YOUNG BULL. POTTER. Royal Gallery, The Hague.

BRONZE DOORS OF THE CAPITOL. At Washington, by Crawford, Rogers, and Rinehart. The doors of the Senate were designed and nearly completed by Crawford, finished by Rinehart. The subjects are "War and its Terrors," "Peace and its Blessings," and include "Bunker Hill and the Death of Warren," "Battle of Monmouth and Rebuke of Lee," "Yorktown and Hamilton," "A Hessian Soldier Attacking a House," "Washington's Reception at Trenton," "Inauguration of Washington," and "Laying of the Corner-stone of the Capitol." Bronze doors in the rotunda of the Capitol at Washington by Rogers. The scenes are from the life of Columbus. They are remarkable for grace and dramatic power.

BRUTUS. Painted by Jacques Louis David in 1789; now in the Louvre. Brutus holds in his hand the written evidence of the guilt of his sons in attempting the restoration of the Tarquins. The bodies of his sons, who have just been executed by their father's orders as consul, are carried away by the lictors amid the shrieks of their mother and sisters.

BULL, THE YOUNG. Painted by Paul Potter in 1647; now in the Royal Gallery at The Hague. The bull is standing under a tree; a ewe is resting by a cow under the tree; while a herdsman is standing on the other side of the fence. All are life size, and the execution and color make the work a masterpiece.

CAESAR, DEATH OF. A favorite subject with painters. The most notable are by Vincenzo Camuccini, in the Royal Palace at Naples; Gérôme, owned by J. J. Astor; and Karl von Piloty, in the Munich Gallery.

CASTOR AND POLLUX. Painted by Rubens; now in the Munich Gallery. The twins are carrying off Hilaira and Phoebe, daughters of Leucippus and priestesses of Athene and Artemis. The maidens were betrothed to Idas and Lynceus. This led to the war in which Castor was slain by Idas.

CECILIA, SAINT. Painted by Raphael; now in the Bologna Gallery. The saint is standing between Saints Paul and John on one side and Saint Augustine and Mary Magdalen on the other. Domenichino, Rubens, and Reynolds have also treated this subject.

CHANCELLOR JOHN WATTS. Statue by Bissell; in Trinity churchyard in New York. The best work this sculptor did.

CHAPEAU DE PAILLE. Painted by Rubens; now in the National Gallery in London. A half-length portrait of a young lady in a black velvet bodice with crimson sleeves and wearing a black hat with black and white feathers.

CHAPIN, STATUE OF DEACON. By Saint-Gaudens; in Springfield, Mass. The old Puritan, on his way to, or from, the meeting house, "grasping," as Kenyon Cox says, "his Bible as Moses clasped the tables of the law and holding his peaceful walking stick with as firm a grip as the handle of a sword."

CHARLES I. Painted by Van Dyck about 1635; now in the Louvre. The king is dressed in white satin jacket, red hose, buff boots, and has just dismounted from his horse.

CHARLES V. AT MUHLBERG. Painted by Titian in 1548; now in the Madrid Museum. The emperor is mounted and carries a spear upon the field of Mühlberg, where he defeated the elector of Saxony in 1547.

CHILDREN OF CHARLES I. Painted by Van Dyck in 1638; now in Windsor Castle. Prince Charles is standing, with his hand upon the head of a very large dog; Princess Elizabeth and Princess Mary are on his right; while Princess Anne holds James, Duke of York, upon her knee. A later picture by Van Dyck is also at Windsor, and an earlier one is in the Turin Gallery.

CHRIST BEFORE PILATE. Painted by Munkácsy in 1881.

CHRIST CROWNED WITH THORNS. Painted by Titian in 1553; now in the Louvre. Another by Caravaggio is in the Hermitage; one by Ludovico Carracci is in Bologna; one by Van Dyck is in the Berlin Museum; one by Guercino is at Munich; and a second by Titian is also in Munich.

CHRIST HEALING THE SICK. Painted by West in 1826; now in the National Gallery in London.

CHRIST ON CALVARY. Painted by Munkácsy in 1883 and 1884. A vivid representation of the crucifixion. The picture was exhibited in America.

CLEOPATRA. A marble statue by Story (1862); in the Metropolitan Museum at New York. An impressive work. Hawthorne took an interest in the conception and execution of the statue.

CLYTIE. A life-size nude marble statue by Rinehart (1872); in a special gallery in the Peabody Institute. A plaster cast is in the Corcoran Art Gallery. The modest grace and tenderness of the figure are delightful.

COMMUNION OF ST. JEROME. Painted by Domenichino in 1614; now in the Vatican. One of the world's most celebrated paintings. St. Jerome is near unto death and is lying before the altar. He attempts to receive the Host from St. Ephraim of Syria. His faithful lion is near him; and, above, is a group of angels.

CONSPIRACY OF CATILINE. Painted by Salvator Rosa; now in the Pitti Palace in Florence. It represents the conspirators taking an oath of fidelity.

CORIOLANUS. A statue of Forrest as Coriolanus executed by Thomas Ball in 1867; now in the Actors' Home near Philadelphia. An excellent piece of work.

CROMWELL AND CHARLES I. Painted by Paul Delaroche; exhibited in Paris in 1831; now in the Nîmes Museum. Cromwell stands beside the coffin of Charles I. and gazes solemnly upon the face.

CRUCHE CASSE or **THE BROKEN PITCHER.** Painted by Greuze; now in the Louvre. A young girl bears a broken or cracked pitcher on her arm. She stands beside a fountain. She is dressed in white, wears a violet ribbon, and carries flowers in her apron.

CRUCIFIXION. Almost all of the great masters have painted this subject. Among the most famous are the pictures by Lucas Cranach, in the Stadtkirche at Weimar; Van Dyck, in Mechlin Cathedral; Andrea Mantegna, in the Louvre; Murillo, in the Hermitage; Rubens, in the Antwerp Museum; Tintoretto, in Venice; Titian, in Ancona; and Christ on Calvary by Munkácsy.

DANTE'S DREAM. Painted by Dante Gabriel Rossetti in 1870; now in the Liverpool Gallery. It represents Dante's dream of seeing Beatrice on the day of her death, as told in his *Vita Nuova*.

DAVID. MICHELANGELO.

DAVID. This statue, now at Florence, is one of the early masterpieces of Michelangelo. The anatomy is so perfect that some even regard the *David* as an offense against taste.

DAVID AND GOLIATH. Painted by Guido; now in the Hermitage at St. Petersburg. David stands holding the bleeding head of the giant. His sling is in his left hand and the giant's sword is at his feet.

DEATH AND THE WOODCUTTER. Painted by Millet in 1859; now owned privately in Paris. An old woodcutter, staggering under a load of fagots and oppressed by the poverty of his lot, calls upon Death to relieve him of the burden of life, but trembles with fear on his approach.

DEATH OF WOLFE. Painted by West in 1771; now in Grosvenor House, London. In the scene of the death of Wolfe on the Plains of Abraham at Quebec in the moment of victory over the French in 1759, West departed from the custom among artists of painting modern figures in classical costumes and presented his characters in modern dress.

DEATH ON THE PALE HORSE. Painted by West in 1817; now in the Pennsylvania Academy. It is 25 feet long and 15 feet high. It is an interpretation of the sixth chapter of Revelations.

DESCENT FROM THE CROSS. A favorite subject with the great masters. Among the most famous are the paintings by Rubens, in the Antwerp Cathedral; Daniele da Volterra, in Rome; Rembrandt, in the Munich Gallery; Andrea del Sarto, in the Pitti Palace at Florence; and Titian, in the Venice Academy.

DIADUMENUS. A statue by Polyclitus. A Roman copy of this is in the British Museum. It represents an athlete binding his brow with a fillet.

DIANA AND ACTAEON. Painted by Titian in 1559; now in Bridgewater House, London, owned by the earl of Ellesmere. With "Diana and Callisto" it forms the pair painted for Philip II. of Spain.

DIANA OF VERSAILLES. A Greek statue found in the ruins of Hadrian's villa at Tivoli; now in the Louvre. It is the most famous statue of the goddess. The goddess is advancing with one hand upon the head of a stag and the other drawing an arrow from a quiver.

DIANA OR CHRIST. Painted by Edwin Long in 1881 and exhibited at the Royal Academy in London. A Christian maiden in the stadium at Ephesus, surrounded by soldiers, executioner, and Roman rulers, elects the service of Christ and the death penalty in preference to that of Diana and life.

DIANA'S HUNTING PARTY. Painted by Hans Makart in 1882 and presented by James H. Banker to the Metropolitan Art Museum in New York. It measures 29 by 13 feet. Diana is about to hurl her spear at a stag in the water protected by nymphs, who beg its life from the goddess.

DIGNITY AND IMPUDENCE. Painted by Landseer; now in the National Gallery at London. A sedate old bloodhound and a saucy Scotch terrier are side by side looking from the door of a kennel.

DORYPHORUS. A statue by Polyclitus; now in the Naples Museum. It was long the standard of human proportion and was known as "The Canon." Artists have visited it from all parts for study. It represents a young man holding a spear in the left hand.

DUCHESS OF DEVONSHIRE. Painted by Gainsborough in 1783.

THE DYING GAUL. Capitoline Museum, Rome.

DYING GAUL. This famous statue in the Capitoline Museum, Rome, represents the passing away of a vanquished barbarian, at once a realistic and pathetic figure. This is a marble copy of a bronze statue executed in the time of King Attalus of Pergamus, about 240 B. C., and is sometimes erroneously called the "Dying Gladiator."

ECCE ANCILLA DOMINI (BEHOLD THE HANDMAIDEN OF THE LORD). The Annunciation painted by Dante Gabriel Rossetti in 1850; now in the National Gallery at London. The Virgin is a portrait of the artist's sister, Christina.

ECCE HOMO (BEHOLD THE MAN). The presentation in art of the passion and capacity for suffering of Christ; a favorite theme of painters. The most notable examples are by Correggio, in the National Gallery at London; Guido, in Dresden Gallery; Murillo, in Madrid and Cadiz galleries; and Titian, in Madrid and Vienna museums.

EGYPT AWAKING. A statue by Elwell; in Paris. A typical Egyptian female figure, seated, with arms uplifted and stretching as one who has just awakened.

ELEVATION OF THE CROSS. Raising the cross after Christ had been fastened upon it; a favorite subject. The best are by Rubens, in the Antwerp Cathedral, and by Van Dyck, in Notre Dame at Courtrai, Belgium.

ELGIN MARBLES. Taken from Athens in 1803 by Lord Elgin and sold for £35,000 ($170,000) to the British government; now in the British Museum. Among them are parts of the frieze of the Parthenon. Considered the finest examples of ancient art. Probably the work of Phidias about 440 B. C.

EMANCIPATION GROUP. Lincoln and a kneeling slave, by Thomas Ball in 1875; in Washington and a replica in Boston (1877). The conception of Lincoln is a lofty one; and the great theme is treated with a high degree of artistic emotion.

THE ENTOMBMENT. TITIAN. Prado Museum, Madrid.

ENTOMBMENT. Bearing the body of Christ to the tomb. Among the most celebrated is that by Titian, in the Louvre, painted in 1523; owned by Charles I., and on his execution passed to Louis XIV. It is one of the most famous pictures in the world. Among the best known are those by Caravaggio, in the Vatican at Rome; Garofalo, in the Borghese Palace at Rome; Raphael, in the Borghese Palace at Rome, and Titian, in the Madrid Museum.

ETHAN ALLEN, STATUE OF. By Larkin G. Mead; in the National Hall of Statuary in the Capitol at Washington; the contribution by Vermont. It is remarkably well done and full of life.

FARNESE BULL. A marble group credited to Apollonius and Tauriscus of the third century B. C.; found in the ruins of the Baths of Caracalla in 1546 and placed in the Farnese Palace at Rome; now in Naples Museum. Zethus and Amphion, sons of Antiope, are tying Dirce to the horns of a bull to punish her for ill-treating their mother.

FARNESE FLORA. A colossal statue of the goddess found in 1546 in the ruins of the Baths of Caracalla; placed in the Farnese Palace; now in the Naples Museum. The figure is 11½ feet high; one of the most beautiful of the ancient colossal statues.

FARNESE HERCULES. Credited to Glycon of Athens in the first century B. C.; perhaps a copy of the Hercules of Lysippus. Hercules stands leaning upon his club with his right hand behind him; found in the Baths of Caracalla in 1540; placed in the Farnese Palace; now in the Naples Museum.

FARNESE JUNO or HERA. Supposed to be a copy of the gold and ivory statue, by Polyclitus, erected near Mycenae about 420 B. C.; formerly in the Farnese Palace; now in the Naples Museum.

FARRAGUT, STATUE OF. By Saint-Gaudens; in Madison Square, New York. One of America's most perfect public memorials.

FAUN OF PRAXITELES. Statue of a faun or satyr leaning upon a tree stump; by Praxiteles. The finest copy is in the Capitoline Museum at Rome.

FEAST IN THE HOUSE OF LEVI. Painted by Paolo Veronese in 1573; now in the Venice Academy. It is 19 feet 8 inches by 46 feet. The theme is taken from Luke v. 29.

FEAST OF THE ROSE GARLANDS. Painted by Albrecht Dürer in 1506; now in the Prague Museum. The Virgin and Child are enthroned under a canopy; angels hold a diadem over the Virgin's head; she crowns the emperor and the Child crowns the pope; both recipients kneel before the Virgin and Child.

FIDES. Painted in 1877 by Edward Burne-Jones, the great English exponent of the romantic school. His work is characterized by idealism and abstract beauty.

FLIGHT INTO EGYPT. Mary and Joseph fleeing into Egypt with the infant Jesus, to escape the jealous fear of Herod. Among the most famous are those by Claude Lorrain, in the Dresden Museum; Murillo, in collection of the duchesse de Galliera in Paris; Rubens, in the Louvre; and Tintoretto, in Venice.

FRIEDLAND or 1807. Painted by Meissonier in 1878; now in the Metropolitan Art Museum in New York. A review of the victorious French army after the battle of Friedland (1807), which made Napoleon dictator of Europe. The Twelfth Cuirassiers gallop through the trampled grain and salute Napoleon.

GALLAUDET GROUP. By French; in the Columbian Institution for Deaf Mutes in Washington. Dr. Gallaudet is represented seated in a chair with a little girl standing beside him. The deaf-mute is learning to talk. This is undoubtedly an exquisite work.

GANYMEDE AND THE EAGLE. A marble group in the Vatican, supposed to be a copy of the bronze done by Leochares in Athens, representing Ganymede being carried to heaven by Zeus in the form of an eagle.

GARFIELD. A bronze statue by Niehaus in Cincinnati; also a marble statue by the same at Washington.

GAUL AND HIS WIFE, THE. A famous group from Asia Minor, probably in the third century B. C.; now in the Villa Ludovisi at Rome. The Gaul is killing himself after having killed his wife; one of the most pathetic studies of antiquity.

GIRLHOOD OF SAINT GENEVIEVE. Painted by Puvis de Chavannes; now in the Panthéon at Paris. St. Germain hangs a medal, marked with a cross, around the neck of St. Geneviève, the patron saint of Paris, and dedicates her to the service of God.

GIORNO, IL, or THE DAY. Painted by Correggio in 1523; now in the Parma Gallery. The Virgin, holding Jesus, is seated with Magdalen on her right and St. Jerome, with lion, on the left.

GRACES, THE THREE. Painted by Raphael in 1504; now in the Chantilly Gallery in France. Though only seven inches long and five inches high, it was bought in 1885 by the duc d'Aumale for £25,000.

GREEK SLAVE, THE. A marble statue by Hiram Powers in 1847; now in the Corcoran Art Gallery at Washington. A nude figure of a woman, chained and exposed for sale in the slave market. Its marvelous popularity in its day far exceeded its artistic merits. Many copies were made by Powers. It is one of the first nude sculptures produced by an American.

FARNESE HERCULES. Naples Museum.

HALE, NATHAN. A statue by Macmonnies; in City Hall Park, New York City. It represents the last moments of the patriot's life as he stands, bound, and utters his defiant words, "I only regret that I have but one life to lose for my country."

HARVARD, JOHN, STATUE OF. By French (1882); at Cambridge. A very effective and truly artistic work.

HAY WAIN. One of the finest paintings of Constable, now in the National Gallery, London. It is a simple English landscape painted in the realistic style of this great innovator.

THE HAY WAIN. CONSTABLE. National Gallery, London.

HEMICYCLE, LE, or **THE SEMICIRCLE.** Painted by Paul Delaroche upon the amphitheater wall of the Palais des Beaux-Arts in Paris in 1837 and 1841. It represents art and contains 75 colossal figures of the world's great artists.

HENRY IV. AND THE SPANISH AMBASSADOR. Painted by Dominique Ingres in 1817; owned by Baron Rothschild. The proud ambassador, admitted to an audience with the king, is horrified to find the king upon all fours romping with his children, one of whom is riding upon his back.

HERCULES, DEATH OF. Painted by Guido; now in the Louvre. Hercules, desperate through the agony of the poisoned tunic, lies upon a funeral pyre on Mount Oeta.

HERCULES STRANGLING THE SERPENTS. Painted by Sir Joshua Reynolds in 1788 for Catherine II.; now in the Hermitage in St. Petersburg. The picture is allegorical of the early struggles of Russian national life.

HERMES OF PRAXITELES. Statue by Praxiteles; found in 1877 in the excavation of the Temple of Hera at Olympia. The god is holding the infant Dionysus on his arm; now in the Olympia Museum.

HIERONYMUS HOLZSCHUHER. DÜRER. National Gallery, Berlin.

HIERONYMUS HOLZSCHUHER. A portrait in the Berlin Museum, painted by Albert Dürer of Nuremberg. It is a strong and masterly work, but evidently inspired by the Van Eycks.

HILANDERAS, LAS, or **THE TAPESTRY WEAVERS.** Painted by Velasquez about 1656; now in the Madrid Museum. This masterpiece represents women at work in the royal tapestry manufactory of Santa Isabel at Madrid.

HILLE BOBBE. Painted by Frans Hals about 1650; now in the Berlin Museum. The witch of Haarlem is seated at a table, an open beer stein before her on the table, and an owl perched on her left shoulder. There is a similar picture in the Metropolitan Art Museum in New York.

HOLY FAMILY, THE. A favorite subject with the great painters. The most famous are by Fra Bartolommeo, at Panshanger House, England, and in the Pitti Palace at Florence; Michelangelo, in the Uffizi Gallery at Florence; Domenichino, in the Louvre; Bernardino Luini, in the Louvre; Murillo, in Madrid, at the Hermitage, in the Louvre, in the Metropolitan Art Museum at New York, and in the National Gallery in London; Sebastiano del Piombo, in the Baring Collection in London; Raphael, in the Louvre and at Munich; Rembrandt, in the Hermitage; Rubens, in the Hermitage, the Pitti Palace, Vienna Museum, and Windsor Castle; Andrea del Sarto, the Pitti Palace, Louvre, and National Gallery; Titian, in the Louvre; and Paolo Veronese, in the Uffizi in Florence.

HOLY NIGHT. CORREGGIO. Royal Gallery, Dresden.

HOLY NIGHT. One of the great altarpieces painted by Correggio in 1529, and now in the Royal Gallery, Dresden. It is the birth of Christ, with the surrounding darkness made more intense by contrast with the light which radiates from the newborn babe and which illumines the Madonna and the faces of those around.

HORSE FAIR, THE. Painted by Rosa Bonheur in 1853; now in the Metropolitan Art Museum in New York. It is 8 feet high and 15 feet long.

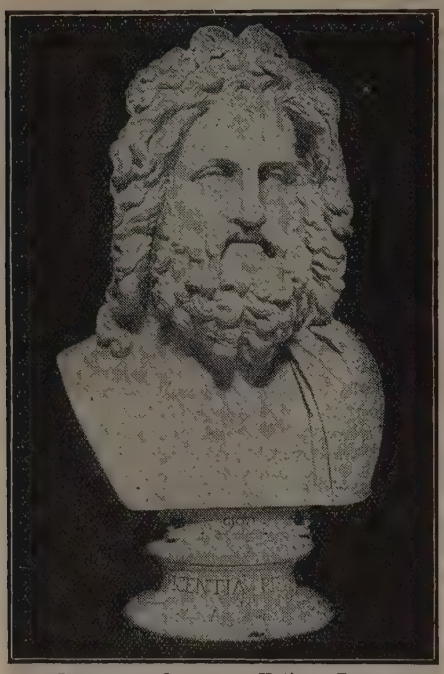
HORSE TAMERS. Group by Macmonnies; at the entrance to Prospect Park in Brooklyn. A young trainer upon the back of one plunging horse seeks to tame another.

HUGUENOT, A. Painted by Sir John Everett Millais in 1852; owned by Mrs. Miller of Preston, England. A Catholic woman seeks to save her Huguenot lover by binding a white scarf around his arm on the morning of the massacre of St. Bartholomew (August 24, 1572). The lover gravely declines the badge.

I FEEL TWO NATURES STRUGGLING WITHIN ME. A group by George Grey Barnard (1894); in the Metropolitan Museum in New York. A victor bending over a prostrate vanquished foe. Remarkable for its vigor and impressiveness.

IMMACULATE CONCEPTION, THE. Painted by Murillo in 1678; now in the Louvre; carried from Spain by Marshal Soult; sold in Paris, in 1852, to the French government for 615,000 francs, the largest sum paid up to that time for any picture.

ISLE OF THE BLESSED. Sometimes called the Island of Death. A striking example of the artistic conceptions of Arnold Böcklin. These works were much ridiculed when first exhibited.



JUPITER OF OTRICOLI. Vatican, Rome.

JACKSON MONUMENT. The first equestrian statue of the United States, executed by Clark Mills in 1853; in Lafayette Square in Washington, opposite the White House.

JOAN OF ARC. Painted by Jules Bastien-Lepage in 1880; now in the Metropolitan Art Museum in New York. Dressed as a peasant girl, she stands under the trees looking at the spectral figures of angels and knights in the clouds.

JOAN OF ARC IN PRISON. Painted by Paul Delaroche in 1824; owned by the duke of Padua. Joan in her cell and bound in chains is being interrogated by the bishop of Winchester, while a clerk records her answers in a book.

JOHN THE BAPTIST, ST. Painted by Leonardo da Vinci; now in the Louvre. He is clad in a lamb-skin; holds a cross in his left hand, and points upward with his right. Francis I. of France owned it; Louis XIII. gave it to Charles I. of England; and upon his death it went to Louis XIV. Other famous pictures on this subject are by Guercino, in the Capitoline Museum; Murillo, at Madrid and Seville; and Andrea del Sarto, in the Pitti Palace, in Florence.

JOHN THE EVANGELIST, ST. Painted by Murillo; now in the Leigh Court Collection in England. The saint is recording the revelation in a book as he is seated on a rock.

JOSEPH AND THE INFANT CHRIST. Painted by Murillo. Two are in the Hermitage, one in Seville, and others in private collections.

JOSEPHINE, CORONATION OF. Painted by Louis David in 1808; now in the Versailles Museum. It is 20 feet by 33 feet. It depicts the coronation at Notre Dame in Paris, December 6, 1804.

JUDGMENT OF PARIS. Painted by Rubens; now in Dresden Museum. A second, by the same, is in the National Gallery at London. Paris, advised by Mercury, holds the golden apple and is deciding upon the relative beauty of Juno, Minerva, and Venus.

JUDITH AND HOLOFERNES. Judith, aided by her servant, is cutting off the head of Holofernes. By some artists she is represented as carrying it. The most famous pictures are by Michelangelo, in the Sistine Chapel; Tintoretto, three pictures in Madrid; Horace Vernet, in the Louvre; Artemisia Gentileschi; in the Pitti Palace; Cristofano Allori, in the Pitti Palace; Philip van Dyck, in The Hague Museum; Andrea Mantegna, in Berlin Museum; and Paolo Veronese, in the Vienna Museum.

JUPITER OF OTRICOLI. The bust of Jupiter found at the Umbrian village of Otricoli, and now in the Vatican Museum at Rome, is believed to have been copied from the historic Olympian statue, the famous masterpiece of Phidias, which was reckoned among the seven wonders of the ancient world.

KNIGHT'S VISION. Painted by Raphael in 1504; now in the National Gallery in London. A young knight sleeps on his shield at the base of a laurel tree. Two maidens, representing fame and pleasure, appear in his dream.

LADY JANE GREY, EXECUTION OF. Painted by Paul Delaroche in 1834. She is kneeling by the block on the scaffold in the Tower of London (February 12, 1554). A priest whispers consolation to her; the executioner stands ready with his ax; and on the left two women stand weeping.

LANZAS, LAS, or THE LANCES. Painted by Velasquez in 1647; now in the Madrid Museum. It represents the surrender of Breda in 1625. Justin of Nassau surrenders the keys of the city to the marquis de Spinola, the Spanish commander, in the presence of the Spanish and Flemish armies. It is one of the greatest of historical paintings.

LAOCOON. A celebrated group in the Vatican, the work of three Rhodian sculptors, about 50 B. C. A Trojan priest, gripped in the deadly coils of the serpents, sees the life of his two sons being crushed

LAOCOON. Vatican, Rome.

out beside him, while he, tortured alike by his pain and powerlessness, utters a last cry of exquisite anguish. This pathetic group inspired the *Laokoon* of Lessing.

LAST JUDGMENT. Painted by Michelangelo in 1534-1541; now in the Sistine Chapel of the Vatican. It is a fresco on the end of the chapel wall opposite to the door and measures 44 feet wide and 54 feet high. It contains 314 figures. Other artists who have treated the same subject are Fra Angelico, Fra Bartolommeo, Rubens, Luca Signorelli, and Roger van der Weyden. Tintoretto's great work in Santa Maria dell' Orto in Venice is 30 feet wide and 60 feet high.

LAST SUPPER, THE. Painted by Leonardo da Vinci in 1498 on the wall of the refectory in the convent of Santa Maria delle Grazie at Milan. It is in oil and measures 15 feet hign and 28 feet long. The refectory was used as a stable for dragoons in 1796. This, with dampness and repainting, has nearly

destroyed it. Fra Angelico, Philippe de Champaigne, Murillo, Raphael, Holbein, Tintoretto, Titian, and Rubens have treated the same theme.

LAST TOKEN, THE. Painted by Gabriel Max in 1874; now in the Metropolitan Art Museum in New York. A Christian maiden martyr in the Colosseum at Rome looks anxiously up to see what sympathizing spectator has cast a rose at her feet, at the moment when two lions and a tiger have issued from their cages.

LATONA AND HER CHILDREN. A marble group by Rinehart in 1874; in the Metropolitan Museum in New York. The queen mother bends tenderly over her sleeping children. Noted for its "serene poetic charm."

LAZARUS, RAISING OF. Painted by Sebastiano del Piombo in 1519; now in the National Gallery in London. It measures 12½ feet by 9 feet 5 inches. Lazarus, in obedience to Christ's command, has risen from the grave and is putting off his grave clothes, while Mary kneels at the feet of Christ. This is one of the world's most highly esteemed paintings. It was painted with the hope of rivaling the Transfiguration of Raphael.

LEO X., POPE, PORTRAIT OF. A famous portrait by Raphael in the Pitti Palace in Florence, Italy. Dressed in a loose white robe, with fur trimmed sleeves, red velvet collar and cap, the Pope sits at a table with a book before him, holding an eyeglass in one hand. Behind him stand his two nephews, Cardinal Giulio de' Medici (Clement VII.) at the right, and Cardinal Luigi de' Rossi, his secretary, at the left. One of the most celebrated portraits in the world. It was carried to Paris in 1797, returned in 1815.

LIBERTY or FREEDOM. The figure on the dome of the Capitol at Washington, by Crawford. The original plaster cast is in the National Museum. The details do not bear out the impressive effect which the statue on the dome gives. Cast by Clark Mills and erected in 1863.

LIGHT OF THE WORLD. Painted by William Holman Hunt in 1854; now in Keble College at Oxford. Christ stands before a closed door, bearing a lantern in his hand.

LION HUNT. Painted by Rubens; now in the Munich Gallery. It measures 8 1-3 feet by 12 1-3 feet. A contest between lions and mounted hunters.

LION OF LUCERNE. Carved by Thorwaldsen on the face of a cliff at Lucerne, in Switzerland. It is of colossal dimensions and represents a crouching lion pierced by a spear and dying; to commemorate those of the Swiss Guards who died defending Louis XVI. in the Tuileries during the Revolution (August 10, 1792).

MADONNA. CARLO DOLCI.

LION'S BRIDE, THE. Painted by Gabriel Max to illustrate Uhland's poem. The daughter of the keeper of a menagerie enters the lion's cage the day before her wedding day to take farewell of the lion. She is killed by the beast, which crouches over the form of the girl and glares at her lover, who is seen through the bars of the cage with a pistol in his hand.

LOGAN, STATUE OF GENERAL. An equestrian monument by Simmons (1901); in Iowa Circle at Washington. An elaborate bronze memorial; remarkably successful.

LOVE AND DEATH. Painted by George Frederick Watts in 1877. Death, clad in white, pushes Love against the roses as he forces his way into a house.

LOVE AND LIFE. Painted by George Frederick Watts in 1885. Love, a winged youth, leads Life, a young girl, up a steep hill, while flowers spring into life in his footsteps.

LYCURGUS. Statue by George Edwin Bissell; on the Appellate Court Building in New York.

MADONNA. A favorite theme of painters. The most famous are:—

Madonna. A typical painting of the Florentine Carlo Dolci, and one that has been frequently copied. These Madonnas of Dolci are frequently seen in European galleries, though the Louvre has not so far honored the painter.

MADONNA OF THE GOLDFINCH. RAPHAEL. Uffizi Gallery, Florence.

Madonna Aldobrandini, by Raphael in 1510 and 1511; now in the National Gallery in London; formerly in the Aldobrandini collection at Rome. Sometimes called the "Garvagh Madonna," from its former owner, Lord Garvagh.

Madonna degli Ansidei or the *Blenheim Madonna,* painted by Raphael in 1506 for the Ansidei family of Perugia; now in the National Gallery of London. It was bought from Blenheim Palace in 1884 for £70,000. The finest Raphael in England.

Madonna del Baldacchino or *Madonna of the Canopy,* by Raphael in 1508; now in the Pitti Palace at Florence. So called because the Virgin is seated under a canopy holding the infant Jesus in her lap.

Madonna del Campanello or Madonna of the Bell, by Bartolommeo Schidone; now in the Pitti Palace at Florence. The infant Jesus is reaching out for a bell which the Virgin holds in her hand.

Madonna del Candelabri or *Borghese Madonna,* by Raphael in 1516; now in the Butler-Johnstone collection in London. A burning candelabrum or torch is held by angels on both sides of the Mother and Child. It was formerly in the Borghese Palace at Rome.

Madonna del Cardellino or *Madonna of the Goldfinch,* by Raphael in 1506; now in the Uffizi at Florence.. St. John offers a goldfinch to the Child.

Madonna della Casa d'Alba or *Madonna of the Alva Family,* by Raphael in 1508 and 1509; now in the Hermitage at St. Petersburg. The Mother leans back against a tree trunk, while St. John hands the Child a cross.

Madonna della Cesta or *Madonna of the Basket*, by Correggio in 1520; now in the National Gallery in London. A basket of linen stands near the Virgin.

Madonna del Coniglio or *Madonna of the Rabbit*, by Titian in 1530; now in the Louvre. St. Catherine, with Jesus in her arms, stoops to look at a rabbit which the Virgin holds in her hand.

Madonna, Connestabile or *Staffa*, by Raphael about 1502 or 1503; now in the Hermitage. The Connestabile-Staffa family of Perugia sold it to the emperor of Russia in 1871, for 330,000 francs.

Madonna di Foligno, by Raphael in 1511; now in the Vatican at Rome. The Mother and Child look down from the clouds upon St. Jerome, St. Francis, and St. John the Baptist. Formerly in the Convent of St. Anna at Foligno.

MADONNA, LA BELLE JARDINIERE. RAPHAEL.
Louvre, Paris.

Madonna, "La Belle Jardinière." One of the beautiful Madonnas painted by Raphael between 1504 and 1508; now in the Louvre. This is one of the most perfect of his creations, and represents the Virgin with the infants, Jesus and John, in the midst of a beautiful landscape.

Madonna, Orleans, by Raphael about 1506; now in the Château de Chantilly in France. The duc d'Orleans owned it in 1701. The duc d'Aumale paid 150,000 francs for it in 1869.

Madonna del Pesce or *Madonna of the Fish*, by Raphael about 1514; now in the Madrid Museum. On the left of the enthroned Mother and Child the archangel Raphael presents Tobias holding the miraculous fish.

Madonna of the Rocks, by Leonardo da Vinci; now in the National Gallery in London. The Child is seated upon the ground and blesses the infant St. John. In the background there are a grotto and high rocks. This is a replica, with some modifications, of the one in the Louvre.

Madonna della Rosa, by Parmigianino; now in the Dresden Gallery. The Child holds a rose in his hand. Raphael, in the Madrid Museum, and Sassoferrato, in the Turin Gallery, have the same idea.

Madonna del Rosario, by Domenichino in the Bologna Gallery; by Murillo in the Dulwich Gallery, in the Pitti Palace, and at Madrid; by Caravaggio in Vienna; by Van Dyck in Palermo; and by Sassoferrato in S. Sabina at Rome. Jesus scatters roses from the clouds upon groups invoking the Virgin's aid through the rosary.

Madonna del Sacco or *Madonna of the Sack*, by Andrea del Sarto in 1525; now in SS. Annunziata de' Servi at Florence. At the left of the Mother and Child St. Joseph leans upon a sack reading.

Madonna della Scodella or *Madonna of the Cup*, by Correggio in 1527 and 1528; now in the Parma Gallery. The Virgin holds a cup or plate in her hand.

Madonna della Sedia or *Madonna of the Chair*, by Raphael in 1516 and 1517; now in the Pitti Palace at Florence. The Virgin, seated in a chair, clasps the infant Jesus in her arms, with the infant St. John on the right in adoration.

MADONNA OF THE CHAIR. RAPHAEL.
Pitti Palace, Florence.

Madonna de la Servilleta or *Madonna of the Napkin*, by Murillo in 1676; now in the Seville Museum. Said to be painted upon a dinner napkin.

Madonna di San Sisto, or the *Sistine Madonna*, or the *Madonna of St. Sixtus*, by Raphael in 1518; now in the Dresden Gallery. The Virgin, holding Jesus in her arms, stands upon clouds, surrounded by a glory of cherubim, between green curtains. On the left St. Sixtus (Pope Sixtus II.) kneels; St. Barbara on the right; and two angels lean upon a balustrade below.

Madonna with Santa Anna, by Leonardo da Vinci; now in the Louvre. The Virgin, seated upon the knee of Santa Anna, leans forward to take the Child, who caresses a lamb.

Madonna della Tenda or *Madonna of the Curtain*, by Raphael in 1516; now in the Munich Gallery. There is a green curtain in the background.

MAGDALEN or **THE READING MAGDALEN.** Painted by Correggio about 1533; now in the Dresden Gallery. It is only 12 inches high and 15 inches wide. It was for years carefully preserved in the Castle of Modena. The Magdalen reclines upon the ground supporting her head upon her right hand and holds a book in her left.

MAIDEN RUNNER, THE. A marble statue, supposed to date from the fifth century B. C.; now in the Vatican. The runner is just starting, with the body bent forward and the right foot raised.

MAN WITH THE GLOVE or **L'HOMME AU GANT.** A noted portrait painted by Vecelli Tiziano, or Titian, as he is more popularly called. It is in the Louvre, Paris. It is an interesting specimen of the work of this greatest painter of the Venetian school.

MAN WITH THE HOE. Painted by Jean François Millet in 1862. It represents a weary peasant leaning upon a clumsy hoe. It suggested Edwin Markham's well-known poem written in 1899.

MARCH OF ATTILA. A fresco painted by Raphael in 1510; in the Vatican. Attila, on his way to Rome, sees Saints Peter and Paul, guardians of the city, in the clouds, with swords in their hands. He submits to Pope Leo I., who is on the left with a retinue.

MARGARET, ST. Painted by Raphael about 1518; in the Louvre. The saint, a symbol of innocence, bears a palm in her right hand, presses one foot upon a huge dragon, the devil, who came to tempt her and whom she overcame.

MARRIAGE A LA MODE. A series of six well-known pictures by Hogarth, painted about 1750; now in the National Gallery in London.

MARRIAGE FEAST AT CANA. Painted by Paolo Veronese in 1563; in the Louvre. Based upon John ii. 1-12. One of the largest easel canvases ever painted —21 feet wide and 31 feet high. There are in it over 130 figures, portraits of contemporaries, in Venetian costume.

MARTYR, THE CHRISTIAN. Painted by Paul Delaroche in 1855; now in a private collection in Paris. The body of a young girl, with her hands bound, is floating down the river, the aureole about her face reflected in the dark waters. The prow of a galley and two figures on the bank complete the background.

MARTYRDOM OF ST. GEORGE. Painted by Paolo Veronese about 1568 in the church of San Giorgio Maggiore in Verona. St. George kneels with his eyes raised to heaven, ignoring a priest of Apollo; while beside him are the executioners and above him the Virgin and Child with attendants.

MARTYRDOM OF ST. LAWRENCE. Painted by Rubens; now in the Old Pinakothek at Munich. Tortured to death upon a gridiron because, as archdeacon under Pope Sixtus II. at Rome, St. Lawrence refused to give to the Roman prefect the treasures of the church. Titian, in the church of Gesuiti at Venice, and also in the Escorial, treated the same subject.

MARTYRS, CHRISTIAN. Painted by Gérôme; now in the Walters Collection at Baltimore. In the center of the arena of the Circus Maximus at Rome a number of Christian prisoners are either bound to crosses to be devoured by wild beasts, or, smeared with pitch, are to be burned alive. A number of wild beasts come stealthily and fearfully from their dens. Gustave Doré treated the same subject in 1874.

MASSACRE OF SCIO. Painted by Delacroix in 1824; now in the Louvre. The canvas—13 feet 10 inches by 11 feet 6 inches—depicts many Greek families upon the shore, after the massacre, awaiting their fate. A Turk is dragging a young girl fastened to his horse, while the city is burning in the distance.

MASSACRE OF THE INNOCENTS. Painted by Rubens in the Old Pinakothek at Munich; by Guido Reni, Garofalo, Tintoretto, and others.

MATER DOLOROSA or **THE SORROWING MOTHER.** Painted by Titian in 1554; now in the Madrid Museum. A bust picture of the Virgin in a violet tunic, with a blue mantle drawn over her white cap; her hands raised toward heaven as she laments the death of her Son.

MEDUSA, RAFT OF THE. Painted by Jean Louis Géricault (1791-1824) in 1819. The *Méduse* was wrecked (July 2, 1816) on her way to Senegal. The passengers sought safety on a raft. Of 149, only 15 survived the privations of 12 days. The canvas measures 23½ feet by 16 feet. It is in the Louvre.

MELEAGER AND ATALANTA. Painted by Rubens; now in the Munich Gallery. Meleager is presenting the head of the Calydonian boar to Atalanta. Similar works by Rubens are in Dresden, Madrid, Vienna, and the Hermitage.

MERCY'S DREAM. Painted by Daniel Huntington in 1850; now in the Corcoran Gallery at Washington. It is a scene from *Pilgrim's Progress*, where Mercy dreams that, despite her fears of not gaining admission to the Celestial City, an angel comes and dresses her in silver and gold and places a crown upon her head.

MERLIN, THE BEGUILING OF. Painted by Burne-Jones; now in a private collection in England. To illustrate Tennyson's *Vivien*. Vivien, in the foreground, is repeating the magic words Merlin has taught her and, in the background, Merlin is changing under the spell.

MICHELANGELO. Statue by Bartlett in bronze; in the Congressional Library at Washington. An extraordinary work, full of dignity and lofty personality.

MICHAEL, ST. Painted by Raphael in 1518; now in the Louvre. St. Michael, descended from heaven, stands with his right foot upon Satan, who lies prostrate upon the ground, looking upward. The saint grasps his spear with both hands about to strike. The "Little St. Michael" by Raphael is also in the Louvre.

MINUTE MAN. Statue by French (1873); in Concord. This was the great sculptor's first work, with almost no tuition. A wonderfully clever first effort.

MIRACLE OF ST. MARK. Painted by Tintoretto about 1548; in the Venice Academy. St. Mark flies down from heaven and prevents some Turks from torturing a Christian prisoner stretched upon the ground and surrounded by executioners and others. Regarded as the artist's greatest work.

MIRROR OF VENUS. Painted by Burne-Jones in 1877. A group of maidens looking at their reflections from a pool of clear water.

MISERS, THE. Painted by Quentin Massys; now in Windsor Castle. A man and his wife count up their wealth of coins and jewels, which lie upon a table along with an inkstand, purse, and other articles. A parrot is on a perch behind them.

MONA LISA. Painted by Leonardo da Vinci in 1500-1504; now in the Louvre. It is the portrait of Mona or Madonna or Madame Lisa Gherardini, third

MONA LISA. DA VINCI. Louvre, Paris.

wife of Francesco del Giocondo; hence she is known as La Gioconda. Her face bears a remarkable, mysterious smile. Stolen Aug. 1911; recovered in Florence, Dec. 1912.

MONARCH OF THE GLEN. Painted by Landseer in 1851; in the Eaton Collection in London. It represents a stag in the Highlands of Scotland proudly breathing defiance to his rivals. It sold in 1884 for £6,510.

MOSES. MICHELANGELO.
Church of San Pietro in Vincoli, Rome.

MOSES. A statue by Michelangelo, originally sculptured for the tomb of Pope Julius II., but now in the Church of San Pietro in Vincoli in Rome. It is a marvelous creation, full of repressed wrath and passion.

MUSES, DANCE OF THE. Painted by Giulio Romano (1492-1546), a pupil of Raphael; in the Pitti Palace at Florence. Apollo dances in a circle with the nine muses, holding each other's hands.

MUSIDORA. Painted by Thomas Gainsborough; in the National Gallery at London. Musidora, from Thomson's *Seasons*, is seated upon the bank of a shaded stream. She has one foot in the water and is loosening the sandal from the other.

NAPOLEON CROSSING THE ALPS. (1) Painted by Louis David in 1805; now in the Versailles Museum. Napoleon, upon a rearing horse, points upward. (2) Painted by Paul Delaroche; owned by Lord Onslow in England. This is regarded as a more faithful and less imaginary picture than the former.

NAPOLEON IN 1814. Painted by Meissonier in 1862; in a private collection in Paris. Napoleon, clad in gray overcoat and mounted upon a white Arabian horse, looks across a battlefield. Two mounted officers await orders. It is only 12 inches by 9 inches. Ruskin paid 1,000 guineas for it in 1868; it brought 5,800 guineas in London in 1882; and 128,000 francs in Paris in 1886.

NAPOLEON IN THE RETREAT FROM RUSSIA. Painted by Meissonier in 1865; now in the Wallace Collection in London. Napoleon and his staff retreat along an icy road, while the army crowds along in a parallel line. It is sometimes called the "Retreat from Moscow."

NAPOLEON, STATUE OF. By Launt Thompson; in the Metropolitan Museum. A thoughtful and highly finished work.

NATIVITY, THE. A favorite subject with painters. Among the best are pictures by Annibale and Ludovico Carracci, in the Louvre; Correggio (Holy Night), in Dresden Museum; Domenico Ghirlandajo, in Dresden Museum; Giulio Romano, in the Louvre; Filippo Lippi, in Florence Academy; and Rembrandt, in Munich Gallery.

NAUSICAA AND HER MAIDENS. Painted by Sir Edward J. Poynter for the earl of Wharncliffe at Wortley Hall, England. Nausicaa and her maidens are playing ball on a grass plot near the sea.

NIOBE. Uffizi Gallery, Florence.

NIAGARA. Painted by Frederick Edwin Church in 1857; now in the Corcoran Art Gallery at Washington. A view of the falls from the Canadian side. It won a second class medal at the Paris Exposition in 1867.

NIGHT AND MORNING. Marble bas-reliefs by Thorwaldsen; in the Thorwaldsen Museum at Copenhagen. Night sweeps through the air clasping sleeping children in her arms, while Morning scatters flowers.

NIKE or **VICTORY.** Statue of the goddess of victory by Paeonius about 436 B. C.; found in the German excavation at Olympia of 1875. The head and arms are wanting. The goddess has just alighted with her garments floating behind.

NIOBE. A statue of Niobe with her youngest daughter, in the Uffizi Gallery, Florence. This is a copy of a classic group executed by the school of Scopas. It represents the devoted Niobe shielding her child, who has been struck down by the arrows of Apollo and Artemis.

NOLI ME TANGERE or **TOUCH ME NOT.** The interview between Christ and Mary Magdalen after the resurrection. The most noted examples are by Correggio, in the Madrid Museum, and Titian, in the Madrid Museum and in the National Gallery at London.

NYDIA. Marble statue by Rogers; in the Art Institute at Chicago. It represents a blind girl, with left hand to the ear to aid her listening, her right hand grasping a staff. A very beautiful and popular work.

OATH OF THE HORATII. Painted by Louis David in 1785; now in the Louvre. The Horatii receive the swords from their father and swear to conquer the Curiatii or die.

ONE MORE SHOT or **WOUNDED TO THE REAR.** A group by Rogers. A wounded soldier is binding his leg. His companion, with his left arm in a sling, endeavors to load his rifle once more before retreating. One of the many popular works of this artist.

O'REILLY MONUMENT. Memorial to John Boyle O'Reilly by Daniel French; in Boston, in the Back Bay Fens. Erin sits in sad pride twining a wreath of laurel, while Patriotism and Poesy attend her.

ORPHEUS AND CERBERUS. A marble statue by Thomas Crawford in 1839; now in the Boston Museum. Orpheus shades his eyes as he peers eagerly and intently into the gloom of Hades in his search for Eurydice.

PARADISE. Painted by Tintoretto in 1588; in the Doge's Palace at Venice. The largest canvas oil painting in the world—74 feet long and 30 feet high. There are more than 400 figures in it. Christ and the Virgin are surrounded by archangels, angels, and saints.

PARNASSUS. Painted by Raphael in 1511; a fresco in the Vatican at Rome. Apollo, with the Muses about him, sits playing a lyre on the summit of a mountain. Many illustrious poets are grouped in the foreground.

PAST AND PRESENT OF AMERICA. A pedimental group, the chief decoration of the Senate wing of the Capitol at Washington, by Crawford. America in the center offers a laurel wreath to those of her citizens who merit it. The rising sun is emblematical of her youth and the eagle of her strength. The pioneer, hunter, Indian, army and navy, mechanic, merchant, student, and teacher are represented.

PAUL, CONVERSION OF ST. Painted by Rubens; now in a private collection in England. It illustrates Acts ix. 3-19.

PETER, CHRIST'S CHARGE TO ST. Painted by Pietro Perugino in 1486; in the Sistine Chapel of the Vatican. Christ is giving the keys to St. Peter, who kneels to receive them. It has been treated by other artists, including Rubens, whose work is in Hertford House, London.

PETER, DELIVERANCE OF ST. Painted by Raphael in 1514; a fresco in the Vatican at Rome. It is in three divisions. In the middle, the angel awakens Peter; in the right, Peter and the angel step lightly over two sleeping guards; in the left, the keepers are dismayed at the escape of their prisoner.

PETER, MARTYRDOM OF ST. Painted by Guido; in the Vatican at Rome. St. Peter is being fastened to the cross, head downwards, by two executioners. Other artists who have treated this subject are Caravaggio, in the Hermitage; Anthony van Dyck, in Brussels Museum; Guercino, in Modena Gallery; and Rubens, in St. Pierre, Cologne.

PIETA. The lamentations of the Virgin and the women over the body of Christ after it was taken down from the cross. Among the most famous are those by Correggio, in the Parma Gallery; Van Dyck, in Munich; Quentin Massys, in Antwerp; Murillo, in Seville; Perugino, in Florence Academy; Rubens, in Brussels; Andrea del Sarto, in Vienna; and Titian, in Venice Academy.

PILGRIMS, EMBARKATION OF THE. Painted by Robert Walter Weir in 1845; in the rotunda of the Capitol at Washington. The Pilgrims are boarding the *Speedwell* at Delft Haven, in Holland, on July 22, 1620, on their way to take the *Mayflower* at Southampton. This picture is reproduced upon the backs of $50 United States national bank notes.

POCAHONTAS, BAPTISM OF. Painted by John G. Chapman; in the rotunda of the Capitol at Washington. Pocahontas is being baptized just before her marriage

to John Rolfe at Jamestown, Va., in 1613. The picture is reproduced upon the backs of $20 United States national bank notes.

PRESENTATION IN THE TEMPLE. The presentation of Jesus in the Temple (Luke ii. 22). Among the most notable are those by Fra Bartolommeo, Vienna Museum; Andrea Mantegna, Berlin Museum; Guido Reni, Vienna Museum; Rembrandt, The Hague Museum; and Titian, Venice Academy.

PRINCES IN THE TOWER. (1) Painted by Paul Delaroche in 1830; now in the Louvre. Edward V. and Richard, Duke of York, sons of Edward IV., imprisoned in the Tower and murdered by order of their uncle, Richard, Duke of Gloucester (afterward Richard III.), in 1483. (2) Another by Sir John Everett Millais; in Holloway Institute, near London.

PRODIGAL SON, RETURN OF THE. Painted by Murillo in 1670-1674; in Stafford House, London. Among others are those by Rembrandt, Teniers, Guercino, Salvator Rosa, James Tissot, Alphonse Legros, and Dubufe.

PRODIGAL SON, THE. A group by Mozier; in the Pennsylvania Academy of Fine Arts.

PSYCHE, STORY OF. Painted by Raphael and his pupils in 1512-1519; a fresco in the Farnesina Palace at Rome. There are, in all, 12 pictures—two on the ceiling and ten in the arches.

QUEEN LOUISE. Painted by Gustav Karl Ludwig Richter, the history and portrait painter. He was one of the most successful of modern portrait painters. This work was painted in 1879 and is now in the Cologne Museum.

RABBIT ON THE WALL. Painted by Sir David Wilkie in 1815; owned by Sir William Armstrong. A mother holds a baby up to see the shadow of a rabbit made upon the wall by the father with his hands; a girl holds a lighted candle while two boys look on.

RAKE'S PROGRESS, THE. Eight pictures painted by Hogarth in 1735; now in the Soane Museum. They represent the life of a profligate young man who ends his days in madness and poverty.

RAPE OF THE SABINES. Romans seizing Sabine women for wives on the founding of Rome. The most notable examples are paintings by Luca Giordano, in Dresden Museum; Nicolas Poussin, in the Louvre; Rubens, in the National Gallery at London; and Jacques Louis David, in the Louvre.

RAPHAEL LEAVING TOBIAS. Painted by Rembrandt in 1637; in the Louvre. Raphael flies to heaven, leaving Tobias and his father, Tobit; Sarah, wife of Tobias, and Anna, her mother.

READING FROM HOMER. A striking example of the work of Alma-Tadema, who is noted for his archaeological zeal and paintings.

READING THE WILL. Painted by Sir David Wilkie in 1820; in the New Pinakothek at Munich. A lawyer, seated at a table, is reading a will to a large number of interested persons.

REPUBLICAN COURT, THE. Painted by Daniel Huntington in 1876; now in the Metropolitan Art Museum at New York. A reception at the executive mansion during Washington's second administration. There are portraits of Mrs. Washington, Nelly Custis, Mrs. Robert Morris, Alexander Hamilton, John Adams, John Jay, Harriet Chew, Jonathan Trumbull, Oliver Ellsworth, Thomas Jefferson, Duke of Kent, Mrs. George Clinton, Mrs. Ralph Izard, Mrs. John Jay, and others.

RESCUE, THE. A marble group by Greenough in 1851; on the main staircase of the Capitol in Washington. A pioneer is grasping an Indian and saving the life of a woman and child. This and the Washington were the first colossal marble sculpture carved by an American.

RESURRECTION, THE. The most noted examples are by Annibale Carracci, in the Louvre; Filippino Lippi, Munich Gallery; Murillo, Madrid; Perugino, the Vatican; Raphael, the Vatican; Rembrandt, Munich Gallery; and Tintoretto, Pitti Palace.

RING OF ST. MARK. Painted by Paris Bordone (1500-1571) of the Venetian school; now in the Venice Academy. A fisherman presents the ring of St. Mark to the Doge as a proof that the saint had saved Venice from destruction by a flood in 1340.

RUBENS' SONS. Painted by Rubens; in the Liechtenstein Gallery at Vienna. Albert has his arm about Nicolas the younger, who holds a flying bird by a string.

SACRED AND PROFANE LOVE. Painted by Titian about 1503; in the Borghese Palace at Rome. Two women, seated at a fountain in a garden, represent the subject.

SAINT GEORGE. A marble statue by Donatello in the National Museum, Florence; a lifelike image

SAINT GEORGE. DONATELLO. National Museum, Florence.

of the legendary warrior, revealing the vivid naturalism for which Donatello is famous.

SALOME. The niece of Herod the Tetrarch and daughter of Herodias. As a reward for her dancing before her uncle he gave her whatever she might ask. She wished for the head of John the Baptist (Matthew xiv.). Among the most notable paintings of this subject are those by Carlo Dolci, in Dresden; Guercino, in the Louvre; Bernardino Luini, in the Louvre and the Uffizi; Titian, in Madrid; and Henri Regnault.

SAMARITAN, THE GOOD. The scene described in Luke x. 30-37 has been painted by many of the masters. Among them are those by Rembrandt, in the Louvre; Caravaggio, in the Brera at Milan; Paolo Veronese, in Vienna; and Eugene Delacroix, privately owned in Paris.

SAMSON AND DELILAH. The scene described in Judges xvi. Among the best examples of this are those by Anthony van Dyck, in Vienna; Rembrandt, in Cassel Gallery; and Rubens, in the Munich Gallery.

SATYR AND PEASANT. Painted by Jacob Jordaens; in the Old Pinakothek at Munich. A satyr entertains a traveler benumbed by the cold. When they are seated the traveler blows his fingers to warm them and his porridge to cool it. The satyr refuses to entertain any one who can blow both hot and cold.

SCAEVOLA, MUCIUS. Painted by Charles Lebrun about 1643. Scaevola is thrusting his hand into a brazier to burn it off as an indication to King Porsena that his threats cannot frighten him. The king pardoned his attempt upon his life and made a treaty of peace with the Romans.

SCHOOL OF ATHENS. Painted by Raphael in 1511; in the Vatican. It shows a vast portico, having the niches filled with statues of Plato, Aristotle, Diogenes, Alcibiades, Xenophon, Pythagoras, Democritus, Epicurus, Pyrrho, Arcesilaus, Archimedes, Ptolemy, Zoroaster, Raphael, and Perugino.

SEBASTIAN, ST. Painted by Annibale Carracci, in the Louvre; Anthony van Dyck, in the Louvre and at Munich; Guercino, in the Pitti Palace; Guido, in the Pitti Palace, the Louvre, and Bologna Gallery; Mantegna, in Vienna; Rubens, in Berlin; Titian, in the Hermitage, Harrach Gallery at Vienna, and the Vatican; Eugene Delacroix, in the church of Nantua in France; and Camille Corot, in the Walters Collection at Baltimore. The saint, commander of a company of praetorian guards, was bound to a stake and shot to death with arrows, by order of the emperor Diocletian, for becoming a Christian.

SHADOW OF DEATH. Painted by William Holman Hunt in 1873; in the Manchester (England) Art Gallery. Christ working as a carpenter in Joseph's

shop. He wearily stretches his arms, and his shadow thrown on the wall forms a cross. The Virgin, at his feet, is alarmed at the omen of death.

SHAW MEMORIAL. By Saint-Gaudens; in Boston. A large relief in bronze in commemoration of Colonel Robert Gould Shaw, who led the first regiment of colored troops organized in Massachusetts. A wonderfully great work.

SHEPHERD, THE LITTLE. Painted by Murillo; owned privately in Paris. The youthful Saviour walks with a crook in his left hand and a sheep on his right. Queen Isabella of Spain gave the picture to Guizot; and it sold in 1874 for 120,000 francs.

SHEPHERDS, ADORATION OF THE. Among the most notable of the many pictures on this subject are those by Raphael Mengs in Madrid; Murillo, in Madrid, Seville, and the Hermitage; Rembrandt, in the National Gallery at London; Velasquez, in the National Gallery at London; Nicolas Poussin, in the Munich Gallery; and Titian, at Milan.

SHERMAN, STATUE OF. By Saint-Gaudens; in Central Park in New York. Remarkable for the artistic conception of the attendant figure of "Victory."

SIBYLS, THE. (1) Painted by Michelangelo; a fresco on the ceiling of the Sistine Chapel of the Vatican. (2) Painted by Raphael in 1514; a fresco in the church of Santa Maria della Pace at Rome.

SIDDONS AS THE TRAGIC MUSE. Painted by Sir Joshua Reynolds in 1784; in Grosvenor House in London. Sarah Siddons sits enthroned upon the clouds and is attended by two tragic figures.

SILENUS AND INFANT BACCHUS. Vatican Museum, Rome.

SILENUS AND INFANT BACCHUS. This group, in the Vatican Museum, shows great beauty of form and expression. It was discovered in the sixteenth century in the gardens of Sallustius near the Quirinal.

SIMPLICITY. Painted by Sir Joshua Reynolds; owned privately in England. A half-length portrait of Offy Gwatkin, Sir Joshua's niece.

SLAVE SHIP, THE. Painted by Turner; owned privately in Boston, Mass. A slave ship, storm-driven, goes ashore; many of the slaves are thrown overboard and are seen manacled and struggling in the waves. Ruskin owned it for a long time; John Taylor Johnston of New York bought it from him; and at Johnston's sale in 1876 it brought $10,000.

SLEEPING ARIADNE. A Roman copy of a fine Greek statue; in the Vatican since 1510. Ariadne, asleep upon the shore of Naxos, abandoned by Theseus. A similar statue is in the Madrid Museum.

SOCRATES, DEATH OF. Painted by Louis David; owned privately in Paris. Socrates, in the midst of his sorrowing disciples, is about to take the cup of poison from the executioner, who turns away his head.

SOLOMON, JUDGMENT OF. The scene in I. Kings iii. 16-28, where Solomon decides who is the mother of a child. He orders it to be cut in two. Raphael's fresco in the Vatican, Paolo Veronese's picture in Bridgewater House in London, and one in the Louvre by Nicolas Poussin are the most celebrated pictures on this subject.

SORTIE OF THE BANNING COCK COMPANY. Painted by Rembrandt in 1642; now in the Amsterdam Museum. The Civic Guard of Amsterdam, under command of Captain Banning Cock, assemble for drill at the call of the drum.

SOWER, THE. Painted by Jean François Millet in 1850; in the Vanderbilt Collection in New York. A peasant, with a bag of grain, is sowing seed on a hillside. A pair of oxen and driver are seen at the end of the furrow.

SPASIMO DI SICILIA or **SICILIAN SPASM.** Painted by Raphael in 1516-1518; now in the Madrid Museum. It was painted for the church of Santa Maria dello Spasimo at Palermo in Sicily. It represents Christ sinking under the weight of the cross on his way to Calvary. The spasm alludes to the fainting of the Virgin on this occasion.

STEPHEN, ST., MARTYRDOM OF. Stoned to death by the Jews (Acts vii.). The most notable paintings of this subject are by Pietro da Cortona, in the Hermitage; Annibale Carracci, in the Louvre; Rubens, at Valenciennes; Domenichino, in the National Gallery at London; Guercino, in Dresden; Eugène Delacroix, in the Arras Museum; and Charles Lebrun, in the Louvre.

STONE AGE, THE. A group by Boyle; in Fairmount Park at Philadelphia. An Indian woman, armed with a stone ax, has successfully defended her young children from a bear cub.

STRAFFORD GOING TO EXECUTION. Painted by Delaroche in 1835; in Stafford House in London. The earl stops at the prison windows to receive the blessings of Archbishop Laud, a prisoner.

STRAWBERRY GIRL. Painted by Sir Joshua Reynolds in 1773; in the Wallace Collection at London. A little girl with a turban headdress holds a strawberry basket.

SUNSET. ROUSSEAU. Louvre, Paris.

SUNSET. A painting by the French landscape painter, Theodore Rousseau, now in the Louvre. It is a sunset scene at Fontainebleau, and like most of his best works (many of which are in America) is characterized by great breadth and harmony of color.

SUPPER AT EMMAUS. Among the many notable pictures of this scene (Luke xxiv. 30) are those by Rembrandt, in the Louvre; Rubens, at Madrid; Titian, in the Louvre; and Paolo Veronese, in Dresden, the Louvre, and Stafford House at London.

SURRENDER OF BURGOYNE. Painted by John Trumbull in 1817-1824; in the rotunda of the Capitol at Washington. General Gates stands in front of a tent surrounded by his officers. He declines the sword of General Burgoyne (Saratoga October 17, 1777). The original sketch of this is at Yale University.

SYNDICS OF THE ARQUEBUSIERS. Painted by Bartholomeus van der Helst in 1657; in the Amsterdam Museum. The four syndics or officers of the archery guild of St. Sebastian are seated at a table examining the prizes.

SYNDICS OF THE CLOTHMAKERS' GUILD. Painted by Rembrandt in 1661; in the Amsterdam Museum. Five syndics or managers of the Cloth Hall (Staalhof) are gathered around a table; one of the number is standing; all are dressed in black.

TEMERAIRE, THE FIGHTING. Painted by Turner in 1839; in the National Gallery in London. This ship was captured in 1798 from the French; she took part in the battle of Trafalgar in 1805. She was condemned in 1838. The picture shows her being towed to Rotherhithe to be broken up.

TEMPTATION OF ST. ANTHONY. The attempt of Satan to conquer St. Anthony, whom he hated for his purity of life. Among the many notable paintings of this subject are those by Pieter Brueghel the Younger, in Dresden; Lucas van Leyden, in Dresden; David Teniers the Younger, in the Louvre, Berlin, Amsterdam, Dresden, Vienna, Madrid, and elsewhere; and Tintoretto, in Venice.

THESEUS. CANOVA. Vatican Museum, Rome.

THESEUS. A heroic figure sculptured by Canova (1782), which represents Theseus gazing at arm's length on the severed head of the Minotaur. This statue, now in the Vatican Museum, marked an epoch in modern sculpture as a return to classic art.

THOMAS, ST., INCREDULITY OF. The scene described in John xx. 25-28. The most famous are by Cima da Conegliano, in Venice; Guercino, in the Vatican; Rembrandt, in the Hermitage; Salviati, in the Louvre; Anthony van Dyck, in the Hermitage; and Rubens, in Antwerp.

TITANIA AND BOTTOM. Painted by Sir Edwin Landseer in 1851; owned privately in England. A scene from *The Midsummer Night's Dream*, where Titania is fondling the ass's head of Bottom crowned with flowers. Mustardseed, Peaseblossom, Cobweb, Moth, and other fairies are near. Sold in 1884 for £7,000.

TOBIAS AND THE ANGEL. Painted by Salvator Rosa; in the Louvre. The archangel Raphael commands Tobias to seize a fish from the water. The same is painted by Murillo, Pollajuolo, Andrea del Sarto, and Titian.

TRANSFIGURATION, THE. Christ's appearance in glory to the disciples. The most famous is by Raphael in the Vatican. This is one of the very great pictures of the world. Begun in 1519, Raphael completed only the upper part before his death in 1520. Giulio Romano finished it from Raphael's designs. The picture was hung over Raphael's body at his funeral and carried in the procession to the Pantheon.

TRIBUTE MONEY. The scene in Matthew xxii. 19 and Luke xx. 24. Painted by Titian; in Dresden Gallery. The inquiring Pharisee holds the coin in his hand while Christ is speaking to him.

TRIUMPH OF CAESAR. Painted by Andrea Mantegna in 1485-1492; in Hampton Court Palace in England. Nine pictures, each nine feet square, depict a grand triumphal procession of Roman soldiers, captives, and slaves preceding Caesar drawn in a chariot.

TRIUMPH OF DEATH. Painted (some think) by Andrea Orcagna or (according to others) by a representative of the Sienese school, about 1377. Three kings on horseback halt before three coffins containing the bodies of dead kings, while the Angel of Death descends with his scythe upon happy groups. Death and his victims are in the center. In the clouds are the souls of the blessed and devils with the damned.

TRIUMPH OF FLORA. Painted by Nicolas Poussin about 1630; in the Louvre. Flora drawn in triumphal procession in a chariot by two cupids and accompanied by singing and dancing men and women. She is being crowned by flowers while a warrior offers her flowers upon his shield.

TRIUMPH OF GALATEA. Painted by Raphael in 1514; in the Farnesina Palace at Rome. A fresco showing the escape of Galatea from Polyphemus after the death of Acis. Galatea is drawn in a shell by dolphins and attended by tritons and sea nymphs.

TRIUMPH OF RELIGION IN THE ARTS. Painted by Overbeck in 1831-1840; in the Städel Gallery at Frankfort in Germany. The Virgin and the Child are enthroned in the clouds, while on the earth are sculptors, artists, and architects to the number of about 60.

TRIUMPH OF SILENUS. Two pictures by Rubens; one in the Berlin Museum and the other in the National Gallery at London. In both Silenus walks in a procession of attending satyrs, fauns, nymphs, and children bearing grapes. The former was in Blenheim Palace until 1885 and the latter was owned by Cardinal Richelieu (1640-1642).

UGOLINO. Painted by Sir Joshua Reynolds in 1773; owned by the earl of Amherst. Ugolino, Count of Gherardesca, betrayed the Pisans to the Genoese. In 1288 he, with his two sons and two grandsons, was imprisoned in the Gualandi Tower at Pisa and starved to death.

URSULA, HISTORY OF SAINT. Painted by Carpaccio in 1490-1495; in the Venice Academy. There are nine pictures. (2) Hans Memling, about 1486, painted the history on the shrine of St. Ursula in the Hospital of St. John at Bruges.

VENICE ENTHRONED. Painted by Paolo Veronese; in the Doge's Palace in Venice.

VENICE, THE GRAND CANAL AT. Painted by Turner; in the Dudley Gallery; sold for 8,000 guineas.

VENICE, TRIUMPH OF. Painted by Tintoretto; in the Doge's Palace at Venice. Venice, a figure of a young woman draped in blue, flies over the Doge and the senators, who are receiving the homage of the conquered.

VENUS ANADYOMENE or VENUS OF THE SHELL. Painted by Titian in 1523; in Bridgewater House in London. The goddess is standing knee-deep in the sea and is combing her tresses. A shell floats beside her upon the water.

VENUS AND ADONIS. Among the many pictures upon this subject are those by Guercino, in Dresden; Rubens, in Blenheim Palace, the Hermitage, and Uffizi; Titian, in Alnwick Castle and Madrid Museum; Paolo Veronese, in Madrid and Edinburgh; and Antony van Dyck, in the Hermitage.

VENUS, BIRTH OF. Painted by Sandro Botticelli; in the Uffizi at Florence. The goddess stands upon a floating shell which is being wafted to the shore by two flying figures representing the winds.

VENUS DE MILO. A world-famed statue of the goddess Aphrodite, and the most priceless treasure of the Louvre. This masterpiece of the school of Phidias was accidentally discovered in 1820 in the island of Melos. Both arms are lost but the beauty and serenity of the form express the highest ideal of art. The attitude of the goddess and the date of the statue are still much debated.

VENUS OF ARLES. A Roman copy of a fine Greek statue found in the ruins of a Roman theater in Arles, in France, in 1651. It was treasured in the Palace at Versailles and given to the Louvre by Louis XIV.

VENUS OF CAPUA. A Roman copy of a Greek statue found in the ruins of an amphitheater at Capua about 1750; now in the Naples Museum. It is very similar to the Venus of Melos.

VENUS OF MEDICI. A marble statue found in the ruins of the Portico of Octavia in Rome; placed in the Villa Medici at Rome; removed to the Tribune of the Uffizi in Florence. It is an undraped figure, the hands in front and the head turned to the left. A

dolphin is beside her to indicate that she has just risen from the sea.

VENUS DE MILO. Louvre, Paris.

VENUS OF THE CAPITOL. A Greek statue; in the Capitoline Museum at Rome. The goddess is ready for the bath, her arms in the position of those of the Venus of Medici. Her garments hang upon an exquisite vase.

VENUS, TOWNLEY. A marble statue found in Ostia in 1776; in the Townley Collection in the British Museum. Very similar to the Venus of Arles.

VILLAGE BRIDE, THE. Painted by Greuze in 1761; in the Louvre. The bride's father is handing a purse, containing the bride's dowry, to the bridegroom; the mother is clasping the hand of the bride, while a younger sister leans upon the bride's shoulder; a notary is seated at the table.

VILLAGE POLITICIANS. Painted by Sir David Wilkie; owned by the earl of Mansfield. A number of villagers seated around a kitchen table are engaged in a heated discussion; others are grouped near a fire; a woman is entering the door and another is seated at the left.

VIRGIN, BIRTH OF THE. Painted by Murillo in 1655; in the Louvre. Four women prepare to bathe the child; St. Anna and St. Joachim are in the background. The picture was painted for the church at Seville; Marshal Soult carried it to France; the government bought it in 1858 for 150,000 francs.

VIRGIN, CORONATION OF THE. Painted by Velasquez, in the Madrid Museum; Raphael, in the Vatican; Fra Angelico, in the Louvre and Uffizi; Guido, in Bologna and London; and Rubens, in Brussels.

VIRGIN, DEATH OF THE. Painted by Caravaggio; in the Louvre. The Virgin, on her deathbed, is attended by the apostles and the disciples. Once owned by Charles I. of England.

VISITATION, THE. The visit of the Virgin to Elizabeth as described in Luke i. 39-40. Painted by Albertinelli, in the Uffizi; Ghirlandajo, in the Louvre; Sebastian del Piombo, in the Louvre; Raphael, in the Madrid Museum; Rembrandt, in Grosvenor House in London; and Rubens, in Antwerp Cathedral.

VULCAN, FORGE OF. Painted by Velasquez in 1629-1631; in the Madrid Museum. Vulcan and four Cyclops stop work to listen to Apollo, who stands at the left; a wreath, illuminated, crowns his head.

WASHINGTON, APOTHEOSIS OF. Painted by Brumidi on the canopy of the rotunda of the Capitol at Washington. The first frescoes done in the United States. Washington sits in the center; the goddess of Liberty on his right and Victory on his left. The 13 original states are represented by female figures encircling the group. The Fall of Tyranny, Agriculture, Mechanics, Commerce, Marine, and Arts and Sciences are grouped in the border.

WASHINGTON, RESIGNATION OF. Painted by John Trumbull in 1827; in the rotunda of the Capitol at Washington. Washington is resigning his position as commander in chief of the Continental army at Annapolis (December 23, 1783). Yale University has the original study of this work.

WHITE CAPTIVE, THE. A marble statue by Erastus D. Palmer in 1858; now in the Metropolitan Art Museum at New York. In refinement, delicacy, and grace it is by far the best work of America up to that time.

WINGED VICTORY OF SAMOTHRACE. Louvre, Paris.

WINGED VICTORY (NIKE) OF SAMOTHRACE. This statue, now in the Louvre, is a superb example of the Attic school of the end of the fourth century. It is remarkable for its perfect modeling of classic drapery, and for the advantage taken of the play of light and shadow.

THE WRESTLERS. Uffizi Gallery, Florence.

WRESTLERS, THE. This famous group, now in the Uffizi Gallery, Florence, is supposed to have been sculptured by Cephissodotus. It gives a most accurate representation of a human body in motion; the tension of the muscles, the swelling of the veins, the perfect anatomy, and the realistic expression are all unexcelled.

ZENOBIA. A statue by Harriet Hosmer; in the Metropolitan Museum of Art, New York City. It represents Zenobia, queen of Palmyra, led captive through the streets of Rome in chains. Her haughty mien and native pride are well brought out.

MUSIC.

Musical expression may be broadly distinguished as rhythmic and melodic. These two principles are essentially distinct, and in the early stages of music are often independent of each other. The difference of principle, however, between the rhythmic and the melodic quality is apparent even in the most advanced stages of the art, in the symphony as in the polka.

Among primitive races, music is merely the accompaniment to dancing, hence rhythm alone is more usually encountered, while melody and harmony are reduced to their simplest forms.

The earliest system of which we have any exact record was devised by the Greeks. The Phœnicians, Egyptians, and Hebrews do not seem to have evolved any distinctive national style. The Greeks were the first to conceive of music as an independent art, and they formulated a scale system based on a knowledge of acoustic laws. The Greek system was the parent of Roman music and the precursor of that of the early Christians, while the Greek play was the prototype of the modern opera. The ritual of the Christian Church was originally rendered in the Ambrosian and Gregorian forms ("Plain Song"), which, though allied to pagan melody, were reminiscent of the liturgy of the Temple at Jerusalem.

The next phase (twelfth to sixteenth centuries) was the contrapuntal unaccompanied choruses founded on the Gregorian key and melodic system. It is noteworthy that not until the definite appearance of Christian church music was any advance made in the direction of harmony. The first steps at improving melodic music were made by singing melodies simultaneously at different pitches. Towards the end of the sixteenth century, as secular life grew more independent of ecclesiastical influences, harmony became the basis of musical design, and, ultimately, the means of the sublimest and most perfect expression of which the art is capable. Music began to develop into manifold types; instrumental music assumed a different aspect from choral music, and secular from sacred vocal music. Then, as the present system of scales became understood, the old devices were adapted to the newer method. The Reformation wrought a change in music no less than in religion, and its impulse and vigor are reflected in the masterpieces of Bach and Handel.

With these great masters the polyphonic period culminated. Secular influences began to predominate; no longer was choral effect the prime motive of the art; instrumental music for its own sake was cultivated; counterpoint and vocal parts were relegated to the background, and melodic progressions became the first consideration. The science of orchestration came into being, for in the time of Bach orchestration in the modern sense did not exist, neither was there any uniform standard by which to regulate the number or grouping of orchestral instruments. The constant blending and interchange of timbres, characteristic of a modern orchestra, was entirely unknown. The instrumentation would frequently remain unaltered during an entire number, while it was not unusual for the players to exceed the number of voices. The works of the old composers have therefore had to be rescored to meet the requirements of modern orchestras. The first attempts to compose purely orchestral music were for the symphonies or overtures of operas. These were primarily written for stringed instruments, with occasionally trumpet solos. One of the most noteworthy names in the early history of orchestration is that of the Bohemian violinist, Stamitz, whose orchestra at the German court of Mannheim became, under his leadership, the finest in Europe. Meanwhile the Italians developed the resources of the violin and the style of music best suited to it. Other groups of musicians in Germany, France, England, and Italy made similar progress with the harpsichord.

Though the art had blossomed forth in numerous forms, their characteristics were not clearly defined; opera and symphony, sonata and church music, were fashioned on like principles, indistinct in style, indefinite and conventional in construction. When greater resources were at the disposal of the composer, each form gained in distinctness and vitality. Still the differentiation of forms continued, each requiring different treatment. The opera expanded into the grand, the comic, the buffa, the seria, and various other types. Pianoforte music came to comprise lyrics of all kinds—sonatas, fugues, capriccios, scherzos, nocturnes, dances, and other distinctive and national varieties.

A revolution in the musical world was created as a result of the visit of an Italian opera company to Paris in 1752. This struck a blow at the French grand opera, and the way was cleared for the reforms of Gluck (1714-1787). The opéra comique was a sign of the times—the shattering of conventions and the demand for naturalness.

The first great name connected with the development of the sonata form was that of Haydn (1732-1809), who raised the symphony from weakness to strength and dignity. The greatness of Mozart (1756-1791) was most apparent in the symphony and its allied forms. He is regarded as the most perfect exponent of the classic idea in music. With the towering figure of Beethoven (1770-1827) classical music reached its zenith. He marks the transition from the eighteenth to the nineteenth century, and the dawn of the romantic era. The advance in the art of orchestration is apparent upon comparing the scores of Beethoven's larger symphonies with those of Mozart; although Beethoven never allows his sense of color to dwarf his greatness as a designer. The next important movement is the rise of a German school of opera. In spite, however, of the impetus given by Weber and Spohr, Teutonic opera was not a truly national product till the triumph of the works of Wagner. Schubert (1797-1828) stands unrivaled as a writer of *lieder*. His was essentially a lyric genius.

We pass now to more modern times, and to composers whose names we have barely space to mention, though their works live on in our lives and memories: Mendelssohn, the writer of æsthetic melodies; Chopin, the most famous composer for the piano; Berlioz, the greatest composer of France and the founder of the program school of music; Schumann, with whom the romantic ideal attained self-consciousness; Liszt, one of the most prolific composers of modern times; Brahms, the greatest symphonist since Beethoven; Grieg, one of the best loved of mod-

ern composers; and Dvorak, a master of orchestration. The central figure in German music to-day is Richard Strauss (1864), whose symphonic poems almost exhaust the powers of musical symbolism. Verdi (1813-1901) is the greatest composer that Italy has produced, and was the one opera composer whose brilliancy was not dimmed by Wagner's splendor.

In England and America musical culture was never more vigorous than it is to-day. The names of Sullivan, Stanford, Cowen, Parry, and Elgar are conspicuous among those of the English composers of our own times. In artistic music the United States has contributed works rich in promise. Paine, Buck, Parker, MacDowell, Chadwick, Foote, Whiting, and others are names sufficient to inspire confidence, though no truly representative composer has yet arisen.

SCHOOLS OF MUSIC.

OLD FRENCH SCHOOL (about 1100-1350). This school is noted for the invention of the *Fauxbourdon* (a progression of voices in sixths and thirds) and the *Discant* (contrary motion of voices). Chief musicians: De Garlande, Léonin, Franko of Paris, De Machault, De Muris, Pérotin, and De Vitry.

SCHOOL OF THE NETHERLANDS (about 1450-1600). This covers four distinct periods: (*a*) that led by Okeghem and his successors, Compère, Brumel, Hobrecht, Jannequin, and Tinctor, all of whose writings were characterized by artificiality; (*b*) the period of Josquin Deprès, Agricola, and Mouton, whose works show greater symmetry of form, but are none the less artificial; (*c*) a period of reaction in favor of a more natural style of composition. The most prominent masters are Arcadelt, Gombert, Goudimel, Willaert, and Van Rore; (*d*) a period famous for the rise of instrumental music. The school of the Netherlands culminated in Orlando di Lasso; the other masters of the period are De Monte and Pevernage.

OLD ENGLISH SCHOOL (about 1220-1600). To this school is credited the earliest specimen of polyphonic composition, viz., the celebrated canon, *Sumer is icumen in* (1226). The earlier composers are Johnson, Merbecke, Redford, and Tye. During the later period many important choral works and madrigals were written by Byrd, Farrant, Gibbons, and Tallis.

SCHOOL OF VENICE (1527-1612). Founded by Willaert. This school was the first to produce vocal works with instrumental accompaniment. Chief composers: Willaert, A. Gabrieli, G. Gabrieli, Merulo, Van Rore, and Zarlino.

SCHOOL OF ROME (1535-1674). Founded by Goudimel about 1535. The Roman school gave greater latitude to individual voices, and originated the oratorio. Chief musicians: Goudimel, Anerio, Allegri, Animuccia, Frescobaldi, Carissimi, Festa, Nanini, and Palestrina.

SCHOOL OF NAPLES (1675-1757). The Neapolitans cultivated the overture, and introduced the aria, besides choruses, duets, etc. Chief musicians: Durante, Leo, A. Scarlatti, D. Scarlatti, Stradella, and Logroscino.

SCHOOL OF GERMAN SINGSPIEL (about 1630-1800). The *Singspiel* was established by Hiller on the basis of the folk song, and eventually developed into a national German opera. The musicians of this school were Keiser, Handel, Kusser, Dittersdorf, Winter, Weigl, Schenck, Strungk, Mattheson, and Telemann. Other German composers favored the Italian opera, notably Doles, Hasse, Naumann, and Graun.

CLASSIC MASTERS (about 1700-1827). In J. S. Bach the *passion* and the *instrumental fugue* reached their highest perfection. His works also mark the beginning of the homophonic-harmonic period. With Handel the *oratorio* and the *vocal fugue* attained their greatest development, and he became the founder of the new English school. Gluck reformed the opera and developed orchestration. Haydn perfected the sonata and became "the father of modern instrumental music." Mozart created no new forms, but impressed his genius on every style he handled. Beethoven introduced the *scherzo* in place of the *minuet* of the symphony. Schubert followed in the steps of Beethoven in the domain of instrumental music. He was the creator of the *Kunstlied* (art-song).

FRENCH GRAND OPERA (1774-1864). The distinguishing features are the absence of spoken dialogue, the prevalence of tragic themes, excessive orchestration, elaborate finales, and the introduction of a ballet. Chief composers: Berton, Gluck, Gossec, Cherubini, Lesueur, Halévy, Meyerbeer, Rossini, and Spontini.

FRENCH OPERA COMIQUE (about 1760-1870). Its composition is generally unconventional, more truthful, and aims less at mere musical effect. Principal masters: Auber, Cherubini, Grétry, Halévy, Herold, Isouard, Bizet, Delibes, Boieldieu, Méhul, Monsigny, Philidor, and A. Thomas.

SCHOOL OF BEL CANTO (1813-1868). The charm of melody and the display of vocal art are the characteristics of this school. The three greatest exponents are Rossini, Bellini, and Donizetti, while of lesser rank are Pacini, Generali, and Mercadante.

GERMAN ROMANTIC SCHOOL (1818-1868). Orchestral tone-coloring was greatly developed and a preference was shown for dissonances, while music generally became more emotional and intense. Among dramatic composers are Spohr, Weber, Marschner, Lortzing, Kretschmer, Götz, Nessler, and Brüll; while among the great writers of choral and instrumental works are Schumann, Spohr, and Mendelssohn.

WAGNER AND LISZT (1843-1897). Wagner effected great reforms in dramatic composition; he maintained that the function of music was to illustrate and intensify the text. By applying Wagner's idea of descriptive music to instrumental music Liszt became an exponent of "program music." He originated the symphony poem and largely developed pianoforte technique. With Berlioz and Wagner he established a new school of interpretative conducting.

NEO-GERMAN SCHOOL (1847-). At first the influence of Liszt predominated, but in time Wagner's titanic genius gave rise to a host of imitators, none of whom, however, could rival the master's skill. Possibly the only great composer among them is Richard Strauss.

MODERN ITALIAN SCHOOL (1851-). The greatest figure in the history of modern Italian music is Verdi, who raised the Italian opera to its highest level. Among the operatic composers of this school are Ponchielli, Boito, Faccio, Marchetti, Coronaro, Smareglia, Mascagni, and Puccini. Chief choral instrumental composers; Pinelli, Sgambati, Cesi, Grazzini, Mancinelli, Martucci, Franchetti, and Perosi.

MODERN FRENCH SCHOOL (1830-). The influence of German music combined with the originality of the French composers themselves has produced a French school of great vigor and excellence. Instrumental composers: Chaminade, Chausson, Bizet, Delibes, David, Franck, Godard, D'Indy, Lalo, Halm, and Saint-Saëns. Dramatic composers: Gounod, Bizet, Saint-Saëns, Chabrier, Massé, Bruneau, and Massenet.

POLISH SCHOOL (1830-). Its history is bound up with the writings of Chopin, who was one of the creators of a new school of pianoforte playing. Other Polish musicians are Dobrzynski, Kurpinski, Moszkowski, and X. and Ph. Scharwenka.

RUSSIAN SCHOOL (1836-). The distinguishing features are strength and variety of rhythm. Chief masters: Glinka, Rubinstein, Bortnianski, Verstowski, Dargomyszki, Seroff, Borodin, Cui, Balakirev, Mussorgski, Rimski-Korsakow, Arenski, Glasunoff, and Tschaikowsky.

SCANDINAVIAN SCHOOL (1840-). The main features are an emphasis of rhythm and employment of dissonances. Principal composers: (Norway) Grieg, Kjerulf, Nordraak, Sinding, and Svendsen; (Denmark) Berggren, Hartmann, Gade, and Enna; (Sweden) Hallstroem, Hallén, Sjörgren, and Södermann.

MODERN ENGLISH SCHOOL (1830-). In light opera the works of Sullivan are noteworthy as having placed this form of composition upon a secure basis. In grand opera no prominent work has yet been produced. The best efforts of this school have been made in choral music. No distinctive national style has been developed, but the compositions are marked by skillful technique and mastery of form. Leading composers: Balfe, Barnett, Bishop, Benedict, Stanford, Sullivan, and Wallace in dramatic music; Barnby, Stainer, Bennett, Parry, Cowen, Coleridge-Taylor, Costa, Mackenzie, and Elgar in instrumental and choral music.

AMERICAN SCHOOL (1880-). Strictly speaking there is no American school which possesses any national or distinctive trait. In the works of the chief composers the influence of foreign and particularly German music is apparent. Works of high attainment have been produced by Paine, Bird, Gilchrist, Foote, Chadwick, Klein, MacDowell, Van der Stucken, Horatio William Parker, Damrosch, and Mrs. H. H. A. Beach.

SOME FAMOUS HYMNS AND THEIR TUNES.

ABIDE WITH ME. Written by Rev. Henry Francis Lyte (1793-1847) and handed in manuscript with the music to his congregation at Lower Brixham, Devonshire, on the occasion of his last service there. Henry Ward Beecher introduced it to American Congregationalists in 1855. The tune now most used was written by Dr. William Henry Monk in 1861.

ALL GLORY, LAUD, AND HONOR. Composed in 820 by Theodulph, Bishop of Orleans, while imprisoned in the cloister of Anjou by Louis le Debonnaire, son of Charlemagne. Used as a processional in both Catholic and Protestant churches. Translated by Rev. J. M. Neale (1818-1866). The most popular tune was composed by Melchior Teschner, a Prussian composer who lived about 1613.

ALL HAIL THE POWER OF JESUS' NAME. Written by Rev. Edward Perronet (1721-1792), a close friend of John Wesley. Dr. Rippon added the last stanza. The tune "Old Coronation" was composed by Oliver Holden, a carpenter of Shirley, Mass. (1765-1844). The little pipe organ upon which he struck the first notes is in the historical rooms of the Old State House in Boston.

ALL PRAISE TO THEE, ETERNAL LORD. Variously credited to Gregory the Great (sixth century) and to an unknown writer of the ninth century. The German form—Gelobet seist du Jesu Christ—has been credited in part to Luther. The tune "Weimar" is by Karl Philip Emanuel Bach, son of Sebastian (1714-1788).

A MIGHTY FORTRESS IS OUR GOD or **EIN FESTE BURG IST UNSER GOTT.** Written in German by Luther (1483-1546); translated into English by Rev. Frederick Henry Hedge (1805-1890), formerly of the Unitarian Church of Bangor, Me. The tune was composed by Luther; that of the English version is by Sebastian Bach.

DOXOLOGIES. (1) "Be Thou, O God, Exalted High" is attributed to Nahum Tate (1652-1715), who collaborated with Rev. Nicholas Brady (1659-1726) in the preparation of a psalter in which it appeared. (2) "Praise God from Whom All Blessings Flow," by Rev. Thomas Ken (1637-1711). (3) "To God the Father, God the Son" was composed probably by Dr. Edwin F. Hatfield (1807-1883). The tune of these is "Old Hundred," said to have been composed by Luther; others say Louis Bourgeois; but the weight of evidence favors Guillaume le Franc, William Franck, or William the Frenchman of Geneva (1541), who died in 1570.

ETERNAL FATHER, STRONG TO SAVE. Written in 1860 by William Whiting; a translation of a Latin hymn. Whiting (1825-1878) was master of Winchester College choir. The tune "Melita" was composed in 1861 by Rev. John B. Dykes. A favorite hymn "for those at sea."

FOREVER WITH THE LORD. Written by James Montgomery (1771-1854). The tunes "Mornington," by Garrett Colley Wellesley, Earl of Mornington (1735-1781), and "Forever with the Lord," by I. B. Woodbury, are the best known of the many to which this hymn has been sung.

FROM GREENLAND'S ICY MOUNTAINS. Written in 1819 by Reginald Heber for a missionary meeting. The tune is by Lowell Mason.

GLORY TO THEE, MY GOD, THIS NIGHT, or **TALLIS' EVENING HYMN.** Bishop Ken's evening hymn prayer, from a *Prayer Manual* published for the use of students in Winchester College. The tune was composed by Thomas Tallis, organist to Queen Elizabeth (1520-1585).

HARK! HARK! MY SOUL. Written by Frederick William Faber. The tunes were composed by John B. Dykes and Henry Smart.

HOLY, HOLY, HOLY, LORD GOD ALMIGHTY. Written by the Right Reverend Reginald Heber, Bishop of Calcutta (1783-1826). The tune was composed by Rev. John Bacchus Dykes (1823-1876).

JERUSALEM THE GOLDEN. A translation by Dr. John Mason Neale of a part of Bernard of Cluny's "De Contemptu Mundi," which was written about 1100. The music was written by Alexander Ewing, a paymaster in the English army (1830-1895).

JESUS, LOVER OF MY SOUL. The best known and best loved of Charles Wesley's hymns. The tune "Refuge" was composed by Joseph P. Holbrook, and "Whitman" by Lowell Mason.

LEAD, KINDLY LIGHT. Written by John Henry Newman (1801-1890), afterwards Cardinal Newman. The tune "Lux Benigna" was composed by Rev. Dr. John B. Dykes in 1865.

MAGNIFICAT. Appears in ritual form in the liturgies of the fourth and fifth centuries. A favorite subject with composers of all nations and ages; but the "Magnificat" of Handel is the greatest (1685-1759); though that by Smart is highly esteemed.

MAJESTIC SWEETNESS SITS ENTHRONED. Written by Rev. Samuel Bennett, an English Baptist minister (1727-1795). The tune "Ortonville" was composed by Thomas Hastings (in 1830), author of "Toplady."

NEARER, MY GOD, TO THEE. Written by Mrs. Sarah Flower Adams (1805-1848) in 1840. The author was a Unitarian and the hymn is regarded as an Old Testament psalm. The tune "Horbury" was composed by Rev. John B. Dykes, "St. Edmund" by Sir Arthur Sullivan, and "Bethany" by Lowell Mason.

O COME, ALL YE FAITHFUL, or **ADESTE FIDELES.** By some believed to have been written by St. Bonaventura, Bishop of Albano (born 1221). The English version is by Rev. Frederick Oakely (1808-1880), and another by Rev. Edward Caswall (1814-1878). The tune is the "Portuguese Hymn," by Simao Portogallo of Lisbon (1763-1830).

O LITTLE TOWN OF BETHLEHEM. Written by Phillips Brooks, Bishop of Massachusetts (1835-1893), in 1868. The tune "Bethlehem" was composed by J. Barnby; the first tune, "St. Louis," was by Mr. Redner, organist of Holy Trinity in Philadelphia.

ONWARD, CHRISTIAN SOLDIERS. Written by Rev. Sabine Baring-Gould (1834-1906). The tune was composed by Sir Arthur Seymour Sullivan (1842-1900).

O WORSHIP THE KING ALL GLORIOUS ABOVE. Written by Sir Robert Grant (1785-1838), afterward governor of Bombay. The tune to which the hymn is most frequently sung is Haydn's "Lyons."

ROCK OF AGES, CLEFT FOR ME. Written by Augustus Montagu Toplady (1740-1778); an almost universal hymn. The tune was composed by Dr. Thomas Hastings (1784-1872) in 1830.

SUN OF MY SOUL, MY SAVIOUR DEAR. Written by Rev. John Keble (1792-1866). The tune "Hursley" was arranged by William Henry Monk (born 1823) from a German choral by Peter Ritter (1760-1846).

TE DEUM LAUDAMUS. Composed by Ambrose, Bishop of Milan, in 387. First sung in English by Bishop Ridley at Hearne Church. The standard anthem of Christian praise. One of the best modern choral renderings of the anthem is the tune by the English composer, Henry Smart (1813-1879).

THE GOD OF ABRAHAM PRAISE. Written by Thomas Olivers (1725-1799), a Welshman converted by Whitefield at Bristol. The tune "Leoni" was heard, it is said, by Olivers as it was sung by Meyer Lyon, the noted Jewish musician, and he adapted the hymn to the tune.

THE LORD DESCENDED FROM ABOVE. Composed by Thomas Sternhold, Groom of the Robes to Henry VIII. and Edward VI., author of a psalter published in 1562, 13 years after his death (1549). The tune "Nottingham," or "St. Magnus," was composed by Jeremiah Clark of London (1670-1707).

Famous Oratorios.

Armes, P.	Hezekiah (1877); St. John the Evangelist (1881); St. Barnabas (1891).

GREAT OPERAS.

AIDA. Giuseppe Verdi. Cairo, 1872.
At Memphis and Thebes, in the reign of the Pharaohs.

Act I.—Aida, taken captive by the Egyptians, is given to Amneris as a slave. Radames, her lover, also loved by Amneris, is chosen to lead the Egyptians against the Ethiopians under Amonasro, Aida's father. Act. II.—Amneris discovers Aida's secret by pretending that Radames has been killed. He returns triumphant with many captives, including Amonasro, disguised as a soldier. Offered whatever boon he desires, Radames asks for the freedom of his captives, which was granted to all but Amonasro. The king bestows upon Radames, his daughter, Amneris. Act III.—Accompanied by Ramphis, the high priest, Amneris goes to the Temple of Isis to pray for Radames's love, and there overhears Aida, her father, and Radames plan to flee from the court. She denounces Radames. Act IV.—Before his trial, Amneris pleads with Radames to explain, but he refuses, is tried and condemned to be buried alive in the stone vaults beneath the altar of the God of War. While Radames awaits his fate in the vault, and as the great stone which seals his tomb is swung into place, Aida is discovered within and the lovers are united in death; Amneris dies of grief above the altar stone.

BARBER OF SEVILLE. Gioacchino Rossini. Rome, 1816. *Seville, Spain.*

Act I.—In love with Rosina, who is so jealously watched by her guardian, Dr. Bartolo, that his attempts to see her are fruitless, Count Almaviva, having made the acquaintance of Figaro, the barber, is advised by him to enter the doctor's house in the guise of a soldier. Rosina recognizes him and sends him a note, which is found by the doctor, who has Almaviva arrested. Act II.—Again the Count gains admission in the guise of a music master, and all is going well when Basilio, the real music master, appears, but is bribed to depart. Bartolo discovers the trick and sends at once for the notary to draw up the marriage contract between Rosina and himself. Basilio returns with the notary, is again bribed and with Figaro witnesses the signing of the marriage contract between the lovers. Bartolo is pacified with Rosina's dowry.

CARMEN. Georges Bizet. Paris, 1875.
Seville, Spain, beginning of nineteenth century.

Act I.—The Spanish gypsy, Carmen, lives only for sensuality. After she has loved many, she is attracted by the sergeant, Don Jose, who is in command of a troop of soldiers assembled in the village where is located the cigarette factory in which she has wounded one of her mates. She is imprisoned and placed under the guardianship of Don Jose, whom she bewitches, and secures release, for which he is put under guard. Act II.—Carmen returns to her tribe, who appear before the inn of Lillias Pastia to dance. Among them is Escamillo, the toreador, who fascinates her. Don Jose, released from prison, deserts his company for her and is persuaded to join the smugglers, who capture Zuniga, the captain, and carry him off. Act III.—Weary of Don Jose, Carmen entices Escamillo to the smugglers' cave, where the rivals combat. Michaela appears with a message for Don Jose from his mother, who is dying; he tries to prevent Carmen from accepting Escamillo's invitation to the bull fight. Act IV.—On returning, he finds her in the arena with Escamillo, to whom she has promised her love if he is the victor. Don Jose tries to reawaken her love but she repulses him and flings his ring at his feet. As the trumpets announce Escamillo's victory, Don Jose stabs her through the heart.

CAVALLERIA RUSTICANA. Pietro Mascagni. Rome, 1890. *A Sicilian village.*

Act I.—Turiddu, a peasant, before entering military service, had wooed Lola, whom he finds married to Alfio when he returns to the village; he tries to console himself with Santuzza, who loves him ardently, and they are engaged. Lola, who cannot endure to have him marry Santuzza, flirts with him until he has forgotten his betrothed, who in turn becomes very jealous and sad. Santuzza pleads with his mother, who tries to help her. On Easter morning, when people are on their way to church, Santuzza meets Turiddu and reproaches him; he flings her from him. Angered by his treatment, she tells Alfio that his wife is false to him. The two men meet at Lucia's inn and challenge each other. Turiddu repents, but meets Alfio in combat and is killed; Santuzza dies in a swoon.

ELEKTRA. Richard Strauss. Dresden, 1909.
King's palace at Mycene, shortly after Trojan War.

Act I.—Clytemnestra, with the aid of her lover, Aegisthus, murdered her husband, Agamemnon, and now fears discovery by her children, Elektra, Chrysothmes, and Orestes. Elektra, who is filled with a desire for vengeance, tries to get her sister's aid in killing the guilty pair. Orestes, her brother, who was said to be dead, had been banished, and appears to Elektra, who tells him the truth about their father, and together they plan revenge. He goes within the palace and accomplishes his purpose. Elektra, overjoyed at his success, dies in a delirious dance.

FAUST. Charles Gounod. Paris, 1859. *German village.*

Act I.—Faust, a student, dissatisfied with his success in scientific research, and his advancing age, calls upon Mephistopheles, who shows him a vision of Marguerite, whereupon he sells his soul to Satan and is transformed into a handsome youth. Act II.—Marguerite, a pure-minded girl, is left in the care of Siebel by her brother Valentine when he goes to war. At a festival before the city gates, she refuses to dance with Faust. Act III.—Siebel binds a bouquet for Marguerite in her garden, the flowers fade, but are revived after being dipped in holy water. Faust and Mephistopheles witness this and the latter leaves a casket of jewels at her door, which she discovers, and adorns herself with; when Faust appears she surrenders herself to him. Act IV.—Valentine, returning from the wars and learning of his sister's misfortune, challenges Faust, but through the aid of Mephistopheles is overcome and dies cursing Marguerite. Act V.—Marguerite, in want and misery, remorseful of her wrong, kills her child, for which she is imprisoned. Faust, desiring to save her, gains access to her prison and begs her to flee; she refuses and, praying for forgiveness, dies; the angels bear her to heaven.

FLYING DUTCHMAN, THE. Richard Wagner. Dresden, 1843. *Coast of Norway.*

Act I.—A Norwegian sea captain, Daland, was driven ashore by a storm. While he and all his crew are asleep, a ghostly ship dashes against his vessel, and is held fast. A pale man with black beard, dressed in black, steps ashore. He tells his story: that having broken his troth, he is compelled to roam the seas without rest; at the end of every seven years he is cast ashore to find a wife who will be true to him forever, which will end his voyaging. When he hears that Daland has a daughter, he asks for her as his wife. Tempted by gold, Daland consents and both ships set sail. Act II.—Senta, the daughter, is much impressed by the picture of the Flying Dutchman, and declares she would save him by her fidelity. Erik, the huntsman, in love with Senta, hears her declaration and tells her his dream of her father's return with a stranger, who carried her off to sea. She listens with delight and Erik leaves in despair. Daland returns with the stranger, who is introduced as her betrothed. Act III.—Later in the evening Erik returns and reproaches Senta for her broken vows to him, which the stranger overhears. Overwhelmed with despair, he calls his crew, tells Senta of the curse, and reveals that he is the Flying Dutchman. Hardly has he departed when Senta flings herself into the sea. Her faithfulness to him is his salvation. The spectral ship disappears and Senta and the Flying Dutchman are seen ascending into heaven.

FRA DIAVOLO. Daniel F. E. Auber. Paris, 1830.
Village of Terracina, Italy, nineteenth century.

Act I.—The Roman governor has offered a reward and sent dragoons to capture Fra Diavolo, a celebrated bandit chief. Lorenzo, the officer in command, is in love with Zerlina, daughter of Matteo, the innkeeper. While the dragoons are at the inn, Lord Cockburn, an Englishman, and his wife, Pamela, arrive, and declare that they have been robbed. Lorenzo and his men set out to capture the thief. Cockburn is jealous of the attentions paid his wife by their traveling companion, Marquis of San Marco (Fra Diavolo), who listens to Zerlina's story of the famous brigand. He pays court to Pamela, and secures from her a costly medallion set with jewels. Lorenzo returns with the stolen property, wins his reward, and hopes to win Zerlina. Act II.—The English couple are conducted to their rooms next to Zerlina's chamber. Fra Diavolo plans further robbery and conceals himself in Zerlina's closet. He gives a prearranged signal to his comrades in the courtyard below and they enter her room and again rob the English couple. A noise outside awakens them, Zerlina appears, and the robbers escape, aided by Fra Diavolo, whose presence arouses the jealousy of Cockburn and Lorenzo, the latter challenges him to a duel. Act III.—Diavolo, in bandit dress, awaits Lorenzo in the forest, as Zerlina and the rich farmer, Francisco, approach with their wedding procession, in which are Diavolo's accomplices, who are arrested and compelled to aid in capturing Diavolo, who is shot.

GIRL OF THE GOLDEN WEST. Giacomo Puccini. New York, 1910.
Gold Fever Era, 1849-1850. California, near Cloudy Mountains.

Act I.—It is dusk in "The Polka," a miners' saloon and dance hall, where Jack Rance, the sheriff, sits smoking, and Nick, the bartender, lights the lamps. Miners troop in, calling for food and drink; they sing, dance, and play cards. Excitement runs high, when Minnie, the only girl in camp, enters, takes down a Bible, and the miners gather about her, questioning and answering in turn. Minnie rejects Rance's attentions and presently he becomes jealous of Dick Johnson, who dances with her. Left alone with Dick, they avow their mutual love and she confides to him that she keeps the miners' gold. Act II.—Minnie returns to her lonely cabin, orders her table set for two, and arrays herself in all the finery in her possession. Johnson arrives shortly, amid a heavy snowstorm, which so increases in fury that he is obliged to remain. Soon a call is heard from the miners, who have come to warn her of Ramerrez, and she hides Johnson behind the bed curtains. They tell her Johnson is Ramerrez, and she affirms that he is not there and they depart. Contemptuously she orders Dick to come out and he confesses, but

implores her pity. She sends him away, and immediately a pistol shot is heard. Opening the door, she finds Dick wounded; she puts him into the loft just as Rance appears to arrest him; again she denies his presence, but a drop of blood falling upon Rance's hand reveals the culprit. Rance proposes a game of poker, but Dick is unable to play and Minnie takes his place, the stakes to be her freedom and Johnson's against marriage with Rance and Johnson's surrender, from the two best games out of three. She pretends to faint and while Rance hunts for whiskey she stacks the cards from her stocking and wins. Act III.—Seated by a fire in a clearing in the forest, Rance awaits the return of the troops with Johnson, while preparations are made for the hanging. Soon they appear, and Johnson is bound and stood in the center of his accusers, who charge him with the intention of stealing their gold, but taking Minnie instead. The noose is ready, when Minnie rides into camp, dismounts and throws herself before Johnson, protecting him. Rance demands her removal and Johnson's life, but Minnie pleads so effectively, reminding them of her care of them and their gold, that they forgive her and release Johnson.

HANSEL AND GRETEL. Engelbert Humperdinck. Munich, 1893. *A German forest.*

Act I.—At home in a poverty-stricken room we find Hansel and Gretel making brooms and knitting stockings, while their parents are away seeking food. The children tease each other and play. Their mother, returning, finds little work done, and, in her rage, upsets a pitcher of milk, their supper. Further enraged, she sends them into the forest to pick strawberries, bidding them stay until they have filled the basket. Their father soon returns with food, and is greatly disturbed because they have been sent into the forest, where lives a witch who lures children with magic cakes, puts them into her oven, and when they are baked into German cakes devours them. Both parents hastily leave the house to find the children. Act II.—While Hansel hunts for berries, Gretel makes wreaths. They are afraid, they see specters and hear the echo as they call in vain for their parents. The Sandman appears, sprinkles sand in their eyes and they fall asleep praying, while angels surround them in accordance with their prayer. Act III.—When they awaken they discover the crunch witch's hut with a bake oven at one side and a cage connected with the house by a hedge of gingerbread men. Attracted by the smell, they begin to break off pieces of the hut and eat. Hansel is captured by the witch and thrust into the cage, while Gretel is sent into the house. On her return, Hansel warns her to be careful; when the witch asks Gretel to look into the oven, she asks how it is done. As the witch bends over, the children shove her into it and she is consumed. All the gingerbread figures become children and are released. Their parents find them and the witch is taken out of the oven as a huge piece of gingerbread.

THE HUGUENOTS. Giacomo Meyerbeer. Paris, 1836.

Paris and Touraine. The night of St. Bartholomew, 1572.

Act I.—Marguerite de Valois, betrothed to Henry IV., anxious to reconcile the Catholics and Huguenots of France by a marriage between Raoul de Nangis, a Protestant nobleman, and Valentine, daughter of Count St. Bris, a Catholic noble, invites Raoul to visit her in her palace. He is found with Count de Nevers, who is entertaining a party of Catholic friends. Each guest is requested to name his adored one, Raoul first. He declares that he loves an unknown one whom he once rescued. A veiled lady appears just at this moment and Raoul recognizes his unknown heroine. She has come to ask De Nevers to release her from her promise to him and he does so. The note to Raoul is brought. Act II.—Marguerite receives Raoul and unfolds her plan of union with Valentine, as a sign of peace. When St. Bris introduces his daughter, Raoul refuses the alliance, believing that Valentine is the mistress of De Nevers. Act III.—Commanded by St. Bris, the troth is renewed between Valentine and De Nevers, who is plotting vengeance against Raoul, when he receives a challenge from him. Valentine, who has been in the chapel near by, overhears the scheme, and plans to save Raoul. Act IV.—The marriage has taken place but Valentine loves only Raoul, who, coming to say farewell, overhears that all the Huguenots are to be murdered that night; De Nevers refuses to take part in the plot, and is removed by St. Bris. Raoul tries to warn his friends, but is detained by Valentine, until he hears the signal for attack. Act V.—The leaders of the Huguenots are assembled when Raoul enters to tell them of the terrors of St. Bartholomew's night, and report the death of the leader; they arm themselves. De Nevers is dead; Valentine accepts Raoul's faith and they are married. Then the Huguenot women concealed in the church are murdered; a terrible scene of carnage follows in which Raoul becomes separated from Valentine, and they are not united until she finds him mortally wounded on the quay of Paris.

JEWELS OF THE MADONNA. Ermanno Wolf-Ferrari.

Modern Naples, the present.

Act I.—Maliella, a beautiful and willful girl, was a parentless waif adopted by Carmela (in accordance with a vow made to the Virgin) when her son, Gennaro, lay at the point of death. Maliella was reared to think of Gennaro as her brother, but she chafes under the many restrictions placed upon her conduct by her foster mother and Gennaro. It is the festival of the Madonna, and Gennaro has made a wonderful wrought-iron candelabrum to be his votive offering to her. His prayers are interrupted by Maliella, who rushes into the garden followed by his mother, angry at some new phase of her willfulness. He chides the girl, who accuses him of jealousy, and to add to his discomfort pins on a paper hat, bursts into song, and invites the assembled youth, who join in her dance, to kiss her; they pursue her, pelting her with flowers. Soon they return, led by Biaso, who has been roughly treated by one of the Camorrists. Rafaele, a member of the band, follows Maliella, attempts to kiss her, and is jabbed with a long pin; he offers her a flower, which she spurns. In the fervor of his love-making, he even offers to procure the jewels which adorn the statue of the Madonna, and makes a movement towards the procession. She screams, and Gennaro asks the fellow's name, but she resents his interference. Rafaele drops the rejected flower and she picks it up. Act II.—That evening in the garden Gennaro tries to reason with her, but she grows defiant and tells him of Rafaele's daring offer. She threatens to leave and finally goes to her room, gathers her belongings, and returns to say farewell to Gennaro, who asks for a kiss and she offers her cheek. He reveals his love for her, which she repels. A frightful temptation overcomes Gennaro in his love, and, gathering up his keys and files, he sneaks out. Rafaele and his companions serenade Maliella, and, while Carmela tries to drive them away, Gennaro returns, looking like a ghost, to find Maliella standing by his empty tool box. Horror-stricken at his deed, he shows the jewels taken from the Madonna, and all run away except Maliella, who finally puts them on. Act III.—The Camorrists are asleep in their lair when Rafaele enters and sings of Maliella. She comes to show him the jewels and he spurns her; she hears Gennaro's voice outside and flings the jewels at him. Terrified, they all flee but Gennaro, who, seeing a statue of the Madonna, crawls to it and stabs himself. The crowd return to seek him, but, finding him at the feet of the image, are awed into silence.

JONGLEUR DE NOTRE DAME (The Juggler of Our Lady). Jules Massenet. Paris, 1903.

Cluny, the fourteenth century.

Act I.—In the market place Jean, the juggler, wanders hungry and miserable, but happy in his freedom, although unsuccessful in gaining audiences. He resorts to a parody upon the mass; a prior appears and he is about to be excommunicated, when he confesses his guilt and is received among the monks, relinquishing his freedom, tempted by the rich food of the abbey. Act II.—All the inmates of the abbey work for the feast of the Holy Mother, but Jean has no part, for he knows no Latin; he resolves to serve her in his own way. Act III.—Jean goes to the chapel, puts off his monastic garb, and, donning the juggler's dress, offers his songs and dances, his only gift, to the statue. So enrapt was he that the approach of the monks was unnoticed. The prior is about to stop him when a miracle occurs, the image raises its hands and places them in benediction upon Jean's head. The monks acclaim a saint: Jean, overcome with joy, dies.

KOENIGSKINDER (Children of the King). Engelbert Humperdinck. New York, 1910.

Legendary days, Hellabrun forest.

Act I.—It is summer in the forest near Hellabrun, where lives a famous Witch and her granddaughter, a Goose-Girl, who is sitting outside weaving a wreath, when the Witch calls her into the house to make bread, into which the Witch puts a poisonous powder. Left alone, the Goose-Girl tries to be happy, and, while looking into the water at her reflection, is surprised by a youth, who, impressed with her beauty, confesses he is the King's Son, and would take her with him. He offers a golden crown, but she refuses to wear it; he puts her wreath inside his tunic, they attempt to run into the woods, but are prevented by the magic all about. Then he goes alone, leaving the crown, which the Girl puts on the neck of the old gray goose. She is so excited when the Witch returns that she is suspected of neglect and finally confesses she has seen a man, which angers the Witch, who sends her into the house as the Fiddler and two friends appear. They have been sent by the councilors to find a real king. She tells them that the first person who enters the town gate after the clock has struck noon will be the king. The Fiddler, who has seen the Goose-Girl at the window, drags her out and she relates the story of her visit from the King's Son. Taking the crown from the goose's neck, she puts it on, declares she is free, and runs off with the Fiddler, followed by the geese. Act II.—The King's Son comes to the town gate, and is about to leave, when he sees a crowd of people approaching to see the King. The Senior Councilor begins a long speech, but is rudely interrupted by the Woodcutter, who relates his adventures in the magic wood. Speculations are rife as to the King's looks and his manner. At the eleventh stroke of the hour, the gates are opened and the Goose-Girl enters, followed by the Fiddler and her geese. She sees the King's Son and he calls her his Queen. The people crowd around and, mocking, drive them through the gates. Act III.—It is

winter in the forest and the Fiddler is weary with hunting for the King's Children. The Woodcutter and his children, who live in the Witch's hut, are surprised to see the King's Son come, bearing the Goose-Girl in his arms, exhausted in their search for food. He wants to sell the crown, but she objects, and he exchanges it with the Woodcutter for a cake, which proves to be one of the poisoned ones belonging to the Witch. They wander off again, and when the Fiddler recognizes the crown, guided by the little gray dove, he hurries into the woods and finds the children dead. The Woodcutter's children construct a rude bier and place the King's Children upon it, covering them with a cloak, on which the Fiddler lays the golden crown.

LA BOHEME. Giacomo Puccini. Turin, 1896.

Paris, about 1830.

Act I.—Marcel, a painter, and Rudolf, a dramatist, are in dire straits, when their Bohemian friends come, bringing food, wine, and cigars. While they are feasting, the landlord asks for the rent, but they make him drunk, and put him out of the room; then they take the rent money for a carousal in the Quartier Latin, leaving Rudolf to his work. Mimi seeks him and they finally go out to supper. Act II.—While in a cafe, Musette, who formerly loved Rudolf, arrives with her rich admirer, Alcindor. Under pretense of suffering from a tight shoe, Musette sends Alcindor to the shoemaker's and joins her Bohemian friends at supper, for which they have no fund; she charges it to Alcindor, who returns with the shoe and is presented the bill. Act III.—Mimi, whom Rudolf has abandoned, seeks Marcel to tell him of her ill treatment, when Rudolf appears, and Mimi conceals herself; her coughing reveals her presence to the men, who have been discussing her health. Act IV.—Marcel and Rudolf are again at work in their garret when the Bohemians come for dinner, among them Musette, assisting the dying Mimi, whom they presently leave with Rudolf. The lovers are reconciled, and Mimi dies.

LA GIOCONDA. Amilcare Ponchielli. Milan, 1876.

Venice, seventeenth century.

Act I.—A festival is being held in the grand court of the ducal palace in Venice. Barnaba, a spy of the Inquisition, is scheming the ruin of Gioconda, a ballad singer. She appears with her blind mother as Barnaba declares that Zuane, the defeated boatman, is a victim of the witchcraft of the blind woman, and the people rush to kill her. Laura, wife of the inquisitor, enters, masked, and saves the blind woman, who gives her a rosary in gratitude. Laura discovers that Enzo, her former lover, is betrothed to Gioconda; Barnaba detects Enzo's love for Laura and proposes a meeting of the lovers on board his ship while Alvise, her husband, is away. Barnaba then sends a letter to Alvise telling of the elopement. Gioconda overhears and is heartbroken. Act II.—Gioconda hides herself on the ship and witnesses the meeting of the lovers. As Laura prays before retiring, Gioconda tells her of her husband's pursuit, and tries to stab her, but Laura holds up the rosary, which Gioconda recognizes, and, resolving to save Laura, places her in her own boat. Enzo, finding Laura has fled, sets fire to the ship. Act III.—Alvise determines Laura shall die by poison and, when she appears dressed for a ball, denounces her, shows her a funeral bier, and presents a bottle of poison. Gioconda substitutes a narcotic for the poison and Laura drinks it. Alvise's guests arrive, he greets them ceremoniously, but La Cieca tells them of Laura's death. Act IV.—Gioconda, alone in a deserted house on the canal, where two men have brought the lifeless Laura, asks their aid in finding her mother. Enzo arrives and is about to kill her when Laura calls to him. Gioconda helps them to escape, and returns to kill herself, as Barnaba comes to claim her. Barnaba in his rage tells of having strangled her mother, but Gioconda is dead.

LAKME. Leon Delibes. Paris, 1883.

An English possession in India, the present.

Act I.—Two young English officers, Gerald and Frederick, accompanied by the daughters of the Viceroy, enter a Hindu temple, and, while the others wander about in the sacred grove, Gerald remains to sketch. Lakme, who with her slave has been gathering flowers, returns to decorate the altar and there finds Gerald, with whom she falls in love. They are interrupted by Nilakantha, a Brahmin, who has a fanatical hatred for foreigners, and Gerald is driven away. Act II.—At the command of her father, who is in the crowd assembled in the market place, disguised as a beggar, Lakme sings accompanied by bells. Gerald approaches, and is stabbed by a priest and left for dead, but Lakme, finding signs of life, has him cared for by her servant, Hadji. Act III.—Lakme nurses Gerald in a hut in the jungle, and one day while she is searching for water he hears the voices of the soldiers and the music of the band; Frederick comes and reminds him of his duty as a soldier. Lakme discerns his wishes, and, as they leave, poisons herself.

LA TOSCA. Giacomo Puccini. Rome, 1900.

Rome, about 1800.

Act I.—Angellotti, an escaped political offender, seeks refuge in the church of Sant' Andrea, where his sister, while praying, has unconsciously served as a model to the painter, Mario Cavaradossi, for his picture of the Magdalen. He secretes himself until the painter is alone, then they converse until interrupted by Tosca, a singer whom Mario loves. She jealously imagines that it is an intrigue with a woman when she sees the picture. Angellotti plans his escape in woman's dress, and flees, warned by a cannon shot. Scarpia, the chief of police, in search of the prisoner, finds Marchesa's fan and the empty basket as Tosca returns; he arouses her jealousy with them. Act II.—Scarpia awaits Tosca in the Farnese palace, whence his agent brings the artist, whom he questions and sends to the torture chamber. When Tosca arrives, her lover's sufferings are described and, harrowed by his groans, she reveals Angellotti's hiding place. Mario is released but denounces Tosca for her treachery. Drums announce Scarpia's defeat and Mario rejoices, for which he is imprisoned. Tosca attempts to follow, but is held back by Scarpia, who demands her virtue as the price of her lover's freedom. She struggles with him and finally, pretending to love him, secures a promise of Mario's release and safe conduct out of the country. After Scarpia has written the order, Tosca stabs him. Act III.—Mario in prison, awaiting execution, writes Tosca a farewell letter; she enters to tell him the news and the need of a mock execution, to which he agrees. The execution is real, however, and, as the soldiers denounce her as a murderess, realizing the truth, she leaps from the parapet of the castle and is dashed to pieces.

LA TRAVIATA. Giuseppe Verdi. Venice. 1853.

Paris and Nantes, about 1700.

Act I.—Violetta Valery forms the acquaintance of Alfred Germont and they live an idyllic life in the country until his father tells her that Alfred's and his sisters' futures have been ruined by her. Act II.—Deeply affected by this, Violetta leaves Alfred and plunges into wildest dissipation. Act III.—Alfred follows her and insults her, for which he is challenged, which makes Violetta ill. Act IV.—Alfred's father realizes that her love is sincere; Alfred, learning what she has sacrificed for him, begs her forgiveness and she dies in his arms.

LES CONTES D'HOFFMANN (Tales of Hoffmann). Jacques Offenbach. Paris, 1880.

The rich Lindorf loves the singer, Stella, who formerly had a love affair with the poet Hoffmann at Milan. Lindorf plans to make Hoffman drunk and then show him to Stella to disgust her. Hoffmann is with his friends at the inn of Luther, which is in the same building with the theater where Stella is singing. Between the acts of the opera, Lindorf succeeds in his scheme, and Hoffmann relates to his friends the story of his three love adventures with Olympia, Giuletta, and Antonie, each adventure requiring one act. The final scene shows the inn to which Lindorf has taken Stella to witness Hoffmann's degradation and so win her for himself. Act I.—Hoffmann falls in love with Olympia. Spalanzani, a mechanical genius, with the help of Coppelius, Olympia's lover, has constructed an automaton, which he exhibits to an astounded public as his daughter. Hoffmann becomes enraptured with the statue, writes an impassioned letter, appointing a meeting, which Olympia attends, but seems unresponsive to his love-making. Coppelius, having discovered the trick, revenges himself by telling Hoffmann the truth. Act II.—Giuletta entertains her many admirers, among them Schlemihl, who casts no shadow, and Hoffmann, who is madly in love with her. His enemy, Dapertutto, who owns Schlemihl's shadow, with the help of Giuletta acquires Hoffmann's. She beguiles the poet, and he barters his shadow for her love, but she breaks her word and leaves him to his enemies. Act III.—Antonie, daughter of Krespiel, inherited from her mother talent for singing, but her father forbids her to sing. When Hoffmann becomes her lover, the father disapproves because of his fondness for music. Dr. Mirakel, who had caused the death of Antonie's mother, obtains entrance to Krespiel's house, and a quarrel ensues. The doctor by some black art causes an apparition of the mother to appear and ask Antonie to sing. She does so and falls dead. Hoffmann lost his bride and Dr. Mirakel triumphed. Coppelius, Dapertutto, and Dr. Mirakel each represents Hoffmann's enemy, who take away from him in turn his love. They are represented by one male and the maidens by one female singer, Hoffman's character being the same throughout.

LOHENGRIN. Richard Wagner. Weimar, 1850.

On the Scheld, the tenth century.

Act I.—King Henry I. of Germany, living in Brabant, assembles the German tribes to expel the Hungarians from his dominions. Elsa has been accused of the murder of her brother, Gottfried, who has mysteriously disappeared. Elsa appears with her attendants and declares her innocence, willing to submit to the judgment of God and the ordeal of combat, choosing as her champion a knight of her dreams. Telramund, who made the accusation, incited by his wife, Ortrud, accepts the challenge for the king. At first the unknown knight is called in vain, but at the second attempt he appears on the river in a boat drawn by a swan, and clad in shining armor, lands, greets the king, and offers himself to Elsa as

her champion on one condition, never to ask his name or origin. She agrees and in the combat following the knight is victorious. He declares her innocence and asks her hand in marriage. Act II.—Telramund and Ortrud were banished, but return in rags on the night before the wedding. Ortrud, who has magical power, schemes to induce Elsa to ask the forbidden questions. In the morning Lohengrin has been proclaimed "Guardian of Brabant." As the bridal party is about to enter the church, Ortrud accuses Lohengrin of being a magician, while Telramund claims that he was beaten by fraud, being ignorant of the name of his opponent. Lohengrin refuses to reveal his identity to any but Elsa, who assures him of her confidence. Act III.—In their bridal chamber Elsa, despite Lohengrin's warning, asks the fatal question. Telramund rushes in to kill, but is killed by Lohengrin, who sorrowfully turns to Elsa and asks her to follow him to the king, to whom he will reveal the mystery. He does so as the troops appear and Telramund's corpse is brought in. Lohengrin is the knight of the Holy Grail. The time for his return has arrived, the swan reappears, and he says farewell; the swan dives into the river, coming up in the form of Gottfried. A dove descends from heaven, and leads Lohengrin back to the castle of the Holy Grail.

LOUISE. Gustave Charpentier. Paris, 1900.
Paris, the present.

Act I.—Louise, a sewing girl, is in love with Julian, an artist, but her mother objects to the match; they plan to get her father's consent, for which Julian writes a letter. Louise presents the letter at supper, her parents quarrel, and Louise finally promises to forget him. Act II.—It is early morning; men and women are on their way to labor, when Julian and some Bohemian companions arrive to run away with Louise when she comes to work escorted by her mother. Julian seeks Louise, and tells her his plans, but she will not consent. Later, in the workroom, Louise is jeered by the other girls for being so silent; Julian is heard singing in the street, begging Louise to come to him, and she cannot resist. Act III.—They go to a tiny house outside the city; at night the other Bohemians join them and dancing follows, Louise being crowned queen of them all. In the midst of this gayety, Louise's mother appears, full of sorrow, and the Bohemians depart. Louise is much frightened, for her mother announces the severe illness of the father, whom only the return of his daughter can cure. Julian relinquishes her on condition of her return. Act IV.—Her father's health is broken, and he reminds her constantly of her ingratitude. Growing defiant, Louise is ordered to bed. As she kisses her father good night, he takes her upon his knee and pleads with her to give up her life with Julian, and finally threatens her. She screams for Julian and her father bids her to go; he calls for her, but listens in vain.

LUCIA DI LAMMERMOOR. Gaetano Donizetti. Naples, 1335. *Scotland, 1700.*

Act I.—Lord Henry Ashton of Lammermoor has discovered that his sister Lucia is in love with Edgar of Ravenswood, his enemy. To prevent their marriage, he sends to Lucia a forged letter to prove Edgar's unfaithfulness, and informs her that only by a marriage with Lord Arthur Bucklaw can their ruin be averted. Act II.—Lucia's teacher, Raymond, persuades her to give up Edgar and the marriage preparations go on. Edgar tries to stop them and curses Lucia for her faithlessness. Act III.—Ashton and Edgar arrange a duel. The marriage takes place, but Lucia, frenzied by Edgar's charges and her own grief, slays Arthur in their chamber. Edgar awaits his enemy in the graveyard. He has heard of the murder and Lucia's insanity. Dying, she asks only for him. The bell tolls for the dead, and Edgar stabs himself.

MADAM BUTTERFLY. Giacomo Puccini. Milan, 1904. *Nagasaki, Japan, the present.*

Act I.—Cho-Cho-San (Madam Butterfly) and Lieut. Pinkerton, U.S.N., are about to enter into a Japanese marriage which has been arranged by a marriage broker, Goro. Sharpless, the American consul, has begged Pinkerton to give up the plan, as the girl believes the marriage is binding, and has renounced her ancestral faith, which forbids her return to her people. An uncle, a religious fanatic, induces her relatives to abandon her and curses her, but Pinkerton consoles her and they are married. Act II.—Three years have passed, in which time Pinkerton returned to America, promising to return, but Suzuki, the servant, suspects his perfidy. Sharpless has been commissioned to tell of Pinkerton's American marriage, a difficult task, because of the wife's faith. To settle all doubt she shows her fair-haired child, whom her husband cannot forget. As the consul departs, the guns announce the arrival of Pinkerton's ship, and preparations are made for his reception, Butterfly passing a sleepless night in watching. At dawn, still watching, she falls asleep. The men come later and tell Suzuki the truth, who, violently angry at first, finally listens to the plan to give up the child. Butterfly appears, is confronted by the wife of Pinkerton, whom she calmly congratulates, when she learns the truth, and promises the child in a half hour's time. At the appointed time they find Cho-Cho-San dead by her own hand.

THE MAGIC FLUTE. Wolfgang Amadeus Mozart. Vienna, 1791.

Act I.—Sarastro, the wise priest of Isis, has taken Pamina to the temple to release her from the influence of her mother, the Queen of the Night, who induces the young Prince Tamino to search for her daughter and free her from the power of Sarastro. Tamino is pursued by a serpent in the forest and rescued by the attendants of the queen, although Papageno, a strange creature arrayed in the plumage of birds, claims the honor. Tamino is given a magic flute and Papageno a chime of bells with which to overcome all danger. Pamina is being persecuted by the Moor, Monastatos, in the palace of Sarastro, when Tamino arrives to rescue her, and the Moor takes to flight. The prince goes on to the temple, where he is refused entrance twice. Papageno, Pamina, and Tamino are about to escape, but the Moor prevents them as Sarastro appears. Pamina explains that she was trying to escape from the Moor, who is severely punished. Act II.—Tamino is led to the Temple of Ordeal, where, in order to possess Pamina, he must undergo the ordeal. The first test requires that the men shall remain silent under temptation. Three ladies tempt them to speak, but they are silent. While Pamina is asleep the Moor approaches and the Queen of Night gives him a dagger with which to kill Sarastro. Again they are tempted and Papageno speaks, but Tamino remains silent, making Pamina believe that he no longer loves her. Papageno wishes for a wife. Finally Tamino and Pamina pass through the ordeal of fire and water unscathed, with the help of the magic flute, and are united by Sarastro.

MANON LESCAUT. Giacomo Puccini. Milan, 1893.
Amiens, Paris, Havre, New Orleans, eighteenth century.

Act I.—A crowd of men are gathered before an inn, while groups of students await the girls as they come from their work. Des Grieux does not join the others, for which he is teased. As Manon and Lescaut descend from the coach, all the students are enchanted, among them Des Grieux, who approaches her when her brother goes into the inn. On his return Geronte accompanies him and falls in love with Manon and plans to carry her off while her brother plays cards, but Edmund, a student, overhears the scheme and suggests that Des Grieux carry her off himself, which he does. Act II.—Manon deserts Des Grieux when his money is gone and goes to Geronte, whom she despises. Des Grieux appears suddenly and they renew their vows, but Geronte locks the doors, preventing their escape, and Manon is dragged off without Des Grieux. Act III.—Manon is cast into prison, and is to be deported to America; Lescaut and Des Grieux try to help her escape, but she is led to the ship followed by Des Grieux, who persuades the captain to take him aboard. Act IV.—Arriving in New Orleans Manon is ill, and he leaves her to find some water. Fearing he has deserted her, when he returns she is beyond aid and dies in his arms.

MIGNON. Charles Louis Ambroise Thomas. Paris, 1866. *A small city; a castle in Italy; eighteenth century.*

Act I.—Just as the gypsy, Jarno, is about to force Mignon to dance by means of a whip in the courtyard of an inn, Wilhelm Meister appears and protects the girl, after having purchased her from the gypsies; she accompanies him dressed as a boy. They meet Laertes, the actor, with the coquettish Philine, and he warns Meister of her inconstancy, but he follows her nevertheless. Act II.—Accompanied by Mignon, Meister visits Philine in the castle of her uncle, and is compelled to bear her ridicule of the "boy." Mignon, when alone, dons Philine's clothes, but is discovered by Meister, who leaves her in distress. She continues in the park until she meets Lothario, the insane old singer, who calls down wrath upon the house, sets fire to the castle, from which Mignon is rescued by Meister. Act III.—Lothario is found to be Mignon's father, who, as a strolling singer, has been looking for his daughter stolen long before by the gypsies. Mignon finds love and happiness in her father and Meister.

PAGLIACCI (The Clown). Ruggiero Leoncavallo. Milan, 1892.
Near Montalto in Calabria, August 15, 1865.

Act I.—The primitive theater of the village comedians has been erected and the actors parade in fantastic costumes, amid the good-natured raillery of the villagers. Canio declares that as a clown he will take part in any joke, but will resent any insult to his honor as a husband. Nedda, his wife, who is untrue to him, fears his threat. Tonio, having offended her, receives a blow from her whip, which angers him. Silvio and Nedda plan to elope, and Tonio, overhearing them, calls Canio, who pursues Silvio, but he escapes. Returning, Canio demands of Nedda her lover's name. Tonio whispers that the lover will attend the performance and can be detected. Act II.—The comedy begins and Nedda, collecting the money, warns Silvio. Canio, still jealous, demands the name of her lover, but she replies lightly and tries to escape; he seizes a knife and stabs her as Silvio comes to her aid and is recognized by Canio, who stabs him also.

PARSIFAL. Richard Wagner. Bayreuth, 1882.
Country and castle of Montsalvat and Klingsor's magic palace.

Act I.—Kept in ignorance of the world by his mother, Parsifal grows up "a guileless fool." His love of adventure is aroused by seeing a company of knights, and his mother

finally allows him to go into the world. Amfortas, keeper of the Holy Grail, has succumbed to the arts of Kundry, contrary to his vow to refrain from the love of woman, and has been wounded by the enchanter Klingsor with his own lance, which fell from his hand and was grasped by Klingsor. It is the one which pierced the side of Christ on the cross, and was saved by Joseph together with the Grail, the vessel which caught the Redeemer's blood. Amfortas suffers agony but cannot be healed or die, until a "guileless fool, by compassion wise," brings back the lance and touches the wound. Kundry, the woman who scorned Christ on the cross, is condemned by Klingsor to wander the earth forever; she brings a healing potion to Gurnemanz, who tells of the magic garden created by Klingsor and peopled with beautiful maidens to seduce the knights. Parsifal, brought before Gurnemanz for wounding a swan within the precincts of the castle, is recognized as the "guileless fool" who can heal Amfortas. The miracle of the Grail is displayed, but Parsifal is so astounded that he forgets to ask the question which would release Amfortas, so is ejected from the castle. Act II.—Parsifal, confined in a dungeon beneath the turret, where Klingsor keeps his magic implements, is fully aroused by the combats in which he has conquered, when Klingsor causes the turret to vanish and a wonderful garden to appear, peopled with beautiful girls who surround him. He resists all but Kundry, who touches him by mentioning the death of his mother, and he kisses her; this excites the "guileless fool," and he understands what can be done for Amfortas. Horrified by Kundry's tale of her sin, he spurns her, and Klingsor tries to kill him with the holy lance, which remains suspended above his head; it is seized by Parsifal, who makes the sign of the cross, and Klingsor and his magic forces disappear. Act III.—After wandering for many years, Parsifal has gained wisdom and journeys once again to the castle of the Grail. Kundry has become the servant of Gurnemanz, who sees Parsifal's lance, and recognizes him. It is Good Friday. Amfortas, about to die, has assembled the knights and is ready to exhibit again the Holy Grail, when Parsifal enters and touches the wound with his lance, healing the king. Reverently holding aloft the Grail, he proclaims himself the king, to whom all bow in loud homage.

PELLEAS AND MELISANDE. Claude Debussy. Paris, 1902.

Act I.—Golaud, a mighty hunter, is lost in a forest. He hears a sound of weeping and discovers Melisande, for whom he seeks shelter. Act II.—A letter from Golaud, announces his marriage to Melisande and asks for her acceptance at the castle, a light in the window to be the sign of their favor. The old king, Arkel, sanctions the marriage and the couple come to the castle, where Melisande meets Pelleas, Golaud's brother. Seated near the fountain with Pelleas, Melisande takes off her wedding ring and accidentally drops it into the water, where it is lost. She is terribly frightened about what to say to Golaud, but Pelleas advises her to tell the truth. Golaud is injured by a fall from his horse; taking Melisande's hand as she ministers to him, he discovers the loss, and she tells him that she dropped it in a cave by the sea trying to escape the tide. He bids her go at once and find it, taking Pelleas with her. Act III.—Pelleas is going away and seeks Melisande to say farewell; overcome by emotion he kisses her passionately, Golaud finds them, and upbraids them for their folly. Act IV.—Pelleas advised by his grandfather to leave the castle at once. Golaud, whose jealousy has been aroused by Melisande's sorrowful mood, seizes and almost chokes her with her hair. Arkel interferes and Golaud departs angrily. Breathless from her encounter, Melisande seeks Pelleas to say good-bye, and they declare their love for each other. Golaud witnesses their embraces and kills Pelleas. Act V.—Melisande, dying, grants forgiveness to the penitent Golaud, and avows her love for Pelleas.

RIGOLETTO. Giuseppe Verdi. Venice, 1851.

Mantua and vicinity, the sixteenth century.

Act I.—The prince of Mantua has seen an unknown beauty in church and desires to possess her, although paying court to the Countess Ceprano. His jester, Rigoletto, mocks the ladies of the court and suggests their removal. The noblemen vow vengeance upon Rigoletto, and Count Monterone curses both the prince and jester. Act II.—Thinking of the curse, Rigoletto returns home to his daughter, Gilda, who is forbidden to appear except at church. She does not know her father's occupation. In the guise of a student the prince appears after Rigoletto departs, and is seen there by the noblemen, who finally abduct Gilda. They tell Rigoletto that they have abducted the Countess Ceprano and secure his assistance; he realizes his deception and remembers the curse. Act III.—The prince hears of the abduction from the noblemen, who say Gilda is Rigoletto's mistress and that she is in the castle. Rigoletto, taunted by the noblemen, finally acknowledges that she is his daughter, and is taken to her. She admits her love for the prince, and Rigoletto vows vengeance against his master. Act IV.—Gilda and Rigoletto go to the house of the bandit, and find the prince amusing himself with Maddalena, his daughter, and the jester bargains with the bandit to kill the prince. Gilda is forced by her father to don male attire and go to Verona, but fearing an attack on the prince returns to overhear the bandit promise his daughter, who begs for the life of the prince, that if by midnight another can be found to take the prince's place, he will spare his life. The prince is kept in the house by a severe storm. When Rigoletto arrives with the money, he receives a bag containing a corpse; he is about to cast the bag into the river when he hears the prince's voice. On opening the wrappings he finds the body of his daughter. The curse had been fulfilled.

THE RING OF THE NIBELUNG. Richard Wagner. Munich, 1869.

Introduction—**THE RHEINGOLD.** Three Rhine daughters, Woglinde, Wellgunde, and Flosshilde, are swimming about at the bottom of the river when the dwarf, Alberich, tries to catch them. The brilliant sun reveals the Rheingold, guarded by the daughters, and despite their father's warning they tell Alberich that "he who can fashion a ring from it and possess it will own the world and all its mighty power," but that the person must care nothing for love, else he cannot fashion the ring. Alberich laughingly snatches the Rheingold and disappears. He makes a ring, whose fame reaches the home of the gods, Walhalla and Wotan. The giants have built Walhalla and their reward is to be the goddess of youth, Freya, the sister of Fricka, Wotan's wife. Wotan plans to kill the dwarf and secure the ring, which he will give the giants instead of Freya. Alberich, with the aid of the ring, has brought all Nibelungs under his power and drives them to slavish tasks. His brother Mime has made him a magic helmet, which renders him invisible besides changing his form to anything he desires. Wotan and Loge, god of fire, visit the dwarf and obtain the secret of the helmet, whose power they doubt. Alberich, to show proof of it, changes himself into a dragon and then into a toad, which Wotan crushes under foot as Loge grasps the helmet, and they carry Alberich to the upper world, where they compel him to give up the treasure also; he curses them and declares it will bring death to whomsoever wears the ring. The giants return and receive the gold and helmet, but Wotan refuses to surrender the ring until frightened by the warnings of Erda, goddess of the earth. Then Freya is freed. The giants quarrel over the ring and one is killed. Wotan leads the gods to Walhalla upon the rainbow and resolves to obtain the secret of the Gotterdammerung. The first day—**THE WALKURE.** Wotan has learned from Erda that the gods will perish if Alberich again obtains the ring. The Walkure are the offspring of the love of Wotan and Erda; they are the shield maidens who lead the heroes to Walhalla to battle for the future of the world. To secure the ring Wotan, as he cannot take it from the giants, descends to earth and founds the Walsungs, from whom the hero will be produced. Siegmund, son of Wotan, weaponless rushes into the hut of Hunding, and is there tended by the latter's wife. Sieglinde. On her husband's return he recognizes his enemy but cannot touch him in his own house. When Hunding retires, Sieglinde gives him a sleeping potion, and shows Siegmund the sword sticking in the tree, which was left there by Wotan at her wedding feast, and tells him it will belong to the man who succeeds in withdrawing it. Siegmund draws the sword and she recognizes him as her twin brother. They flee into the forest. Brunhilde, Wotan's favorite shield maiden, is commanded to protect the Walsung in the fight between Siegmund and Hunding, but Fricka commands that the victory shall be Hunding's to punish Siegmund for taking his sister away. Brunhilde does not obey, but Wotan aids Hunding and the sword is broken in two; Siegmund is slain, but Brunhilde is pursued by Wotan, who kills Hunding. Brunhilde joins the other Walkure, and awaits Wotan, who causes her to fall into a magic sleep, and decrees that she shall belong to him who shall awake her with a kiss. He causes flames to surround the peak so only the most fearless knight could penetrate. Second day—**SIEGFRIED.** The son of Sieglinde, born in the forest. At her death she gave him and the two pieces of his father's sword into the keeping of Mime, the smith. He tried in vain to join the pieces of the sword, hoping that Siegfried, who has great strength, may slay the fierce dragon, Fafner, guarding the treasure received from Wotan. Siegfried questions about his origin and Mime refuses to answer until almost strangled, then tells him of his parentage and shows him the broken sword. Wotan appears in disguise and wagers with Mime that he can answer three questions satisfactorily, the stake to be Mime's head, and also requires an answer to three questions or forfeit his own head. Mime answers two, but cannot tell who will mend the sword. Wotan says that one who has never known fear can accomplish it. Siegfried returns, joins the parts, and produces a powerful sword; then Mime sends him to kill Fafner. Alberich is waiting near the cave to kill the slayer of Fafner, when Siegfried appears with Mime and kills the dragon, whose blood upon his fingers gives him magic power, and he takes the magic helmet and ring. He is enabled to read Mime's mind and slays him. A bird sings to him of the maiden on Valkyr's rock, and, led by it, he proceeds to rescue Brunhilde. He is met by Wotan, whose spear he splinters with his sword, and springs through flames to the rock, where he awakens Brunhilde with a kiss. Third day—**GOTTERDAMMERUNG.** Wotan seated in Walhalla, awaiting the end he has predicted, orders a spear to be constructed to displace the one Siegfried destroyed. Loge is to set fire to Walhalla when God and the

world have been freed from the curse of the ring and the Rheingold has been returned to the Rhine maidens. Siegfried comes from the forest with Brunhilde, who has instructed him in the wisdom of the gods; he gives her the ring as a love token, and she presents him with her steed, Grane, that he may go forth into the world to perform deeds of valor. Hagen, son of Alberich, is the avenger who is to slay Siegfried and obtain the ring. When Siegfried arrives at Hagen's home he is hospitably entertained and given a potion which causes him to forget Brunhilde; he wooes Gutrune and, drinking blood brotherhood, joins Gunther, her brother, in the adventure to win Brunhilde. Siegfried, in the guise of Gunther, approaches Brunhilde, takes the ring from her hand, and leads her away to Gunther, where she sees Siegfried united to Gutrune and the ring upon his finger. She has been united to Gunther, and filled with a frenzy of jealousy, joins Hagen to murder Siegfried. The latter is besieged by the Rhine maidens for the ring, and they predict his death. He drinks wine at Hagen's banquet, his memory immediately returns, and he relates his rescue of Brunhilde, and their love. Hagen stabs him in the back and he dies; his body is carried to Gutrune. Hagen demands the ring from Gunther, who refuses to give it up. Siegfried's body is placed upon the funeral pyre and Brunhilde applies the torch, after taking the ring from his finger, when she mounts her horse and ascends the flames which the Rhine rises above; the maidens grasp the ring, and Hagen is dragged to the depths. A great light appearing in the distance denotes the destruction of Walhalla, "the twilight of the gods."

SALOME. Richard Strauss. Dresden, 1905.

Palace of Herod, A.D. 30.

Salome lives at the sensual and cruel court of Herod, her stepfather. Still a maiden, she has conceived a strong passion for the Prophet Yochanaan, who has been thrown into a cistern near the palace by Herod. Salome orders the prophet to be brought to her by the young Syrian commander, Narraboth, who is so insanely infatuated with her that he obeys her commands against the orders of the king. When he discovers Salome's ardor for the prophet, he kills himself before her, which she scarcely notices. Yochanaan repulses her and returns to prison; she becomes half crazed with passion. Herod wishes to see her dance and she takes advantage of this to extort from him the promise of reward, which he gives without any conditions. Scantily clad, she dances alluringly before him and then demands the head of the prophet. Herod, afraid to slay this prophet of God lest the people revolt, offers half his kingdom if she will withdraw. She refuses, and demands the head of the Baptist, until Herod orders his execution. His head is brought to her in proof of his death, and as she kisses the pallid lips again and again, Herod in disgust orders her death, the infuriated soldiers crushing her with their shields.

SAMSON AND DELILAH. Camille Saint-Saens. Weimar, 1877. *Gaza in Palestine,* 1150 *B.C.*

Act I.—The Israelites are in revolt against the oppression of the Philistines and pray for relief. Samson, their leader, is filled with the hope of victory, although scoffed at by Abimelech, the satrap, who in attempting to repress them is killed by Samson, whom the Philistines fear to arrest. The Israelites, taking courage, drive the Philistines away. Delilah and her maids greet Samson, the leader, and he is unable to withstand her charms. Act II.—The high priest has commanded Delilah to deliver the hero to the Philistines and she awaits Samson in her home, with vengeance in her heart, as he has deserted her once. When he appears she so bewitches him that he tells her his secret of strength is in his hair. She lulls him to sleep, cuts off his hair, and calls in the Philistines, who overpower him, as his strength has gone. Act III.—Weak, blind, and imprisoned, he is filled with remorse as he hears the reproaches of his people. He is dragged out to be shown as a captive in the triumphal procession, taken to the temple, and ordered to sing in praise of Delilah, but he prays to the Lord to give him strength and vision, as the enemy mock him and the tumult increases. He continues praying and, grasping the two marble pillars of the temple, bends them and with his enemies finds death among the ruins.

THE SECRET OF SUZANNE. Ermanno Wolf-Ferrari. Munich, 1909. *The present.*

Count Gil and Countess Suzanne have recently been married, but the youthful bride has not dared to tell her husband that she smokes cigarettes, lest he disapprove and scold her, so she is obliged to smoke whenever a good opportunity is offered. He observes the odor of smoke about the house and his jealousy is aroused. Not dreaming that she is the culprit, he fears that she has a lover whom she is hiding. His accusations drive her to all sorts of absurd excuses, which seem to confirm his suspicions. At last Count Gil feels that he must know the truth. He follows the supposed lover from room to room, sniffing the tobacco smoke as he goes. When he finally believes he has trapped the lover, he finds his pretty little wife smoking. She looks so charming when engaged in her pet vice, he is so relieved to find he is the only lover, that he forgives her and peace is restored.

TANNHAUSER. Richard Wagner. Dresden, 1845.

Thuringia and the Wartburg, the thirteenth century.

Act I.—The goddess Venus has won the dreaming Tannhauser by her fascinations, but he soon longs for freedom, though she tries to hold him. At the mention of Mary, the mother of God, the spell is broken, Venus and her attendants disappear, and he finds himself in the Wartburg just below, where a young shepherd sits playing. As the pilgrims pass, Tannhauser, sobbing, sinks to his knees. The landgrave and his companions Wolfram, Walter, Biterolf, Reimar, and Heinrich find him and are rejoiced, for they have missed him. He had fled because unsuccessful in the prize singing. When the huntsmen tell him that he has gained Elizabeth's heart with his singing, he joins them. Act II.—Another contest is to be held in the hall of the Wartburg. Elizabeth has been in retirement since Tannhauser's disappearance, but promises to be present if he returns; she is there to greet him when he comes. The subject of the day is "Love's Awakening." Elizabeth is to grant a wish to the victor, whatever it may be. Wolfram begins, declaring love is a pure stream which should never be troubled. Tannhauser replies to all in turn and finally sings a song of love to Venus, shocks the ladies and the knights draw their swords upon him. Elizabeth protects him and he is allowed to join a band of pilgrims to Rome to seek forgiveness. Act III.—The pilgrims return with no news of Tannhauser for Elizabeth, who returns broken-hearted to the Wartburg. Wolfram has a vision, in which a tottering pilgrim is seeking the path to Venus; it is Tannhauser who is unforgiven by the pope. Calling for Venus, who appears and beckons him to her cavern, his attention is drawn to a procession chanting and carrying a bier, on which is Elizabeth's body. He kneels beside it and prays. The withered stick put forth young leaves, a sign of the forgiveness of God.

THAIS. Jules Massenet. Paris, 1894.

Thebes and the Theban desert, Egypt, during Greek occupation.

Act I.—Athanael, a monk of the Cenobite Order, has been in Alexandria to denounce the luxury and license of the Greeks, but returns to report that the city is under the rule of Thais, a beautiful courtesan. In his dreams that night he sees her half clad posing before the people as Aphrodite, and he awakens, condemning her aloud. Again he departs upon his mission and on reaching the city goes to see Nicias, whom he finds infatuated with Thais, though she has ruined him. The monk is invited to remain for a banquet, at which Thais will be present. Slaves array the monk in gorgeous apparel. Thais soon appears, surrounded by an adoring crowd, and presently discovers Athanael and asks his name and business. He tries to explain his mission, but she only exerts her charms the more; he denounces her and finally goes away horror-stricken. Act II.—Accompanied by her friends, Thais returns home dispirited and tired. Athanael watches her as she gazes into her mirror with delight, and prepares some incense as she sings to Venus. He tells her that he loves her with the love of the spirit, and commands her to follow him but she hears the voice of Nicias, and turns from the monk, who tells her he will wait until day and lies down outside on the pavement. Alone she falls into a reverie then slowly appears, bearing a lamp, and tells Athanael that she is ready to go with him. Nicias and friends appear and call for dances, but Thais, clad in a simple robe of white, follows the monk, bearing the flaming torch. Her slaves follow, as flames devour the house behind them. Act III.—Thais and Athanael have almost reached the convent in the desert when her strength gives out and he helps her to the abbess, when they say farewell. Athanael returns to his dwelling, where he confides to Palemon his love for the beautiful woman. A vision of Thais dying so overcomes him that he rushes into the desert, where a storm is fiercely raging. Act IV.—In the garden of the convent Thais lies dying as the nuns kneel about her, when Athanael enters and asks for her. Left alone, he tells her of his love, but, rising, she points to the sky, where she sees angels approaching to bear her away. She calls on God and falls dead at his feet. Overcome with anguish, he sinks to the ground beside her.

TRISTAN AND ISOLDE. Richard Wagner. Munich, 1865. *On board ship, in Cornwall and in Brittany.*

Act I.—Tristan has been sent by King Mark to bring his intended bride, Isolde, from Ireland to Cornwall. She has recognized in him the wounded knight she once nursed but who slew her betrothed in combat. She resolves to kill him and orders her servant to prepare a poisoned potion for him. By mistake she is given a love potion, which they both drink and finally sink into each other's arms in an ecstasy of love. Act II.—When they reach King Mark's castle, they plan to meet in secret, but she is warned by her servant against the jealous Melot. Tristan is also warned, but it is too late, for he is closely watched by Melot, the king, and attendants. The king, however, despises Melot for his treachery; Tristan is injured in the combat which follows. Act III.—Taken to his own home, Tristan grows rapidly worse and his servant sends for Isolde to heal him. When she comes, Tristan rushes to her and dies in her arms. The king has also come to unite the lovers, but Kurwenal thinks he has evil intent and kills Melot. Isolde dies of grief beside Tristan and the king remains in prayer beside them.

ART AND MUSICAL TERMS.

ACANTHUS. A plant, having ornamental foliage, the conventionalized form of which is largely employed for architectural decoration, especially on the Corinthian capital. There are two principal species, *acanthus mollis* and *acanthus spinosa*, the latter somewhat resembling a thistle.

ACCOMPANIMENT. A secondary part added to the principal for the improvement of the general effect.

ACROPOLIS. A fortified city, or the fortified part of a city, on the summit of a hill.

ADAGIO. A slow movement.

AD LIBITUM. Implies that the time of the movement is left to the discretion of the performer.

ALLEGRETTO. With cheerful quickness.

AMPHIPROSTYLE. A Greek temple, having a portico in front and one in the rear projecting beyond the side walls.

AMPHITHEATER. A building for gladiatorial and other shows, generally elliptical in form.

AMPHORA. A tall earthenware jar with two handles.

ANDANTE. Somewhat sedate; slowly.

ANGELS. In medieval art divided into nine degrees: Seraphim, Domination, Princedom, Cherubim, Virtues, Archangels, Thrones, Powers, Angels. The Cupid-like angels were only introduced in the time of the Renaissance.

ANIMATO, ANIMOSO, or CON ANIMA. Animated; with spirit.

ANNULUS or ANNULET. Ring of molding above the lower part of the echinus of Doric capitals.

ANTAE. Rectangular pilasters forming the ends of the walls of the cella of a Greek temple, and supporting the extremities of the architrave. A temple of this form was called a temple "in antis."

ANTEFIXA. Terra cotta ornaments placed above the cornice and on the ridge of the roof of Greek temples.

APSE. The extremity of a church, generally semicircular in form and surmounted by a semi-dome.

AQUATINT. A process of engraving by acid laid on in even washes with a brush, upon a broken surface formed by a crackled film of resin on the copper.

ARABESQUE. An ornament composed of stems, foliage, leafage of plants, scrolls, and fantastic animals. Not, as its name implies, an Arab invention, but found in Greek and Roman architecture.

ARCADE. A series of arches.

ARCH. A curved structure, generally a segment or segments of the circle. Semicircular arches were used by the Romans; horseshoe arches by the Byzantines and Moors; pointed arches formed of two intersecting segments of circles by the Gothic builders.

ARCHAIC. The early period of art when forms were stiff, conventional, and symbolic.

ARCHITRAVE. The horizontal part of a structure resting immediately on the capital of column or pilaster.

ASSAI. Very; used as an adverb with another word.

ASTRAGAL. A small semicircular molding at the top of a column beneath the capital, also used to divide the architrave horizontally into parts. Named from its supposed resemblance to a row of knuckle bones.

A TEMPO. In regular time.

ATLANTES. Human male figures, employed instead of columns to support the architrave.

ATRIUM. A covered court in a Roman house, with an opening in the center (compluvium) and roof sloping inwards.

BALDACHIN. A canopy over seats and other places of honor.

BAROQUE. Rococo.

BARREL VAULT. A vault of semi-cylindrical form.

BASE. The lower division of a column on which the shaft is placed; absent in the Doric order.

BASILICA. A rectangular hall divided by rows of columns into three naves, and used by the Romans as a court of justice. Adopted as the typical form of early Christian churches.

BAS-RELIEF or BASSO-RILIEVO. Figures sculptured on panel projecting less than half their proportions from the surface.

BASTION. A projecting polygonal buttress on a fortification.

BATTLEMENT. A parapet of a fortification, consisting of alternate raised portions and spaces, the latter called crenels or embrasures.

BAY. A portion of a structure marked off by the division of the vaulting, the arches, or the buttresses.

BEAT. An indication of a certain duration of time.

BEN. Implying well, as *ben marcato*.

BODY COLOR. In water-color painting, color made opaque by intermixture with white.

BOSS. An architectural ornament of ceilings, placed generally where the ribs of the vault meet.

BUTTRESS. A piece of wall built at right angles to the wall of a building to strengthen the structure, either immediately against the wall or connected by an arch called a flying buttress.

BYZANTINE. The style of architecture and painting in use at Constantinople from the sixth to the twelfth century.

CALANDO. A gradual diminution in speed and tone.

CADUCEUS. A wand of laurel or olive on which two snakes are intertwined; the emblem of Hermes.

CAPITAL. The, usually ornamented, member which crowns the top of a column or pillar, and by the form of which the different orders are characterized.

CARYATIDES. Female figures, employed instead of columns to support the architrave.

CELLA. The internal part inclosed by the walls of a Greek temple.

CHEVET. A form of apse inclosed by an arcade with a series of chapels round it, common in Romanesque and Gothic churches in France.

CHEVRON. A zigzag molding used in Romanesque architecture.

CHIAROSCURO. The distribution of light and shade.

CHROMATIC. Proceeding or formed by semi-tones.

CINQUEFOIL. An ornamental foliation, consisting of five projecting cusps.

CLEARSTORY. The row of windows forming the third or upper division of the nave wall of a church, rising above the roof of the outer portion of the structure.

CLOISTER. A quadrangular covered walk, forming a portion of a monastic building.

CLUSTERED COLUMN. A pier formed by a number of shafts clustered together, either united or separate.

COLUMN. A column consists of three principal parts: base, shaft, and capital.

COMPOSITE. The last of the five Roman architectural orders, formed by the combination of the Ionic volute with the foliage capital of the Corinthian.

CON. With; as *con espressione*.

CORINTHIAN. The third order in the Roman classification, of Greek origin. Shaft slender and smooth; capital richly decorated with acanthus leaf ornaments.

CORNICE. The horizontal molded projection terminating a building.

CORONA. A molding forming part of a cornice with lower part grooved to form a dripstone.

CRESCENDO. A gradual increase in tone.

CRYPT. A subterranean chapel beneath a church.

CUPOLA. A small dome or square structure rising above the roof of a building.

CUSP. Pointed foliations in architectural tracery.

CYMA. An undulated molding, formed of a concave and convex arc. When the upper arc is convex it is called cyma reversa; when the upper is hollow, it is called cyma recta.

DA. By.

DALES or DAL. In a soft, quiet manner.

DAMASCENING. Metal ornamented by inlaying another metal.

DECORATED. The second of the pointed or Gothic styles of architecture in England.

DELICATO. With delicacy.

DENTILS. Ornaments in the form of small cubes or teeth.

DIAPER. A mode of decoration by a repeated pattern.

DOLOROSO. In a melancholy, sad style.

DORIC. The oldest and simplest of the Greek orders of architecture.

DORMER. A gable window in the sloping side of a roof.

DRY-POINT. Direct engraving upon copper with the etching needle.

ECHINUS. The ovolo molding of a capital.

ELEVATION. The vertical plan of a building.

ENTABLATURE. The horizontal superstructure which lies upon the columns in classic architecture.

ENTASIS. The swelling of the shaft of a column.

EPINAOS. The portico situated at the back of a temple.

ESPRESSIVO or CON ESPRESSIONE. With expression.

ETCHING. Engraving by the action of acid on a copperplate covered with a wax ground on which lines have been scratched by the etching needle.

FACADE. The face or front of a building.
FAN TRACERY. Elaborate carved work spread over an arched surface.
FILLET. A plain band used in architecture to separate ornaments and moldings.
FINE. The end.
FINIAL. An ornament of carved work representing foliage on a pinnacle or spire.
FLAMBOYANT. A florid style of French pointed architecture peculiar to the fifteenth century, contemporary with perpendicular in England.
FLUTES. Small semicircular grooves or channels cut in the shafts of columns or pilasters.
FORTE. Strong, loud.
FRESCO. Painting executed on a freshly laid ground of stucco.
FRET. An angular, interlaced architectural ornament.
FRIEZE. (1) The middle division of an entablature which lies between the architrave and cornice. (2) Any horizontal sculptured band.
FURIOSO. With great animation.

GABLE. The triangular end of a house from the eaves to the top.
GENRE. Scenes from domestic life.
GIUSTO. In perfect time.
GRAVE. Slow in movement; low in pitch.
GRISAILLE. A style of painting in gray by which solid bodies are represented as if in relief.
GROIN. The angular curve formed at the intersections of a vaulted roof.
GUSTOSO or **CON GUSTO.** With style; taste.
GYMNASIUM. A large building used by the Greeks in which gymnastics were taught and practised.

HELIX. A small volute like the tendril of a vine placed under the Corinthian abacus.
HYPOSTYLE. A roof supported by columns.

IL. The.
IMPASTO. The thickness of the body of pigment laid on to a painting.
IMPETUOSO. Impetuously.
IN. In; as *in tempo.*
INTAGLIO. A stone in which the design is sunk beneath the surface, and gives impression of a bas-relief.
INTRADO or **INTRODUZIONE.** An introduction to a piece of music.
IONIC. The second order in Greek architecture distinguished by the voluted ornaments of its capital.

JAMB. The side of any opening in a wall.

KEYSTONE. The top stone of an arch.
KLAFT. A royal Egyptian headdress forming a kind of hood and terminating in two flaps, which fall over the breast.

LANCET. A pointed arch, obtuse at the point, resembling a surgeon's lancet.
LANTERN. A small turret above the roof of a building having windows all round it.
LARGO. A slow and solemn degree of time.
LEGATO. In a smooth, even manner.
LEGGIANDO. Lightly.
LINTEL. The stone or beam placed across the top of a door or window.
LOGGIA. The gallery or corridor of a palace, having a colonnade on one or more sides, open to the air.
LOTUS. A water lily. In Egypt and India held sacred.

MANSARD. A roof with two sets of rafters of which the upper part is less steep than the lower. Named after a French architect.
MARCATO. In a marked manner.
MARQUETRY. Inlaid work of ornamental woods and stones of various colors. Often written Parquetry.
MAUSOLEUM. (1) The tomb of Mausolus, king of Caria. (2) Any tomb of imposing size and magnificence.
MEDALLION. A circular or oval tablet on the face of a building.
MEME. The same.
METOPE. A square slab, sculptured or plain, between the triglyphs in the Doric frieze.
MEZZO. In a medium degree; as *mezzo forte.*
MEZZO-RILIEVO. Sculpture in relief in which half of the figure projects.
MEZZOTINTO. A method of engraving by smoothing away the lights from a ground mechanically roughened.
MODERATO. Moderately.
MOLTO. Very; as *molto forte.*
MONOLITH. An object formed of a single block of stone.
MOSAIC. An imitation of painting by joining together minute pieces of hard substances of different colors.
MOVIMENTO. Movement; time.
MULLIONS. The slender pieces which separate a window into compartments.
MUTULE. An architectural ornament of the Doric order, consisting of a square block placed at equal intervals in a Doric cornice.

NAOS. The interior apartment of a Greek temple.
NAVE. The middle part or body of a church from the choir to principal entrance between the aisles.
NIMBUS. A halo or circular disk around the head of sacred personages. After the eighth century, living persons were in Italy distinguished by a square nimbus, which sometimes assumes the form of a scroll partly unrolled. The heads of statues of gods and of Roman emperors were decorated with a crown of rays. The same is found in the Oriental representation of Buddha.

OBBLIGATO. An essential portion of a composition.
OGEE. An arch described with four centers so as to be concave in lower and convex in upper part.
OGIVE. A pointed arch.
ORDER. An order in architecture consists of two parts: the one, vertical, consisting of a column and its base and capital; the other, a horizontal entablature, consisting of architrave, frieze, and cornice. The word is only used when the order is one of the five whose dimensions and details were fixed and defined by Palladio and other architects of the sixteenth century; these are the Doric, Ionic, Corinthian, Tuscan (supposed to be a simpler form of Doric), and Composite (a Roman modification of Corinthian).
ORIEL. A projecting angular window, generally triangular or pentagonal in shape.
OTTAVA or **8VA.** An octave.
OVOLO. A convex molding much used in classical architecture.

PAGODA. A sacred tower in the countries of the far East.
PALESTRA. A place for wrestling, formerly part of the gymnasium.
PEDALE or **PED.** Signifies that performer must press down pedal.
PEDIMENT. A triangular crowning of a portico usually supported by a row of columns.
PEN. A little.
PENDENTIVE. The part of a vault between two arches supporting a dome.
PERIPTERAL. A name given to a temple which had a portico of six columns on each front and a detached colonnade of 11 on each side of the cella.
PERISTYLE. A building, the interior of which is surrounded with columns.
PERSPECTIVE. The art of representing on a flat surface the appearance of objects from one given point of view.
PIANISSIMO or **PP.** Very soft.
PIANO or **P.** Soft.
PIER. Perpendicular supports from which arches spring.
PILASTER. Square pillar on a wall partly imbedded in it, less than one fourth of its thickness projecting.
PINNACLE. A small spire.
PISCINA. A stone basin usually placed in a niche in the wall of the chancel at which the priest might wash his hands.
PLINTH. The lower projecting base of a column.
PLUS. More.
POCO A POCO. Gradually; by a regular gradation.
POMPOSO. Stately, dignified.
PRECIPITATO. Very quickly; hurriedly.
PREMIERE. First, as *première fois,* first time.
PRESTO. Very quick.
PRIMO. First, as *violino primo,* first violin.
PRONAOS. The portico situated in front of a temple.
PROPYLAEA. Gateway or entrance to an Egyptian temple.

QUASI. In the manner of; like.
QUATREFOIL. An ornament in pointed architecture, consisting of four foils.

QUIETO. With repose, quietly.

RAPIDO. Rapidly.
RINFORZANDO, RINF., or RF. With increase.
RITENENTE or RITENUTO. Decreasing in speed.
ROCOCO. A style of decoration distinguished by a superfluity of confused and discordant detail.
ROMANESQUE. The debased style of architecture and ornament adopted in the later Roman empire, and the styles founded upon it.
ROSE WINDOW. A large, circular window divided into compartments by curved mullions.
RUSTICATION. Hewn stone masonry, the joints of which are rendered conspicuous by grooves or channels.

SARCOPHAGUS. A stone coffin.
SCUMBLING. The process of going over a painting with a brush, nearly dry, to soften and blend the tints.
SEGNO. Sign, as *al segno*, go back to sign.
SEMPRE. Always, as *sempre piano*.
SERIOSO. Seriously.
SHAFT. The body of a column.
SOLO or SOLA. Alone. A composition rendered by one person.
SOSTENUTO or SOST. Prolonged, sustained in tone.
SPHINX. A figure with a human head on a lion's body, typifying the union of intellectual and physical power. An Egyptian emblem, signifying the religious mystery.
SPIRITO. With spirit.
STACCATO. Each note to be distinctly marked.
STESSO. Extended, diffused, slow.
STYLOBATE. The common base of a row of columns.
SYNCOPATE. See SYNCOPATION.
SYNCOPATION. Connecting an unaccented note with an accented note following others in the same or in different bars, thus forming one prolonged note with a duration equal to the two.

TAENIA. A band which separates the Doric frieze from the architrave.
TANTO or TAN. So much.
TARDO. Slowly.
TEMPERA. Painting with pigments mixed with chalk or clay, and diluted with size.
TEMPO COMMODO. In moderate or easy time.
THALAMUS. The nuptial chamber in a Roman house.
TORSO. The trunk of the statue of a human figure.
TRACERY. Geometrical ornament.
TRANQUILLO. Tranquilly.
TRANSEPT. A transverse nave, passing in front of the choir, and crossing the longitudinal nave of a church.
TRANSOM. The horizontal crossbar in a window.
TREFOIL. An ornament of three foils.
TREMANDO or TREMOLO. The rapid striking of a note so as to produce a tremulous effect.
TREMENDI. With terrific expression.
TRIFORIUM. The second or middle story of the nave wall of a Gothic church, consisting of a gallery over the ceiling of the side aisle and below its roof.
TRIGLYPH. An ornament, consisting of three flutings or upright groupings, separating the metopes in a Doric frieze.
TRILLE or TRILLO. A trill or shake.
TRIPLET. A group of three notes equal in duration of time to two notes of the same value.
TRIPTYCH. A form of pictures in three panels.
TYMPANUM. The triangular space between the horizontal and sloping cornices. The name is also given to the space included between the lintel of a door and the arch over it.

UN. A, as *un poco*, a little.

VAULT. An arched ceiling or roof of stone.
VELOCE. Rapidly.
VELOCISSIMO. With great rapidity.
VIGOROSO. With vigor.
VIVACE or VIVACEMENTE. Briskly and quickly.
VOLTI SUBITO. Turn over quickly.
VOLUTE. A spiral scroll.
VOUSSOIRS. The wedge-shaped stones used in constructing an arch.

ZOOPHORUS or ZOPHORUS (lit., bearing animals). A continuous frieze, decorated with figures of animals, conventional and real.

LANDMARKS IN THE HISTORY OF MUSIC.

333 St. Ambrose born.
384 The Ambrosian chant arranged for Milan cathedral.
590 Accession of Pope Gregory, who arranged the Gregorian chant.
814 Chant of Metz, Germany, began to be introduced in all Catholic churches at matins.
895-900 Beginning of modern harmony. Hucbald's "Organum."
(*c.*) 1025 Improvements in musical notation and introduction of solmization by Guido of Arezzo.
1100 Beginning of the earliest French school of contrapuntists. Jean Perotin introduces "imitations."
1200 Franco of Cologne regulates measure in music and formulates some of the fundamental laws of modern harmony.
1217 Walter Odington, an English disciple of the French school, writes a learned treatise on music.
1380 Introduction of secular tunes in masses.
1425-1430 John Okeghem, first master of the great Netherlands school, born. Canon carried by him to its utmost perfection.
1453 Fall of Constantinople and flight of scholars to Italy.
1475 The Meistersingers flourished in Germany.
1480 Adrian Willaert, father of the madrigal, born. Introduction of double choruses in antiphonal form.
1514 Palestrina born.
1520 Orlando di Lasso, last of the Netherlands school, born.
1524 The first Lutheran hymn book published.
1544 Cyprian di Rore's "Chromatic Madrigals" published.
1555 Palestrina's first masses published.
1563-1570 Lasso's celebrated penitential psalms composed.
1594 Performance of Jacopo Peri's "Daphne," the first opera at the Palazzo Corsi, Florence.
1600 Cavaliere's oratorio, "L'Anima è Corpo," produced.
1600 Production of Peri's "Euridice" at the marriage of Henry IV. and Maria de Medici in Florence.
1607 Monteverde's "Orfeo" produced at Mantua.
1608 Production of Monteverde's "Arianna."
1627 Opera introduced in Germany by Schütz.
1637 Opening in Venice of the Teatra San Cassiano, the first opera-house, with Manelli's "Andromeda."
1659 Alessandro Scarlatti, founder of the Neapolitan school, born.
1672 Sebastiani's passion music published.
1685 Johann Sebastian Bach and Händel born.
1710 The pianoforte invented by Cristofori.
1714 Gluck born.
1718 Händel makes England his home.
1724 Bach's "St. John's Passion" produced.
1731 Händel's first English oratorio, "Esther," produced.
1732 Joseph Haydn, father of the symphony, born.
1742 April 18, at Dublin, "The Messiah" first performed.
1749 March 23, "The Messiah" produced in London.
1756 Wolfgang Amadeus Mozart born.
1770 Beethoven born. Mozart's "Mithridate" produced.
1786 Weber born.
1791 Cherubini's "Lodoiska" produced.
1791 Meyerbeer born.
1792 Rossini born.
1795 Beethoven's Opus I. published.
1797 Schubert born.
1798 Donizetti born.
1799 Haydn's "Creation" produced at Vienna.
1802 Bellini born.
1803 Berlioz born.
1809 Mendelssohn and Chopin born.
1810 Schumann born.
1811 Liszt born.
1813 Rossini's "Tancred" produced.
1813 Richard Wagner born.
1813 Giuseppe Verdi born.
1818 Gounod born.
1821 Schubert's "Erl-King" first sung in public.
1829 Rossini's "William Tell" produced.
1831 Bellini's "La Sonnambula" produced.
1842 Wagner's "Rienzi" produced.
1845 Wagner's "Tannhäuser" produced.
1846 Mendelssohn's "Elijah" produced at the Birmingham Festival.
1849 Schumann's "Faust" produced.
1850 Wagner's "Lohengrin" produced.
1851 Verdi's "Rigoletto" produced.
1859 Gounod's "Faust" produced.
1864 Richard Strauss born.
1868 Wagner's "Die Meistersinger" produced.
1876 Wagner's "Der Ring des Nibelungen" produced.
1887 Verdi's "Otello" produced.
1900 Elgar's "Dream of Gerontius" produced.

Newspapers and Periodicals.—There is little doubt that in the field of educational extension outside of organized institutions the first place must be given to the newspaper. Dr. W. T. Harris in an address said: "Far surpassing our libraries in educative influences are our own daily newspapers and magazines. Our people are more freely supplied with newspapers than are the people of any other nation. We are governed by public opinion, as ascertained and expressed in the newspapers to such an extent that our civilization is justly to be called a newspaper civilization." The newspaper, like all our great social and institutional growths, began in colonial times. It is older than the public library but younger than the public school. The first regularly printed newspaper appeared in England in 1622, the first daily paper in 1702. In the United States the first newspaper was issued at Boston in 1690. It was of quarto size, comprising four pages, one of which was blank, and the only copy known to be in existence is in the state paper office in London. The Boston *News Letter*, edited by the postmaster, John Campbell, appeared on the 24th of April, 1704. It was printed on a half sheet 8 inches by 12 inches and was issued weekly until 1776. In 1719, the Boston *Gazette* and the *American Weekly Mercury* of Philadelphia were issued. The *New England Courant* (1721), the *Weekly Rehearsal*, the *Weekly Post Boy* (1734), and the *Independent Advertiser* (1748) were all printed in Boston. Benjamin Franklin bought the *Pennsylvania Gazette* in 1729 and published it for 30 years. The *Rhode Island Gazette* was started in Newport in 1732, the *Maryland Gazette* at Annapolis in 1728, and the *South Carolina Gazette* at Charleston in 1731. These were all weekly papers, the first daily being the *Pennsylvania Packet*, afterward called the *Daily Advertiser*, established in Philadelphia in 1784.

The earlier papers were ordinarily printed on a half sheet, folded either once or twice, though with no uniformity in this respect. When there was a press of news, a whole sheet was used. Although advertisements were inserted they were not frequent. One appeared in the first issue of the *News Letter* and two in the second.

While throughout the United States in 1750 there were only thirteen newspapers published, and nearly all of them in Massachusetts, there were, in 1910, 22,730 newspapers, of which New York published 1,988; Illinois, 1,792; Pennsylvania, 1,402; Ohio, 1,145; while Delaware published only 34; Alaska has 27, the fewest in the country.

Magazines.—The first successful magazine published in America was the *American Magazine and Historical Chronicle* at Boston in 1743, which lasted more than three years and appeared monthly, its first number containing 50 pages. It was followed in 1758 by the *New England Magazine of Knowledge and of Pleasure* containing 60 pages, which lasted only four months.

Between 1750 and 1775, six attempts to found a magazine failed in Philadelphia; but Robert Aiken in 1775 secured contributions from Thomas Paine to the *Pennsylvania Magazine* and was able to secure a foothold, but even with so popular and able a contributor was unable to carry the enterprise through the stormy days of the Revolution. The number of magazines published before the Revolution was sixteen. Between 1783 and 1800, forty others appeared. The first magazine to appear in the nineteenth century was the *Portfolio*, published by Dennie in Philadelphia between the years 1804 and 1825.

In the year 1815 was issued at Boston what is to the present generation the first substantial contribution to magazine publication, *The North American Review*, which appeared as a quarterly. It was removed to New York, where it appeared as a monthly, after 1819. It was founded by Tudor, and among its brilliant editors are the names of Channing, Dana, Everett, Sparks, A. H. Everett, Palfrey, Bowen, Peabody, Lowell, Norton, Henry Adams, and A. T. Rice.

The *Atlantic Monthly*, issued at Boston in 1857, was first edited by James Russell Lowell. James T. Fields, William D. Howells, Thomas Bailey Aldrich, and Bliss Perry were his successors. Such men as Longfellow, Holmes, Emerson, Whittier, and nearly every man of prominence have contributed to the high standard of literary excellence which it has since maintained.

Harper's Mgazine was established in 1850 and is noted as being the first of such publications to make illustrations a feature of its regular issues. *Scribner's Magazine* appeared in 1871, and upon the death of its first editor, Dr. J. G. Holland, in 1881, its name was changed to that of the *Century*, by which it is still known.

It is impossible to follow even by the mere mention of names the magazines which have since appeared in this country.

The field which the magazine occupies as an educational force is, probably, second only to that of the newspaper, for, apart from those whose table of contents presents nearly every feature in the field of culture, there is a great number of purely technical magazines which strive to keep pace with the application of science and scientific methods in the great field of commerce and economics. One of the oldest of these is the *American Journal of Science*, first issued in 1818 at New Haven, Conn. Later publications were the *Scientific American*, a weekly first published in 1846, the *American Naturalist* (1867), *Appleton's Popular Science Monthly* (1872) and *Science* (1883).

Learned Societies and Associations.—Generally speaking, learned societies and associations are voluntary in organization and administration, with the single possible exception in the United States of the National Academy of Science, established by act of Congress in 1865 with its home in Washington. It acts, to a certain degree, as a scientific advisory council of Congress. These organizations may be classified into six groups:—

First; General scientific societies, which include such as the American Academy of Arts and Sciences at Boston (1780), Connecticut Academy of Arts and Sciences (1799), the New York Academy of Sciences (1817), Brooklyn Academy of Arts and Sciences (1823), the Albany Institute (1824), the Maryland Academy of Science (1826), the Delaware County Institute of Science (1833), the Essex Institute at Salem (1848), and the American Association for the Advancement of Science, which is the largest and most influential society of this class in the United States.

Second: The historical societies, of which the Massachusetts Historical Association is the oldest and the forerunner of a list of about 50 similar institutions throughout the country, whose object is the preservation of historical records and the promotion of historical research in their respective localities. Notable amongst them is the Historical Society of New York (1804) and the American Jewish Historical Society (1902). One society in this class, the American Historical Association, which originated as late as 1884, the only national historical society in the country, has its headquarters at Washington. Allied to these are the American Antiquarian Society of Worcester, Mass. (1812), the American Geographical Society of New York (1852), and the National Geographic Society of Washington, D. C.

Third: Societies concerned with special branches of science, biology, and natural history, the oldest of which is the Academy of Natural Science of Philadelphia (1812).

Fourth: Learned societies which have for their object the study of a single special subject. These are numerous, and in addition to those following individual scientific subjects, include a great part of literary societies.

Fifth: Societies and associations relating to professions, such as medicine dentistry, law, engineering, fine arts, and architecture.

Sixth: Teachers' associations. The foremost among these is the great national society of teachers, the National Education Association, which begun under another name in 1857 and was organized in Philadelphia, but took its present name in 1870 at Cleveland. In its earlier days all matters relating to education in all of its departments were discussed at meetings of the entire association; but upon its organization under its new name it was divided into several departments, which now number 18, and subjects pertaining to these were discussed simultaneously in each department. It is composed of annual members, who pay a fee of $2 each; of life members, $20; of life directors, $100; and perpetual directorships, with privileges enjoyed by boards of education on payment of $100. Its meetings are held annually and its constitution is splendidly adapted to the administration of so large an organization comprising so many different interests.

One of the most notable features regarding this society was the appointment at Saratoga in 1892 of the special Committee of Ten to consider and to pass upon the course of study in secondary schools. It appointed nine subcommittees of experts, each of ten members, the same being one subcommittee for each branch of study in the secondary school. Their voluminous report of 250 pages upon the subject has proved a valuable contribution to the organization of secondary schools.

A Committee of Fifteen was appointed in 1893 to consider elementary education, and its work was equally valuable. In 1895 a Committee of Twelve on Rural Schools, a Committee on College Entrance Requirements, and a Committee on Normal Schools were appointed, and in 1898 a Committee on the Relations of Public Libraries to Public Schools; these committees contributed reports at the Los Angeles meeting of 1899, which reflect the expert opinion of the foremost educators of the country upon these subjects. Copies of these reports were widely circulated.

The meetings of the association are attended by over 50,000 educators, and its report upon educational matters is considered to be the best record of educational progress and of the science and art of pedagogy.

Similar work, though in a smaller field, is being done in the southern states by the Southern Educational Association, organized in 1890.

LIBRARIES.

The free public library, supported by taxation and used by the people, contributes largely to both culture and scholarship among the masses. The great value lies in its power to continue the education of those who for economic reasons cannot long enjoy school advantages.

Collections of books, called libraries, and accessible to only a few, have existed in nearly all countries from a very early date, either as private property or as part of a college or university. The institution known as a free circulating library is a product of the last half of the nineteenth century. The claim is made and with evident justice, that the first free public library in the United States, if not in the world, was that of Peterborough, New Hampshire, for the support of which the town in 1833 voted the proceeds from the general taxation of banks. This money was used to purchase books to be circulated free among the people of that town. Libraries were established for the use of the people in connection with district schools in New York state in 1835; but these were not successful on account of the small-sized units for which they were provided. But the idea led to the passing of laws to establish free public libraries in towns. The first law of this kind was passed by New Hampshire in 1849. Similar permissive laws have been passed in nearly all of the states; and many special grants of money have furthered the purpose. In consequence of this attitude many libraries have been established in towns and their efficiency has been greatly promoted. There is a public library in all but one of the towns in Massachusetts. By arrangement with an adjoining large town books are received each week, for which the small town makes an appropriation.

One of the greatest advances in library extension has been the establishment of open shelves accessible to all patrons. The difficulty of getting books to the people has been largely overcome by the establishment of traveling libraries, branch libraries, delivery stations, and deposit stations. Much has been done for library extension by the gifts from private citizens. Chief among American benefactors is Mr. Andrew Carnegie, whose great work may be summed up in the statement that he has by his gifts endowed over 2,100 libraries with more than $54,000,000.

The library of Harvard College was without doubt the first in our land to be used by more than a single family. Franklin in his autobiography tells of the origin of the American Philosophical Society and its library in 1732. Notable among the others privately established was the Redwood Library of Newport, Rhode Island, founded in 1747. The promoters of these subscription libraries evidently considered that the books were to be hoarded rather than used, so strict were the regulations enforced.

Ancient Libraries.—While the ancient Egyptians are known to have made collections of their writings, no remains of their libraries have been found, though carved inscriptions persist in abundance. In ancient Babylonia libraries consisting of clay tablets inscribed with cuneiform characters were commonly preserved in their temples; and some of these, such as the recently discovered collection in the Temple of Bel, in Nippur, which was destroyed in 1782 B. C., have persisted to the present day. The ancient Greeks maintained private collections of writings, and, according to Pliny, the first Roman public library was established in 39; but the Ulpian library established by Trajan surpassed all others. The most famous of all ancient collections was the Alexandrine library, which was founded about 300 B. C. by Ptolemy Soter, and which contained about 700,000 manuscript rolls at the time of Cæsar's visit (43 B. C.).

EARLY CHRISTIAN LIBRARIES were founded by Alexander, the Bishop, about 250, and by St. Jerome, St. Augustine, and St. Pamphilus. Constantine founded a library at Constantinople in 336, which became large and famous. The Crusaders caused its partial destruction, which was made complete by the Moslem conquest.

MEDIAEVAL LIBRARIES.—Throughout the Middle Ages, collections of books were preserved in monasteries, particularly those of the Benedictines. Many noted libraries had their origin in these collections. England is indebted to the Benedictines for her first library at Canterbury, which dates from 596, also for St. Peter's at York, St. Cuthbert's at Durham, those at Bury St. Edmunds, St. Albans, and others.

RENAISSANCE LIBRARIES.—The revival of learning following the dispersion of Greek scholars throughout Europe after the fall of Constantinople, and the invention of printing, created a new era in the history of libraries. While noted libraries such as Palencia, Spain (1212), Salamanca (1220), the University of Oxford (about 1230), the University of Prague (1348), and Heidelberg (1386), were founded previous to 1500, the great libraries of modern times have been established and developed since that date.

MODERN LIBRARIES.—Although libraries have steadily increased since the dissemination of printed books, their greatest development has taken place during the last century. The National Library, Paris, now the most extensive in the world, contained only 250,000 volumes in 1800. The British Museum Library ranks second, yet as late as 1837 its collections numbered only 250,000 printed books. The Imperial Library, St. Petersburg, which stands third, dates its great growth from 1795. The Library of Congress, ranking fourth, founded in 1800, was reduced by fire to only 20,000 volumes in 1851.

Great libraries have been developed in connection with leading universities,—notably those of Oxford and Cambridge in England, Paris, Vienna, Strassburg, Leipzig, Göttingen, Munich, Tübingen, and Heidelberg on the continent, and Harvard, Yale, Chicago, and Columbia in the United States, each of which contains more than 400,000 volumes. Among city libraries that of Boston (1852) has been one of the most noted and successful, ranking among the first ten libraries of the world, and, since 1895, the new Public Library of New York, formed by the consolidation of older libraries, has risen to foremost rank.

LEADING FOREIGN LIBRARIES

Founded	City and Country	Library	Volumes (Minerva 1913)
1902	Aarhuus, Denmark	City	200,000
1754	Amsterdam, Netherlands	University	600,000
1837	Athens, Greece	University	314,000

MUSEUMS.

History.—A museum was originally a place sacred to the Muses, but later the name was used to designate institutions for the study of art or philosophy, the earliest being the celebrated museum of Ptolemy Soter at Alexandria. The use of the name to denote institutions preserving and exhibiting works of art and specimens of natural history is modern as are the institutions themselves. Some maintain that the modern museum has been evolved from the ancient custom of placing votive offerings in temples, and from the mediæval method of preserving sacred and historical objects in monasteries and churches. In this connection it is interesting to note that the ancient navigator Hanno, upon returning from a long voyage, presented skins of animals now supposed to have been gorillas to the Temple of Astarte in Carthage where they remained until the Romans destroyed the city.

Museums were first formed by rulers and by the rich, usually without system or purpose, chiefly to gratify curiosity. At a much later period scientific men began to form collections for study, and from combinations of these have arisen most of the great modern museums.

Art Museums date from the fourteenth century in Italy, where the collections of Cosimo de' Medici in later years grew into the celebrated treasures of the Uffizi Gallery, the Pitti Palace, and the National Museum at Florence. The vast art wealth of the Vatican in Rome had its beginnings in the collections made by Pope Julius II. (1503-1513). Between 1553 and 1586 collections were established in the Zwinger at Dresden, resulting later in the foundation of the Dresden Museum (1711-1722).

The transformation of the old feudal castle of the Louvre at Paris into a modern palace began in 1546, and its slowly completed galleries became repositories of the royal treasures of art, which, in 1710, contained over 2,400 paintings. In 1793 the National Museum was opened at Louvre, composed very largely of these royal collections, and in 1818 the National Museum of the Luxembourg, whose foundation dates from 1750, was reorganized and devoted to contemporary art. The Hermitage Gallery in the Winter Palace at St. Petersburg was built during the reign of Catherine II. (1765-1796). The National Gallery in London, which had its beginnings in collections made about 1820, was opened in 1838. Other noted museums were established at this time. At Munich the Glyptothek was founded in 1830 and the Pinacothek was completed in 1836. At Berlin the Royal Museum was organized in 1830, and the City Museum of Leipzig dates from the same year.

In the United States, the Philadelphia Academy of Fine Arts, founded in 1805, was the first institution to maintain a gallery and a school of instruction—all of the large museums of art being established during the last three decades of the nineteenth century: Boston and New York in 1870, Chicago in 1879, Cincinnati in 1881, the Corcoran Gallery in Washington in 1894, and the Carnegie Museum in Pittsburg in 1896.

Natural History Museums are, on the whole, a much later development, though some cabinets of natural objects were of early foundation; those of the Zwinger in Dresden, dating from 1553 to 1582, became organized about 1720 as the Dresden Museum, which is now one of the finest in Europe. The famous Jardin des Plantes in Paris, founded in 1626, early contained zoölogical collections which have since been developed into the most noteworthy natural science museum in France. In 1667 Elias Ashmole began the collections which in time became the Ashmolean Museum at Oxford, while the British Museum was founded in 1753 upon the collections of Sir Hans Sloane. For a full century these grew slowly, being little known to the public, and comparatively few others were established. However, during the last 60 years since museums have become inspirational in function, in addition to their primitive use for investigation and instruction, general interest in them has increased amazingly, and in England and America in particular, great national expositions or world's fairs have been factors of notable importance in establishing new ones. The Victoria and Albert Museum at South Kensington, London, was the direct outcome of the World's Fair of 1851, and a similar result followed the Glasgow Exposition.

In the United States, the earliest noteworthy endeavor to found a general museum was that of C. W. Peale, who opened the Philadelphia Museum in 1785, followed by similar attempts in other cities, none of which was permanent. In 1808 Silliman procured a cabinet of minerals for Yale College, an acquisition unique in its time and the forerunner of the magnificent collections now in possession of the great universities. The State Cabinet of specimens illustrating geology, botany, and entomology at Albany dates from 1836. The Smithsonian Institution became the repository of government collections in 1846. The now world-famous Museum of Comparative Zoölogy at Cambridge was established in 1859, largely through the efforts of Louis Agassiz. The American Museum of Natural History, New York, was organized in 1869, and as a result of the interest aroused by the Centennial Exhibition, the National Museum was founded at Washington in 1876. The Field Columbian Museum of Chicago, established in 1893, owes its origin to the World's Columbian Exposition of that year, and at the close of the "Midwinter Exposition" in 1894, a similar institution was organized in Golden Gate Park, San Francisco. The Carnegie Institution at Pittsburg, containing a museum, was completed in 1895. Since 1870 many states, cities, universities, colleges, and natural history societies have founded museums, and, while not so numerous as libraries, they are considered necessary adjuncts of every well equipped college or university, and every section of the country now possesses museums of more or less importance.

Number of Museums.—In Germany, which possesses nearly 500 museums, about 150 are devoted to natural history. In France the natural history museums number about 300, and in England there are 250. Of the list of some 250 natural history museums, as compared to about 8,000 libraries in the United States, 175 belong to schools and universities, 30 are maintained by learned societies, 30 are state museums, and 15 are supported by municipal and privately contributed funds. New York leads, with over 30 natural history museums; Pennsylvania follows, with about 20; Massachusetts has 17; Illinois, 15; Ohio, 14; and California, 10.

Character and Educational Value.—The scope of modern museums has been expanded far beyond the restricted groups of art and natural history objects of the early cabinets. Museums of art, besides painting and sculpture, now include antiquities, ceramics, glasses, porcelains, gems, fabrics, metal work, and numerous other collections. The modern natural history museums embrace a vast range of systematized material—palaeontological, geological, mineralogical, archaeological, ethnological, and anthropological, in addition to the zoölogical and botanical collections of the early museums. Besides there are also historical, military, clerical, technological, commercial, and educational museums. While the natural science and other collections of colleges, universities, and learned societies are chiefly utilized by students for instruction and investigation, and are made use of only to a limited degree in public education, museums in some of the larger cities have contributed extensively to public instruction, notably through popular lectures, traveling and loan exhibits, journals, bulletins, and in various other ways. The National Museum at Washington gives instructive special exhibits of remains of prehistoric culture, aboriginal modes of life, and the arts, industries, and occupations of various native and foreign races, and also loans duplicate collections for exhibition elsewhere. At the American Museum of Natural History of New York City much emphasis is laid upon educational extension, which is promoted by free public lectures on travel, natural science, and geography, and special Saturday lectures are given for the benefit of teachers, who are also granted the use of large series of lantern slides and other materials for use in giving lectures to their own students. Prepared sets of birds, insects, and other animals are loaned to schools, and lecture materials are distributed through the Department of Public Instruction. The Field Columbian Museum gives a series of popular lectures each year and publishes many scientific contributions. These, and similar forms of educational extension, are being everywhere rapidly developed, and are factors of increasing importance in public instruction. Technological museums display raw materials of use in the industrial arts and the several stages during manufacture. Commercial museums advance the interests of trade by exhibits of products, raw and finished, and supply data on prices, costs, and the needs of other countries.

CHRISTIANITY.

The Christian religion shares with all religions the recognition of man's dependence upon God. The essential point of distinction between it and all other religions is its provision for salvation through a Saviour sent direct from God, in the person of Jesus Christ. Upon this it bases its conception that it is the only true religion. It regards Judaism as of divine ordination but only preparatory to the coming of Christ, and hence imperfect. It holds that heathenism is debased, and that if any heathen be saved it must come about through the conscious or accidental adoption of means which God has prescribed, and by the complete atonement by Christ. Without this, and faith, and the essential elements of the Gospel, Christianity holds that there can be no salvation.

The history of the growth of the Christian Church is largely a history of its external organization, by which the visible and the invisible Church were connected. The sacerdotal institution was adopted from Judaism, consolidated by Saint Augustine, and culminated in the Papacy; so that membership in the Church and an acknowledgment of the hierarchy became essentials to salvation,—a view which many of the Anglican community recognize. But other Protestant denominations have insisted that the invisible Church is to be emphasized, and have done so to such an extent that almost any form of Church government or organization is recognized by them as being efficient.

The Ancient Church.—The period between the day of Pentecost, in the year 30, to the end of 800 is recognized as the period of the ancient church. It is remarkable for:—

(1) The rapid growth of the early church,
(2) The production of the literature of the New Testament,
(3) The organization of extensive missionary work, and
(4) The increasing opposition of the Jews.

To these are to be added the opposition of the Roman emperors, especially Nero, Domitian, Trajan, Hadrian, Antoninus Pius, and Marcus Aurelius. Grave heresies arose prior to the third century and the establishment of the canon of the New Testament and the writings of the early fathers met these conditions. In the third century, also, missionaries carried the Christian religion to western Europe and eastward to Armenia, Persia, and India. Roman emperors gave the Christians scant acknowledgment during the reigns of Septimius Severus, Caracalla, Heliogabalus, and Alexander Severus; while active persecution occurred in the reigns of Decius (250) and Diocletian (284-305). There was little tolerance or safety until the Edict of Galerius (311) and the Edict of Milan by Constantine (313). When, in 323, Constantine conquered Licinius, the Christian religion was the strongest in the world and became the religion of the Roman Empire.

During the fourth and fifth centuries there were numerous controversies, notably the Arian, demolished at Constantinople (381); the Origenistic (394-407;) the Apollinarian, ended in 381; the Nestorian, rejected at Ephesus in 431; the Eutychian (451); the Monophysite (553); the Monothelitic (680); and the long struggle between Augustine and Pelagius. Within the organization of the Church the most noticeable events were those which set the clergy apart from the laity and clearly marked the difference. For a time in the East, the rise and predominance of Mohammedanism retarded the growth of the Church there. So strongly organized had the Church become in the West that Charlemagne in 800 assumed the crown of the Holy Roman Empire as a vassal of the Bishop of Rome.

The Mediaeval Church.—The breach between the Eastern and Western branches of the Church, which had been growing for many years, culminated in 1054. Many monastic orders with common vows of chastity, poverty, and obedience, arose after the close of the tenth century; and nearly all were founded upon the plan of the Brotherhood of St. Benedict formed five centuries earlier. About the end of the eleventh century the Crusades began. Scholasticism, which sought to reduce the whole religious system to the basis of logic; and mysticism, which investigated and developed doctrines without too close reasoning, played great parts in the development of the Church at this time. Heretical and schismatic movements began among the Paulitians, Cathari, Albigenses, Waldensians, and others, which some historians regard as the first stirring of individual liberty. These were followed by the outbreak of Wiclif in England, and of Huss in Bohemia; and so general did these and similar movements become that the harshest measures for their repression were adopted.

The Modern Church (1500 to the present day).—Many and widely different influences had for some years been preparing the way for the Reformation, as Protestants universally designate their secession from the Roman Catholic Church. It is hard to specify when and where the movement began, or which of the heretical movements previously mentioned contributed most to its advance. But the German movement assumed such a conspicuous and eventful character that it is customary to say that the Reformation began upon the day when Luther fastened to the church door at Wittenberg his 95 objections or theses (All Saints' Eve, October 31, 1517). Calvin urged on the movement in Switzerland and Knox in Scotland. It may be said in general terms that the reformation movement was shared in by the Teutonic races while the Latin peoples retained their allegiance to the Church.

Within the Church there followed a period, known as the counter-reformation, during which the abuses to which she herself had drawn attention were corrected and her continuity with the ancient order was declared unimpaired by the Council of Trent (1545-1563). The Protestant body very soon developed two strongly divergent forces, the Lutheran, or adherents to Luther; and the Reformed, or followers of Calvin. This division increased, and subdivisions into a multiplicity of sects occurred as a logical sequence of the avowal of the authority of Scriptures and of justification by faith. From this division has resulted a renewal of the missionary spirit, which is one of the most marked characteristics of the Modern Church period. This aggressive missionary work has been followed up by Christians of all denominations, and has given to the

world, on the one hand, the self-denying Loyola, Xavier, and others, and, on the other hand, the great pioneer missionary force working throughout the nineteenth century in all lands among the heathen.

The period of the present day in the Christian world is marked by a movement called by some the rationalistic, which seeks to conduct a searching examination into traditions and assumptions, with the aid of the recent archæological and other knowledge along scientific lines. There is in no sense what was at one time within recent years feared by many—a conflict between science and religion. For the Church regards science as the handmaiden of all branches of knowledge, and calmly and confidently awaits the outcome of the most rigid investigations, ready to receive her contributions to the eternal truth.

Innocent XI	1676-1689
Alexander VIII	1689-1691
Innocent XII	1691-1700
Clement XI	1700-1721
Innocent XIII	1721-1724
Benedict XIII	1724-1730
Clement XII	1730-1740
Benedict XIV	1740-1758
Clement XIII	1758-1769
Clement XIV	1769-1774
Pius VI	1775-1799
Pius VII	1800-1823
Leo XII	1823-1829
Pius VIII	1829-1830
Gregory XVI	1831-1846
Pius IX	1846-1878
Leo XIII	1878-1903
Pius X	1903-1914
Benedict XV	1914–1922
Pius XI	1922–

The title of pope, formerly given to all bishops, was first adopted by Hyginus in 139. At the time of the councils of Nicæa (325) and Antioch (341) the Bishop of Rome was regarded as metropolitan, and before the end of the seventh century the supremacy of Rome was acknowledged throughout the West. The Church of Rome meanwhile continued to increase its temporal dominion, the power of the papacy reaching its zenith in the time of Innocent III. (1198-1216). During the "Babylonian Captivity" (1309-1376) the popes lived at Avignon, and with England and Germany alienated, their power began to wane. The Great Schism still further discredited the papacy. The temporal power of the popes came to an end in 1870 with the occupation of Rome by Victor Emmanuel.

A pope is ordinarily elected by *scrutiny*. Each cardinal in conclave writes on a ticket both his own name and that of another cardinal. These tickets, folded and sealed, are placed in a chalice, from which they are taken by scrutators nominated *ad hoc* from the electing body. A cardinal who receives two thirds of the entire votes is declared elected.

The Roman Pontiff has for advisors and coadjutors the Sacred College of Cardinals, consisting, when complete, of 70 members, viz.: 6 cardinal bishops, 50 cardinal priests, and 14 cardinal deacons. It rarely, however, comprises the full number. In April, 1909, it consisted of 6 cardinal bishops, 42 cardinal priests, and 5 cardinal deacons. Though primarily drawn from the vicinity of Rome, the cardinals are now Princes of the Church at large, and are selected from every Christian nation. The cardinals constitute the papal senate or council and the various Sacred Congregations; they govern the Church while the papal see is vacant, and elect the new pope. They received the distinction of the red hat under Innocent IV., and the title of Eminence from Urban VIII. in 1630.

ADVENTISTS. Those who believe that Christ will, on his second coming, establish a personal reign upon the earth. The Adventists in the United States were founded by William Miller (1782-1849), who began lecturing on the millennium in 1831, and fixed the date at various times from 1843 to 1861. His followers were known as Millerites. The largest group of Adventists are the Seventh-Day Adventists, who observe the seventh day as Sabbath and believe in the fulfillment of Bible prophecies; the Advent Christians believe, as do the Seventh-Day Adventists, in the annihilation of the wicked; the Evangelical Adventists reject the annihilation doctrine. Other smaller groups are the Church of God, Life and Advent Union, and Churches of God in Jesus Christ.

ALBIGENSES. In the twelfth and thirteenth centuries several heretical sects of anti-sacerdotal Christians existed in the south of France. They were very numerous at Albi, in Languedoc, where they were most vigorously persecuted in a series of wars of extermination, the bloodiest in history. Pope Innocent III., in 1208, directed against them a crusade led by Arnold of Citeaux and Simon de Montfort. By the end of the thirteenth century they had lost their identity as sects.

ANTIBURGHERS. A division of the Scotch Secession church (1747), who refused to regard the burgesses' oath as compatible with their religion. Reunited with the Burghers in 1820.

BAPTISTS. A Christian denomination which holds that baptism must be preceded by a personal confession of faith, and, hence, rejects the principle of infant baptism. Baptists are generally, but not always, believers in baptism by immersion. While in some form this belief is of great age, as a separate denomination, the Baptists date from the time of the Reformation; their opponents have given them the name of Anabaptists. Roger Williams (1600-1684), originally a minister of the Church of England, founded (1639) the first Baptist church in America. Baptists are sometimes called Calvinist Baptists; Freewill Baptists practise open communionism; German Baptists are popularly known as Dunkers; Old-School, Anti-Mission, or Hard-Shell Baptists are extreme Calvinists; Seventh-Day Baptists keep the seventh instead of the first day as Sabbath; Disciples of Christ or Christians; Six-Principle Baptists, and Christians or the Christian Connection are other divisions. Those who hold that baptism by immersion is necessary for communion are called close-communionists as opposed to the open-communionists.

BROTHERHOOD OF ST. ANDREW. A men's society within the Protestant Episcopal Church whose members are united for the purpose of spreading the kingdom of Christ, among young men especially. It was founded in Chicago in 1883, and in 1909 numbers 15,000 members, or 1,300 active chapters, in the United States, while Canada has 400 chapters of 3,800 members. It is a world-wide movement, with societies wherever its missionaries have been established in many remote places.

CHRISTIAN ENDEAVOR, YOUNG PEOPLE'S SOCIETY OF. A religious society organized in Williston Church, Portland, Me., by Rev. Francis E. Clark, D.D., LL.D., in 1881. Dr. Clark has been continuously associated with the movement since its inception. Each society is a part of some local church, and exists to make the young people loyal and efficient members of the churches of all of the great evangelical denominations. There are (1909) 69,256 societies, numbering 3,462,800 members, chiefly in the United States and Canada, but also extending to other and to missionary countries.

CHRISTIAN SCIENCE. A religious system formulated by Mrs. Mary Baker G. Eddy (1822-1910), who began to teach its principles at Lynn, Mass., in 1867; founded the First Church of Christ Scientist in Boston, Mass., 1879, which was enlarged to accommodate 8,000 people and rededicated in June, 1906; ordained pastor (1881); founded the Massachusetts Metaphysical College (chartered 1881). The principles of the system are elaborated in her works: *Science and Health, with Key to the Scriptures* (1875), which is the Christian Science text-book; *Unity of Good, Retrospection and Introspection*, and *Manual of the Mother Church*. The fundamental belief consists in acknowledgment and adoration of one Supreme God; in the inspiration of the Scriptures; in the divinity of Christ; in the supremacy of God as a spirit; in prayer without ceasing; in all the essentials of Christian belief; and the claim that the chief work of Christian Science is to destroy all evil, which will eventually pass away, and to reform mankind. Christian Science is regarded by its members as the triumph of Truth over all error, sin, sickness, and death.

CONGREGATIONALISTS. A denomination of Christians who hold that church government is to be vested in the associated brotherhood of each local church as an independent body, and acknowledge the evangelical or orthodox doctrines, infant baptism, and baptism by sprinkling. The Congregationalists are identical with the Independents of England. The origin of the body dates to the reign of Elizabeth, and its principles found an ardent advocate in Robert Browne in 1580. Congregationalism exerted a peculiar influence upon the development of the New England colonies, which were founded by members of this church.

DISCIPLES OF CHRIST or CHRISTIANS. A religious body working towards a return in faith and life to the Christianity of the New Testament. It is distinctively American in its origin, and it was evolved by teachers among religious denominations simultaneously pleading for the Bible alone, without additions of creed or formulas, and for the union of all Christians upon the basis of the Apostles' teaching. It is steadily increasing in numbers and importance.

DUTCH REFORMED CHURCH. This body arose out of a union of the Dutch churches in America, begun in 1770 and completed in 1812. Elders and deacons, chosen for two years, form a controlling consistory in which the elders work with the pastor, while the deacons control the alms. The Great Consistory is composed of former elders and deacons, and its office is advisory. In theological belief the church is Calvinistic; in worship the service is liturgical. The True Reformed Dutch Church was constituted in 1822 by secession from the Dutch Reformed Church in America.

EPISCOPAL CHURCH, PROTESTANT. The Church of England as transplanted in the United States follows the doctrines of apostolic creeds and principles of the primitive church. From 1607 until the War of Independence the Episcopal clergy in America were under the control of the Bishop of London. Rev. Samuel Seabury (1729-1796) was consecrated in Scotland the Bishop of Connecticut and was the first Protestant Episcopal bishop in America (1784). The General Convention is the national association of all the Protestant Episcopal churches in America and meets triennially.

EPWORTH LEAGUE. A society in connection with the Methodist Episcopal Church, organized at Cleveland, Ohio, in 1889, and named after the birthplace of John Wesley. Its object is to bind the young people closely to the church. It is probably the largest denominational society of young people in the world. The League of the Methodist Episcopal Church, South, was organized early in 1891.

FRIENDS or QUAKERS. A society of Christians which originated in England in the middle of the seventeenth century through the teachings of George Fox (1624-1691). They rely on the immediate teaching and guidance of the Holy Spirit; have no paid ministry; reject the outward observance of such church rites as baptism and the Lord's Supper, which they believe is partaken of spiritually; have no liturgy, and often conduct their meetings in silence. The well-known peculiarities of speech and dress are rapidly disappearing, though their hatred of war and objection to oath-taking are as strong as ever. In 1827, by a division in the Society of Friends, an order was founded by Elias Hicks (1748-1830) and known

as the Hicksites. These observe the usages of the Friends, but in doctrinal points more nearly approach the Unitarians.

GERMAN REFORMED CHURCH. A body erected among the German colonies in America. Its first synod was formed in 1747. Church government is Presbyterian in form; theology is moderately Calvinistic; and the service is optionally liturgical.

GREEK CHURCH. A body which follows the foundation of Christianity to the end of the seventh general council of the church in 787, known as the second Nicene Council. There the members refused to recognize the authority of Rome, and separated in 1054. Its rise was contemporaneous with and dependent upon the eminence which the Byzantine empire attained. Its title is "the Holy Orthodox Catholic and Apostolic Oriental Church," and comprises the church in the Ottoman empire, governed from Constantinople; the church in Greece; and the Russo-Greek Church. It is known also as the Eastern Church. The church is governed by the patriarchs of Constantinople, Alexandria, Antioch, and Jerusalem, and by the Russian Holy Governing Synod.

LUTHERANS. The Lutheran Church, the State Church of Germany and three Scandinavian countries, was established by Martin Luther in the sixteenth century. He called it the Evangelical Church; the term Lutheran was originally one of reproach. The nine dogmas of the church are contained in the Apostle's Creed, Nicene Creed, Athanasian Creed, Augsburg Confession (1530), Apology for the Augsburg Confession (1530), the Schmalkald Articles (1537), Catechisms of Luther (1529), and the formula of Concord (1577).

LUTHER LEAGUE OF AMERICA. A Lutheran organization of 100,000 members united for the promotion of activity in and loyalty towards the church. The first national convention was held at Pittsburg, Pa., in 1895. The first local organization occurred at New York City in 1888.

METHODISTS. The most important divisions are the Wesleyans of England and the Methodist Episcopal Church of the United States. They are evangelical and Arminian; have, generally, no liturgy; each church is organized into classes under class-leaders; churches are grouped in circuits under a district superintendent; in American churches bishops have general supervision of the whole church. The denomination was founded by John Wesley (1703-1791), and the name Methodist was first given to Wesley and his associates by fellow students at Oxford.

MORAVIANS. This Christian denomination, known also as the United Brethren, claims its descent from John Huss (1369-1415). They suffered much persecution and expulsion in early times, but are now established in the three home provinces of Great Britain, Germany, and America. Each of these are governed by a synod; and a general synod of the three meets every ten years at Herrnhut, Saxony. They are especially noted for their zealous missionary work.

MORMONS, THE, or CHURCH OF JESUS CHRIST OF LATTER DAY SAINTS. A religious sect organized at Fayette, N. Y., in 1830, by Joseph Smith, who maintained he had received a divine revelation for the upbuilding of the Kingdom of God, and that an angel had delivered to him an ancient record engraved on plates of gold, which he translated and published as the Book of Mormon. This volume is regarded as equal in authority with the Jewish and Christian Scriptures but not superseding or supplanting them. A temple was built at Kirtland, O., in 1831, and other branches were established, but owing to opposition a general westward movement took place in 1838. Most of the people located in Illinois, where in 1839 they began the erection of the temple at Nauvoo. Increasing opposition culminated in the assassination of Joseph and Hyrum Smith by a mob in 1844. Brigham Young then became the head of the church and in 1846 led the memorable westward exodus across the plains. The pioneers reached the valley of Great Salt Lake in 1847, and established what has now become a prosperous commonwealth. The practice of plural marriage, which led to much persecution, was never general and has been formally discontinued. The total membership now exceeds 300,000.

PRESBYTERIANS. A body of Christians governed by elders or presbyteries. Among the leading divisions of this body are: (1) the Established Church of Scotland, founded in 1560 by John Knox (1505-1572); (2) the Presbyterian Church in the United States, founded in 1705, split into the New School and the Old School on theology and antislavery (1838), reunited (1870); (3) the Presbyterian Church of the United States (Southern), which separated from the Old School in 1861 when the Confederacy was established; (4) the Free Church of Scotland, which, in 1843, went out from the Established Church of Scotland; in 1900 the major part of its members united with the United Presbyterian Church to form the United Free Church of Scotland. The Covenanters, in 1638 and 1643, bound themselves by a solemn covenant to resist the prelacy and papacy and to support the Presbyterian Church in doctrine and polity; the name was afterwards applied to the Cameronians or Reformed Presbyterians who followed Richard Cameron (died 1680) in the refusal to accept the indulgence granted to Presbyterians by Charles II.; in 1876 the greater number of them were merged in the Free Church.

REFORMED EPISCOPAL CHURCH. A body organized in 1873 by former clergy and members of the Protestant Episcopal Church. Episcopal government is retained as a matter of policy without belief in its divine imposition; the Book of Common Prayer in revised form is in use; the doctrines of regeneration by baptism, real presence, oblation, and apostolic succession are rejected.

SAINT VINCENT DE PAUL. The greatest Roman Catholic organization was founded in 1835, in Paris, France, where the head office is now located; it has branches in every part of the world. Its principal mission is the care of the poor in their homes, to keep the family life intact; it conducts many other charities, as boys' clubs, hospital and prison visiting committees, summer homes, and distributes books and papers.

SWEDENBORGIANS. Followers of the teachings and religious doctrines of Emanuel Swedenborg (1688-1772), founder of the New Church. The church was organized in London in 1778 under the name of the "Society of the New Church signified by the New Jerusalem." The doctrine of correspondencies between material things and spiritual principles of good and evil is the foundation of Swedenborg's system. He never contemplated the erection of a separate church, but hoped for the working of the dispensation, which he foresaw dating from 1757, a year of regeneration, regardless of creed.

UNITARIANS. A religious body which affirms the unipersonality of the Deity, and denies the doctrine of the Trinity. The movement in the United States developed in New England under the teaching of Dr. William Ellery Channing (1780-1842). The ranks were joined by many Congregationalist churches, and the American Unitarian Association was formed in 1825.

UNIVERSALISTS. A body of Christians who believe that all mankind will eventually be redeemed from sin and suffering and be united in holiness with God. Outside of this fundamental belief there is wide diversity of views among the members. John Murray (1741-1815), an American Universalist clergyman, is known as the "father of American Universalism"; and Hosea Ballou (1771-1852), pastor of the Second Universalist Society in Boston, Mass. (1817-1852), was one of the founders of American Universalism.

WOMEN'S CHRISTIAN TEMPERANCE UNION. A great national movement organized in Cleveland, Ohio, in 1874. There are 40 working departments in the United States, within which are 10,000 local unions having a total membership of half a million. The society has greatly influenced legislation, making for purity and temperance. The World's W. C. T. U., organized in 1883 by Frances E. Willard (1839-1898), has auxiliaries in 50 countries. The emblem of the society is a white ribbon.

YOUNG MEN'S CHRISTIAN ASSOCIATION. This religious organization originated in England, where a society was founded in 1844 by Sir George Williams (1821-1905). As originally planned, its object was the holding of religious services in business houses in London; since then great additions of a cultural and social value have been made. In America the first institutions were founded in 1851; the first international convention was held at Buffalo in 1854. Of the 8,472 associations in the world, 2,118 are in North America. The American membership is 536,037; buildings owned by the associations 712, valued at $55,583,150.

YOUNG WOMEN'S CHRISTIAN ASSOCIATION. A society for women planned similarly to the Y. M. C. A. Organized in London in 1855; in the United States in 1866; and in colleges in 1873. The World's Association was formed in 1894. The membership in the local associations subordinate to the American Committee (formed in 1886) is 228,590.

SCHOOLS OF PHILOSOPHY.

ORIENTAL SCHOOL.—The earliest recorded ventures in speculative thought are to be found in the Vedas, which set forth the Brahministic system of philosophy in the Hindu sacred literature (2000-1500 B. C.). When, in 1400 B. C., Vyasa founded the Vedanta or Uttaramimansa School of Hindu philosophy, the Mimansa School had long been established. The logical school, surprisingly similar to the later teachings of Aristotle, followed; the Kanade or Vaisheshika School dealt with the theory of atoms; the Kapila or Sankhya School was atheistic, and repudiated the idea that matter may proceed from or originate in spirit; and the Patanjali (about 140 B. C.) or Yoga system, founded on theism.

Other schools of philosophy formulated by orientals are Buddhism, Confucianism, and Zoroastrianism (which see).

EARLY GREEK SCHOOLS.—The germ of European philosophy is found in the teaching of **Thales**, born in Miletus in Asia Minor, about 640 B. C. With his followers he is classed in the Milesian school. He was philosopher, astronomer, and geometer; one of the seven wise men of Greece, and the earliest of the Ionian natural philosophers. He is reputed to have foretold an eclipse of the sun May 28, 585 B. C. Water was the principle of all things in his system.

The ELEATIC SCHOOL was founded by **Xenophanes** (570-480 B. C.). Born in Colophon, Asia Minor; settled at Elea in Greece (536 B. C.). He was the first Greek theologian and was more of a religious reformer than a philosopher, and was fanatically opposed to the polytheism of Greece.

Zeno of the Eleatics (fifth century B. C.) lived in Athens during the early days of Socrates; especially noted for his arguments setting forth the inconceivability of motion, the inventor of dialectics.

The PYTHAGOREAN SCHOOL was founded by **Pythagoras** (582-500 B. C.). Born in Samos, Greece; went to Crotona, in Magna Graecia, in 529, and there founded his philosophic school, which was a secret organization, into the mysteries of which candidates were formally initiated. Pythagoras traveled in Egypt and is credited with introducing the 47th problem of Euclid. He taught transmigration of souls, did not teach the existence of God, and based everything upon number.

Anaxagoras (500-428 B. C.). Born at Clazomenae in Ionia; taught at Athens and had as pupils, Pericles, Thucydides, and Euripides. He was the first of the philosophers to teach intelligence or reason as a metaphysical principle. Banished on a charge of impiety.

Heraclitus (535-475 B. C.). Born at Ephesus; was known as "the obscure" and as "the weeping philosopher." He taught that all knowledge is acquired through the senses, and foreshadowed the doctrine of predestination.

Democritus (460-357 B. C.). "The Abderite" and "the laughing philosopher," was born at Abdera. Traveled extensively; taught the atomic system, and that reflection makes complete knowledge. Said to have destroyed his sight that he might pursue his studies without distraction.

Empedocles (490-430 B. C.). Born at Agrigentum, Sicily; followed the teachings of Pythagoras and Parmenides. Said to have thrown himself into the crater of Etna in order to impress his followers with his divine nature. Earth, air, fire, and water were in his system the four elements.

The SOPHISTS attained great power in ancient Greece by their acceptable doctrines. Right was a matter of convention, and was that conduct which conferred the greatest good upon the greatest number; whatever society regarded as right was so. Conscience was a matter of education. Good conduct was duty and interest combined. In their day no clear distinction was made between logic and grammar on the one hand and skill in reasoning and in disputation on the other. They soon attached great importance to quibbles and their doctrines and methods were treated with contempt—hence our word sophistry. **Protagoras** of Abdera (481-411 B. C.) was the earliest of the Sophists.

The SOCRATIC SCHOOL was founded by **Socrates** (470-399 B. C.), the noblest exponent of the ethical life of the Greeks. His method of confounding the Sophists in argument is known as "the Socratic method." His teachings are set forth in the "Dialogues" of Plato and the "Memorabilia" of Xenophon. Plato, Xenophon, and Alcibiades were his most celebrated pupils. Accused of impiety and of corrupting the youth, he was condemned to suicide, and drank hemlock in prison in the presence of his disciples.

The ACADEMIC SCHOOL was founded by **Plato** (429 or 427-347 B. C.). He was a pupil of **Socrates** and the teacher of **Aristotle**. His philosophy is still the greatest exposition of idealism, and though based on the teachings of Socrates, goes far beyond them in speculation. He taught in the quiet of a grove or garden, "Akademia," near Athens, and Plato's school came to be called the Academic school and his followers Academicians.

The CYNICS was a Greek school founded by **Antisthenes** (444-371? B. C.), who taught in the Cynosarges, a gymnasium near Athens, hence the name Cynics. They taught virtue, self-control, and contempt of riches, art, science, and amusements. **Diogenes** of Sinope (412-323 B. C.) was the most famous of the Cynics, and noted for his eccentricities.

The CYRENAIC SCHOOL was founded by **Aristippus** (lived about 380 B. C.). Born in Cyrene, Africa. He was a pupil of Socrates, whose principles and methods were largely discarded by this founder of a hedonistic school.

The MEGARIC SCHOOL was founded by **Euclid** of Megara, not the Euclid of mathematical fame but a pupil of Socrates, born in the middle of the fifth century B. C.

The PERIPATETIC SCHOOL was founded by **Aristotle**, the Stagyrite, the most famous and influential of Greek philosophers (384-322 B. C.). He taught in the walks of the Lyceum at Athens, hence the name, Peripatetic. Greek philosophy culminated in Aristotle, and until the discovery of modern science and scientific methods his books were text-books in the colleges, and his opinions were authoritative on all matters philosophical.

The EPICUREAN SCHOOL was founded by **Epicurus** (342-270 B. C.). Born in Samos. His school was opened at Athens in 306. The germ of his system was that pleasure is the only end of rational action, and that freedom is the ultimate pleasure.

The STOICS were founded by **Zeno** (340-265 B. C.), who taught from the Painted Porch in the Agora at Athens. The sternness and severity of the doctrines, and the effects of them upon some of the noblest men of antiquity have become proverbial. Indifference to pain is the most marked of the effects of the system.

The SKEPTICS were founded by **Pyrrho** (360-170 B. C.). Born in Elis. While the founder professed to doubt everything, the name Skeptic means a looking through or into all things.

The ALEXANDRIAN SCHOOLS.—The decadence of philosophy at Athens after the brilliant period of Aristotle sent the philosophers elsewhere. Rome displayed slight appreciation for all systems except the Stoic, which appealed to them. In Alexandria, rapidly becoming a center of science and learning, a fertile soil was found, and there arose the strange mixture of philosophical teaching, part mystic, part skeptic, which is known as neo-Platonism. The earliest of the Alexandrian philosophers was Philo Judaeus or Philo the Jew (about 20 B. C.-40? A. D.), whose great object was to harmonize the philosophy of religion and whose work resulted in a sort of pantheism permeated with Oriental doctrines. Ammonius Saccas (170-243?) was the founder of the neo-Platonic school and the teacher of Plotinus, Longinus, and Origen. Plotinus (205-270) is regarded by many as the greatest of the neo-Platonists, though he is equally a neo-Aristotelian and a neo-philosopher, as he took into account the teachings of all of his great predecessors. Apollonius Tyanaeus (4? B. C.-97? A. D.) was a Pythagorean and a reputed worker of miracles. Porphyry (233-305) taught philosophy at Rome and wrote vigorously against the Christians. Hypatia (end of fourth and beginning of fifth centuries) was a neo-Platonic philosopher, famed for her beauty and for her tragic death described by Kingsley in his novel. She was the daughter of Theon, mathematician and astronomer, whose reputation she eclipsed. The Gnostics arose within the Christian Church in the first century, flourished in the second century, and disappeared towards the close of the sixth. They relied for salvation more upon knowledge than upon faith, did not interpret the Scriptures literally, and drew upon the older philosophies for their guidance.

ARABIAN PHILOSOPHY.—The Arabians excelled in science, but the repressing influence of the teachings of the Koran prevented an equal success in metaphysics. Averroes of Cordova (1126 or 1120-1198) was probably the most noted of the Arabians, famed as a philosopher, physician, and commentator of Aristotle. Many of his works were translated into Hebrew and Latin. In his doctrine three main elements meet: the philosophy of Aristotle, neo-Platonism, and the influences of the religion of Islam.

Al Gazel or Gazali (1058 or 1059-1111) the skeptic of the Arabians, taught at Bagdad as a professor of theology.

SCHOLASTICISM.—The Scholastics or Schoolmen were Christian Aristotelians who taught in the schools of Europe from the eleventh century until the Reformation. Their work was characterized by the authority of the Church, the influence of Aristotle, and the Arabian commentators, and by a stiff, formal, and pedantic mode of discussion. The greatest of the Schoolmen were Abelard (1079-1142), Aquinas (1225 or 1227-1274), Duns Scotus (1265?-1308?), the founder of Scotism, and his pupil William of Occam (1270-1347), the reviver of nominalism.

Giordano Bruno (about 1548-1600). An Italian philosopher; taught that there is an all-life (God) animating the whole universe, "which is thus one living being with life in all its members." This pantheistic doctrine led to a poetic personification of nature, and a humanistic view of the universe supplanting the factor of religious experience so prominent in medieval thought. Spinoza, Descartes, Schelling, and other later thinkers were influenced by Bruno.

BACONIAN PHILOSOPHY.—Inductive Philosophy was founded by Francis (Lord) Bacon, whose biography appears elsewhere. He was the first to formulate the method and to insist upon careful verification by observation and experiment of all facts that are employed in generalizations. It is as a methodologist who taught men of science the need and value of experiment that Bacon appears in the highest light.

MODERN PHILOSOPHERS.—Cartesian Philosophy is named after René Descartes (1596-1650), a French philosopher, who is famous for the oft-repeated formula, "*Cogito, ergo sum*" (I think, therefore I am). His method is based on mathematics, in which science Descartes was eminent. He describes four methods of procedure in philosophical investigation: (1) Do not accept anything until it is proved to be true. (2) All questions are to be subjected to the most careful analysis. (3) Proceed from simpler to more difficult matters. (4) See that no factors are overlooked or forgotten in the investigation in hand.

Thomas Hobbes (1588-1679), a celebrated English philosopher, who is regarded as the father of materialism. He was a pronounced nominalist, an antagonist of scholasticism, suggested the association of ideas, and was an advance worker in the field of modern rationalism. While thoroughly devout, he insisted upon the separation of religion or theology from philosophy.

John Locke (1632-1704), the founder of the modern English and French schools of "sensation" philosophy and psychology. His work was formulated in his *Essay on the Human Understanding*. He contributed greatly to the advance of philosophy by directing men's minds to the study of the knowable, and to giving up useless speculation on the unknowable.

Baruch or **Benedict Spinoza** (1632-1677), a Dutch philosopher of Jewish descent, the greatest expounder of the modern system of pantheism. The starting point of his philosophy is the Cartesian, of which he was a profound student. He saw God in all things, and conceived of no existence apart from God.

Gottfried Wilhelm von Leibnitz (1646-1716), a noted German philosopher and mathematician, was greatly influenced by the teachings of Descartes but differed from him in method and in some fundamental tenets. In his *Monadology* he presented a revision of Descartes's theory of substance,—teaching that the universe consists of a system of monads or units rising from the lowest to the highest grades of perfection in a "preëstablished harmony."

Christian von Wolff (1679-1754), a disciple of Leibnitz and father of the philosophy that prevailed in Germany before the time of Kant, the term Dogmatism being specifically applied to his system. He claimed for philosophy the entire field of knowledge, and emphasized method in philosophical speculation.

George Berkeley (1685-1753), an Irish prelate, famous for his theory of vision, which is the foundation of the psycho-physiological study of that subject. His idealism startled the philosophic minds of Europe. He started with Locke's system and developed it.

David Hume (1711-1776), the Scottish philosopher and historian, noted for his subtlety of metaphysical reasonings and for original work in political economy. His writings did away with the contemptuous criticism of the skeptic, who now demanded an answer instead of a laugh.

Etienne Bonnot de Condillac (1715-1780), a famous French philosopher, one of the foremost advocates of sensualism, or the founder of the French Sensational School. He took up Locke's system and carried it to the extent of saying that all knowledge is pure sensation.

Immanuel Kant (1724-1804), founder of the critical philosophy. The rock of the Kantian metaphysics is his *Criticism of the Pure Reason* or the *Critique of Pure Reason*, and its influence spread all over Europe. Kant has the reputation of being one of the deepest thinkers of any age.

Friedrich Heinrich Jacobi (1743-1819), a German philosopher, who was the chief exponent of "faith-philosophy" (Glaubensphilosophie). He opposed the witness of faith to the pantheistic view of the world advocated by Spinoza, and to the phenomenalistic view maintained by Kant.

Johann Gottlieb Fichte (1762-1814) was the greatest of Kant's pupils, though repudiated by the master. He has been called the soldier of philosophy. His system went far beyond that of Kant, and transformed all knowledge into pure idealism.

Friedrich Wilhelm Joseph Schelling (1775-1854), a noted German philosopher; was at first only an expounder of the philosophy of Fichte, but, later, framed his theory that the true sources of knowledge are not experience or reflection, but intellectual intuition. He was one of the most prolific of the metaphysical writers of Europe.

George Wilhelm Friedrich Hegel (1770-1831), the founder of Hegelianism, a system which, during the second quarter of the nineteenth century, was the leading system of metaphysical thought in Germany. He held that the source of all knowledge is the union of assertion and negation and the harmonizing of every proposition with its negation. Hegelianism is radically opposed to natural science and to the Newtonian philosophy. Its influence has produced the socialism of to-day.

Arthur Schopenhauer (1788-1860), a German philosopher; opposed the teachings of Fichte, Schelling, and Hegel, maintaining that the will, not thought or reason, is the absolute, and from this developed his theories of pessimism and voluntarism.

Ralph Waldo Emerson (1803-1882), an American philosopher who called himself a Transcendentalist. He left no system and developed no methods, but embodied his thoughts in disconnected essays. His reputation is probably greater abroad than at home. He was an optimist, and, above all, an individualist.

Isidore Auguste Marie Francois Xavier Comte (1798-1857), a celebrated French philosopher, the founder of positivism, which deals with the real, the known, the tangible or sensible in nature. He regarded all of the sciences as but branches of Positive Philosophy, and proposed to unite, coö dinate, and correlate them under that head. He arranges his sciences in this order: astronomy, physics, chemistry, organic chemistry, biology, and sociology, in the order of the clearness of possible predictions; and mathematics was regarded as the basis of all scientific work.

John Stuart Mill (1806-1873), an English economist and philosopher, and the most prominent of the English school of utilitarians,—which also included his father, James Mills (1773-1836), and Jeremy Bentham (1748-1832),—advocated the ethical theory called by him utilitarianism, which considers adaptation to an end the test of moral worth,—the end being interpreted as the general happiness.

Herbert Spencer (1820-1903), an English philosopher of great distinction. His early training developed a strong liking for mechanics, and in 1837 he became chief engineer of the London and Birmingham railway, continuing in this work for 10 years. From 1848 to 1852 he was sub-editor of *The Economist*, and wrote *Social Statics*. In the eight years following he published *Psychology*, which he expanded into *Synthetic Philosophy*. He conceived a system of philosophy to include the general principles of all existing knowledge, and completed it. It consists of "First Principles," "Principles of Biology," "Principles of Psychology," "Principles of Sociology," and "Principles of Ethics." In the system he applies the idea of evolution to the universe, but especially to organic life and its forms as well as to political and social institutions. He conceived evolution as the history of events rather than the history of the causes that make change, by which conception he has rendered inestimable service to human knowledge. His other writings include three volumes of *Essays, Scientific, Political, and Speculative*, his *Autobiography*, and *Education*, a book widely used in training schools for teachers.

Karl Robert Eduard von Hartmann (1842-1906) founded a new school of philosophy which professes to be a synthesis of that of Hegel and that of Schopenhauer, reconciling the results obtained from both the philosophic and the scientific methods. His fame rests upon his work entitled *The Philosophy of the Unconscious*, in which he defines the unconscious as the "absolute principle, active in all things, the force which is operative in the inorganic, the organic, and the mental alike, yet not revealed in consciousness."

UNIVERSITIES, COLLEGES, AND MOST TECHNICAL SCHOOLS IN THE UNITED STATES.

Junior colleges, now numbering nearly 300, normal schools of collegiate ranking, and a few minor colleges are not included. Colleges for women are marked by a star (*); for men by two stars (**); coeducational colleges are unmarked; a few men's universities and many men's colleges admit women as graduate students. All colleges not otherwise designated are non-denominational.

Negro Education.—The teaching of negroes in the South before the Civil War was forbidden by law whether the negroes were slaves or free, and serious penalties might be inflicted upon both teacher and pupil in cases of infraction. While no prohibitive laws were enforced in the North, there were no separate schools or special provision made for them, and when they were excluded from schools by public sentiment they enjoyed no educational advantages even there. The few negroes who were able to read and write had acquired their learning in the so-called clandestine schools or through the kindness of some member of their master's family. Yet it is hardly too broad a statement to make that before the Civil War in America the negroes were uneducated. Upon their emancipation social and economic considerations required that they should enjoy educational advantages. The first important steps in this direction were taken by the Freedman's Bureau which Congress established in 1865. The first commissioner of this Bureau, General O. O. Howard, began an educational work of great magnitude, and so successful were these efforts that at the end of the five years' life of the Bureau 4,239 schools for colored people in the South had been established and had an enrollment of 247,333 pupils.

Since the Civil War it is estimated that the South has expended upon negro education fully $200,000,000 and has conducted its work through separate schools. The teachers in most of these schools are colored, and provision has been made for the teachers' instruction in several normal schools, the best known of which is the Hampton Normal and Industrial Institute at Hampton, Va. Another, and an offspring from the Hampton Institute, is that at Tuskegee, Ala., which through its president, Booker T. Washington, has attained considerable fame. It opened in 1881 with one teacher and 30 students. At the present time its faculty of 185 colored instructors and student enrollment of 1,700 testify to a most remarkable educational advance. It is said in this connection that Booker T. Washington has done more for negro education than has any other man of his race. Higher education is supplied to the negro race by a very great number of colleges and universities distributed throughout the South. It is not unusual to find colored students in the best universities of the South taking equal rank with white students in the several courses. Harvard, Yale, Cornell, Columbia, Pennsylvania, and other institutions of rank in the North and East have all graduated colored students with honors, and some of these have been elected to Phi Betta Kappa.

RELIGIOUS AND PHILOSOPHICAL TERMS.

ANABAPTISTS. The most extreme sect of the period of the Reformation. The sacrament of infant baptism was rejected by them on the ground that personal profession sealed by baptism alone suffices for salvation. Their development tended to overthrow the existing social order and to introduce a Christian theocracy of a socialistic nature. The most influential names in the development were Thomas Münzer (1521); Nikolaus Storch, the prophet of Wittenberg; John of Leyden or Johann Bockhold, put to death in 1536. The followers were active in the "Peasants' War" in Thuringia in 1525. Menno Simmons continued some of the teachings of the sect and founded the order of Mennonites.

ANNUNCIATION. The announcement to the Virgin Mary by the angel Gabriel of the beginning of the incarnation. The feast day is now observed on March 25, though the Council of Toledo (656) set it at December 18, and the Milan Church at the fourth Sunday in Advent. The present date was set by Sixtus IV. in 1480.

ANTINOMIANISM. The forcible separation of the "gospel" and the "law," or of faith and works. The controversy began with Paul and continues to the present day. During the Reformation the struggle was most acute and the most extreme partisan was Arnsdorf.

APOCALYPSE. The name given to the last book of the New Testament, usually called The Revelation of St. John. It was written about the year 96, while John was on the isle of Patmos, whither he had been banished by the emperor Domitian.

APOCHRYPHA means hidden, secret, and is applied to a collection of 14 books claiming to be sacred, sometimes appended to the Old Testament, but not admitted into the Biblical Canon. They form no part of the Hebrew Bible. In the Anglican Church they may be read "for example of life and instruction of manners," but not to establish any doctrine. Some of them exist only in Greek.

APOSTLE. "One sent"; a specially chosen messenger or delegate sent out on some important mission; specifically applied to the twelve disciples sent forth by Jesus to preach his gospel and heal the sick. The name is also applied to others in the New Testament, e. g., Paul, "the apostle to the Gentiles." He "had seen the Lord," and that was an important qualification. In more modern times the name is sometimes applied to those who have been sent on important missions, and have become most intimately connected with them; for example, John Eliot, "the apostle to the Indians." In the Mormon Church there is an official (one of 12) named an apostle, whose duty is to be a special witness of the name of Jesus. In the modern Greek Church service the lesson from the epistle is called "the apostle."

ARIANISM. Founded on the apparently contradictory statements of such Alexandrian theologians as Origen upon the relations between the Father and the Son. The conflict is perceived between the theory of the eternity of Christ and of his "essence," which conveys the idea of his inferiority to the Father. Arius (256-336) accepted the latter idea. The Nicene Creed expresses the idea of the coequality of Father and Son. The controversy waged between the years 318 and 381. It was renewed in England by Samuel Clarke in 1720 and in New England by Jonathan Mayhew in 1747.

ARIANS. The followers of the special doctrines of Arius, a deacon of Alexandria, in the fourth century. He held that Jesus, the son, having been begotten of the Father, could not be co-eternal with him, and that his nature could not be identical with that of the Father, but only similar to it. His doctrines were condemned by the Council of Nice, 325, which declared that "Christ is God of God; begotten, not made; of one substance with God." No Arians now exist.

ARMINIANISM. The reaction against the extreme interpretation of the Calvinistic dogma of predestination. Jacobus Arminius of Leyden (1560-1609) originated the movement. The Arminian view is held to-day by the Wesleyan or Methodist Episcopal Church.

ARTICLES, THE THIRTY-NINE. The body of Articles of the faith and discipline of the Church of England, based on an earlier group of 42, prepared by Archbishop Cranmer and Bishop Ridley; submitted to Parliament and Convocation in 1562, and adopted as the criterion of the faith of its members on the subjects to which they relate.

ASSUMPTION. Direct reception into heaven, and regarded as one of the "privileges of the Virgin." The feast of the Assumption is celebrated on August 15.

ATHANASIAN CREED. Supposed to date from the fifth century. It is remarkable for the damnatory clauses which it contains; and arose from the controversy which raged during the time of Arius. This creed is rejected by the Eastern or Greek Church, by the American Episcopal Church, and has been questioned by the Church of England. It was not written by Athanasius (296-373).

AUGSBURG CONFESSION. The most authoritative of the Lutheran creeds. Prepared by Melanchthon in 1530 with the approval of Luther and at the request of Emperor Charles V.

AVATAR. The name which signifies in Hindu mythology each of the ten incarnations of Vishnu.

BACONIAN METHOD. Investigation advocated by Francis Bacon (1561-1629) requires (1) a collection of particular instances as exhaustive as possible; (2) from these collected instances are excluded by comparison all elements which do not accompany the phenomenon investigated; (3) by this exclusion and comparison a result is arrived at which proves the general proposition. The method is known as the Inductive Method, whereby from a number of particular cases a general result is reached.

BELGIC CONFESSION. The doctrinal standard of the Dutch and Belgian Reformed Churches and of the Dutch Reformed Church in America. It was drawn up by Guido de Brès and others in 1561; adopted by several synods between 1566 and 1581; and modified by the Synod of Dort in 1619.

CANONIZATION. The ceremony by which eminent deceased believers in the Roman Catholic Church are raised to the rank of saints. The honor of public veneration is conferred upon the person. No one can be canonized until a generation after death.

CARDINAL is derived from Latin *cardo*, a hinge, and was first applied to the priests and deacons permanently attached to a church, thus forming a hinge round which the work of the church turned. It now designates a member of the Sacred College at Rome, who is a counselor of the pope, is nominated by him, and is next in rank to him. Three classes were established in the fifteenth century by Paul II.: cardinal bishops (6), cardinal priests (50), and cardinal deacons (14). In 1570 the number was fixed at 70, after the 70 elders of Moses. The official dress includes a red cassock, a short, purple mantle, and a low-crowned, broad-brimmed, red hat with a hanging cord (with 15 tassels) at each side.

CARDINAL VIRTUES. These are prudence, temperance, fortitude, and justice.

CARMELITES. A monastic order founded by Berthold on Mount Carmel in the twelfth century. It was formally recognized by the church in 1224. It is credited with the invention of the scapulary. A dispute with the Jesuits brought its power to a close in 1698.

CELIBACY. The state of unmarried persons; especially the voluntary abstention from marriage as among the clergy of the Roman Catholic Church, and one of the vows of the "orders" of that and similar churches. Celibacy was demanded by Buddha of his monkish order, the Sangha. This has been relaxed among some of the Buddhist sects of Japan; for example, the Jodo sect.

CHALDEANS, THE, or **AKKADIANS,** are a non-Semitic race, who came originally from the mountain country of Elam, and were formerly the dominant people of Babylonia. One of the four great cities of Shinar was Accad. The Babylonians were indebted to the Sumero-Akkadians for their cuneiform writing, religion, and mythology.

CISTERCIAN. A monastic order founded by St. Bernard at Citeaux, in Burgundy, in 1113. It is important in the records of Scholasticism and Mysticism, and with the founding of Port Royal.

COLLECTIVISM. Public ownership of land and capital and the public control of industries. Often used synonymously with Socialism, Communism, and Social Democracy.

COMMUNISM. Extreme Socialism which advocates village communities under the principles advocated by

Marx and Engels. The Communistic Manifesto was promulgated in 1847 and was an important factor in the Revolution of 1848.

CREED. An orderly statement or declaration of one's beliefs, especially in regard to Christian doctrine; but one may have a "political" or other "creed." The Christian creeds are numerous. The "Apostles' Creed," and the "Nicene Creed," both of the fourth century, are the creeds of the Protestant churches. To this the Church of England adds the "Athanasian Creed" (which see).

DEISM. The form of religion which separates God from the world so far as denying that the idea of God includes either in whole or in part the idea of the world.

DEUS EX MACHINA. Divine power or agency regarded as separate from nature and changing or interfering with it at times. A tenet of Deism.

DING AN SICH. A phrase invented by Kant to indicate "a thing in itself" considered apart from the phenomenon by which it is attended or manifested.

DOMINICANS. The order of the brethren of St. Dominic, founded in 1216. The members took vows of mendicancy, chastity, poverty, and obedience. Albertus Magnus and Thomas Aquinas were among its members. Tauler, Suso, Eckhart, and Savonarola were members at a later period.

DONATISTS. A sect of the Christian Church in Roman Africa in the fourth century. It was submerged by the Saracenic invasion in the seventh century.

DRUSES. Agnostic theists of Syria.

ECLECTICISM. A philosophic system which endeavors to incorporate the best of all systems. The Alexandrian Neo-Platonic School is known as the Eclectic School.

EDWARDEANS. American theologians who followed the teachings of Jonathan Edwards regarding Calvinism. It is also known as New England Theology and Berkshire Divinity.

EMPIRICISM. The doctrine that truth is to be sought in experience as derived from immediate sense impressions. Opposed to Rationalism.

EPICUREANISM. The ethical doctrine of Epicurus that pleasure is the only thing worth having on its own account and that each man's pleasure is his own chief good. The teachings of Epicurus form more a code of laws for the conduct of life than a system of philosophy.

EPIPHANY. The festival of the manifestation of God to mankind through Christ. In the Christian Church the festival is celebrated on January 6. The Western Church regards the event as dating from the manifestation of Christ to the Wise Men of the East.

ESCHATOLOGY. That part of systematic theological teaching which deals with the "last" things—death, the end of the world, and the future life.

EUCHARIST. The sacrament of the Lord's Supper. The views held concerning the sacrament are very divergent and include (1) the doctrine of the Real Presence, which holds that the whole substance of the bread is changed into the body and the whole substance of the wine is changed into the blood of Christ; (2) the doctrine of the Virtual Presence, which holds that the Eucharist is the only means by which the benefits of his atonement are conferred; and (3) the doctrine of the Figurative Presence, which regards the elements and the rite as only memorials of Christ's death.

EXEGESIS. That branch of dogmatic theology which deals with the interpretation of authoritative sacred books. It comprises rabbinical, patristic, mediæval, and modern exegesis.

FALK LAWS, THE (1873), were so called from Dr. Falk, who insisted on the compulsory education of the clergy of Prussia. The laws are four in number: (1) The first was directed against the abuse of ecclesiastical discipline for political purposes, such as "boycotting," excommunication, and anathemas; (2) the next regulated the effect of secession from the church on the obligation to meet certain taxes; (3) the third law was directed at the evasions by Roman Catholics of state education incumbent on all Germans; and (4) abolished the legality of papal tribunals, recognizing the judgments of the German ecclesiastical courts as the only authority on church matters. In 1874 these four laws were supplemented by others, to insure more perfect obedience. Dr. Adalbert Falk was appointed by Prince Bismarck "Minister of Public Worship," January 22, 1872. In 1872 Prince Bismarck carried through the Prussian Houses a bill to transfer the control of primary education from the church to the state authorities.

FRANCISCANS. The brethren of the Order of St. Francis, founded 1210-1223. After the growth of the first century its adherents numbered over 200,000. Among its prominent members were Bonaventura, Alexander of Hales, William of Occam, and Roger Bacon.

HAGIOGRAPHA. The Canon of the Old Testament is divided into: the Law, the Prophets, and the Hagiographa or sacred writings. This last includes the Psalms, Proverbs, Job, Song of Songs, Ruth, Lamentations, Ecclesiastes, Esther, Daniel, Ezra, Nehemiah, and Chronicles.

HAGIOLOGY. That part of ecclesiastical history which deals with the lives, deeds, and the canonization of saints.

HALACHA AND HAGGADA. The divisions of the Midrash or the exegesis, exposition, and commentaries of the law of Moses. Halacha deals with the interpretation of the sense of the Hebrew scriptures; Haggada comprises the stories, legends, and parables which explain the Law.

HERESY. Opposition to the fundamental dogmas of the church when the opponents are of the members of the church. Heterodoxy is a lesser degree of opposition or of dissent.

HERMENEUTICS. That part of theological exegesis which deals with the science or theory of interpretation.

HUGUENOTS. Protestants, first called so in France, from a German word signifying "allied by oath" (1560); massacre of them at Paris (August 24, 1572).

IDEALISM. A theory in metaphysics which holds that the universe is the work or the embodiment of reason or of mind.

IMMACULATE CONCEPTION. The dogma which holds that the Virgin Mary became by the grace of God the subject of a peculiar reception of the merits of Christ by which she escaped all influence of original sin. This dogma was promulgated by Pope Pius IX. in 1854.

INCARNATION. -The assumption by Deity of mortal, generally human, form. The Christian conception of the incarnation teaches the union of the divine and the human nature in the person of Christ.

INFALLIBILITY. When applied to the church, the doctrine teaches that the church as a whole, by the influence of the Divine Spirit, cannot err in matters of faith and morals. When applied to the pope, the teaching is that the pope, by the assistance of St. Peter, cannot err when speaking *ex cathedrâ* on matters of faith and morals. That latter doctrine was authoritatively enunciated by the Vatican Council in 1870.

INTELLECTUALISM. In psychology, the theory which holds that the intellect is more fundamental than are the affections. In philosophy, it is held that the ultimate principle of the universe is some form of thought or reason, or is capable of explanation in terms of the intellect.

INTERCESSION. The doctrine that Christ on his ascension to heaven took upon himself the office of perpetual mediation with the Father on behalf of mankind, whom he had redeemed by his crucifixion and death.

INTERMEDIATE STATE. The condition of human souls in the interval between the death of the body and the last judgment.

KNIGHTS TEMPLARS. A religious order instituted 1119; flourished in England during the reign of Henry II.; all of them in France arrested in one day. They were charged with great crime and great riches. Fifty-nine of them were burned alive at Paris (1307); their order destroyed by Pope Clement V. in 1312.

LATITUDINARIANISM. Holding a breadth of view and of tolerance almost approaching indifference. In the seventeenth century the term was applied to the views of those churchmen who sought to effect a union between the Dissenters and the members of the Church of England by emphasizing only common grounds of belief.

LIBERALISM. The disposition on the part of an individual to free and untrammeled thought and action. It is opposed to conservatism. When urged to extremes liberalism becomes radicalism.

LOGOS. The Son of God in whom God's wisdom and power are made manifest and who was incarnate in the person of Jesus Christ.

MACROCOSM AND MICROCOSM. Macrocosm is the great world or universe in contrast to man, the microcosm or small world

MANICHAEISM. The two principles of good and evil, light and darkness, are in eternal conflict in the world and in man's nature, where the struggle is between the flesh and the spirit. Evil influence is to be overcome only by vigorous discipline. For a time St. Augustine was influenced by this teaching.

MATERIALISM. The view that all of the facts of the universe are capable of explanation upon the basis of body or matter indefinitely extended. The ultimate fact of the universe is matter in motion. The greatest modern development of materialism was effected by the Encyclopaedists in the eighteenth century.

MELIORISM. A term invented by George Eliot to express a view midway between optimism and pessimism. It is a belief that it is possible to improve the world by human effort and that such improvement is an inevitable result of evolution.

METEMPSYCHOSIS. The transmigration of souls from one form to another, either human or animal. It is a tenet of Orphic, Pythagorean, Egyptian, Indian, Jewish, and Swedenborgian philosophy.

MONKERY began in Egypt and Persia; tolerably well established about 330. In Egypt alone there were 96,000 monks. St. Anthony, the first example of a monastic life (305), established the first monastery on Mt. Colzim, near the Red Sea. Athanasius introduced monastic life into Rome in 341.

MYSTICISM. Forms of religious and speculative thought which claim to hold direct communication with, or obtain immediate knowledge of, the divine essence.

NATIVITY. The birth of Christ. This occurred probably four years before the date fixed by current chronology.

PAGANISM, finally overthrown in the Roman Empire in the reign of Theodosius between 388 and 395.

PERSECUTION, by the Jews, the first in 33; first general of the Christians under Nero (64); second under Domitian (93); third under Trajan (107); fourth under Marcus-Aurelius (166-177); fifth under Severus (202); sixth under Maximinus (235); seventh under Decius (250); eighth under Valerian (257); ninth under Aurelian (275); tenth under Diocletian (302); by the Arians under Constantius (337); under Julian the Apostate (361); Luther's followers persecuted in Franconia (1525); the Protestants persecuted in England (1556); in France (1723).

POPE, Title of, formerly given to all ecclesiastics; then it became a special title of bishops, and still later was confined to the supreme pontiff; but Boniface III. (606) influenced the emperor Phocas to confine it to the bishops of Rome. Hygenus was the first bishop of Rome that took the title. Supremacy of pope over the Christian Church first enforced by Boniface III. (607); John XIX., a layman, made pope (1024). The first pope that kept an army was Leo IX. (1048). Pope Gregory obliged Henry IV., Emperor of Germany, to stand three days, in the depth of winter, barefooted, at his castle gate, to implore his pardon (1077); the pope's authority first introduced into England (1079); abrogated by Parliament (1534); the word pope struck out of all English books (1541).

PROTESTANTS, NAME OF, began from the Diet of Spires, when several of the German states protested against a decree of the Diet to support the doctrine of the Church of Rome (1529).

SAINTS, TUTELAR, St. George of England, St. Andrew of Scotland, St. Patrick of Ireland, St. David of Wales, St. Denis of France, St. James of Spain.

FRATERNAL ORGANIZATIONS.

These are societies formed for the mutual advantage of the members, socially and beneficially. The highest moral precepts are taught, and their ethical value cannot be overestimated. Secrecy as to the symbols and ceremonials is required. The membership is estimated at more than 12 millions. The following are among the largest:—

Columbus, Knights of.—This is a fraternal organization with insured and associate or non-insured members also, incorporated in 1882. No person who is engaged in the manufacture or sale of intoxicating liquors as a beverage is eligible.

Elks, Benevolent and Protective Order of.—An order whose purposes are chiefly social and philanthropic, including insurance; organized in New York City in 1868. Its membership is restricted to white male citizens 21 years of age.

Foresters, Ancient Order of.—One of the largest beneficiary societies in existence, established in Yorkshire, Eng., in 1745, and in America in 1832; it has courts in 36 countries. The ladies' auxiliary society is called a court. The **Independent Order of Foresters** was founded at Newark, N. J., in 1874; it is general in the United States and Canada. **The Foresters of America** were a part of the Ancient Order till 1889; in 1895 they assumed the new name.

Hibernians, Ancient Order of.—An Irish Catholic organization whose main object is "the advancement of the principles of Irish nationality"; the year 1642 and 1651 are both given as the date of institution; Rory Og O'More was the founder; at first called "The Defenders," they reorganized under the present name as a benefit order in the United States in 1836. The **Ladies' Auxiliary** is an important division.

Maccabees, Knights of the.—A beneficial order organized September 1, 1883, embracing life, accident, sick, and disability benefits. The Supreme Tent, or chief office of the order, is at Port Huron, Mich. The **Ladies of Maccabees,** also a beneficiary society, and its governing body, the Great Hive, were established in 1886.

Malta, Knights of.—A fraternal, military, religious, and beneficial order, the oldest knightly organization in the world, founded in Jerusalem in 1048. The Supreme Grand Commandery of America was chartered in 1889 by the Scottish branch of which it is a part and to which it pays an annual tax. The twelve degrees of the order are founded upon the Holy Bible.

Masons, Free.—According to legend, the beginnings of masonry can be traced back to the date of the building of the Temple of Jerusalem, with King Solomon as the first grand master. Its definite history is known to have begun in the sixteenth century, when it became the successor of the guilds of masons and architects, who were bound together by the secret signs and passwords of their trade. In 1717, a grand lodge was established in England, and a branch of this was founded in America in 1730. After the Revolution the American lodges separated from the English and organized grand lodges in each state. There are now ten Masonic rites in use, but the York or English rite of thirteen and the Scottish of thirty-three degrees are universal. The chapter of **Royal Arch Masons** and the commandery of **Knights Templars** belong to the former. **The Order of the Eastern Star** is the only society allied to masonry that receives women into membership.

Odd Fellows, Independent Order of.—A benevolent order founded in England in 1813, evolved from workingmen's beneficial societies. It was introduced into the United States in 1819, separated from the English order in 1843, and in 1879 instituted the Sovereign Grand Lodge, which controls the order throughout the world.

The Encampment, the Patriarchs Militant, and Rebekahs, the last a branch for women members, are important departments.

Patrons of Husbandry.—An organization originally instituted for those persons "directly interested in the cultivation of the soil." It is to-day a social, educational, and elevating influence for all classes of people, especially for those n the rural districts. It is non-partisan and nonsectarian. Its constitution provides for local, district, state, and national granges, in which seven degrees are conferred; women are admitted equally with men and are eligible to all offices. It was originated by Oliver H. Kelley in 1867.

Pythias, Knights of.—A fraternal organization which has insurance and endowment benefits, founded in 1864 at Washington. It has a supreme lodge which has full control; three degrees are conferred, page, esquire, and knight.

Red Men, Improved Order of.—A beneficial society, claiming unbroken succession from the Sons of Liberty and other Revolutionary societies, reorganized in 1835. Its government is modeled after that of the United States; the Great Council of the United States is the supreme governing body. Its three degrees are adoption, warrior, and chief; its officers are prophet, sachem, senior sagamore, junior sagamore, chief of records, and keeper of wampum. The **Degree of Pocahontas** is for the benefit of the female relatives of the Red Men.

Royal Arcanum, The.—A beneficial society originated by Dr. Darius Wilson and John A. Cummings at Boston in 1877; nine members form the Supreme Council, the governing body. There is a benefit certificate of one, two, and three thousand dollars, payable at deaths of members.

United Workmen, Ancient Order of.—A benevolent society organized at Meadville, Pa., in 1868. The constitution provided that when the first 1,000 were enrolled, an insurance feature should be added, guaranteeing $500 on the death of the insured member; this was later increased to $2,000.

BENEFICIAL ORGANIZATIONS.

There are many other societies, religious, patriotic, and social, all with a purpose for the betterment of mankind.

Salvation Army, The.—A religious and philanthropic organization which developed from a mission in East London conducted by William Booth, in 1865; in 1878 it assumed the present title; its object was to influence the masses of people outside the churches, thus open air meetings and services in prisons and saloons were held. Military titles for the officers were adopted, uniforms assumed, and barracks built. Total abstinence is the condition of membership. It was introduced into America in 1880. In 1896, Commander Ballington Booth with several other officers withdrew from the Army and organized the **Volunteers of America**, whose work is of the same kind.

Grand Army of the Republic, The—A patriotic society organized in Decatur, Ill., April 6, 1866. Its purpose is to foster the fraternal feeling among those who participated in the Rebellion, to perpetuate the memory of their dead, and to aid the members and their families. Any United States soldier, sailor, or marine who served from April 12, 1861, to April 9, 1865, is eligible, if honorably discharged. It is made up of departments representing the states and territories and local societies. In 1879, the **Sons of Veterans**, consisting of male descendants of Grand Army members, and in 1883, the **Women's Relief Corps** were organized.

Spanish War Veterans.—This society, incorporated in 1899, admits to membership any soldier or sailor of the regular or volunteer army and navy and marine corps of the United States who served honorably during the Spanish or Philippine wars; its auxiliary is composed of women who rendered special service

Red Cross, The.—An international society whose original purpose was to mitigate the horrors of war by alleviating suffering on the battlefield. In 1859, M. Henri Dunant, a Swiss philanthropist, witnessed the dreadful condition of the wounded soldiers at Magenta and Solferino. He wrote a book in which he proposed that societies be formed in every country to train nurses and collect supplies in times of peace; through his efforts an international conference was held at Geneva in 1863, at which fourteen European nations were represented; no delegates were present from any Asiatic, African, or American nation. The United States Sanitary Commission was doing this sort of work at the time. The universal insignia of a white flag and armband bearing a red cross was adopted. In 1881, the **American Association of the Red Cross** was incorporated in Washington, D. C., and Clara Barton was its first president. In 1905, by Act of Congress, this organization was dissolved and a new national incorporation of the **American National Red Cross** formed. In addition to the original work planned, it is engaged in the relief of sufferers during great calamities, as fires, famines, earthquakes, floods, and pestilences. At the Hague Peace Conference in 1899, relief was extended to naval warfare.

Boy Scouts of America, The.—In 1900, Ernest Thompson Seton formed a brotherhood among some boys called the "Woodcraft Indians"; in 1904, he went to England and secured the coöperation of General R. S. S. Baden-Powell, the chief advocate of scouting in the British army, in making the movement popular; in 1908, the Boy Scout movement was organized. The organization consists of the Chief Scout, Scout Councils, Local Committees, Troops, Patrols, and Scouts; the latter are of three kinds, first class, second class and tenderfeet. The object is to direct the boys' enthusiasm into proper channels. The boys are taught to appreciate the things about them, and trained in endurance, self-reliance, self-control, and helpfulness.

CIVIC ORGANIZATIONS.

During the last two decades many groups of business men have banded together to promote the best interests of their home communities. Several organizations have reached international proportions and are constantly adding new chapters in cities and large towns. Among these that are well known are Rotary, Kiwanis, and the Lions International clubs.

The oldest of these, the Rotary, was established in Chicago in mid-winter of 1905. Several business men, led by Paul P. Harris, had

been meeting at various places; and from the fact of rotation of gatherings the name Rotary was suggested as a permanent mark of distinction. Three years later a second club was organized in San Francisco. The organization became international with the founding of the group in Winnipeg, Canada, in 1910, since which time the principles of the Rotarians have been carried into forty countries of four continents. During the first twenty years the membership increased to the hundred thousand mark, and the number is still consistently growing, with almost two thousand different local clubs stretching from Illinois to India and Australia.

From the start Rotary has emphasized a high stand of business ethics, realizing that service is the basis of all good business. "He profits most who serves best" has become a characteristic motto. In choosing members only the highest community standards are considered. For membership a man must belong to a firm recognized for importance; he must be of known integrity and recognized force in business, and must be socially acceptable in his town or city. Only a single representative is elected from each business or occupation or profession. Each member may propose a man from his own business who becomes an associate member but without voting powers.

Prominent among the eleven rules of ethics of Rotary is a belief in the dignity of one's business or occupation; efficiency; honesty; fairness in all business dealings; interest in building up one's community; the making of friends; and the universality of the Golden Rule.

Kiwanis, established in 1915, during the first ten years spread to nearly eighteen thousand centers on the North American continent. From each of the professions and lines of business ordinarily two members are chosen for a local club. Like the Rotarians a hundred thousand men gather weekly for lunch and the discussion of business and community relations. The main objectives of Kiwanis are summed up in the official creed, which emphasizes the spiritual rather than the material in life; counsels the adoption of higher standards in business and private affairs; encourages worthy civic movements everywhere; and hopes to increase friendliness among all men.

To carry out this code of ethics, certain definite activities are fostered from time to time. Kiwanis has given valuable aid to the endeavor for Americanization, to the securing of a fairer chance for the under-privileged child, to promoting a more friendly attitude between those of the farm and of the town, and to the establishment of various civic movements in local communities.

The International Association of Lions Clubs, between 1917 and 1925 increased from a few members in one unit to more than forty thousand members in nine hundred units. Various small, independent clubs fused into this one larger organization, the ultimate aim of which now is to establish a club in every sizable town and city of the United States and Canada. Lionism has Loyalty, Integrity, Oneness, Nobleness, Initiative, Service and Merit as the main corner stones.

The slogan is "Liberty, Intelligence, Our Nation's Safety." Full and effective cooperation is pledged to all similar organizations, chambers of commerce, business and religious groups that foster the good of town and country. Its special aim is the elimination of class distinctions, political and sectarian differences, such as keep men from uniting in the highest spirit of brotherhood. The Lions have also specially aided in movements for the physical betterment of towns and cities.
